ARE
"ALWAYS
THE BEST"

"There is no doing anything well without application and industry."—Lord Chesterfield.

INTRODUCTION

IN the year 1863 this business began its career in Sydney, thus for **70 years** it has devoted its energies and thought to provide only such goods as would make a name of "repute" in its particular sphere of action. It is not necessary to say that hard work has always accompanied its progress, because it must be apparent to all that "success" cannot be achieved without energy. We are still hard at work and will continue to maintain our position along the Broad Highway of Life.

This catalogue contains full lists of Seeds, Plants, Fruit Trees, Ornamental Trees, Shrubs and Flowering Plants, Horticultural Sundries, including Garden Tools.

We also publish special lists of Carnations, Chrysanthemums, Dahlias, Sweet Peas, Flowering Bulbs, Seed Potatoes, Farm Seeds during the year, which we will send free on application as published.

We would particularly call our customers' attention to the necessity of addressing their correspondence correctly. This ensures prompt delivery and obviates the chance of it going into any other channel. Address all communications to **ANDERSON & CO. LTD., Box 1608 BB, G.P.O., SYDNEY.**

When visiting Sydney we cordially invite our customers to come and meet us. Our Retail Shop is situated at **399-401 George Street**, opposite Dymock's; our General Offices and Wholesale Department is at **188-190 Kent Street.**

SEEDSMEN AND PLANT MERCHANTS,
399-401 GEORGE STREET, SYDNEY.

Anderson & Co Limited

CORRESPONDENCE :

Correspondence is welcomed upon any subject appertaining to Agricultural and Horticultural matters, and the firm will be pleased to give their advice and experience at all times. Letters to be addressed to **Box 1608 BB, G.P.O., Sydney.**

ADDRESS :

It is important that the full name and address of the sender be given with all orders, together with instructions as to the route goods are to be dispatched. By so doing mistakes are minimised and considerable help rendered toward the prompt dispatch of goods.

REMITTANCES :

These can be made by Crossed Cheques, Bank Drafts, Money Orders or Postal Notes. **Exchange must be added to all Country and Interstate Cheques.** For small amounts, Postage Stamps may be sent.

DISCOUNT FOR CASH :

A liberal discount is given off Retail Orders when cash is sent with order for Vegetable Seeds, Flower Seeds, Bulbs and Plants; or extra Seeds, Bulbs or Plants to an equivalent value, except on Collections and Farm Seeds, which are priced net.

NEW ACCOUNTS :

New Accounts are welcomed, and a reference should be furnished with the opening order. All orders for Seed Grain, Seed Potatoes and fertilizers are considered "**Cash Goods**," and are payable when accounts are furnished.

POSTAGE AND CARRIAGE :

Postage or Carriage is paid on all Retail Orders for Vegetable Seeds (except Peas and Beans), Flower Seeds and Bulbs; also on all Vegetable Seeds quoted by the pound on page 11 of this Catalogue. Carriage on Agricultural Seeds, Seed Grain, Seed Potatoes, Fruit Trees and Plants, Garden Tools, Sundries, Manures and Implements, Peas and Beans quoted in bulk, is an extra charge unless otherwise quoted. For Parcels Post and Railway Rates, see inside Back Cover.

LIABILITY :

All goods sent out by Anderson and Company are packed by experts and handed over in good condition to Railway, Steamer or other Public Carriers and a receipt taken. After this the Company's liability ceases. Should the goods be lost, damaged or delayed, redress must be obtained from the carriers. Customers are advised of the dispatch of goods sent by rail or steamer.

SUBSTITUTING :

It is unavoidable that some lines may be sold out during the season. Customers should give permission to substitute the nearest possible to the Seeds or Plants required, or advise "**No Substitutes.**"

A SERVICE :

Recipients of this Catalogue doubtless have many friends who are interested in gardening pursuits. A copy will be willingly posted if their name and address is sent to **Anderson and Co. Ltd., Box 1608 BB., G.P.O., Sydney, N.S.W.**

Conditions of Sale

WE believe that all Seeds, Bulbs and Roots sold by us are of the description and kind specified by us at the time of sale, but owing to the practical impossibility in many cases of being certain of this, we give no undertaking that such Seeds, Bulbs, or Roots will correspond with the description under which they are sold, and we make all sales subject to this condition. We further give no warranty, expressed or implied, as to their growth, description, quality or productiveness, and will not be in any way responsible for the crop. If the purchaser does not accept the goods sold to him on these terms, they are at once to be returned to us.

Novelty Roses for 1933

Plants not available until May, 1933. Postage Extra—N.S.W., 1/9 to 2/3 dozen. Interstate, South and West Australia, and Northern Territory, 4/3 dozen. Victoria, Queensland and Tasmania, 3/6 dozen.

MISS AUSTRALIA—The Rose of 1933.

AUREATE (H.T.). Bud and young flower, bright orange cadmium, heavily shaded rosy-scarlet, developing to unfading sunflower yellow, washed orange scarlet; vigorous, strong grower, sweetly scented; free flowering. 4/- each.

CAYETANA STUART (Pernt.). Bud very large, long pointed; flower large, double cupped, lasting, moderately fragrant, yellow, borne single on long stems; foliage, dark green, glossy, disease-resistant; growth vigorous, bushy. 4/- each.

COMTESSE VANDAL (H.T.). A seedling of Ophelia and Mrs. Aaron Ward crossed with Souv. de Claudius Pernet, producing a unique blending of these three varieties. Robust and healthy growth. Colour of bud is reddish copper with reddish golden bronze, which lightens as the bud develops. The inner side of petals is salmon, graduating to gold at the base, the reverse side of petals is deep coral, producing a unique contrast in rose colouring. 4/- each.

CLB. DAME EDITH HELEN (Clb. H.T.). Vigorous climbing sport of the well-known dwarf variety; unsuited to moist tropical climates. 4/- each.

CLB. ETOILE DE HOLLANDE (Clb. H.T.). Vigorous climbing sport of Etoile de Hollande. This should be a great acquisition to the dark red climbing roses. 4/- each.

CLB. LORD CHARLEMONT (Clb. H.T.). A strong climbing sport of the well-known bush variety. Clear crimson, flowers produced very freely. One of the best climbing crimson roses yet introduced. 4/- each.

CLB. MRS. C. J. BELL (Clb. H.T.). A grand addition to the list of climbing

roses, as this colour is not very plentiful, and with its good foliage and ever-blooming qualities should be a decided acquisition. 4/- each.

DUQUESA DE PENARANDA (H.T.). Bud very large, long pointed; flower double, cupped, extremely lasting, fragrant, orange, borne several together on long stem. Foliage abundant, rich green, glossy, disease-resistant. Growth vigorous. 4/- each.

EARL GODARD BENTINCK (H.T.). Growth very robust, foliage dark green and disease-proof. Blooms are full, large, and of perfect form. Colour, cochineal red. 4/- each.

EDITOR McFARLAND (H.T.). Erect vigorous growth; foliage dark green, disease proof; bud very long, on long and rigid peduncle. Flower very large, bright rose shaded salmon and capucine red. One of the finest roses introduced for ten years past. 4/- ea.

EDUARD SCHILL (Pernt.). Bud and flower very large and uni-coloured brick red, with capucine red. Petals very large, shell shaped and massive substance. The bloom is full and perfect form, always opens well and retains its colour in the sun. 4/- each.

GRENOBLE (H.T.). Vigorous and erect growth; foliage dark green, disease proof; bud long, on rigid peduncle. Dazzling scarlet, flower large, full, perfect form, sweetly perfumed. Superb variety for massing. 4/- each.

HEINRICH GAEDE (Pernt.). Growth vigorous, with large glossy bronze green foliage; flower large, full cup shaped with large broad petals. Colour capucine red with glowing orange, practically non-fading. A rose of undoubted merit. 4/- each.

GIPSY LASS (H.T.). Rich scarlet crimson, with blackish shading; full, globular, lasting; foliage hard, disease resisting. Vigorous growth, free and perpetual bloomer; true rose perfume. 4/- each.

KRALJ TOMISLAV (H.T.). Flower large and full, deep rosy pink. Growth vigorous and floriferous. A superb rose. 4/- each.

LADY BETTY (H.T.). A new seedling rose of great charm, deep rose, madder in the bud. As the flower unfolds the petals assume a bright apricot pink, with veinings of madder. The bloom is perfectly shaped and tea perfumed. A strong grower of bushy habit, free flowering. A tip-top variety for massing and cutting. 4/- each.

LESLEY DUDLEY (H.T.). Flowers soft pink at edge of petals, deepening to carmine, scarlet-orange, and salmon-rose, with a saffron base; outside of petals soft pink, buff and gold. The blooms are large, pointed, full of perfect shape, and very fragrant. Vigorous and bushy growth, large dark green foliage and few thorns. 4/- each.

LISE CHIAVASSA (H.T.). Vigorous growth, with large green foliage; most floriferous and continuous bloomer. Bud very pretty, opening into a large, full and cup formed flower. Colour carmine cochineal; highly perfumed. 4/- each.

MADAME HENRI THIEBAUT (H.T.). Vigorous growth, with large, green foliage. Superb long bud on rigid stem, coral carmine flower, very large, full, opening well; coral salmon shaded orange. Superb colour. Very floriferous and highly perfumed. 4/- each.

MADAME LOUISE TREMEAU (H.T.). Vigorous growth, brilliant dark green foliage, immune from disease. Colour capucine red. Flower very large, cup shaped, petals large and smooth. Rose colour, tinted capucine red. 4/- each.

MISS AUSTRALIA (H.T.). The Rose of 1933. A delicate shell pink, often shaded salmon at the base of petals. The blooms are exceptionally large and excellent form. It is one of the highest standards yet attained in an exhibition and garden rose. Growth strong, and the sweet-scented, perfectly shaped, very large, long lasting blooms, which average 80 petals, freely produced, stand erect on stiff long stems, with good foliage. Miss Australia was our best rose at the Royal Easter Show, and was admired daily by many thousands of rose lovers, who showered unstinted praise upon it. 5/- each.

MRS. J. D. EISELE (H.T.). A new rose of outstanding quality, that has remarkable endurance as well as great beauty. Has been well tried out for two years. The colour is a lively bright cerise with shadings of cochineal. Large free flowering. A magnificent exhibition and garden rose. 4/- each.

MRS. H. G. JOHNSTONE (H.T.). A very large, full and well formed flower that will make a splendid appeal. Colour pretty rose pink, deepening at the base and edge of petals to rose madder. Not unlike Caroline Testout, but with higher centre and more lively colour. Robust growth and resistant to mildew. 4/- each.

MRS. PAUL GOUDIE (Pernt.). An improved Lord Lambourne, which does not die back. Colour deep buttercup yellow, every petal being heavily margined carmine-scarlet. Rich fruity fragrance; large and full flowers. Vigorous growth; dark green; mildew proof foliage. 4/- each.

PORTADOWN GLORY (H.T.). Colour clear canary yellow, which is both rich in tone and lasting. The flowers are perfectly formed, and have a tea perfume. Growth is free, vigorous, and practically thornless, with bright green mildew proof foliage. 4/- each.

PICTURE (H.T.). An ideal rose for garden and bedding purposes, and splendid for cutting. Medium sized buds, perfectly formed. When opening the clear rose pink velvety petals reflex in the most pleasing manner, giving the impression of a huge flower. The growth is sturdy and free. 4/- each.

RUBY MAINWARING (H.T.). The blooms are of good form and richly coloured velvety scarlet, opening a rich rosy cerise. The colouring goes right through the petal. As a bedding and garden variety it is superb; fragrant. 4/- each.

SIR HENRY SEAGRAVE (H.T.). Primrose yellow, with chrome base; large well shaped bud, full flower, vigorous and hardy growth; free and perpetual blooming; sweet scent. 4/- each.

SOUV. DE MADAME CHAMBARD (H.T.). Vigorous erect growth, dark green foliage. Splendid long bud on rigid stem. The flower is very large, full and ideal form, opening well in all weathers. Colour dark carmine rose, centre rosy salmon, suffused orange. Very strong tea perfume. 4/- each.

TOM BARR (H.T.). A mixture of yellow and russet orange suffused salmon and scarlet. Perfect shape and quality. Sweet fragrance. Vigorous growth; bright green mildew-proof foliage. 4/- each.

NOVELTY ROSES OF 1932

Price, 2/- each, 22/- dozen; Postage extra.

AROMA (H.T.). Bud large, ovoid; flower, large, double, extremely fragrant, foliage abundant, disease resistant. Growth vigorous.

ATTRACTION (H.T.). Intense bright unfading yellow cadmium with a shading of orange. Tips of buds touched with carmine. Full, medium size. Glossy bronze green foliage; free blooming.

CATHERINE KORDES (H.T.). Buds long and pointed, opening to large blooms of ideal shape, much in the way of "Ophelia." The colour, startling scarlet with dark shades of crimson.

CORAL (H.T.). Bright coral with buttercup base developing to salmon-shrimp, shaded yellow towards the base. Long pointed bud. Vigorous growth; dark green foliage.

CLIMBING DAILY MAIL SCENTED (Clb. H.T.). A climbing sport of Daily Mail Scented Rose. Rich deep velvety red with a scarlet sheen; richly scented.

CLIMBING MRS. LOVELL SWISHER (Clb. H.T.). Climbing sport of Mrs. Lovell Swisher. Outside of petals lilac rose passing to madder lake and deep yellow at centre; inside of petals pale flesh shading to amber yellow at base. Tea scented.

CLIMBING SOUV. DE MADAME BOULLET (Clb. H.T.). A climbing sport of Souv. de Madame Boulet. Dark cadmium yellow, large and fairly full. Beautiful bronze green foliage; tea scented.

DELIGHTFUL (H.T.). A rose of an entirely new shade providing a vivid combination of colours. Outside of petals amber-yellow, inner side sparkling rose, shading to yellow base. Colour becomes more brilliant as flowers age. Flowers large, full; tea perfume. Dark green mildew proof foliage.

MAX KRAUSE (H.T.). Flowers are of immense size, full, fine pointed form, bud very long on stiff stem. Colour, deep reddish orange, changing to lighter tone as bloom ages; disease resisting foliage.

MRS. GEORGE GEARY (H.T.). Bud long pointed, flower large, fragrant, unfading glowing orange cerise shaded cardinal; bronze green disease-resisting foliage.

NEW DAWN (H.W.). (Everblooming Dr. W. Van Fleet). Bud and flower medium size, double, slightly fragrant, bluish pink; dark green glossy foliage, vigorous climbing growth.

PORTADOWN FRAGRANCE (H.T.). Flowers large, full and of perfect formation. Colour brilliant orange salmon pink, heavily flushed throughout with orange scarlet, running to an orange base. Growth vigorous; profuse bloomer.

PORTADOWN SALLY (H.T.). Reddish crimson carmine flushed and veined yellow, running to a yellow base. Outer sides of the petals are sulphur yellow stained and flushed carmine. High pointed centre, faint tea scent. Vigorous growth; mildew-proof foliage.

ROSLYN (H.T.). Bud medium size, long pointed, deep orange; flower large, slightly fragrant, golden yellow; growth vigorous; compact.

SIR BASIL McFARLAND (H.T.). Colour, orange salmon pink with a beautiful orange sheen heavily flushed and veined yellow. Flower full, beautiful shape; dark green foliage, strong stems.

TRIGO (H.T.). Bright Indian yellow with deep buttercup base, reverse apricot washed cerise; long pointed bud, large bloom of perfect quality. Disease-resisting. Vigorous growth.

NOVELTY SHRUBS FOR 1933

Postage or Carriage Extra.

BRUGMANSIA SANGUINEA, E.3. A unique flowering specimen producing reddish orange tubular blooms after the style of the old Angels Trumpet. It is not new, but has been neglected for a considerable time. Liable to injury from severe frosts. 2/6 each.

CRATAEGUS HODGINSII, E.12. The earliest yellow fruiting variety to mature. Well worth growing for its masses of fruit, which are most distinct. Hardy. 2/- each.

CRATAEGUS ROGERSIANA FLAVA, E.10. Another early fruiting variety which is almost covered in the autumn months with golden yellow berries. Recommended. 2/- each.

ESCALLONIA EDINBURGH, E.5. A vigorous, free flowering evergreen, producing carmine pink flowers, which have a reverse of a darker colour. Recommended. Hardy. 2/6 each.

ESCALLONIA DONARD SEEDLING, E.5. A vigorous, free flowering evergreen, producing large sprays of pale pink flowers, which are very decorative. Hardy. 2/6 each.

FICUS BELLINGERI, E.40. An attractive evergreen tree of noble proportions. Suitable for specimens or avenues where other planting is not likely to be carried out. Recommended as the best variety of Ficus for stock feed. 2/- each.

FUCHSIA SOUV. DE HENRY HENKEL, E.3. A hybrid variety producing long tubular blooms after the style of Gartenmeister Bonstedt, but a better colour. 1/6 each.

ILEX J. C. VAN TOL, E.10. A particularly fine berry-bearing form of the ordinary English Holly. Grafted plants. 2/6 each.

NEW HYDRANGEAS

No colours are mentioned, as unless they are grown in iron free soil the colours will vary from Pink through Mauve to Blue in direct proportion to the amount of iron the plants absorb.

Caroline. Immense heads and very large individual pips. A very fine variety. 3/6 each.

Deutschland. Dwarf and compact grower, with large flowers of good colour. 2/6 and 3/- each.

Highland's Blue. Large, compact heads of good colour. A fine variety. 3/6 each.

Liebling. Very large truss with large individual flowers. 2/6 and 3/- each.

Nix. When grown in iron free soil is the best red yet seen. 3/- each.

Odin. Very large fringed flowers with good colour. 2/6 and 3/- each.

Paris. Recommended as one of the best of the newer varieties. 2/6 and 3/- each.

Queen Mary. Very large heads and pips; good clear colour. 2/6 and 3/- each.

Rochambeau. This is one of the very latest sorts; is described as a very deep red in iron free soils. 3/- each.

Rouget de Lisle. One of the most intense in either pink or blue. 2/6 and 3/- each.

Viking. Dwarf, compact grower, with very large fringed flowers, which are sometimes semi-double. 2/6 and 3/- each.

FLOWERS AND VEGETABLES OF MERIT

including Novelties for 1933

THE SEASONS FOR SOWING ARE GIVEN UNDER THE RESPECTIVE HEADINGS IN GENERAL LIST: VEGETABLES, 1 to 9; FLOWERS, 12 to 28.

ASTER, GIANT CREGO

A247 INDIAN SUMMER (Novelty 1933)—The blooms measure $4\frac{1}{2}$ to 5 inches in diameter; are very double, with attractively curled and twisted petals. The colour is identical with the favourite Continental colour, Cinnabar.

Price, per packet, 1/-.

CALENDULA

151B GOLDEN RADIO (Novelty 1933)—In the selection of the golden colour, all the attractive characteristics of the orange form, namely, curled petals and exquisite appearance of the flowers, have been maintained. Golden Radio should meet with an unanimous welcome.

Price, per packet, 1/-.

CHRYSANTHEMUM

279A MAWII (Novelty 1933)—Of perennial duration, this perfectly hardy subject, about one foot in height, is ideal for the border or rockery. The flowers are two inches across; are rich pink, the beauty of which is enhanced by the silvery foliage.

Price, per packet, 1/6.

CLARKIA, DOUBLE

The flowers of these attractive, large-flowered varieties are perfect in form and duplication, and are admirably suitable for border-decoration and for cutting.

300K LA FRANCE (Novelty 1933)—The beauty of the Salmon-pink flowers is heightened by the contrasting colour of each petal.

300L ILLUMINATION—The colour is orange mingled rose and terra-cotta, resulting in a most effective shade.

Price, each variety, per packet, 1/-; the two for 1/9.

GODETIA, "SYBIL SHERWOOD"

GODETIA

New flowers must, of necessity, vary in merit and popularity. These highly-improved types of Godetias are outstanding among the annual novelties of recent years, and have been recognised as decided features for superb bedding effect. For cutting, too, they are ideal; the flowers will last for 10 to 14 days in water—the buds developing fully.

475 SYBIL SHERWOOD (Novelty 1933)—A glorious shade of bright salmon-pink, softened by an undefined edging of white; strong-stemmed, and so free in flowering qualities that the foliage, practically, is hidden from view.

476 PELARGONIUM (Novelty 1933)—Most aptly named, the distinct and beautiful markings resemble those of the erstwhile show Pelargonium. On a blush-pink ground the flowers are heavily blotched deep carmine-pink—the contrast in the mass being unusually effective.

477 THUNDERBOLT (Novelty 1933)—Flowers are very dark crimson—the brilliancy in the flowers prevents that dullness associated with so many dark flowers. Price, each variety, 1/- per packet; the three for 2/6.

IPOMEA, DOUBLE

554 ROSE MARIE (Novelty 1933)—The flowers, double and semi-double, are a beautiful shade of deep rose—a colour that stands out, cameo-like, from the brilliant green of the dense foliage of the vine.

Price, per packet, 1/-.

Mesembryanthemum Criniflorum

(LIVINGSTONE DAISY).

735 MIXED (Novelty 1933)—This wonderful new annual—a first-class carpet, rockery and edging plant—is absolutely hardy; thrives in poor soil; and is grown easily. The plants, of slightly spreading habit, are covered, literally, with flowers, measuring about one inch, of many delightful shades. There are pure whites, tinted and edged with rose, crimson, pink and buff; and self colours of primrose, golden, buff, apricot, crimson and pink.

Price, per packet, 1/6.

NASTURTIUM

SEMI-DWARF,
DOUBLE SWEET-SCENTED

793A GOLDEN GLEAM—By sending out short runners that average 18 inches the plant takes a spreading, bush-like form; and, when in full bloom, the golden flowers, produced freely over the entire plant, make a blaze of color resembling a spread of gold-nuggets. The flowers are double, average two and one-half to three inches across, have a musk-like odour, and are borne on stiff stems six inches in length. Consequently the flowers stand well above the foliage—an added attraction that gives more effect to the showy appearance of the plant. This outstanding garden-acquisition may be utilized in a number of ways: Pot, hanging basket, window-box, balcony-trough, bedding or cut-flower culture.

Annual. Per packet, 6d. and 1/-.

NASTURTIUM, "GOLDEN GLEAM"

Flowers and Vegetables of Merit (continued)

VENIDIUM.

ROCK MELON CALIFORNIAN CREAM

The fruit is of medium size; the skin yellow, flaked green; the flesh salmon; the flavour delicious—an ideal variety for either the kitchen or market gardener. Price, per packet, 1/-.

(See illustration on page 6).

TOMATO

Special attention is drawn to the NEW PRITCHARD TOMATO

Australia is indebted greatly to the late Dr. F. J. Pritchard, of the Department of Agriculture of the United States of America, for the many varieties of tomatoes produced by him, which include Break O'Day, Marvelosa, Marglobe and others. Because of high resistance to Fusarium wilt, many of his productions have become very popular with our growers. To perpetuate his memory, his last selection has been liberated under his name. The vine is short-jointed and of low growth. The smooth solid fruit is scarlet, of medium size, and sets in a cluster of about five. During the past season this variety was grown at Hawkesbury Agricultural College, and, from reports, appears to be much superior to many of the older varieties. Price, per packet, 1/-.

BREAK O'DAY

This origination—a wilt-resistant variety developed by the Department of Agriculture of United States of America—is the result of crossing Marglobe and Marvana. The plant is of vigorous growth, with relatively sparse foliage, and matures a little earlier than Marglobe. The solid, deep, medium-sized fruit is a beautiful scarlet and almost seedless; therefore is excellent for table use. Price, per packet, 1/-.

OXHEART

This is a distinct, main-crop, pink-fruited variety. The fruit is large, bulging and tapers almost to a point, and contains few seeds. The flesh is of good substance and of fine flavour. Price, per packet, 6d.

STOCK, Early Giant Imperial

This vigorous and robust strain, in which the percentage of "doubles" is exceptionally high, has been grown successfully by admirers of the stock. A good white and a good yellow have long been wanted; so we are pleased to offer the following improved varieties:—

11409 SHASTA (Novelty 1933)

This improved white variety has a longer flower-stalk, larger individual bloom, and more blooms to the stalk.

11410 BUTTERCUP (Novelty 1933)

The plant is of a far better habit, throwing long spikes well-covered with large blooms. The colour is yellow—a richer and deeper tone than is usual in yellow stocks.

Price, each variety, per packet, 1/6; the two for 2/9.

VENIDIUM

1136 FASTUOSUM (The Monarch of the Veldt)

This South African plant presents a combination of stateliness, dignity and beauty. The flowers, individually about six inches across, are of two and sometimes three rows of flaming orange petals, each petal being marked at the base with a chestnut-orange blotch. The disc in some flowers is black; in others dark green. The plant does not carry dense foliage, grows two and one-half to three feet high, and produces the blooms singly on stems about 18 inches long; therefore makes an excellent decorative subject. Annual. Price, per packet, 1/-.

Australian-Raised ONION

"NEW KING"

This variety, which was offered by us last year (1932) as a novelty, has been found to be quite up to expectation, and we have pleasure in again including it in our list.

It is a good commercial type and shape with brown colored skin. The keeping qualities are first-class, the bulbs having been kept for eight months.

It is a cross between "The Queen" and "Brown Spanish," with some of the "James Keeping" blood through it. It is early maturing and does not readily run to seed. The raiser considers it superior to "Hunter River Brown Spanish." Seed sown at the end of March or early in April will be ready to market about end of November.

Seed, 1/- per pkt.; 2/6 per oz.; 4ozs. for 8/6. Per lb., 30/-.

Post Free.

Per packet, 6d.; Postage, 3d.

Price per lb., see below.

For CULTURAL NOTES see French Beans.

ANDERSON'S WONDER (Golden Pods)—Strong, bushy-growing, dwarf variety; stringless, fine flavour 2/-

THE STARTLER (Golden Pods)—Six inches long; perfectly stringless, buttery flavour 2/-

BRITTLE WAX—Early; pod, round, fleshy and tender 2/-

GOLDEN WAX—Dwarf; fleshy pod of good flavour. Prolific 2/-

BLACK SEEDED WAX—Hardy golden-podded butter beans of dwarf habit 2/-

MONT D'OR—Tall-growing variety; good flavour; fleshy pods 2/-

Snake Beans

Per packet, 6d.; post free.

Bears pods about 2 feet long, which are stringless and of good flavour. Like French Beans, and are used in exactly the same way. Plants grow 6 feet. Must be picked regularly to prevent the Beans from ripening their seed. Sow in Spring and early Summer.

SPECIAL NOTE

For Postage Rates on Beans, Peas, Sweet Corn, in bulk, refer to Inside Back Cover.

French Beans

Per packet, 6d.; Postage, 3d.

Price per lb., see below.

For Postage on Bulk lines see Inside Back Cover.

CULTURAL NOTES

Sow the "dwarf" sorts every two or three weeks from September to February inclusive, in rows 2 feet apart, and 4 to 6 inches from plant to plant. The "runners" should have a space of from 3 to 4 feet between the rows, and about 12 inches in the rows. These should be sown in September, October or November and staked. Soil need not be too rich.

Dwarf

CANADIAN WONDER—Very long pods; excellent flavour; a wonderful bearer 1/6

BURPEE'S STRINGLESS GREEN POD—The pods are stringless, long, and nearly straight. A first-class Bean. Early, prolific bearer; excellent 2/-

THE MONITOR—Heavy cropping variety, with large broad pods; very delicious 2/-

FELTHAM PROLIFIC—One of the heaviest croppers, producing plentiful supplies of rich, green fleshy pods 2/-

MAGNUM BONUM—Very prolific, fleshy, large pods 2/-

BLUE WONDER—Good cropper, tender, and of fine flavour. The pods are dark purple; but, when cooked, become an intense green. Packets only 2/-

Runners

EPICURE—Grows 6 to 8ft. Stringless. Continues to bear throughout the season if young pods are kept pulled 2/-

KENTUCKY WONDER—A very prolific stringless podded Bean; good flavour; grows 6 feet. Equal to Epicure 2/-

GENERAL McKAY—Very large, broad pods, excellent flavour and good cropper. The pods are stringless 2/-

SCARLET RUNNER—Suitable for the colder districts 2/-

TONGAN (Black Seeded)—Called "Poor Man's Bean." A splendid type of Bean for slicing and boiling in the same manner as ordinary French Beans. Perennial. Post Free. Packets only.

Lima Beans

Per packet, 6d.; Postage, 3d.

Per lb., 2/6; for Postage on Bulk lines see Inside Back Cover.

CULTURAL NOTES

Sow the Beans in October, November or December, in good loamy soil, if possible, which has been well enriched. Sandy soil will also produce good crops if liberally treated. Plants of the tall variety should stand 2 feet apart and the dwarf sorts 18 inches apart. The tall sorts require stakes about 6 to 8 feet high. The Beans bear their pods in great abundance; if carefully picked, bear all Summer.

EARLY LEVIATHAN (Tall)—Very productive.

KING OF THE GARDEN (Tall)—Pods are large and well filled, and produced in great abundance. The quality is all that can be desired.

BURPEE'S DWARF—Plants from 18 to 20 inches high.

HENDERSON'S DWARF—A very early bush variety; 18 inches high.

Broad Beans

Per packet, 6d.; Postage, 3d. For Postage on bulk lines see Inside Back Cover.

CULTURAL NOTES

Strong loam, and even somewhat clayey soil suits this useful vegetable. It does not require much manure, particularly when the land has been manured for the previous crop. Sow in March, April, May, June and July, in drills 3 or 4 feet apart, and 12 inches in the rows.

ANDERSON'S GIANT LONG POD—Per Pods 12in. long; delicate in flavour 1/-

BROAD WINDSOR—Very productive 1/-

EARLY LONG POD—Prolific bearer, crops early 1/-

COLE'S DWARF PROLIFIC—Heavy cropper; height, 2 feet . . 1/-

Broccoli

Per packet, 3d. and 6d.; per oz., 2/-.

CULTURAL NOTES

Sow for the main crop in December, January and February, and again in June, and July, and plant out as soon as the plants are ready and the weather suitable.

ADAM'S EARLY WHITE.

KNIGHT'S PROTECTING.

ELLETSON'S MAMMOTH.

Brussels Sprouts

Per packet, 3d. and 6d.; per oz., 1/6.

CULTURAL NOTES

Sow in June and August for mid-Summer use, and again from November to March for early and late Winter use. Plant out in rows 2 feet apart. **IMPROVED**—An excellent variety.

Beet

Per packet, 3d. and 6d.; per oz., 1/-.
For Prices per 1/2 lb. and lb., see page 11.

CULTURAL NOTES.

Beet should follow some crop for which the land has been well manured, because the symmetrical form of the root cannot be preserved if fresh manure is used. Sow in rows 18 to 24 inches apart; thin out to 10 or 12 inches, and be careful to "single" the plants—generally two plants spring from a single seed vessel. Strong soil is most suitable, but not essential. Make sowings every month from July to December, and again about February to March, should the weather be favourable. All the Turnip-rooted varieties are much earlier than the long-shaped sorts, and quite equal in quality.

ANDERSON'S EXTRA EARLY TURNIP-ROOTED—A beautiful deep crimson variety.

IMPROVED BLOOD TURNIP—Globular shape; bright blood red; flesh close, and of excellent texture; tops well.

ECLIPSE—A very early variety, dark red, perfectly round, excellent for domestic use; close grained, and fine quality.

EGYPTIAN TURNIP-ROOTED—This is an extra early Beet, growing very fast; rather flat in shape, with blood-red flesh.

EARLY WONDER OR RAPID RED—One of the earliest varieties in cultivation. Top, small; root, almost globular; skin, dark red; flesh, deep red; sweet and of excellent quality. A popular variety with market gardeners.

DETROIT IMPROVED DARK RED—Medium-sized roots, globular and very smooth. Flesh dark red, fine grained, tender and sweet. Tops small, permitting of close planting. An ideal Beet.

ANDERSON'S LONG BLOOD-RED—One of the finest table Beets. Short and crisp in the grain, beautifully deep rich color, tender, and of fine flavour; 12 inches long.

OBELISK—An intermediate or half-long variety of fine quality; flesh deep crimson.

Beet

Silver or Spinach

Per packet, 3d. and 6d.; per oz., 1/-.
Prices for 1/2 lb. and lb., see page 11.

The green part of the leaves is cooked like Spinach, and the broad white stems, cooked and served with white sauce, are delicious if flavoured with celery seed.

CULTURAL NOTES

Sow throughout the year in rich soil in rows 2 feet apart. Thin seedlings 12 to 15 inches apart. May be sown also in seed-beds and transplanted.

GIANT CURLED-LEAVED—Pure white stalks.

GIANT DARK GREEN PLAIN-LEAVED—Broad leaves; white stalks.

Borecole (Kale)

Per packet, 3d. and 6d.; per oz., 1/6.

CULTURAL NOTES

Sow in seed beds in January and June, and treat as Cabbage. Should be planted in rows 2 feet apart, and 12 to 18 inches in the rows.

DWARF GREEN CURLED—Suitable for the colder districts of the State.

Savoy Cabbage

Per packet, 3d. and 6d.

An excellent curled Cabbage; does remarkably well in the cooler parts of the State. Has a distinct flavour of its own; is at its best during cold, frosty weather.

CULTURAL NOTES—Same as Cabbage.

	Per	Per
	1/2 lb.	oz.
DRUMHEAD —Extra large heads	3/6	1/3
GREEN CURLED —Superb variety	3/6	1/3

HENDERSON'S SUCCESSION.

Cabbage

Per packet, 3d. and 6d.
Per oz. and per 1/2 lb., see below.
For Prices per lb., see page 11.

CULTURAL NOTES

Strong loam produces the finest Cabbage, but all soils, from clay to sand, if deeply worked and manured, will produce good Cabbage. Two successive crops must not be planted in the same ground, or after Turnips, or any of the Brassica tribe. For the smaller kinds the rows may be 20 inches, and the plants in the rows 15 inches apart, the distance apart to be increased for the stronger growing varieties. Sowings may be made in seed-beds during the greater portion of the year—the main sowings during late Summer and Autumn.

SUCCESSION, HENDERSON'S GENUINE STRAIN—This standard variety still maintains its position as one of the best market gardener's Cabbage that is grown in the State. For Autumn and Spring Sowing it is excellent, but it is an all-the-year-round variety. Short stemmed, with enormous flat heads, packed very closely, of fine texture and quality, and large specimens are not coarse in flavour. It is esteemed not only for its size and quality, but is a grand keeper. It stands the Summer heat excellently, and travels well.

EARLY DRUMHEAD—A foremost variety with market gardeners. The short-stemmed, flat-heads are large and of excellent quality. Matures about four months.

ST. JOHN'S DAY, EARLY—Comes to maturity very quickly, and stands well; one of the best; fair sized; hearts well. Has all the qualities of Improved St. John's Day, but is not so large.

ANDERSON'S IMPROVED ST. JOHN'S DAY—One of the finest flat-headed Cabbages; will heart during the warm months, and produce large, solid heads. Can be grown at any time of the year. Turns in quickly, is all heart, dark green leaves, short stemmed.

BURPEE'S ALL HEAD EARLY—Short stemmed, and a compact grower; has few spreading leaves. Heads are large, flat, and closely packed; the quality is of the best. Can be grown all the year round.

AUTUMN KING OR WORLD BEATER—Fine late Cabbage. Outer leaves are of a glaucous green color, and crimped. Produces enormous heart and very few outside leaves; goes all to head, and is fine and close-grained. Excellent for market or private use.

COPENHAGEN MARKET—This variety has been well tested in Australia, and has proved a first-class variety for both private growers and market gardeners. An early maturing Cabbage, of good form, and with solid heads.

EARLY SPRING (Henderson's)—Resembling the Succession. Early and solid header, producing uniform crop.

LARGE WHITE BRUNSWICK—A splendid large variety, which is not so subject to aphids or grubs as other sorts. A favourite with market gardeners on that account.

ENKHUIZEN GLORY—Solid round heads; medium size; fine flavour; excellent for Winter use in Northern districts.

EARLY JERSEY WAKEFIELD—Favourite; medium size; fine table sort.

GOLDEN ACRE—Small compact heads, sweet eating. A great acquisition.

WINNINGSTADT—Cone-shaped; good sort to market; very heavy; excellent keeper; resists aphids.

EARLY DWARF YORK—Small, but very early; good flavour.

EAST HAM—Excellent domestic variety for Autumn and Winter crop. Medium, firm, and white-hearted.

ENFIELD MARKET—Conical-shaped; tender.

LONDON MARKET—Splendid sort for general crops. White, firm hearts.

SUGARLOAF—Most delicate flavour; excellent for private use.

GREEN-GLAZED OR APHIS-PROOF—Suitable for localities where the aphid is troublesome. Does not always produce a good head; but the glossy dark green leaves are ideal for cooking. May be successfully grown in the tropics.

ANDERSON'S "DEFIANCE" RED—A grand pickling variety; large, solid heads, weighing 10 to 12 lbs. Color, intense blood red; excellent strain.

Carrot

Per packet, 3d. and 6d.; per oz., 1/-.
For Prices per ¼lb. and lb., see Page 11.

CULTURAL NOTES

Make sowings from July to October, and again from February to April, in drills, 18 inches apart, and when fit, thin out to five or six inches. Sand and sandy loam produce the best Carrots; they will grow in any soil if not stony, but will fork if grown on freshly manured land.

ST. VALERY—An excellent Scarlet Carrot; longer than Intermediate—gardeners' favourite. Perfect shape and fine quality.

EARLY SHORT HORN—Good color and quality, very early; a favourite. Suitable for shallow soils.

IMPROVED SCARLET INTERMEDIATE—Of fine size and shape, with short top; early and excellent.

SCARLET LONG HORN—Medium length; very early; good color and flavour.

MANCHESTER TABLE—A splendid early variety suitable for growing in warm climates. In size between Early Short Horn and Intermediate. Stump rooted; good flavour; excellent for table use.

MORSE'S RED-CORED CHANTENAY—Color, rich orange. Fine texture and excellent both for garden and market garden use.

GUERANDE or OX-HEART—Stump-rooted, about five inches long; color, bright orange-red. Suitable for growing in warm climates.

LARGE RED ALTRINGHAM—Long red.

LONG RED SURREY—Very long, grows to perfection on deep, rich land.

FIELD CARROTS—For Prices see page 30.

Cape Gooseberry

Per packet, 3d. and 6d.

CULTURAL NOTES

Sow in September and October, and prick out in a row along a warm, sheltered border, in a rich soil, two feet apart. The plants should be stopped by pinching out the tops of the shoots occasionally to induce a sturdy, bushy growth.

ORDINARY VARIETY—Can be used for dessert; makes delicious jam. Per oz., 3/-.
JAPANESE—A variety of erect habit, from 1½ to 2 feet high.

Capsicum or Pepper

Per packet, 3d. and 6d.

CULTURAL NOTES

Sow in pots or boxes in a frame or bush-house in July and August, or in beds in the open border in September or October, and plant out when the plants are 3 inches high—2 or 3 feet apart. Water and shade until they are established plants. The soil can hardly be too rich; but Chillies will thrive in any ordinary garden soil.

MILD VARIETIES

NEAPOLITAN—One of the earliest large reds; very sweet and mild; excellent for salads and baking.

RUBY KING—Handsome large scarlet fruits. Flesh is thick; sweet and mild; desirable for salads and stuffing.

IMPROVED BULL NOSE—Large scarlet fruit; early; mild flavour.

CHINESE GIANT—Very ornamental; vivid scarlet.

SWEET SPANISH—A useful type.

GOLDEN DAWN—Very ornamental.

HOT VARIETIES

BIRD'S EYE—Highly prized for hot pickles; the peppers, when ripe, will keep a long time if stored dry.

CORAL GEM BOUQUET—Intensely hot. Plants covered with very small peppers.

LONG YELLOW CAYENNE—Fruit narrow, 5 inches long.

LONG RED CAYENNE—Fruit narrow, slightly curved; 5 ins. long.

SMALL CHILI—Short narrow fruit, about 1½ inches long.

CHERRY—Fruit round, about 1 inch through.

ANDERSON'S WHITE QUEEN CAULIFLOWER.

Cauliflower

Per packet, 3d. and 6d.; per ¼lb. and per oz., see below.
For Prices per lb., see Page 11.

CULTURAL NOTES

Sow in rich, light soil from November to March, slightly shading, and keep well watered. The plants should not be allowed to crowd each other, or become stunted. During dull or showery weather, plant out in rows 3 feet by 2 feet in liberally manured land; water the plants for a few days unless the weather be showery. If Cauliflower plants once get a severe check they will never produce fine heads. Cauliflower should never follow a Cabbage crop, nor be grown two seasons following on the same land.

ANDERSON'S "WHITE QUEEN"—A superb variety, very early dwarf; produces large, firm, closely set heads, beautifully white and tender, excellent flavour, luxuriant foliage. One of the finest grown, which we strongly recommend

Per	Per
1-lb.	oz.
18/6	5/-

VEITCH'S AUTUMN GIANT—Produces magnificent, large, snow-white, firm heads; plants are of a vigorous growth, requiring plenty of room. It is not an early variety 6/6 2/-

EARLY ECLIPSE—Popular Victorian variety, suitable for market gardeners 7/6 2/6

EARLY GREENLEAF—The foliage has a glazed appearance and will resist aphids and wigglers. Normal size, good quality 7/-

EARLY ITALIAN GIANT—One of the earliest. Very large white heads, well protected by foliage 7/6 2/6

LATE ITALIAN GIANT—A large variety, with very white heads 6/6 2/-

EARLY LONDON—A first-class early variety. Fine, white heads; one of the best for private gardens; very old favourite 10/6 3/-

LARGE ASIATIC—A large variety of fine quality, for private use and for market; of excellent color and very hardy 10/6 3/-

WALCHEREN—Good reliable sort, and a favourite with some growers, medium early 2/6

Celery

Per packet, 3d. and 6d.; per oz., 1/6; except where otherwise marked.

For Prices per 1/2 lb. and lb., see page 11.

CULTURAL NOTES

Sow for main crop in September and October. Seed beds for this sowing should not be over rich. So as to furnish plants for putting out for several months, a later sowing, say, in December or January, may be made; in this case, sow the seed in shallow boxes, and place in a situation where they can be shaded if necessary, until the seed has germinated. To grow Celery to perfection, choose a bed that has been richly manured for a previous crop, such as a Cauliflower bed. The soil should be of a friable nature, and well pulverised. Open the trenches 18 inches wide, and of a like depth; stack the soil on either side, to be ready for drawing back into the trenches as the plants progress. In the bottom of trenches place about 6 inches of stable manure, partially rotted, and fork it well into the soil. Cover this with a couple of inches of the soil previously thrown out, and water copiously the night before planting; carefully raise the plants from the seed bed and plant along the centre of the trench, about 9 inches apart. Weed often, and draw in soil as the plants advance, taking care that the hearts of the plants are not buried; continue to do so until the plants are full grown and the trench is nearly filled up. Keep plants going with water, when young, if necessary, and use liquid manure. With this treatment Celery stalks will be well blanched and tender.

WHITE PLUME—First-class variety; very tender. The stalks, inner leaves and heart are white, which simplifies the blanching process.

WRIGHT'S SELECTED GIANT WHITE—A leading variety; excellent quality, tender and crisp, blanches well.

WINTER QUEEN—Ribs are solid, crisp, and of nutty flavour; when blanched are of a fine cream white color.

COLE'S CRYSTAL WHITE—Large and fine quality; crisp, well flavoured.

WHITE SOLID PASCHAL—This fine Celery has remarkable breadth of stalk, fine flavour, fleshy, and very tender; self-blanching variety.

TURNER'S INCOMPARABLE WHITE—Old favourite; very fine quality; always reliable; fine flavour; tender when blanched.

GOLDEN SELF-BLANCHING—Remarkably early, entirely self-blanching, with large golden-yellow heart; very crisp and solid. 2/6 per oz.

COLE'S RED SOLID—Fine pink color; large solid stems; tender, crisp.

CELERIAC

(TURNIP-ROOTED CELERY)

Per packet, 3d. and 6d.

Grown for the roots, that are used for boiling or flavouring soups. May also be used for salads.

Cucumber

Per pkt., 3d. and 6d.; per oz., see below. For Price per 1/2 lb. and lb., see page 11.

CULTURAL NOTES

In warm climates make a first sowing in the open about the middle of August. In the colder districts six weeks later. Successional sowings may extend to January under favourable conditions. The soil must be well and deeply worked, and made very rich to produce fine Cucumbers; three plants to each hill will be enough, and the hills should be about 6 feet apart; the ground should be mulched with manure, and the plants watered if necessary. In all cases the points of the shoots should be pinched out when the plants are in flower, to cause the fruit to set.

COMMERCIAL—Early, hardy, very productive; dark green fruit; fine flavour; 6 to 8 ins. long. Market gardeners' favourite 1/6

APPLE-SHAPED—Fine tender flesh 1/6

CRYSTAL APPLE—Fruit of even size, white skin; flesh, crisp and delicious 2/6

IMPROVED WHITE SPINE—This Cucumber is a great favourite with market growers. Crops early, hardy, good flavour 1/6

EARLY FORTUNE—The attractive rich, dark green fruit measures about 9 inches long. The white flesh is of firm and crisp texture; the flavour delicious 1/6

CHOICE LONG GREEN—Excellent variety; fruit 18 inches long 2/-

LONG GREEN PRICKLY—Fine size; deep green color; crisp, delicious 1/6

CRYSTAL WHITE—A milky white skinned variety, fine flavour; fruit 12 to 15 inches 2/-

SHORT GREEN PRICKLY—Very hardy; a good sort 1/6

GREEN GHERKIN—Small fruit; used for pickling 1/6

WEST INDIAN GHERKIN—Very small fruit; used only for pickling 2/6

JAPANESE CLIMBING (Green)—Very early, prolific, rapid climber; well adapted for pickling or slicing

AFRICAN HORNED—A very prolific and ornamental variety. When ripe the fruit is salmon-red color. Does exceptionally well in our warmer districts

Cress

Per pkt., 3d. and 6d.; per oz., see below. For Prices per 1/2 lb. and lb., see page 11.

CULTURAL NOTES

Curled Cress—Sow thickly every two or three weeks with or without a dash of mustard seed. In Summer months shade is necessary to produce a crisp and tender growth. Can be sown in any rich soil, in shaded beds or boxes; must have plenty of moisture.

Water Cress—Raise from seed sown in a situation where it can be flooded or freely watered. If planted on banks of gently flowing shallow streams, or ponds, it will soon spread and afford a continuous supply.

TRIPLE CURLED—Often grown with Mustard, making excellent salad. 6d. per oz.

WATER CRESS—Sow in moist land, or on a creek bank. 2/- per oz.

AMERICAN OR LAND CRESS—Used as a Water Cress during Winter. 1/- per oz.

Culinary Herbs

Per packet, 3d. and 6d.

CULTURAL NOTES

Sow seed in Autumn and Spring.

MARJORAM (Sweet). Per oz., 2/-.

SAGE. Per oz., 1/6

Egg Plant

Per packet, 3d. and 6d.; per oz., 3/6.

CULTURAL NOTES

Sow in September and October, and plant out in rows two feet apart and the same distance from plant to plant. Shade and water until the plants are established. When the fruits are set remove all but from eight to twelve on each plant—that is, allow only a single fruit to mature on each shoot. The young plants should be stopped, to induce branching.

BLACK BEAUTY—Large, brilliant, shiny black rind; early.

IMPROVED NEW YORK PURPLE.

LONG WHITE CHINA.

Endive

Per packet, 3d. and 6d.; per oz., 1/-.

This Salad Plant, when well grown and blanched, is by some preferred to Lettuce.

CULTURAL NOTES

Sow in February and March, and plant out when fit, in rows two feet apart and one foot from plant to plant.

BATAVIAN. **GREEN CURLED**.

Kohl-Rabi

(Turnip-Rooted Cabbage)

Per packet, 3d. and 6d.; per oz., 1/-.

A delicious vegetable, but must be tasted in good condition to be appreciated.

CULTURAL NOTES

Sow in beds like Cabbage from December to March; plant 18 inches apart. Any garden soil, well manured, will suit this vegetable.

LARGE GREEN. **LARGE PURPLE**.

Leek

Per packet, 3d. and 6d.; per oz., 1/-.

CULTURAL NOTES

No culinary vegetable is of easier culture. Sow in prepared beds in April, May or June at the latest, and plant out in rows 18 inches apart and 8 inches apart in the rows if the soil is rich, and a very large Leek is desired. When the plants are six inches high they are fit for planting out.

ANDERSON'S PERFECTION—Very handsome; blanches beautifully.

LONDON FLAG—A favourite with growers for market.

MUSSELBURGH—A very large variety.

NEW YORK TYPE.

Lettuce

Per packet, 3d. and 6d.; per oz., 1/3. For Prices per 1/4 lb. and lb., see page 11.

CULTURAL NOTES

With rich, light soil, and a supply of water, these salad plants can be placed upon the table daily throughout the year. All the varieties may be sown from January to June, and transplanted when fit into rows at distances from each other suitable to the size of the variety. From June to January only, sorts least liable to run to seed should be sown in drills where

they are intended to remain for the crop. The Cos and other non-solid sorts will be improved by having the leaves loosely bound together, round the heart, when about two-thirds grown. In planting out, Lettuce should be lifted without breaking the roots, and planted out during dull and showery weather.

Cabbage Lettuce

NEW YORK—Of unusual size and solidity, with little tendency to run to seed; crisp, tender, excellent flavour.

NEW YORK, No. 41—A Protected Head! This dark green, crinkled or savoyed variety was bred to develop such a head. The habit of the over-folding of outer leaves allows head-protection from either sunny or foggy weather. Has proved an excellent type for Summer-Autumn sowing for Autumn and early Spring maturity.

DRUMHEAD—One of the most popular varieties of Cabbage Lettuce among Sydney market gardeners, producing white solid hearts during Winter and Spring; crisp, and of fine flavour.

ICEBERG—A quick grower, with hard, handsome heads, exquisite flavour. A variety we highly recommend.

BIG BOSTON—A large hearting variety, recommended for market gardening purposes; light green in color, with golden buttery head.

DEACON—One of the best; large heads; leaves pale green without, with beautiful rich cream yellow within; delicious buttery flavour, making a fine, fresh, crisp salad. Stands Summer heat.

HANSON—Solid hearting variety; not liable to run to seed. The outside leaves are a lively green, but hearts are white, crisp, and tender.

MAY KING—Unexcelled for flavour and suitability for salads; hardy, and stands Summer well; very early.

MAMMOTH SALAMANDER—Wonderful heat-resisting qualities; solid heads, large size, when other varieties are only a bundle of loose leaves.

MIGNONETTE—Beautiful russet-colored variety, of unique appearance; small, but very solid and compact.

NEAPOLITAN—A superior, large Cabbage Lettuce, similar to Drumhead.

OHIO—Early, hardy, beautiful, crisp; hearts freely when young; finely curved leaves; medium size.

TOM THUMB—Small, compact variety; good quality; does not go to seed quickly.

Cos Lettuce

PARIS WHITE COS—Favourite sort, suitable for cold or warm districts; grows anywhere in the State provided soil is rich and moist. Leaves grow erect, and produce long-shaped, loose hearts; leaves should be tied together to keep crisp.

Melon

Cassaba Melon

Per packet, 3d. and 6d.

CULTURE—Same as Rock Melons.

(See page 6).

This Melon can be classed as a Rock Melon, but the fruit is somewhat distinct in appearance. May be stored for late use.

GOLDEN BEAUTY—Bright yellow with wrinkled skin; flesh white.

PINEAPPLE—Late ripening; very solid, heavy; deep green; white flesh.

HONEYDEW—Smooth skin; flesh light green; skin nearly white; creamy yellow when ripe. Per oz., 1/-.

Mango Melon

or Vegetable Peach

Per packet, 3d. and 6d.

CULTURE—Same as Rock Melons.

(See page 6).

A very productive little Melon; fruit about the size of an Orange, and of delicate flavour when baked or boiled like Vegetable Marrow.

Preserving Melon

Per packet, 3d. and 6d.

CULTURE—Same as Water Melons.

(See page 6).

CITRON—A round variety, with red seeds. Per oz., 9d.

LONG GREEN—Excellent for jam making. Per oz., 9d.

FROSTED OR SNOW—A small fruited variety, round in shape, very choice. Per oz., 1/3.

ROCK AND WATER MELONS ARE ON PAGE 6.

Rock Melon

Per packet, 3d. and 6d.; per oz., 1/6.
Price per 1/2 lb. and lb., see page 11.

CULTURAL NOTES

The culture of the Rock Melon is somewhat like that of the Cucumber. Sow out of doors September to November. The hills need not be so wide as for Water Melons, nor should the soil be so highly manured. But do not leave more than two of the strongest plants on each hill, and do not thin them out until they begin to run. Water during dry weather to bring on the young plants. When the fruit begins to show signs of ripening, a frame of calico or canvas covering should be provided to prevent any external moisture injuring the fruit, otherwise the most delicious varieties will prove insipid, watery and worthless.

BALTIMORE—Fine variety; excellent flavour; green flesh; large.

BANANA—Distinct variety, bearing long, slender, banana-like fruit, skin creamy white, and entirely free from netting; flesh deep salmon color and of good quality.

BAY VIEW—Fine large fruit, yellow flesh.

CALIFORNIAN CREAM—See Novelty Pages. 1/- per packet.

EARLY HACKENSACK—Early; delicious; thickly netted green skin, deeply ribbed; green flesh.

EMERALD GEM—Delicious, early and prolific; a smooth ribbed skin emerald green; flesh salmon color.

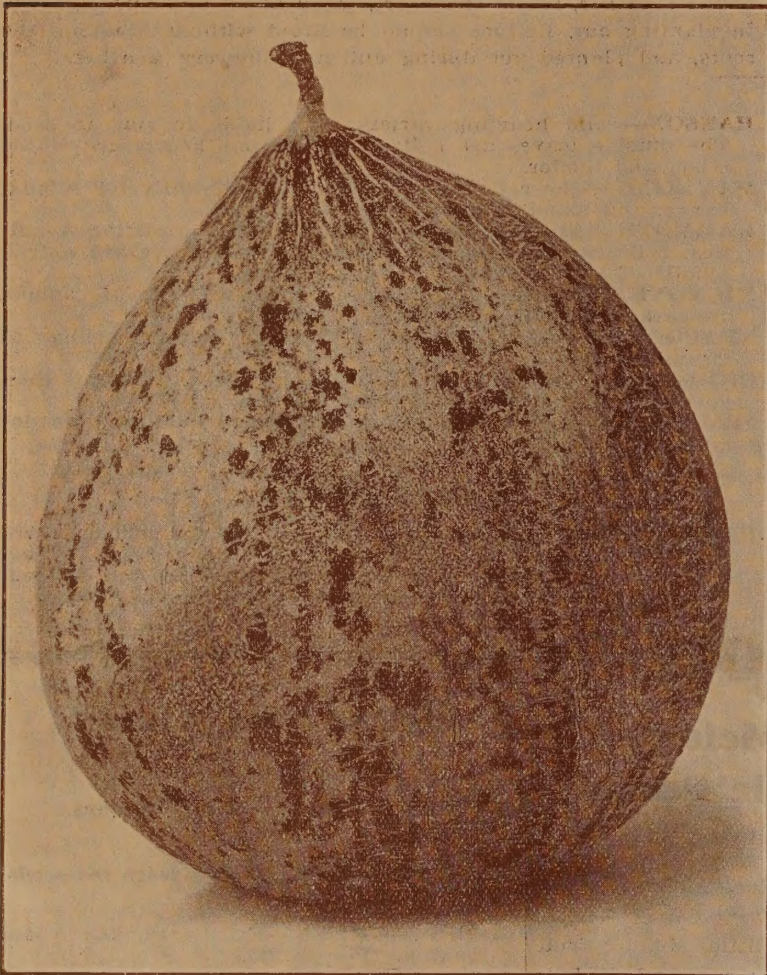

FORDHOOK—Heavily netted and nicely ribbed; golden red flesh of exquisite flavour; prolific yielder.

IMPROVED JENNY LIND—Fine quality, rich and highly flavoured; an excellent keeper; bears freely.

IRONDEQUOIT—A very fine variety, suitable either for commercial purposes or private gardens; fruit medium, delicious flavour; flesh yellow when ripe.

MILLER'S CREAM—Nearly round, with dark green skin; thick, firm, fine, orange-colored flesh.

NETTED GEM OR ROCKY FORD—Light green flesh; melting and sweet; a hardy variety.

CALIFORNIAN CREAM ROCK MELON.
For description, see Novelty Pages.

ROCK MELON (continued)—

NUTMEG—Medium-sized Melon, delicious flavour; great favourite.

PAUL ROSE—Light green skin; flesh salmon; richly flavoured; moderately sized fruit.

SPICY CANTALOUPE—Very distinct in flavour and appearance; cream colored rind; flesh deep rich salmon; 8-10 ins. in length.

Water Melon

Per packet, 3d. and 6d.; per oz., 1/-.
Price per 1/2 lb. and lb., see page 11.

CULTURAL NOTES

Sandy loam is the most suitable, but in fair seasons they do well in any good garden soil. Sow five or six seeds in prepared hills 5 or 6 feet apart each way, eventually leaving two of the best plants in each hill. The best time for sowing is September, October and November.

KLECKLEY SWEETS, IMPROVED—A selected and improved strain from the well-known Kleckley Sweets. The rind of the large cylindrical fruit is dark green, while the flesh, of splendid eating qualities, is rich red. Will become popular with market gardeners.

ANGELINO—Black Seeded. A melon of par excellence; good market variety.

ANGELINO—White Seeded. Produces well, oval shape, fine color. Medium size. Advise picking when green shades to gold.

CHILEAN—White Seeded. A melon of exceptional merit. Extra solid, crisp and sugary. A prime favourite.

CHILEAN—Black Seeded. The melon possesses a fine fruity flavour. Thin rind. Moderate size; ideal for the home gardener.

COLE'S EARLY—Of good quality; very early; has bright red flesh, delicate flavour, and very prolific.

CUBAN QUEEN—A very large, bright crimson-fleshed Melon, of superior quality and delicious flavour.

FLORIDA FAVOURITE—Large oblong fruit; delicious flavour. **GOLDEN SWEET**—The rind is dark green and the flesh of a bright golden yellow or champagne color. A luscious sugary flavour. The Melons average about 20lb. weight.

HALBERT HONEY—Rich and tender when ripe, 18 to 20 ins. in length; flesh rich, crimson-like color, deep green rind.

ICE CREAM—White seeded, excellent, with a delightful green skin; mottled; flesh deep pink.

IRISH GRAY—The flesh is a beautiful red color, the skin a light green. Travels well.

KOLB'S GEM—Light green skin, nearly round in shape; 30 to 50 lb. in weight; flesh bright red; rich and sweet.

KLECKLEY SWEETS—Rich bright scarlet flesh, crisp, sugary, and melting; free from stringiness; ripens close to the skin. Fruit is 18 to 20 inches long, with dark green skin.

MAMMOTH IRONCLAD—Beautiful Melon, oblong, with mottled green skin; an average weight of 50 lb.; crisp, delicious flesh.

McIVER SUGAR—Fruit often 2 feet in length; skin shows bands of white shading into green. Superior quality. Flesh pale pink, crisp and luscious.

SUGAR STICK—Large, light green; oblong in form, measuring 20 to 24 inches long; luscious, bright red, crisp flesh.

THE DIXIE—Very early variety; flesh bright red, skin dark green, beautifully striped; fruit oblong.

TOM WATSON—Bright pink flesh, small white seed, dark green skin.

Mushroom Spawn

1/- Brick, 2/- post free in N.S.W.; 2/6 in Q'land., Vic., Tas.;
3/- in other States; 2 Bricks, post free, 3/3 N.S.W.

A leaflet giving full cultural directions is sent with each order, or will be sent free on application.

Mustard

FINEST WHITE.

Per packet, 3d. and 6d.; per lb., 1/-. Postage extra.
Special price for quantities.

CULTURAL NOTES

As a salad, Mustard is usually cultivated in the same bed with Cress.

Okra

Per packet, 3d. and 6d.
Sow in late Spring.

The pods form the edible part. Gather while young and tender. Good for flavouring soups and stews.

IMPROVED DWARF—Compact-growing; green meaty pods.
LONG GREEN—Slender long pods, about 5 inches. Excellent quality.

Onion

Per packet, 3d. and 6d.; per oz., see below.

For price per 1lb. and 1lb., see page 11.

CULTURAL NOTES

For ordinary garden culture and to produce large bulbs, sow in rich, well-prepared soil, in the months of March or April, transplanting during the following July or August into drills two feet apart and ten inches in the drill. The young plants should be carefully raised from the beds, so that the fibrous roots may not be injured. The rows where the young Onions are to be planted should have the soil raised in small ridges about three or four inches above the rest of the bed. After the plants have taken firm hold of the ground, the ridges should be drawn away from the plants so as to leave the whole of the bulb exposed to the air, nothing but the fibrous roots left underground. This rule is very generally neglected, the consequence being thick-necked and imperfect, bad-keeping bulbs. For field Culture of Onions, see Page 30.

- ANDERSON'S MARKET MODEL**—Of remarkable size and quality; color brown. The bulbs are perfect in form, and very mild flavoured; large, and its keeping qualities are unequalled 2/-
- ANDERSON'S MAMMOTH SILVER KING**—Skin a beautiful silver white; mild and pleasant flavour 1/-
- ANDERSON'S WHITE PICKLING ONION, "CHAMPION"**—Small; mild flavour; very early; exceedingly suitable for pickling. Sow thickly 1/-
- SILVER SKIN**—Excellent pickling variety; clean, silver skin 1/-
- SOUTHPORT WHITE GLOBE**—Excellent variety 2/-
- BROWN SPANISH**—A splendid variety, large and firm, largely grown for market; brown skin, and good keeper, solid 1/-
- BROWN GLOBE**—Like Brown Spanish, with all its good qualities; in shape more globular; a fine keeper; very solid 1/-
- HUNTER RIVER EARLY BROWN**—A very early type of the Brown Spanish 3/6
- AILSA CRAIG**—A very attractive-looking Onion, with pale brown skin; flavour is mild, and form globular. Splendid keeper and good exhibition variety 2/-
- JAMES' KEEPING**—One of the best; keeps well; brown skin; resembles Brown Globe 1/-
- ODOURLESS**—This variety has proved a great success in the home garden 4/-
- EXTRA EARLY YELLOW GLOBE**—Very early, remarkable keeper; excellent domestic variety 1/6
- EXTRA EARLY FLAT RED**—Very early; mild flavour; keeps well; moderate size 1/6
- GIANT ROCCA**—A fine Onion, mild flavour. Large bulb; reddish yellow color 1/6
- WHITE PORTUGAL**—Splendid keeper 1/6
- THE QUEEN**—Silver skinned pickling variety; fine flavour; early; sow thickly 1/-
- EARLY BARLETTA**—White skinned early variety; mild flavour 1/-
- NEW KING** (see Novelty pages). Per packet, 1/- 2/6

Parsley

Per packet, 3d. and 6d.; per ounce, 9d.

For Price per 1lb. and 1lb., see page 11.

CULTURAL NOTES

Sow in March, and again in August, September and October. The soil should be finely worked, and the seed sown in drills and lightly covered; the seeds take a long time to germinate.

EXTRA TRIPLE CURLED—Fine garnishing; one of the best; beautifully mossy.

CHAMPION MOSS—Beautiful dwarf-growing, moss-like variety.

Parsnip

Per packet, 3d. and 6d.; per ounce, 9d.

For Prices per 1lb. and 1lb., see page 11.

CULTURAL NOTES

Parsnips prefer rather stronger soil than the Carrot, but is otherwise grown exactly like it; the land must be well and deeply worked; freshly-manured land is not suitable, as it will cause the roots to fork. The rows should be 2 feet apart, and the plants should be thinned to 8 or 10 inches. Sow for a main crop during Spring months, and make smaller sowings in the Autumn. Parsnip seed, not being a good keeper, should be sown thickly, so as to ensure plenty of plants.

HOLLOW CROWN—Very select, long roots.

LARGE GUERNSEY—Good flavour.

Garden Peas

Per packet 6d., postage 3d. extra; Price per lb., see below.

For price per 1lb. and 1lb., see page 11.

Quotations for bushel or sack lots on application.

CULTURAL NOTES

The best season for sowing for a large crop of Peas is May, June and July, but an early sowing may be made in March, and successive sowings during Winter and Spring. In fair seasons, by judicious selection of varieties, a constant succession may be kept up for nine months in mild localities. Peas like a strong loamy soil; if somewhat sandy the better. If the situation be a dry one, crops sown later than July will not yield a return unless ample moisture be forthcoming, either artificial or natural.

Early Varieties

- AMERICAN WONDER**—One foot. A very early and very dwarf Pea, and a wonderful bearer; pods well filled; of deep green color; and of superb flavour 1/3
- ENGLISH WONDER**—Two feet. Very prolific variety; a few days later than American Wonder, and pods slightly larger 1/3
- GREENFEAST**—A very prolific dwarf early variety; grown extensively for market purposes 1/3
- LITTLE MARVEL**—One of the finest cropping Dwarf Peas; pods dark, and of medium size; well filled and of fine flavour; height 20 inches 1/3
- McLEAN'S LITTLE GEM**—One-and-a-half feet. An excellent Pea, and one of the very best dwarfs; an abundant bearer; pods well filled; excellent flavour 1/3
- RICHARD SEDDON**—One of the finest of the Dwarf Early Peas; large, well-filled pods. Height, 20 inches 1/3
- SHERWOOD**—One of the best early wrinkled varieties; large pods 1/3
- THE DAISY**—Height, 12 to 18 inches. Covered with pods 5 inches in length; one of the best of its class 1/3
- WM. HURST**—One-and-a-half feet. One of the very best dwarf marrow Peas grown; large, well-filled pods, of fine flavour 1/3
- WITHAM WONDER**—Partaking somewhat of the nature of American Wonder; slightly taller in growth 1/3

Medium Varieties

- DWARF DEFIANCE**—Two-and-a-half feet; heavy cropper; beautiful dark green pods, well filled 1/-
- DUKE OF ALBANY**—Height, 3½ to 4 feet. A Pea of unusual merit; thrives well, early or late, and withstands the frost remarkably well, even in the coldest climate 1/3
- HOME DELIGHT**—An entirely distinct Pea, classed as second early; strong and vigorous plant; grows about 2 feet; beautiful pods of light green color 1/3
- PEERLESS**—Robust habit; large pointed, deep green pods. Height, 3 feet 1/3
- SENATOR**—A heavy cropping Pea, and a great favourite. Height, 2½ feet 1/3
- STRATAGEM**—Two-and-a-half to 3 feet. Fine semi-dwarf wrinkled marrow; crops wonderfully; pods large and fine, deliciously flavoured 1/-
- TELEPHONE**—Tall wrinkled marrow, with pods of 10 to 12 Peas; fine flavour; grows 4½ feet high. Very strong grower 1/3
- VEITCH'S PERFECTION**—Two-and-a-half to 3 feet. A somewhat more deliciously-flavoured Pea than Yorkshire Hero, and a little taller; not quite so hardy 1/-
- YORKSHIRE HERO**—Two-and-a-half to 3 feet. The most highly esteemed wrinkled Pea grown. A wonderful cropper, with abundant well-filled pods; delicious flavour, and most vigorous growth 1/-

Sugar Peas

(EDIBLE PODDED).

CULTURE—Same as the ordinary Peas.

TALL—The pods are cooked whole while young. It may be used in the same manner as the other varieties of garden Peas 2/-

SPECIAL NOTE

For Postal Rates on Peas, Beans, etc., in bulk, see Inside Back Cover.

Pe-Tsai

(CHINESE CABBAGE)

Per packet, 3d. and 6d.; per oz., 1/6.
For Prices per 1/2 lb. and lb., see page 11.

CULTURAL NOTES

Chinese Cabbage, with large loose leaves, will succeed in dry seasons where other varieties of Cabbage do not. Sow during the Autumn and Spring. The leaves are used like Spinach Beet, which it somewhat resembles.

Pop Corn

3d. and 6d. per packet; post free.
1/6 per lb.; for postage rates on bulk lines, see Inside Back Cover.

CULTURAL NOTES

Same as Sweet Corn. Allow the cobs to ripen thoroughly, and then roast the grains in a close iron vessel until they "pop," shaking the vessel meantime. The Corn is then taken out and slightly dusted with powdered sugar. It forms a delicious sweet.

Pumpkin

Per packet, 3d. and 6d.; per oz., 9d.
For Prices per 1/2 lb. and lb., see page 11.

CULTURAL NOTES

For garden culture heavily manure the land all over, and dig in deeply, give an extra dressing to the hills where the seed is to be sown, and fork well in. The hills should be 6 or 8 feet apart, and only two plants should be allowed to remain in each hill. Sow 6 or 8 seeds in each hill, so as to guard against total loss of plants by insects. A good mulch of manure greatly increases the yield. Sow August to November.

TRIANGLE (Shamrock)—A very popular variety; peculiar shape, very prolific. Good table sort.

BEAUDESERT—A true Queensland blue, good quality, sweet and dry. Flesh, orange color.

CROWN—Medium size, thick flesh, fine quality; good keeper, and dry.

TROMBONE—Flesh very sweet; excellent for pies.

GRAMMA—A very useful sort, both for cooking in various ways, and for cattle or pig food.

IRONBARK—Old established favourite variety.

JAPANESE—Flesh a rich salmon color; fine grained; very dry when cooked.

LARGE BUTTON—Fine, dry sort; good keeper.

SMALL SUGAR—Very early; matures three months from seed.

TURK'S CAP—Fine table variety; good keeper; red top.

CUSHAW—Large, bottle-shaped fruit, with crooked neck; very prolific; keeps well.

Rhubarb

Per packet, 3d. and 6d.; per oz., 1/6.
For Prices per 1/2 lb. and lb., see page 11.

CULTURAL NOTES

Sow under shelter of a few leafless boughs and a manure mulch, in August or September. The young plants should be kept growing with frequent watering if the weather is very dry. Let the plants remain in the seed bed until Autumn, when they should be transferred to the permanent beds, made of the best soil, trenched 2 feet deep, and manured with half-decomposed stable manure. The plants should be 3 by 4 feet apart, and the whole bed dug and manured every year.

CRIMSON WINTER—Bears heaviest during early Winter, but can be pulled all the year round.

GIANT—Best for Summer use.

(For Roots of all Varieties, see page 10).

Radish

Per packet, 3d. and 6d.; per oz., 9d.
For Prices per 1/2 lb. and lb., see page 11.

CULTURAL NOTES

Sow in light, rich, sandy soil every fortnight for succession; use a shaded border during Summer months, and mulching manure on the surface, and water freely. Sow in drills or broadcast. **LONG SCARLET**—A splendid strain; the roots about 6 inches in length; skin is bright red, with crisp, juicy, icy white flesh; grown extensively for both home and market.

MIXED TURNIP—A mixture of red and white turnip-shaped varieties in equal proportions. This very early type is most attractive and of the finest quality; the flesh is pure white, crisp and tender.

RED TURNIP—This round early maturing variety is a rich scarlet colour, and a very suitable variety for salads.

WHITE TURNIP—A round quick maturing variety. The flesh and skin are pure white.

CELESTIAL OR WHITE CHINESE—Thick, long white sort, with blunt bottom. Flesh crisp and pungent.

FRENCH BREAKFAST—A popular oval shaped variety; skin red, tipped white. Specially recommended for tropical districts.

WHITE ICICLE—Crisp, white variety. Roots long, tapered; very white throughout; mild, and of splendid flavour.

Rosella

Per Packet, 3d. and 6d.; per oz., 1/3.
It is from the fleshy calyx of the handsome plant (*Hibiscus subdorifa*) that the celebrated Queensland Rosella jam is made.

CULTURAL NOTES.

This plant requires a hot climate and should be suitable for warm, sheltered situations near Sydney and on our coast. To get the plants early so that they have a long Summer and flower freely, they should be here raised in artificial heat in June or July, and kept in pots until towards the end of September, when the plants may be planted out in rows 4 to 5 feet apart.

Salsify

Per packet, 3d. and 6d.; per oz., 1/6.

CULTURAL NOTES.

This delicate vegetable thrives well in our climate. The roots are used like Carrots or Parsnips, and they can be cultivated exactly in the same manner—that is, in drills at similar distances and similar soil. Salsify is often called the "Vegetable Oyster." Sow August to November.

Spinach

Per packet, 3d. and 6d.; per oz., 9d.
For Prices per 1/2 lb. and lb., see page 11.

CULTURAL NOTES

Sow in rows about 18 inches apart, and thin out to about 9 inches. Good, rich soil is necessary to produce a succulent growth. February and March are the best months for sowing, but where moisture is obtainable Spinach may be grown six months in the year.

ROUND (Summer). PRICKLY (Winter).
MONSTROUS VIROFLAY.
NEW ZEALAND.

Squash

Per packet, 3d. and 6d.; per oz., 1/-.
For Prices per 1/2 lb. and lb., see page 11.

CULTURAL NOTES

Sow in August, September, October, and November successively. Prepare the beds as for Pumpkins, including the manure and top dressing. The seeds, however, should be planted about 2 feet, and the rows about 4 feet apart for the bush kinds; running kinds at the same distance as Pumpkins. Squashes should be gathered for use while the faded bloom still adheres to the fruit. They should always be boiled whole, and be well drained before being placed on the table.

EARLY WHITE CUSTARD (Bush)—Wonderful bearer, delicate flavour, compact growth.

EARLY GOLDEN (Bush)—All the good qualities of the former, but yellow skin.

FORDHOOK (Bush)—Flesh dry and sweet; will keep if well ripened; rind yellow; flesh straw color.

MONITOR (Trailing)—The fruit is long, skin a dark grey—the shape resembles a large cucumber—and when grown under favourable soil conditions is about 2 feet in length. The flesh is orange in color, and when baked it is delicious. Flesh dry and cooks beautifully.

CROCKNECK (Bush)—Prolific bearer.

IMPROVED TRUE HUBBARD (Trailing)—One of the most reliable; very hard, green skin.

GOLDEN HUBBARD (Trailing)—Yellow.

BLUE HUBBARD (Trailing)—The skin is bluish grey and very hard, and the flesh of good color and fine flavour.

WARTED HUBBARD (Trailing)—The surface of the dark green skin is heavily warted; the flesh is fine-grained and dry.

BOSTON MARROW (Trailing)—Deep yellow flesh, orange skin.

Sweet Corn

Per packet, 3d. and 6d.; post free.
Price, per lb., on application. For postage rates on bulk lines see Inside Back Cover.

CULTURAL NOTES

Sow September to January, in rows three or four feet apart, and one foot in the rows. Sweet Corn will succeed in any moderately rich garden soil. While growing, hoe between rows frequently.

A delicious vegetable. The Cobs should be cooked when they are quite soft and tender like green peas.

ANDERSON'S TABLE QUEEN—A superb variety; large cobs, and white grains.

METROPOLITAN—Ears 9 inches long; exceedingly white in color.

GOLDEN BANTAM—A yellow-seeded variety; very early; dwarf.

EARLY CORY—Large cobs, white grains; good cropper.

STOWELL'S EVERGREEN—Long white grains; excellent flavour.

Tomato

Per packet, 3d. and 6d.; per oz., see below.
Prices per ½lb., see page 11.

CULTURAL NOTES

Sow under glass in July and outside during September, October and November; plant out as soon as ready into good strong rich soil. Plenty of room and manure is all that is necessary to produce this favourite fruit-vegetable in abundance. We consider by far the best way to grow them is to plant in rows four feet apart each way, and grow them on stakes or a trellis five feet high, regularly pinching back all the laterals to the second joint, until the plants have reached the top of the stakes; top the main stem and continue to pinch back the laterals, and so remove all useless growth until the trellis or stakes are covered with fruit from top to bottom. Mulch plants well, and spray to keep down the caterpillars, and to control fungus diseases.

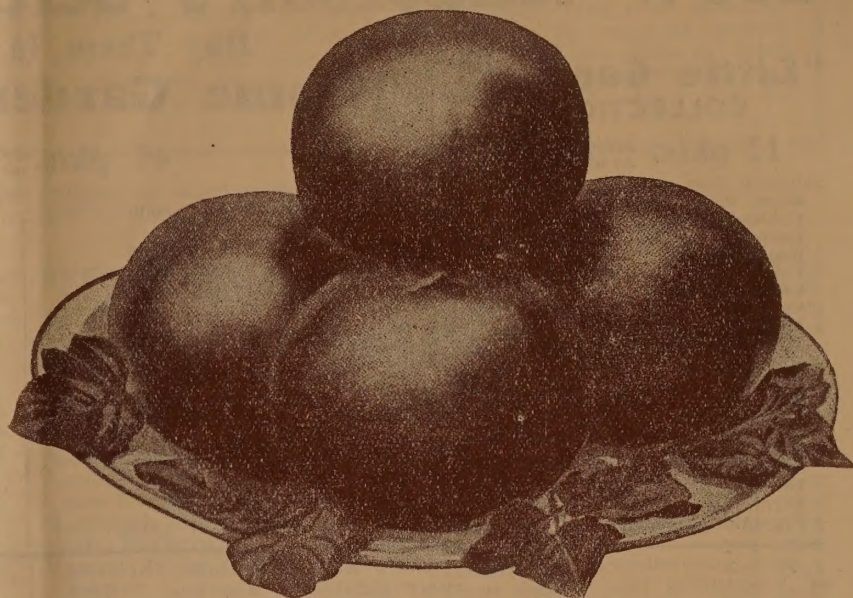

Glass House Tomatoes

The following varieties have been proved adaptable to Glasshouse cultivation, which is carried on so extensively for the production of high-grade fruit during Winter—

Anderson's Repeater.
Beefsteak.
Duke of York.
Chinese or South Australian Red.
Sunnybrook Earliana.
Bonny Best.

FIVE GOOD TOMATOES

ANDERSON'S "REPEATER"—A splendid early variety, very prolific bearer; medium sized fruit 3/6
MARGLOBE—An outstanding variety. Will withstand unfavourable weather, and is claimed to be wilt resistant. Fruit is large, well-rounded, scarlet-red. Second early 3/6
MARVELOSA—A second-early, pink-fruited variety. Medium size. Makes medium to heavy growth 3/6
MARVANA—Very early; scarlet-fruited variety. Fruit is small to medium-sized. Shows wilt resistance 3/6
SUNNYBROOK EARLIANA—An extra early Tomato of choice quality. The plants bear prolifically. The fruit fleshy and of excellent flavour, bright scarlet 3/6
BREAK O'DAY—See Novelty pages. Per packet, 6d. 3/6
OXHEART—See Novelty pages. Per packet, 6d. 3/6
BEEFSTEAK—A Tomato of immense size; color rich red. Crops enormously 5/-
BURWOOD PRIZE—One of the best market garden varieties; good yielder 3/6
BONNY BEST—A selection from Chalk's Early Jewel; solid red fruit, in clusters of three to five; globular and smooth 3/6
CHALK'S EARLY JEWEL—Large, extra early, heavy cropper; very robust and compact grower; fruit bright scarlet; fine flavour 3/6
CHINESE OR SOUTH AUSTRALIAN RED—An early, large-fruited variety. The shape is irregular, but proves an excellent market variety on account of the good skin enabling successful carriage 3/6
CRIMSON CUSHION—Large; flesh very solid and of superb flavour 3/6
DUKE OF YORK—Rich scarlet, smooth, round in shape, flesh very firm, fine flavour; fruit in clusters of sometimes eight and ten. **DWARF CHAMPION**—Beautiful red; medium size, solid, prolific, excellent; self-supporting on strong, upright stems 3/-
GOLDEN TROPHY—Golden color; medium sized; delicate flavour. **GREATER BALTIMORE**—An excellent main-crop variety. Good cropper. Recommended for canning purposes. Carries well 3/6
JUNE PINK—Early pink-fruited Tomato. Flesh solid, fine texture 3/6
KING HUMBERT—A nice red Tomato, resembling an oblong Plum. **MATCHLESS**—Very large, of brightest cardinal red; flesh nearly solid; entirely without core; not liable to crack 3/6
PONDEROSA—A splendid red variety of immense size; solid, fine, strongly-flavoured fruits, smooth; a great bearer 3/6
PONDEROSA, GOLDEN—Large yellow-fruited variety; highly esteemed 3/6
SPARK'S EARLIANA—This exceedingly early Tomato has a large fruit of bright red color, and is very solid 3/6
STONE—Superior red Tomato; uniform size; large, handsome; fruit in clusters, smooth, solid, fine grained; splendid 3/6
WALKER'S RECRUIT—Produces large bunches of medium-sized red fruit of disease-resisting variety 3/6
We also supply the following well-known sorts:—
YELLOW CHERRY, PEAR-SHAPED, RED CHERRY.

ANDERSON'S REPEATER TOMATO.

Turnip

Per packet, 3d. and 6d.

For Prices per ½lb. and lb., see page 11

CULTURAL NOTES

A good light soil suits Turnips best, but with fairly rich soil of any kind, and favourable weather, very fine crops are obtainable. Sow in February and March in drills 1½ inches apart, and thin out to 6 or 8 inches.

Turnips may also be sown in November, and even earlier; but if dry weather sets in, only poor crops can be expected.

ANDERSON'S WHITE MODEL—Fine, clear, white skin, grand quality; perfect shape.
WHITE STONE—Pure, white flesh, oval shaped; excellent for market.
WHITE NEPAUL—Early short-topped, delicate, tender, snow-white, flat shape.
EARLY RED AMERICAN STONE—Flat shaped, but with a purple top.
PURPLE-TOP MUNICH—Extra early; fine flavour.
LONG WHITE—Suitable for hot districts.
ORANGE JELLY—Superior globular yellow-fleshed Turnip; flavour rich and excellent.
LAING'S GARDEN SWEDE—A favourite; for Autumn sowing.
ANDERSON'S IMPERIAL PURPLE-TOP SWEDE—An excellent Swede, highly suitable for garden cultivation.

Vegetable Marrow

Per packet, 3d. and 6d.; per oz., 1/-.

For Prices per ½lb. and lb., see page 11

Culture—Cultivated and used in the same way as recommended for Squash.

ANDERSON'S SELECT LONG EARLY WHITE—Abundant bearer, large fruited, running variety.
LONG-FRUITED BUSH (White)—Excellent quality and flavour, prolific, very early; plants do not run.
LONG-FRUITED BUSH (Green)—Of equal merit to white fruiting variety.
CUSTARD SHAPED—A bushy, compact grower; good flavour.
MOORE'S CREAM—A selected variety, productive; fruit of medium size.

Grow Anderson's Selected Vegetable Seeds

As a convenience to our customers we select those varieties of Vegetables best suited to their particular districts. This service is a great saving of time and worry.

Every season an increasing number of customers from all parts of Australasia avail themselves of our well-known Collections.

Customers are asked to give **FULL NAME AND ADDRESS, AND POST TOWN.**

Should there be any variety of Vegetable Seed in either of these collections which the purchaser would wish to be omitted, please advise, and we will gladly make any alteration asked, except the sending of Peas or Beans, for other items.

Either of the above Collections sent Post Free to any Postal address in New South Wales, Queensland, Victoria, Tasmania, New Zealand, and Fiji, at prices named, when cash is remitted with the order. To all country cheques 6d. exchange must be added. Interstate 1/-.

Owing to the increased Parcel Post Rates, we have reluctantly been compelled to make a slight increase in the prices of the Collections to customers residing in South, West, North and Central Australia, Papua and New Guinea, as follows:— 5/- Collection, 5/-; 10/- Collection, 10/6; 20/- Collection, 22/-, Post Free, when cash is remitted with order. To all interstate cheques 1/- exchange must be added.

Culinary Plants, Roots and Bulbs

NOTE!—Postage extra on following Plants, Roots and Bulbs.

For Rates see Inside Back Cover.

ASPARAGUS ROOTS

Can be supplied during June, July and August.

Full Cultural directions on application.

Colossal } 10/-
Perfection }
Erfurt, Giant } per 100

ESCHALOTS

Price, 1/- per lb.

Used like Spring Onions in Salad, and sometimes for flavouring. The cloves must be divided and planted separately. Fresh manure should be avoided.

GLOBE ARTICHOKE

Can be supplied any time during the year.

Green and Purple. Plants, per dozen 6/-

JERUSALEM ARTICHOKE

Can be supplied June, July and August.

TUBERS

Price 3d. per lb.
Special Prices for Large Quantities.

HORSERADISH

Can be supplied any time during year.

Roots or Crown . . 3/6 per doz.

GARLIC

Price, 1/- per lb.

This bulb, which belongs to the Onion family, is used for flavouring soups, stews, etc.

CHOKOS

Can be supplied May to July. These are the best months to plant. Price, 4d. ea.; postage, N.S.W., 9d. extra.

RHUBARB ROOTS

Can be supplied from May to end of October.

Each. Doz.
Topps Crimson Winter, 9d. 7/6
Victorian Giant 9d. 7/6
Sydney Market Variety 6d. 4/-
Sydney Crimson Variety 6d. 4/-

SEAKALE

Price, 6/- per doz.

Can be supplied any time during the Winter months. Plants two years old.

TREE OR TOP ONIONS

Price, 1/6 per lb. Postage extra.

Plant the sets or tops during the Autumn and Winter months; these will produce large bulbs at the base the first season. The large bulbs when planted produce the tops, which make excellent salad flavouring and pickle well.

POTATO ONIONS

Price, 1/- per lb.

Plant during Autumn; they yield good crops when Onions cannot be raised from seed, and come in at a time when Onions are scarce. The bulbs are produced like potatoes.

SWEET POTATO CUTTINGS

We can supply from Nov. to Jan. Price, 1/- per doz.; 7/- per 100.

HERBS

Strong plants of the following can be supplied all the year round:—

Sage 6d. each
Thyme 6d. each
Marjoram 6d. each
Mint Roots, 4d. and 6d. per bundle

Anderson's Clean Bird Seeds

Birds will naturally thrive when fed with selected seeds full of rich nutritive qualities. Singing birds will be kept in full song for greater periods; talkers will even talk more. The plumage of both talkers and singers will take on a gayer, brighter appearance. All this because the feeding of good seed keeps the birds in fine mettle. And when a bird is enjoying good health it will give of its best. Another point is the fact that good seed goes farther—the birds derive sufficient nourishment from a lesser quantity than they would from cheap inferior seed.

We exercise special care in the selection of our bird seeds. In our mixtures—both Song Bird and Parrot—none but clean and wholesome seeds are used. The Mixtures are proportionately balanced and the seed is machined-dressed at our Warehouse. Thus we have attained a position second-to-none, and an ever-increasing clientele of bird lovers who have proved that Anderson's Bird Seeds are the Best.

Parrot Food, 4d. per lb., 3lb. bags 1/-
Song Bird Mixture, 2lb. bags, 1/-
Canary 6d. per lb.
Hemp 6d. per lb.
Rape 6d. per lb.

Maw 1/9 per lb.
Millet, White, French, Common and Red 4d. per lb.
Flax or Linseed . . 6d. per lb.
Bird's Eye Chillies 1/9 per lb.
Pea Nuts 1/- per lb.

IMPORTANT NOTE

In conformity with a request by the Postal Authorities we would emphasise the importance of correctly addressing correspondence. The use of our box number facilitates prompt delivery and obviates the chance of letters going astray. We would ask our customers to address all their letters plainly as follows:—

ANDERSON AND COMPANY LTD.,
Seedsmen and Plant Merchants,
P.O. BOX 1608 BB, SYDNEY.

Prices to Market Gardeners

CONDITIONS OF SALE.—We believe that all Seeds, Bulbs and Roots sold by us are of the description and kind specified by us at the time of sale, but owing to the practical impossibility in many cases of being certain of this, we give no undertaking that such Seeds, Bulbs or Roots will correspond with the description under which they are sold, and we make all sales subject to this condition. We further give no warranty, expressed or implied, as to their growth, description, quality or productiveness, and will not be in any way responsible for the crop. If the purchaser does not accept the goods sold to him on these terms, they are at once to be returned to us.

NOTE.—The following prices are subject to market fluctuation, but we will always do our best to adhere to them throughout the season.

Orders for half-pounds are supplied at POUND RATES.

ANDERSON'S FLOWER GARDEN SEEDS

From the World's Best Growers

ANDERSON'S ANTIRRHINUMS (SNAPDRAGONS)

SOW AT ALMOST ANY TIME OF THE YEAR.

These superb biennials have become quite prominent gardening features. They have always been highly esteemed as bedding plants and borderers, but the beautiful range of colors now available has added considerably to their value for massing. We have included in our list a selection of choice colors that have been well tried.

Maximum Grandiflorum

Extra Tall, large-flowered.

Height, 4 to 5 feet.

Per pkt., 6d.; 6 for 2/9; 12 for 5/-.
Post Free.

For planting in the shrubby or the central portions of large beds this graceful type proves of interest.

- A 2 **Cattleya**. A superb rosy lilac.
- A 3 **Cerebus**. Rose; yellow throat.
- A 4 **Copper King**. A deep bronzy-copper.
- A 5 **Diamond**. Golden yellow; lilac throat.
- A 6 **Fire Flame**. Dark purple and yellow.
- A 7 **Gotelind**. Light copper, old rose throat.
- A 8 **Indian Summer**. Rich velvety copper.
- A 9 **Nymph**. Rosy lilac, white tube.
- A 10 **Purple King**. Deep purple-crimson.
- A 11 **Old Gold**. A beautiful deep golden.
- A 12 **Ruby**. Rich ruby red.
- A 13 **The Rose**. Charming rose pink.
- A 14 **Snowflake**. Pure white, yellow tube.
- A 15 **Torchlight**. Carmine tinted orange.
- A 16 **Sunnybrook**. Attractive blend of orange, yellow and salmon.
- A 17 **Sunshine**. Bright rich yellow, touch light pink on tube.

Majus Grandiflorum

Tall; large-flowered.

Height, 2½ to 3 feet.

Per pkt., 6d. (except where otherwise priced); any six 6d. pkts. for 2/9; any twelve 6d. pkts. for 5/-. Post Free.

The flower heads of this class are from 10 to 14 inches. Excellent for cutting.

- A 53 **Cerise King**. Cerise pink, white throat and white lip.
- A 54 **Cottage Maid**. Handsome, pale pink, white throat.
- A 55 **Feltham Beauty**. Deep rose pink, with white centre.
- A 56 **Ghestia**. Deep crimson.
- A 57 **Harmony**. Frilled flowers; color, rich terra-cotta orange; shaded with rose, and merging into golden yellow at the centre.
- A 58 **Queen Victoria**. Pure white spike; very large. 3d. per pkt.
- A 58 **Maralda**. Coppery carmine.
- A 59 **Orange Beauty**. Lovely orange scarlet, with gold lip.
- A 65 **Pink Beauty**. A deep rose pink self.
- A 67 **Pink Pearl**. Ground color white; upper portion shaded peach blossom; the tip deeper shade.
- A 68 **Rose Dore**. Self salmon rose; shaded gold.
- A 69 **Rose King**. Brilliant carmine rose, deepening towards centre; no white throat or lip.
- A 70 **Rose Pearl**. Bright soft rose, white lip and throat, slightly tipped yellow.
- A 71 **Ruby Rose**. Fine deep salmon rose.
- A 72 **Venus**. Delicate pink; white throat.
- A 73 **Vermillion Brilliant**. Fine orange scarlet.
- A 74 **Wallflower**. Large, reddish, brown.
- A 75 **Golden King**. Yellow.
- A 76 **Cardinal**. Dazzling scarlet.
- A 77 **Othello**. Dark claret or maroon.

Nanum Grandiflorum

Semi-dwarf; large-flowered.

Height, 18 to 24 inches.

Per pkt., 6d.; 6 for 2/9; 12 for 5/-.
Post Free.

The semi-dwarf kinds, with marvellous forms and variety of colours—which are more delicate and delightful than those of the taller varieties—are incomparably fine for garden-planting, particularly in bedding and edging work.

- A 100 **Apple Blossom**. White throat, pink lip and standard.
- A 101 **Black Prince**. Dark crimson flower; dark foliage.
- A 103 **Buff Queen**. Rose canary lip; shaded orange.
- A 104 **Captivation**. A charming rich chamois, shaded pink; very large flower, fine spike.
- A 105 **Canary Bird**. Clear yellow.
- A 106 **Climax**. A bedding variety of outstanding merit; large and beautifully formed flowers; rich orange, shading to gold in centre.
- A 107 **Delicata**. Pink and white.
- A 108 **Empress**. Strikingly large flowers of a rich velvety crimson; sturdy and compact habit.
- A 109 **Enchantress**. Delightful pale flesh pink; flowers large; fine spikes.
- A 110 **Fascination**. Pearly pink self.
- A 111 **Firebrand**. Brilliant scarlet.
- A 112 **Fiery Belt**. Vivid orange; white throat.
- A 113 **Flamingo**. Flowers deep terra-cotta, with orange-yellow centre, and white throat.
- A 114 **Gloria**. Flowers large, and of a rich deep rose, prettily fringed, and cluster thickly on the spike.
- A 115 **Ivory**. Throws a very fine spike of large blooms. Color, ivory white.
- A 116 **Ladybird**. Cherry pink and white.
- A 117 **Maize Queen**. Salmon maize; yellow lip.
- A 118 **Nelrose**. Rich coral pink.
- A 119 **Nobile**. White, suffused purplish crimson.
- A 120 **Pink Gem**. Clear rose pink.
- A 121 **Prima Donna**. Rich terra-cotta pink.
- A 122 **Queen of the North**. White.
- A 123 **Sybil Eckford**. Apricot primrose.
- A 124 **Victory**. Mammoth flowers, a rich terra-cotta orange, shading to yellow in centre.
- A 125 **Yellow Beauty**. Fine, rich, golden yellow; very large flowers; large sturdy spikes of bloom.
- A 126 **Cherry Ripe**. A most appealing variety; glowing cherry-red, shaded terra-cotta and tinted cerise.
- A 127 **Orange Queen**. Terra-cotta pink, golden centre, pale orange lip.

Nanum Grandiflorum Majestic

Semi-dwarf; large-flowered.

Height, about 24 inches.

Per pkt., 1/-; 5 for 4/6. Post Free.

To the ever-widening series of the semi-dwarf section comes a valuable addition. The plants are slightly taller—about 2 feet, well-rounded and symmetrical in form, and bloom profusely. The large individual flowers are evenly-spaced upon the majestic flower-spike, giving a denser and more massive appearance.

- A 135 **Majestic Delight**. A most fascinating shade, salmon-pink shading to apricot, with a golden apricot centre.
- A 136 **Majestic Orange King**. A lovely blend, rich terra-cotta shades, merging into pure deep orange at the base, with a contrasting yellow lip.
- A 137 **Majestic Red Chief**. Rich deep scarlet of a scintillating brightness.
- A 138 **Majestic Rose Marie**. Quite a novel shade, being a light salmon-rose with golden centre.
- A 139 **Majestic Eldorado**. A strictly self color, deep golden yellow, quite the richest tint yet produced.

Choice Mixtures

Our Mixture of each type includes a beautiful assortment of all the colors that belong to each particular type.

- 52 **Anderson's Choice Mixed, Tall**. Beauty of spikes unsurpassed. 3d. per packet.
- 56 **Picturatum**. Showy, striped, and spotted. 3d. per packet.
- 60 **Grandiflora Striatum**. Magnificent striped variety. 3d. per packet.
- A 60 **Nanum, Choice Mixed**. 3d. per pkt.
- 61 **Nanum Grandiflorum, Anderson's Extra Choice Mixed**. Various colors, and very attractive. 6d. per packet.
- A 61 **Nanum Grandiflorum, Anderson's Superb Mixed**. 1/- per packet.
- 62 **Majus Grandiflorum, Anderson's Extra Choice Mixed**. Containing all the newest tall varieties. 6d. and 1/- per pkt.
- 63 **Nanum Grandiflorum, Art Shades**. A mixture of the latest light shades. 6d. per packet.
- 64 **Nanum Grandiflorum, Tango or Sunset Shades**. A mixture of choice tango-colored sorts. 6d. per packet.
- A 1 **Maximum Grandiflorum, Anderson's Grand Mixed**. For robustness of growth and brilliancy of coloring, this extra tall type holds its own. The large individual flowers are evenly spaced along the stalks. 1/- per pkt.

All Our Flower Seeds are from
the World's Best Growers.

ANDERSON'S ASTERS

SOW AUGUST TO JANUARY

CULTURAL NOTES

A charming family of half-hardy annuals, producing profusion of bloom in trusses of six or eight fine heads of beautiful colors, 3 to 4 inches across.

The popularity of the Aster is universal. These beautiful garden lovers' favourites are easily grown, and they respond royally to the reasonable amount of care they require. Good results should be obtained by following the brief notes given here.

The main essential is the right soil conditions. Light, sandy loam, not over-manured, suits them best. Asters will not do well in heavy soils. Also soil that becomes intensely hot during the Summer months is unsuitable. During the hot months a good plan is to mulch the plants with lawn grass cuttings, or well-decayed cow or stable manure. This has the effect of retaining moisture and keeping the soil cool. Commonsense must be exercised in watering. Though liberal watering is needed, care must be taken not to water too much.

Early sowings may be made in August in a frame, preferably in seed boxes, and planted out towards the end of September. Outdoor sowings are not advisable until the frosts are over, as the seedlings are very tender. When planted in their permanent flowering quarters, protection is recommended from late frosts. Also guard against the heat of the sun, otherwise you will find your young plants scorched up.

Rochester

Height, 2 feet.

This type of Aster has a wonderful reputation in America, and has become familiar to growers in New South Wales. The plants bloom early, and the flowers are very large and produced abundantly, and are very double. The long narrow petals fall over one another in a charming cascade of color, and cannot be equalled for richness of effect.

A176 White. A181 Crimson.
A177 Lavender. A182 Lavender Pink
A178 Shell Pink. A183 Rose.
A179 Purple.

Each variety, 6d. pkt.; any 6 pkts. for 2/6. Post Free.

Late American Beauty

Height, 2½ to 3 feet.

Tall branching type, very large flowers, magnificent late blooming sort. Flowers borne on long stems, incurved petals—freely produced.

A201 Azure Fairy. A205 Carmine Rose.
A202 Crimson. A206 Dark Violet.
A203 Purple. A207 Lavender.
A204 Peach Blossom. A208 White.
A209 Rose.

A210 September Beauty (Shell Pink).
Each variety, 1/- pkt.; 6 pkts. for 5/-;
10 varieties for 7/6. Post Free.

Giant Crego

Height, 2 feet.

An American strain of branching type, producing very large flowers.

A237 Pink. A243 White.
A238 Purple. A244 Deep Rose.
A239 Azure Blue. A245 Lavender
A240 Lavender. Pink.
A241 Rose. A246 Cattleya
A242 Crimson. Pale Rosy Lilac.

Each variety, 6d. pkt.; 6 pkts. for 2/6;
10 pkts. for 4/-. Post Free.

A247 Indian Summer: See Novelty pages.

Aurora

A359 This is a robust variety of Aster, averaging 2 feet in height. The flowers are striking, the centre being bright yellow with an outer circle of delicate blue.

Price, 1/- per packet.

Heart of France

A357 The best pure red Aster. Flower opens red, and deepens with age. The flowers full, and the plants of branching type.

Price, 1/- per packet.

We recommend the following types for general effect and usefulness as cut flowers:—Rochester, Giant Crego, Late American Beauty, Californian Giant and Californian Giant Sunshine.

Californian Giant

Height, 2½ to 3 feet.

A late giant flowering type, similar in growth to Late American Beauty. The flowers are beautifully out-curved.

A261 Light Blue. A263 Purple.
A262 Rose. A264 Pink.

A265 White.

Each variety, 1/- pkt.; 5 pkts. for 4/-. Post Free.

American Comet, Giant

Height, 2 feet.

An immensely popular class. Flowers large and double, produced freely on vigorous branching plants.

A321 White. A323 Lavender Pink.
A322 Rose. A324 Shell Pink.

A325 Purple.

Each variety, 1/- pkt.; 5 pkts. for 4/3. Post Free.

Tasmanian Giant

Branching

Height, 2 feet.

Many gardeners prefer the Tasmanian Branching type. We offer the following range of colors of Tasmanian-saved seed:—

A341 Pink. A345 Crimson.
A342 White. A346 Light Blue.
A343 Flesh. A347 Dark Blue.
A344 Red.

Each variety, 6d. pkt.; or any 6 for 2/6. Post Free.

King Needled

Height, 1½ to 2 feet.

As the name implies, the petals of the flowers are of a fine needle-like appearance, which gives a soft effect to the blooms. Owing to the very narrow petals this class withstands wet weather.

A301 Blackish Blue. A304 Rose.
A303 Crimson. A306 Peach Pink.

Each variety, 1/- pkt., the set of four for 3/6. Post Free.

Choice Mixtures

A175 Rochester, Choice-mixed. 1/- and 2/6 per pkt.

A200 Late American Beauty, Choice-mixed. 1/- and 2/6 per pkt.

A235 Giant Crego, Mixed. 6d. and 1/- per pkt.

A236 Giant Crego, Striped Mixed. Flowers striped with white. 6d. per pkt.

A260 Californian Giant. Choice-mixed. 1/- and 2/6 per pkt.

A275 Californian Giant Sunshine, Mixed. Dainty flowers, in varying shades of enchantress-pink, apple-blossom, deep rose, blue and lavender; up to five inches in diameter. Each bloom has a clear quilled centre, surrounded by an outer circle of loosely-curved petals. 1/- per pkt.

A300 King Needled, Mixed. 1/- and 2/6 per packet.

A320 American Comet Giant, Mixed. 1/- and 2/6 per pkt.

A340 Tasmanian Giant Branching, Mixed. 6d. per pkt.

A356 The Monitor or Satin—A wonderful range of colors in this mixture. Of branching habit, beautiful large flowers, crested, frilled and twisted satin-like petals. 1/- per pkt.

Miscellaneous Mixtures

3d. per pkt., or any 5 for 1/-.

82 Crown—Various colors; white centre.
89 Globe Flowered—Various colors, showy.

92 Mignon, Mixed—Light blue, lilac rose.
97 Quilled Mixed—Striking colors.

98 Single Marguerite, Mixed—Valuable for cutting.

103 Semple's Branching, Mixed. Late flowering, tall growing; double.

108 Invincible, Branching, Mixed. Large flowers. A particularly fine strain; free flowering.

ANDERSON'S PANSIES

Sow during late Summer and Autumn for best results in warm districts. May also be sown during early Spring in cold districts.

These beautiful flowers are favourites with all; they are so easily grown, and bloom for so many months, that they find a place in nearly every garden. Our Pansies have carried off prizes offered by a great many Horticultural Societies, and we have received a large number of testimonials as to their excellence. Should be sown in boxes or in the canvas frame during late Summer and Autumn, and transplanted to the flower garden. They love rich sandy soil, and old cow manure is the best fertiliser. Liquid manure during blooming season will greatly assist the size of the flowers.

Anderson's Choice Pansies

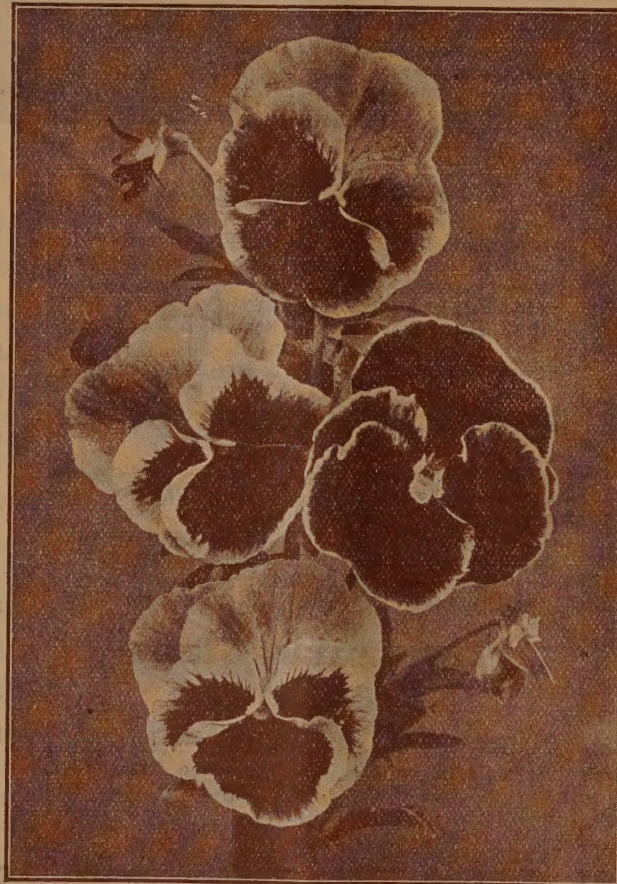

When a very rich color-effect is desired, the following excellent strains will be highly pleasing.

- 838 Anderson's Jewel. Charming strain, robust growth. Flowers large, curled, margined and blotched; magnificent colors and shades. 1/6 per packet.
- 839 Anderson's Large French Stained. A superb strain; colors are most beautiful, and include the grand shades of mahogany, crimson, yellow and blue. Fine form, markings and substance. 6d. and 1/- per packet.
- 840 Bugnot's Exhibition. A superb strain; flowers of fine substance, colorings and markings. 1/6 per packet.
- 842 Couquette de Poissy. Beautiful mauve color, very effective. 6d. per packet.
- 843 Lord Beaconsfield (Giant). Deep purple violet, shaded white on upper petals. 6d. per packet.
- 844 Masterpiece. Petals curled on margins; most attractive shades of color; fine shape, and large. 1/- and 1/6 per packet.
- 845 Non Plus Ultra. Very attractive, vigorous plants; flowers of every shade of rich color. 6d. per packet.
- 846 Odier's Choicest Strain. Finely marked. 6d. per packet.
- 847 Orchid Flowered. Flowers of loveliest colors and shades. 6d. per packet.
- 848 Peacock. Flowers of the most beautiful shades of blue and violet. 6d. per packet.
- 851 Striped. Distinct class containing varied markings; good colors and large, well-shaped blooms. 6d. per packet.
- 852 Trimardeau Giant. Very vigorous, compact habit; flowers rich, large. 6d. per packet.
- 854 First-class Assorted. Splendid large flowers; great variety of colors. 3d. per packet.
- 855 Anderson's Mammoth. A magnificent strain, showing some very attractive features; robust and hardy. 1 1/2 per packet.
- 859 Eros. Deep velvety brown, with broad yellow margin. 6d. per packet.
- 860 Splendour. Large blooms, with unique colorings, with very distinct appearance. 1/- per pkt.

Anderson's Special Pansies

These strains give good results on the Show-bench or for garden-display of high-class blooms.

- 861 Anderson's Gold Medal. A really superb strain that excels any other selection offered by us. The colors are very rich and the blotches and eyes clearly defined. 3/6 per packet.
- 862 Bath's Empress. One of the best English strains of Pansy; essentially a show variety. The glorious colors and markings exhibited in the flowers are exquisite, and the quality of the blooms is of the very richest. 2/6 per packet.
- 863 Anderson's Special Exhibition. A mixture of the finest and most distinct types of Show Strains in cultivation. 2/6 per packet.
- 864 Roggli Giants, Re-selected. This superb strain embodies these outstanding features:—Robust plant-growth; very large, well-formed flowers; long, strong flower-stems; and rare color-combinations. 2/6 per packet.

Anderson's "Sunshine Collection" of Pansy

This is a collection of ten excellent varieties, which will yield a grand display of floral splendour.

- | | |
|----------------------------------|------------------------|
| Anderson's Large French Stained. | Non Plus Ultra. |
| Giant Mammoth. | Odier's Choice Strain. |
| Lord Beaconsfield. | Peacock. |
| Masterpiece. | Trimardeau. |
| First-class Assorted. | Orchid-flowered. |

Ten varieties, 1 packet of each, 5/-. Post Free.

Anderson's Bedding Pansies

6d. per pkt.; 6 pkts., 2/6; 12 pkts., 5/-. Post Free.

Bedding Pansies make a captivating display of colour when massed in beds. The following varieties are particularly suitable for this purpose. To obtain the best effect we recommend the planting of whole beds of distinct kinds.

- 865 Yellow, with Black Eye.
- 866 Golden Yellow.
- 867 Lavender.
- 869 Snowflake, White.
- 870 Faust, or King of Blacks. Darkest.
- 870a Apricot. Orange-apricot.
- 872 Mercury. Velvety purple.
- 873 Indigo Blue. Very effective.
- 874 Bronze. Unique.
- 875 Adonis. Light sky blue.
- 875a Cardinal. Ox-blood-red.
- 876 Orange. Quite distinct.
- 877 Pure Dark Violet. Rich.
- 878 Violet, with White Edge.
- 878a Meteor. Mahogany.
- 879 Anderson's Mixed Bedding.

Anderson's Violas for Bedding

Each variety, 6d. per pkt.; 6 pkts., 2/6; 8 pkts., 3/9; 12 pkts., 5/-. Post Free.

Sow in Autumn for best results.

Violas are most attractive for bedding in masses or for bordering.

- 871 Anderson's Choice Mixed.
- 871a Blue Gem (Jersey Gem). Deep violet blue.
- 871b Admiration. Dark blue.
- 871c Blue Perfection. Blue.
- 871e Lutea. Yellow.
- 871f Mauve Queen. Mauve.
- 871g Papilio. Blue, white blotch.
- 871h Purple King. Purple.
- 871j White Perfection. White.
- 871k Lord Nelson. Deep blue.
- 871m Apricot. Apricot-yellow, tinged orange.
- 871n Papilio, Dark Purple. Self-coloured.
- 871p Puck. Bi-coloured, yellow and violet.
- 871q Gracilis. Produces a mass of very small blue flowers.

ANDERSON'S STOCKS

Sow Mid-Summer to late Autumn. In cold districts also sow early Spring.

In the cool of the evening, the scent of Anderson's Stocks is delightful. A quiet rest in home garden where these delightful flowers are growing affords an ideal form of relaxation after a tiring day. Stocks like a good, rich soil, and will succeed well if the season is favourable. Splendid flower spikes are produced by the Intermediate, Brompton, Perfection, Imperial, and Nice varieties. Stocks are liable to attacks of aphids, but one or two applications of Nicotine or Tobacco Extract will easily eradicate the pest.

"BEAUTY OF NICE" STOCK.

Anderson's "Nice" Stocks

The suitability of this particular strain of Stocks has been extensively proved under all circumstances. Their floriferousness and large proportion of double flowers make them most popular. Best treated as annuals. Height, 2 to 2½ feet.

- 11200 American Beauty. Deep Rose.
- 11201 Abundance. Fine shade of carmine rose; sturdy branching habit.
- 11202 Salmon Queen. Early flowering; salmon pink shade.
- 11211 Beauty of Nice. Large fragrant flowers; delicate shade, flesh pink.
- 11212 Bianca. White, very large and early.
- 11221 Queen Alexandra. Delicate rosy purple.
- 11231 Crimson King. Large flowered.
- 11241 Almond Blossom. Delicate shade.
- 11242 Soliel de Nice. Sulphur yellow.
- 11243 Pride of Keller. Beautiful dark purple.
- 11244 Violet de Parme. Blue mauve, sturdy habit.
- 11245 Belle de Naples. Mid-rose color.
- 11246 Cote d'Azur. Distinct, light purplish-blue.
- 11247 Lloyd George. Deep red.
- 11248 Woodrow Wilson. Slatey blue.
- 11249 King Alphonse XIII. Yellow.
- 11250 Aurora. Orange.
- 11252 Beauty of Cannes. Garnet brown.
- 11253 Fireglow. Bright red.
- 11255 Sunset. Deep salmon, almost brick red.

Each variety, 6d. per packet; any 13 varieties for 5/-.

Giant Perfection Stocks

Growing to the height of twenty-four inches and of an exceedingly branching nature, this early and free-blooming ten week strain proves ideal for the garden. The blooms—high percentage double—are gracefully borne on long stalks so favoured by florists.

- 11275 Blood Red. Striking; displays well in floral decoration.
- 11276 Canary Yellow—Blends nicely with blue and violet shades.
- 11277 Flesh—Delicate; tones with stronger rose shades.
- 11278 Pale Blue—Enchanting shade.
- 11279 Pale Blush—Shadings of blush-pink.
- 11280 Pale Violet—Soft shade of violet.
- 11281 Rose—Beautiful rose-pink.
- 11282 Rose, Shaded Terra-Cotta—Unique shade combination.
- 11283 Silvery Lilac—The silver-like tinge to the lilac gives distinction.
- 11284 Violet—Delightful appearance; large florets.
- 11285 Glistening White—The purest of whites.

Each variety, 6d. per packet; 6 packets, 2/9; 11 packets, 4/-.

Early Giant Imperial Stocks

Large individual florets—up to two inches in diameter—nicely balanced on long flower stalks. The plants grow 24 to 30 inches in height, bloom early, and produce sweetly scented flowers—double to a large degree.

- | | |
|--|---|
| 11301 Canary Yellow. | 11407 Golden Rose — Rich light-rose, enhanced by a pleasing golden effect in centre of each floret. |
| 11302 Dark Blue. | |
| 11303 Fiery Blood-Red. | |
| 11304 Lavender. | |
| 11305 White. | 11408 Old Rose — Beautiful shade of old rose, previously lacking in this class. |
| 11405 Antique Copper—Rich hellebore red, overlaid with copper. | |
| 11406 Elk's Pride — Royal purple. | 11409 Shasta } See Novelty pages. |
| | 11410 Buttercup } |

Each variety, 1/- per pkt.; 4 pkts., 3/6; 9 pkts., 7/6. Post Free.

Brompton Stocks

Many inland gardeners prefer this biennial group. The plants stand the winter well, and bloom very early in Spring—the display extending over several weeks. Height, about 2 feet.

- 1115 Scarlet. Very showy and distinct.
- 1116 White. Fine spikes of clear pure white.
- 1119 Empress Elizabeth. Large, rose-shaped flowers; lovely dark red; early; large percentage double.
- 1120 White Lady. Large double snowy white flowers.

Each variety, 6d. per packet.

Anderson's Stock Mixtures

The color-mixture of each group is of an even balance.

TEN WEEK.

- 1100 Large Flowered Dwarf, Mixed. Very showy, large flowers. 3d. and 6d. per packet.
- 1101 Giant Perfection. Beautiful double spikes. One of the best strains. 6d. and 1/- per packet.
- 1105 Perpetual Flowering. Hardy, constant bloomer; various colors. 6d. per packet.
- 1112 Anderson's Special Strain. Large Flowering. 1/- per packet.

BROMPTON.

- 1117 Mixed. 6d. per packet.

INTERMEDIATE.

- 1118 Finest Mixed. 6d. per packet.

"NICE," GIANT.

- 11251 Anderson's Special Mixture. Contains a mixture of all the "Nice" varieties. 1/- and 2/6 per packet.

GIANT IMPERIAL, EARLY.

- 11300 Anderson's Special Mixed. A perfect blend of all varieties of this meritorious class. 1/- and 2/6 per packet.

ANDERSON'S ZINNIAS

ZINNIAS: In temperate districts very early sowings are not advisable.

SOW AUGUST TO JANUARY
The Evolution of the Zinnia

ZINNIAS REVEL IN THE
HEAT AND SUNSHINE.

The first Zinnias were introduced in 1860 in the form of a small daisy-like flower, which originated in Mexico. For several years they remained in the background, and were then developed by John Bodger, of California. The result thereof is:—

These outstanding strains merit a place in any garden.

Zinnias are strikingly beautiful. The plants are sturdy. During the heat of Summer they flower profusely. For cut flower purposes the flowers are excellent. The plants are relatively free from disease, and practically immune from attacks by fungal and insect pests. They are splendid subjects for mixed borders or bedding purposes.

Zinnias are not over-fastidious as to soil. They require little care in the matter of cultivation. When planting out the seedlings, allow approximately, for tall varieties, 15 to 18 inches either way for the plant to fully develop; and for dwarf varieties 9 to 12 inches will answer the purpose.

All Zinnia seed offered by us is a direct importation of Bodger's noted Californian strain. You can, therefore, rely upon getting the best—

—the best that money can buy.

Giant Dahlia-Flowered

Height, 2½ to 3 feet.

From the Giant Robusta strain the popular Dahlia-flowered type was evolved. The first Dahlia-flowered Zinnia was red in color. From this the present remarkable line of Dahlia-flowered Zinnias was started, and now this line embraces many shades of distinct colorings.

- 1226 Exquisite—Rose.
 - 1227 Golden State—Orange.
 - 1228 Illuminator—Deep Rose.
 - 1229 Crimson Monarch—Crimson
 - 1230 Scarlet Flame—Scarlet.
 - 1231 Meteor—Glowing Red.
 - 1232 Old Rose.
 - 1233 Oriole—Orange and Gold.
 - 1234 Dream—Lavender.
 - 1235 Polar Bear—White.
 - 1236 Buttercup—Creamy Yellow.
 - 1237 Canary Bird—Primrose.
 - 1238 Lemon Beauty—Lemon on Brown.
 - 1239 Purple Prince—Rhodanthepurple.
 - 1240 Youth—Light Rose.
 - 1241 Golden Dawn—Golden yellow.
 - 1242 Eldorado—Pleasing shade of Rose.
 - 1243 Luminosa — Bright deep Pink, with light suffusion of Salmon.
 - 1244 Old Gold—Beautiful shade of Old Gold.
- Each variety, 9d. per pkt.: 6 pkts. for 4/3; 12 pkts. for 8/-; or the full collection of 19 sorts for 11/-, Post Free.
- 1225 Anderson's Choice Mixed. 1/- and 2/6 per pkt.

ZINNIA GIANT MAMMOTH.

Giant Mammoth

Height, 2½ to 3 feet.

The Giant Mammoth Zinnia presents a very pleasing appearance; it possesses smaller centres and more loosely placed petals than the old Giant type. The petals are imbricated, and the flower assumes a succession of graceful shapes from bud to bloom. The following varieties should merit the attention of all gardening enthusiasts.

- 1261 Cerise Queen—Color, Cerise Rose.
 - 1262 Enchantress—Rose.
 - 1263 Lemon Queen—Lemon Orange.
 - 1264 Miss Wilmott—Soft Pink.
 - 1265 Orange King—Brilliant Orange.
 - 1266 Orange Queen—Golden Yellow.
 - 1267 Rose Queen—Bright Rose.
 - 1268 Scarlet Gem—Glowing Scarlet.
 - 1269 Violet Queen—Deep Violet.
 - 1270—Lavender Gem — Interesting-compelling shade of Lavender.
 - 1271 Brightness — Bright Deep Rose.
 - 1272 Salmon Queen—Blending of Salmon-Rose.
 - 1273 Grenadier—An attractive, rich deep Red.
- Each variety, 1/- per pkt.; 4 pkts. for 3/6; 8 pkts. for 6/6; 13 pkts. for 9/-. Post Free.
- 1260 Anderson's Grand Mixture of above, 1/- and 2/6 per packet.

Zinnia Pumila Picotee, Delight

Height: about 2 feet.

The petals of the flowers are ruffled and curled, a large percentage having fringed petals with gold or picotee tips. The texture and petite appearance of the blooms place this strain in a special class for either bedding effects or cut-flower use.

- 1290 Pumila Picotee Delight. Mixed—Contains an assortment of most pleasing colours: Salmon, Cream, Buff, Biscuit, Yellow, and Lavender.
 - 1291 Pumila Picotee Delight, Salmon-Rose—An extra select strain of light and deep Salmon shades—tints that are popular for decorative work.
- Each variety, 1/- per pkt.; the two for 1/9. Post Free.

Grandiflora Robusta

Height, 2½ to 3 feet.

This type of Zinnia has become a wonderful favourite with gardeners.

- 1196 Crimson
- 1197 Cardinal Red
- 1198 Sulphur Yellow
- 1199 Purple
- 1200 White
- 1201 Golden Yellow
- 1202 Flesh Colour
- 1203 Scarlet
- 1204 Apricot Buff
- 1205 Deep Rose
- 1206 Salmon
- 1207 Burnt Orange

Each variety:
6d. per pkt.
3 pkts. for 1/6
6 for 2/9
8 for 3/6
12 for 5/-.
Post Free.

1195 Mixed, 6d. and 1/- pkt.

Lilliput

Height, 12 to 18 inches.

This charming class of Zinnia is admirably suited for growing along the edges of flower borders, or for massing in beds. The growth is compact, and by planting beds of self colors, some striking effects can be obtained.

- 1181 Scarlet Gem
- 1182 Canary
- 1183 Salmon Rose
- 1184 Golden Gem
- 1185 Dark Crimson
- 1186 White Gem
- 1187 Flesh
- 1188 Purple

Each variety:
6d. per pkt.
6 pkts. for 2/9
8 pkts. for 3/6
Post Free.

1180 Mixed. 6d. per packet.

Miscellaneous Types

- 1174 Grandiflora Plenissima, Mixed. The flowers are very fine, sometimes six inches across; colors intense. 3d. per packet.
- 1176 Elegans Curled and Crested, Mixed. Flowers beautifully twisted and curled, giving a most attractive appearance. 3d. per packet.
- 1177 Elegans Double Striped or Zebra. Flowers distinctly striped; 18 inches. 3d. per packet.
- 1179 Elegans Tom Thumb Double, Mixed. Very dwarf; only 12 inches. 3d. per packet.
- 1192 Crown O'Gold, Mixed. The outstanding feature of this strain is that each petal of the flower is overlaid with a deep golden yellow at the base, while the tips carry out the individual flower-colour. For size of flower, height and general robustness, this strain resembles the popular Dahlia-flowered. The range of colour covers such becoming shades as Old Rose, Cream, Yellow, Carmine-Red and Pink. 1/- per packet.
- 1193 Linearis. The narrow-leaved plants are dwarf, about 12 inches in height; and, when in flower, are covered with numerous small, bright orange-coloured, single blooms, producing a brilliant effect. Suitable for edgings, small beds or rockeries. 6d. per packet.
- 1194 Double Giant Picotee. The colours of its large flowers are remarkably clear, each petal being distinctly tipped with well defined markings, giving the flowers a very pleasing appearance. Height, 2 feet. 1/- per packet.

ANDERSON'S CALENDULAS

(ENGLISH MARIGOLDS)

CALENDULA "RADIO"

Sow in Autumn or Spring. Warm climates, Autumn sowings give best results.

Great strides have taken place in the development of the Calendula. The double types of Calendula have been much improved both in size and fullness of flowers. These types are now far in advance of the old single and semi-double varieties. They make a wonderful display in the garden and are a considerable acquisition as cut flowers. Height, 18 inches.

147 Golden Delight. The plants are robust; the golden yellow flowers are fully double and have loosely-formed petals, giving a graceful appearance. 1/- per packet.

148 Campfire. The plants are of strong sturdy growth and large even petals; flowers are borne on long, stout stems; the color is brilliant orange with a scarlet sheen, and yellow centre. The blooms are larger and more flat than those of any variety previously introduced. 9d. per packet.

149 Lemon Queen. Sunflower yellow. 9d. per packet.

150 Meteor. Double, golden coloured, striped. 3d. per packet.

151 Prince of Orange. Double, rich, orange. 3d. per packet.

151a Radio. The flowers are intense orange in color and are borne on stems of medium length. The petals are curled, giving the flowers a distinct and exquisite appearance. 9d. per packet.

151b Golden Radio. See Novelty pages.

152 The Ball. The flowers are long-stemmed, very large, uniformly double, and, in color, a charming orange with a light centre. This variety is excellent for garden-bedding and ideal as a cut-flower. 6d. per packet.

153 Orange King. Produces large dark-centred, double flowers—up to 3½ inches in diameter—of an intense deep orange-red, suitable for cutting. 6d. per packet.

ANDERSON'S DELPHINIUMS

(PERENNIAL LARKSPURS)

Sow during Autumn and Spring.

399 "Gold Medal" Strain. An improved type of Delphinium. "Gold Medal" Strain contains the following colors: Light blue, deep blue, mid blue, and unique pastel shades. Mixed seed, per packet, 1/6 and 2/6.

401 Formosum. Graceful, lovely blue flowers. 6d. per packet.

402 Hybrids, Mixed. Choice selection, best varieties; flower spikes 2 to 3 feet in length. Australian-saved Seed, 6d., 1/- and 2/6 per packet.

403 Nudicaule. Bright scarlet; dwarf, compact. 6d. per packet.

407 Cardinal. Vivid scarlet. Height, 2½ feet. 6d. per packet.

407a Belladonna Improved. The individual florets are larger and of brighter blue. It excels for continuous blooming. Price, per pkt., 1/6 and 2/6.

409 Belladonna. Very superior; long spikes; azure blue. 1/- per packet.

409a Bellamosa. Dark blue, 1/- per pkt.

Butterfly Type

Butterfly Delphiniums are particularly worth-while growing. The colors are good and the flowers are borne in the form of artistic sprays, which are admirably suited for decorative purposes. The Butterfly varieties are dwarf-growing, 12 to 15 inches high.

403a Chinensis, Cambridge Blue. The colour—Cambridge blue—is rich, clear, and noted for its brilliancy. Height, 2 to 3 feet. 1/- per packet.

404 Butterfly, Azure Blue. 6d. per pkt.

405 Butterfly, Dark Blue. 6d. per pkt.

406 Butterfly, White. 6d. per packet.

408 Butterfly, Mixed. 6d. per packet.

DELPHINIUM: Gold Medal Strain.

ANDERSON'S ICELAND POPPIES (PAPAVER NUDICAULE)

SOW FROM MID-SUMMER TO LATE AUTUMN.

All our Iceland Poppy Seed is Australian raised; therefore suited to local conditions. Height, 18 to 24 inches.

ICELAND POPPY.

- 907 Anderson's Special Strain**—The plants of this re-selected strain are robust, and produce freely, on extra long stems, large flowers—a very high percentage of which are brilliant orange shades. Price, per pkt., 1/-.
- 907a Anderson's Winter Delight.** This early-flowering strain covers a range of shades from light mandarin to medium orange. The flowers are large, long-stemmed and open nicely. Price, per packet, 1/-.
- 908 Coonara Pinks**—A combination of pink and salmon shades. The flowers are borne in great profusion on long stems, specially desirable for cutting. Price, per packet, 9d.
- 909 Baker's Sunbeam.** Distinct type. Ideal plants for border and bedding purposes. Price, per packet, 1/-.
- 910 Improved Sunbeam.** The flowers of this strain include many new art tints, such as Maize, Cream and Rose tones. The flowers are large, and borne on long, stout stems. Price, per packet, 1/-.
- 911 Girrahween.** The range of colors includes orange and yellow. Beautiful flowers, with long stems. Price, per packet, 1/-.
- 912 May Farm.** A special long-stemmed strain of Poppy, producing large flowers. Price, per packet, 1/-.
- 913 Gartref: Dark-edged Strain.** A unique strain obtained as the result of re-selection. The majority of the blooms has distinct dark-edged petals. The flowers are large in size. The color tones range as follows: Cream, Biscuit, Fawn, Salmon, Apricot, Yellow, Old Gold, Pink, Rose and Bronze. Price, per packet, 1/6 and 2/6.
- 894 Mixed.** Contains free-flowering varieties in many shades. Price, per packet, 3d. and 6d.
- SHIRLEY AND OTHER POPPIES (see Papaver, page 26).

ANDERSON'S LARKSPURS (ANNUAL DELPHINIUMS)

SOW AUTUMN.

Most valuable of our hardy annuals; graceful foliage; flowers of beautiful colours.

Giant Imperial

Originating from the stock-flowered type, this excellent strain is valuable as a cut-flower; while the upright Delphinium-like growth and base-branching habit are factors that promote this hardy annual to the front ranks in garden-decoration. Height, 3 feet.

- 574a Blue Spire.** An intense Oxford Blue.
- 574b Lilac Spire.** A beautiful popular color.
- 574c Rose Spire.** A pleasing shade of deep Rose-pink.
- 574d White Spire.** A pure white. Long straight upright stems, useful for cutting.
- 574e Peach Spire.** A real, clear, light pink, without a trace of salmon.
- 574f Salmon-Rose Spire.** A lovely shade of salmon-rose.

Each of the above, 1/- per packet; the set of six for 5/-. Post Free.

Mixtures

- 570 Dwarf Rocket, Double Mixed.** 12 inches. 3d. per packet.
- 573 Ranunculus Flowered, Mixed.** 18 inches. 3d. per packet.
- 574 Giant Hyacinth Flowered, Mixed.** 2 feet. 3d. per packet.
- 574g Giant Imperial, Mixed.** Height, 3 feet. 1/- per packet.
- 575a Tall Stock-Flowered, Mixed.** Double-flowering. Height, 2½ to 3 feet. 6d. per packet.

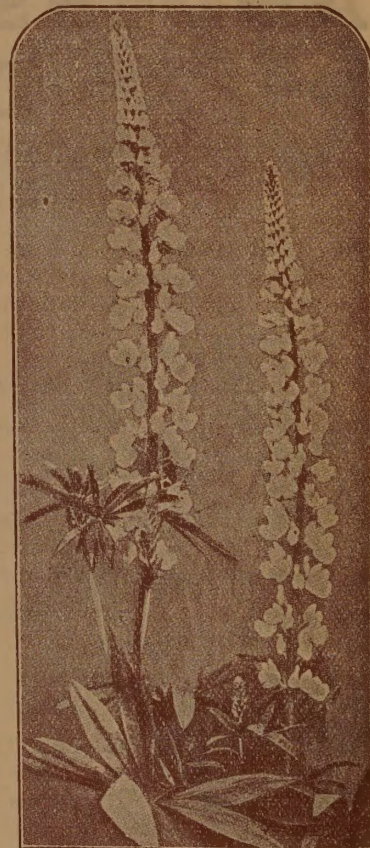

Stock Flowered

These following **DOUBLE-FLOWERING LARKSPURS** should prove very effective for bedding. Height, 3 feet:—

- 582c La France.** Of outstanding merit; has proved popular on account of the striking color—a pleasing Salmon Pink.
- 582f Exquisite Pink Improved.** The flowers are an exquisite pink, arrayed on long graceful stems; this acquisition is most valuable for cutting.
- 582g Los Angeles.** The foliage intense green, thus affording the flowers more prominence. The color is a rich salmon ground overlaid with a brilliant and pleasing rose.
- 582h Miss California.** A very deep, rich pink on a salmon ground. The flowers are placed in such a manner as to give a Delphinium-like appearance.
- 582j Carmine King.** A showy tone of deep carmine rose.

Each of the above, 9d. per packet; set of five for 3/-. Post Free.

- 575 True Blue.** **582 Bright Pink.**
- 576 Lilac.** **582a Carmine.**
- 578 Purple.** **582b White.**
- 579 Sky Blue.** **582c Old Rose.**
- 580 Scarlet.** **582d Exquisite (Pink).**
- Each of the above, 6d. per packet; 6 packets, five for 3/-. Post Free.

LUPIN.

ANDERSON'S LUPINS

SOW AUTUMN AND SPRING.

Price, per packet, 6d. Except where otherwise priced. The flowers are most attractive.

- 689 Hartwegii, Royal Blue.** A deep rich color.
- 690 Hartwegii, Azure Blue.** A nice bright color.
- 691 Hartwegii Roseus.** Light rosy red.
- 692 Hartwegii Alba.** Pure white.
- 693 Yellow.** Delightful fragrance.
- 694 Hartwegii Superb Mixed.** Handsome tall spikes of flowers; effective and showy. Height, 3 feet.
- 694a Mixed.** 3d. per packet.
- 695 Dunnettii Superbus.** Purple, Yellow, White.
- 696 Cruickshankii Blue.** Fine variety; 2 feet.
- 697 Nanus.** Pretty dwarf; blue; 6 to 9 inches.

- 701 Polyphyllus Hybrids, Mixed.** Perennial strain, producing superb spikes of flowers.
- 702 Pink Pearl.** A bushy growing type, free-flowering, constant and good bloomer.
- 703 Blue Pearl.** Charming companion flower to Pink Pearl.
- 703a White Pearl.** This variety completes the trio of this attractive type.
- 704 Blue Hybrids.** This Australian Hybrid Lupin carries beautiful spikes of flowers. Height, 4 feet.
- 705 Hybridus Atrococcineus.** Red, white-tipped flowers.
- 705a Hybridus Roseus.** Clear pink.

Anderson's General List of Flower Seeds

ABRONIA

6d. per packet.

Sow in Spring and Autumn.

Trailing plant, suitable for rockery; waxy Verbena-like flowers, scented; hardy annual. 8 inches.

1 *Umbellata*. Rosy-lilac, fragrant.

ACROCLINIUM

3d. per packet.

Sow Autumn or Spring.

Beautiful everlasting; can be dried for winter bouquets; hardy annual. 12 inches.

5 *Album, Single*. Graceful, white, yellow centre.

6 *Roseum, Single*. Rose dark eye.

7 *Roseum, Double*. Pretty bright rose, with yellow centre.

8 *Mixed*. All colours.

ACTINOTUS

Australian Flannel Flower.

1/- per packet.

Sow Summer and early Autumn.

Height, about 2 feet.

9 *Helianthi*. Daisy-like flowers of flannel-like appearance.

ADONIS

6d. per packet.

Sow in Spring, 12 inches.

10 *Vernalis*. Perennial; star-shaped yellow flowers.

11 *Aestivalis* (*Flos Adonis*). Annual. Crimson scarlet. Free flowering; feathery foliage; very showy.

AGATHEA

Blue Marguerite.

6d. per packet.

Sow Autumn and Spring.

Showy perennial border plant. Height, 18 inches. Likes sunny situation.

11a *Coelestis*. Blue, yellow centre.

AGERATUM

6d. per packet.

Sow in Autumn and Spring.

12 *Imperial Dwarf*. Blue.

13 *Tall*. Blue.

14 *Blue Cap*. The foliage is small and the plants have the appearance of miniature domes, so that it is quite the beau ideal for edging.

AGROSTEMMA

6d. per packet.

Sow Autumn and Spring.

An attractive free-flowering annual of easy culture; fine for cutting; height, about 2 feet.

15 *Coeli-Rosa* (*Rose of Heaven*). Flower-heads consist of several lightly-arrayed, beautiful pink flowers, singly, in size about that of a shilling.

ALYSSUM

3d. per packet. Sow Autumn or Spring.

16 *Carpet of Snow*. Very dwarf, 2 to 3 inches; pure white.

17 *Maritimum* (*Sweet Alyssum*). Hardy annual; small truss of white flowers in great profusion; cutting down after flowering promotes new growth.

18 *Maritimum Compactum* (*Little Gem*). Very dwarf, erect variety.

19 *Saxatile*. Dwarf, showy, hardy perennial; yellow flowers; leaves hoary margined.

20 *Lilac Queen*. Pure lilac, dwarf.

AMARANTHUS

3d. per packet.

Sow during September, October, November, December.

Magnificent foliage plants, with gorgeous leaves of crimson and gold, green and yellow; colours deeper in the Autumn. They are beautiful border plants, requiring plenty of room, good soil, and a warm position. *Salicifolius* is perhaps the best—a most lovely variety—but *Tricolour* is also a gem. Both are grown for their beautiful coloured leaves. They are hardy annuals.

22 *Salicifolius* (*Fountain Plant*). Crimson and yellow plume. 4 to 5 feet.

23 *Tricolour* (*Joseph's Coat*). Leaves red, yellow and green. 3 to 5 feet.

AMARANTHUS (continued)—

24 *Henderii*. Leaves carmine, orange yellow and green. 4 feet.

25 *Firebrand*. Large leaves, deep blood-red, bright yellow edges. 6 feet.

27 *Caudatus* (*Love-lies-bleeding*). Racemes of drooping purplish crimson flowers. 3 feet. Not a foliage plant.

28 *Tricolor Aurora*. Foliage red, yellow and green; brilliant carmine head. 6d. per packet.

29 *Choice Mixed*. A selection of the best varieties. 1/- per packet.

ANAGALLIS

Pimpernel.

6d. per packet.

Sow in Autumn or Spring.

A pretty dwarf-growing annual, constant bloomer, and very compact habit.

35 *Grandiflora, Choice Mixed*.

ANCHUSA

Cape Forget-Me-Not.

6d. per packet.

Sow in Autumn and Spring.

Free flowering; excellent for bouquet; like a strong-growing Forget-me-not.

41 *Capensis*. Biennial, height 2 feet. Bright azure blue.

42 *Italica, Lissadell*. Perennial, height 4 to 5 feet. Clear gentian blue.

43 *Blue Bird*. Annual, height 18 inches. Indigo blue.

ANEMONE

6d. per packet.

Sow early in Autumn.

Tuberous-rooted plants, easily produced from seed; magnificent colours; blooms early in Spring, when flowers are scarce. Requires good, rich, well-drained light soil.

46 *Coronaria, Mixed*. 12 inches high.

47 *St. Brigid*. The Irish Poppy-flowered Anemone. Large, single and semi-double flowers of an endless variety of color.

(See our Bulb List for Tubers of Anemones).

ANTHEMIS

6d. per packet.

Sow Autumn and Spring.

Beautiful flower of single *Chrysanthemum* type, excellent border plant.

51 *Kelwayii*. Color, brilliant golden orange yellow.

ANTIRRHINUM

52 to A139: See page 12.

AQUILEGIA

Columbine.

6d. per packet. Except otherwise priced. Sow in Autumn and Spring.

Very showy, hardy, herbaceous perennials; make handsome border plants; easily grown, requiring a light soil. 18 to 24 inches.

67 *Coerulea Hybrida Grandiflora, Mixed*. Single long-spurred varieties.

68 *Chrysantha Grandiflora Alba* (*White Spurred*). Snow-white flowers of elegant shape.

69 *Blue Shades*. Long-spurred, large flowers.

69a *Orange Shades*. Long-spurred, large flowers.

70 *Pink Shades*. Long-spurred, large flowers.

71 *Mixed*. Finest sorts. 3d. per packet.

73 *Rose Queen*. Long-spurred, single, rose-colored, white centre, yellow anthers.

74 *Mrs. Scott Elliott's Strain*. A magnificent strain of single flowers, unexcelled. 1/- per packet.

75a *Copper Queen*. Unique strain.

ARABIS Rock Cress.

6d. per packet.

Sow in Autumn and Spring.

For borders or rock work, blooming freely; hardy perennial; 6 inches.

76 *Alpina*. White, very dwarf.

ARCTOTIS

6d. per packet.

Sow in Autumn and Spring.

78 *Grandis*. Flowers single; white with pale violet centre.

ASTER

82 to A359: See page 13.

AUBRETIA

6d. per packet.

Sow in Autumn.

Hardy perennial, suitable for edgings and borders.

109 *Leichtlini*. Luminous carmine rose.

AURICULA

1/- per packet.

Hardy perennial; suitable for the cooler districts. Height, 6 inches.

112 *Choice Mixed*. Best sorts.

BALSAM

6d. per packet. Except otherwise priced. Sow in Spring and Summer.

A favourite annual, producing rose-like blooms of various colours in great abundance. Suitable for outside cultivation and for pots. Requires rich soil and plenty of moisture.

114 *Carnation*. Striped and flaked; attractive.

115 *Solferino*. Streaked and spotted; distinct.

116 *Camellia Flowered, Choice Mixed*.

117 *Camellia Flowered Alba Perfecta*. White; double.

118 *Camellia Flowered, Prince Bismarck*. Double, brilliant salmon rose; very free.

118a *Camellia Flowered, Primrose*. Extra double, compact. 2 inches across.

119 *Choice Mixed*. 3d. per packet.

BEGONIA

Tuberous Rooted.

Sow in Spring.

These charming plants require great care in raising from seed, which is very small, and must be sown in light soil in a frame or green-house, and afterwards grown in pots. Foliage very handsome; graceful, drooping flowers, most attractive tender perennials. 18 inches.

124 *Single*. Charming colors. 1/- pkt.

125 *Double*. Beautiful shades. 2/6 pkt.

BEDDING OR FIBROUS ROOTED.

Sow Spring and Summer.

Dwarf growing perennials for bedding and edging. The flowers and foliage make a good display. Height, 9 to 12 inches.

127 *Semperflorens, Mixed*. Deep green shining foliage and profusion of flowers. 6d. per packet.

128 *Semperflorens, Prima Donna*. Clear rose, light leaf. 1/- per packet.

128a *Semperflorens, Gracilis Luminosa*. Scarlet, bronze leaves. 1/- per pkt.

128b *Semperflorens, Fireball*. Orange, green foliage. 1/- per packet.

128c *Semperflorens, Salmon Queen*. Salmon, dark leaf. 1/- per packet.

128d *Semperflorens, Queen of the Border*. Carmine, green leaf. 1/- per packet.

128e *Semperflorens, Broadcast Radio*. Vivid scarlet carmine. 1/- per pkt.

BORONIA

6d. per packet.

Sow in Spring.

129 *Megastigma*. Sweetly-scented. Color, brown and yellow.

BRACHYCOME

Swan River Daisy.

6d. per packet.

Sow in Autumn and Spring.

Hardy annual, compact, stands dry weather; flowers daisy-like; produced in great profusion; prefers rich, light loam. 9 inches.

130 *Iberidifolia*. Bright blue flowers.

131 *Iberidifolia Alba*. Pure white flowers.

BRAZILIAN GLORY PEA

(See Sesbania, page 28)

BROWALLIA

6d. per packet.

Sow early in Spring.

Pretty hardy annuals, covering themselves with bloom; nice border plants; do best in rich, light loam. 15 inches.

133 *Alata Coerulea*. Large bright blue.

134 *Alba*. White; very pretty variety.

136 *Speciosa Major*. Large blue flowers.

CALCEOLARIA

Sow Autumn.

A charming perennial plant for frame, conservatory or bush-house culture only. 12 to 18 inches.

143 *Shrubby*. Self colors—yellow, brown. 1/6 pkt.

144 *Finest Mixed*. Selected strain; robust; floriferous. 2/6 per packet.

CALENDULA

147 to 153: See page 17.

CALIFORNIAN POPPY

(See Eschscholtzia, page 23)

CALLIOPSIS

Coreopsis.

Price, 3d. per packet.

(Except where otherwise marked).

Sow Autumn and Spring.

Hardy annuals and perennials. Not particular as to soil; a long time in bloom.

154 *Dazzler*. Rich maroon, red centre.

155 *Drummondii*. Yellow, crimson centre.

156 *Grandiflora*. Perennial; golden yellow.

157 *Lanceolata*. Perennial; fine yellow.

158 *Atropurpurea*. Rich brownish crimson.

159 *Bicolor Hybrida*. Double flowers.

160 *Coronata Maxima*. Golden yellow.

161 *Marmorata*. Yellow, splashed crimson.

162 *Golden Ray*. Golden yellow, crimson centre.

163 *Fire King*. Deep bright scarlet, cactus-shaped petals.

163a *Mayfield Giant*. Perennial variety of Australian origin. 6d. per pkt.

164 *The Garnet*. A dwarf variety, glossy, crimson scarlet, very effective in masses.

164a *Grandiflora, Double*. Producing a very large percentage of semi-double golden yellow flowers on long slender stems. Hardy perennial.

164b *Mixed*.

CAMPANULA

6d. per packet.

Sow in Autumn.

165 *Pyramidalis Alba*. A magnificent white, flowering variety, with long spikes.

166 *Pyramidalis*. Blue, magnificent spikes.

167 *Persicifolia Grandiflora, Mixed*. An exceedingly fine strain; large flowers.

CANARY CREEPER

(See TROPÆOLUM, page 28).

CANTERBURY BELLS

3d. per packet. Except otherwise priced.

Sow in Autumn or Spring.

A family of very showy border plants, the colours being very distinct and rich. Sow in frame or box and plant out in the border later. Free bloomers, hardy perennials.

175 *Double Blue*.

176 *Double Rose*.

177 *Double White*.

177a *Double Mixed*.

178 *Single White*.

179 *Single Blue*.

180 *Single Rose*.

180a *Single Mixed*.

All of the Finest Strain.

181 *Calycanthema, Mixed*. Charming, saucer-like outer petals. 6d. per pkt.

182 *Striata*. White, streaked violet.

CARNATION

Price, per packet, 1/6.

(Except where otherwise priced).

Sow Autumn and Spring.

The perennial varieties should produce a large percentage of first-class flowers, being saved from a magnificent collection of named sorts. Sow in pots or boxes in light soil, and keep carefully watered until the plants are large enough to prick out. Marguerite varieties are very hardy, and easily raised from seed, and flower first season.

PERENNIAL SECTION.

213 *Bizarre*. Flaked and striped; excellent.

214 *Grenadin*. Brilliant double scarlet.

215 *Anderson's Choice Double Mixed*. Superb stock; best sorts.

216 *Perpetual Flowering, Mixed*. Superb free bloomers.

217 *Yellow Ground Perpetual*. Race of perpetuals, producing much required yellow shades.

218 *Riviera ("Nice Giant")*. Superb mixture; saved from the largest blooms.

218b *Superb-mixed (Australian-saved)*. Seed fertilised and saved from finest crosses of Australian and American Carnations. 2/6 and 3/6 per packet.

MARGUERITE SECTION.

219 *Mixed*. Flowers first season from seed; large proportion double; varied colors. 6d. per pkt.

220 *Giant White*. Beautiful pure white. 6d. pkt.

221 *Giant Malmaison, Anderson's Special Strain*. Enormous double flowers. 1/- per packet.

222 *Giant Golden Yellow*. 6d. per pkt.

223 *Giant Dark Red*. 6d. per packet.

224 *Giant Pink*. 6d. per packet.

CHABAUD SECTION.

225 *Chabaud's Improved Mixed*. Robust, upright habit; clove-scented. 1/- per packet.

226 *Chabaud's Enfant De Nice, Mixed*. This magnificent strain is of robust, upright habit, with long strong stalks bearing flowers 2½ to 3 inches in diameter. About 90 per cent. come double. 1/6 per packet.

CELOSIA

Cockscomb.

6d. per packet.

Sow in Spring and Summer.

The three first-named produce large cockscomb-like heads. Thompsoni bears its flowers in feathery spikes, and should have the leader pinched out, which will improve its habit. Half-hardy annuals.

233 *Dwarf, Mixed*. Choice selection; colored heads. Height, 9 to 12 inches.

234 *Dwarf Crimson*. Standard variety.

235 *Carter's Empress*. Crested, bright scarlet. Height, 9 to 12 inches.

236 *Thompsoni Magnifica, Mixed*. A feathered Cockscomb of great beauty; the plumes of various colors, from golden to dark crimson. Height, 2ft.

236a *Childsii, Mixed (Chinese Wool Flower)*. So named because the flower heads resemble a large loose ball of wool. Height, 18 inches.

CANDYTUFT.

CANDYTUFT

Iberis.

3d. per packet.

Sow in Autumn and Spring.

This pretty family is well worth a place in the garden. They bloom in great profusion, and are very useful for cut flowers.

185 *Dobbie's White Spiral*. Pure white spikes, 4 inches long.

185a *Flesh*. Delicate shade.

186 *Giant, Hyacinth Flowered*. Immense spikes of pure white flowers; improved strain; 15 inches.

187 *White Rocket*. Magnificent spikes.

188 *White*. Large, effective and handsome.

188a *Lavender*. Attractive.

189 *Purple*. Large fine trusses.

190 *Carmine*. Flowers rich carmine.

190a *Rose Cardinal*. Effective color.

192 *Empress*. Trusses of pure white.

194 *Tom Thumb, White*. Dwarf.

195 *Dwarf Crimson*. Rich glowing color.

197 *Mixed*.

CANNA

6d. per packet.

Sow Autumn and Spring.

Magnificent decorative plants with handsome foliage and brilliant flowers. Shows to advantage when massed. May also be grown in tubs or pots. 3 to 4 feet high.

205 *Madam Crozy*. Crimson, with gold margin.

206 *Crozy's Hybrids, Mixed*. Very effective.

For Canna Plants, see page 54

CENTAUREA CYANUS

Cornflower.

Sow in Autumn and Spring.

The Centaurea is one of the most useful annuals in cultivation. It blooms during winter in profusion, and is most useful for cutting for bouquets in Winter and Spring. The plants should stand one foot apart, and can be transplanted. The double type of flower is immensely suitable for floral work. Height, 1½ to 2 feet.

- 242 Double Rose. 6d. per packet.
242a Double Blue. 6d. per packet.
242b Double Ruby. 6d. per packet.
242c Double Mauve. 6d. per packet.
243 Single Blue. Charming. 3d. per pkt.
246 Single Mixed. 3d. per packet.

CENTAUREA MOSCHATA

Sweet Sultan.

6d. per packet.

Sow Autumn and Spring.

- 252 Blue. Double.
253 Purple. Double.
254 White. Double.
255 Odorata Marguerite. Large white, scented.
256 Suaveolens. Yellow Cornflower.
257 Imperialis. Mixed. Large flowers.
258 Americana. Large flowers, 3 to 4 inches in diameter. Mauve color.
259 Imperialis, Amaranth Red. Graceful flowers.
252a Mixed.

CENTAUREA CANDIDISSIMA

6d. per packet.

Sow in Autumn.

- 260 Valuable Perennial Foliage Plants for Ribbon Bordering. Compact plants, with silvery foliage. 12 ins.

CHEIRANTHUS

1/- per packet.

Sow Autumn and Spring.

- 263 Allioni. A variety of Wallflower, dwarf in habit, brilliant orange yellow. Treat as an annual.

CHRYSANTHEMUM

ANNUAL SECTION.

Marguerite Varieties.

3d. per packet.

Sow during Autumn or Spring.

These varieties are hardy annuals; strong growers, showy, and are admirably suited for cutting; they keep a long time in water. Height, 18 ins. to 2 feet.

- 265 Double Hybrids. White, yellow and crimson; various colored centres.
269 Tricolour Dunnetti. Single, Mixed. Very showy.
272 Segeteum (Corn Marigold). Yellow.
273 Tricolor Coccineum (Tom Thumb). Branching; scarlet flowers.
274 Golden Wheel. Golden yellow. Purple centre.
275 Carinatum, Northern Star. Blooms 3½ inches across. White, soft yellow in centre.
276 Coronarium, Primrose Gem. Compact variety; double flowers.
277 Silver Wheel. Silvery white.

PERENNIAL SECTION.

- 279 Frutescens (Paris Daisy). Lovely flower, hardy, bushy growing. Per packet, 6d.

- 279a Mawil. See Novelty pages.

LEUCANTHEMUM OR SHASTA DAISSY VARIETIES.

- 280 Grandiflorum Hybridum (Shasta Daisy). Dwarf habit. Flowers pure glistening white. Single; yellow centre. Per packet, 6d.
281 Gigantic Shasta Daisy "Alaska." Flowers white, 4½ to 5 inches in diameter. Per packet, 6d.
282 "Chiffon Daisy." Flowers pure white, narrow tassel-like petals. Per packet, 1/-.
283 Maximum, The Prince. Glistening white; 5 inches across flower. Per packet, 1/-.

CHRYSANTHEMUM (continued)—

JAPANESE VARIETIES.

- 284 Inodorum, Double, White. A percentage of double only. 6d. packet.
285 Indicum, Double, Mixed. A percentage double only. Per packet, 6d.
286 Early Flowering, Mixed. This mixture contains single and double varieties. Saved from named sorts that are vigorous and that have blooms of good substance and color. 1/- packet.

CINERARIA

Sow December to February.

In coastal districts this elegant and brilliant-flowered plant is now in demand for massing in beds and borders where sheltered from strong winds. Use light soil, mixed with old cow manure, a little sand and old vegetable mould made from decayed leaves. Can also be grown in bush or green-house. Height, 18 to 24 inches.

- 290 Hybrida Grandiflora, Single, Choice Mixed. Charming colors. Superior to double variety. 1/- and 2/6 pkt.
292 Hybrida Grandiflora, Double. Very select strain, producing large percentage of double flowers. 1/6 pkt.
293 Californian Special Prize Strain. Individual florets of flower-heads measure 2 to 2½ inches across. Per pkt., 2/6

CINERARIA

ORNAMENTAL-LEAVED VARIETY.

6d. per packet.

Sow in Spring.

Beautiful silver leaves; effective in carpet bedding; 12 inches high.

- 296 Maritima Candidissima. Large leaves.

CLARKIA

6d. per packet.

Sow in Spring and Autumn.

A showy, hardy annual; easily grown; very effective in masses. Height, 18 inches.

- 298 Elegans, Single Mixed.
299 Elegans, Double Mixed.

DOUBLE, SEPARATE COLORS.

- 300 Snow Queen. White.
300a Apple Blossom. Delicate shade.
300b Brilliant. Rose.
300c Chamois. Chamois-pink.
300d Purple King. Light purple.
300e Queen Mary. Rose-carmine.
300f Salmon Queen. Salmon-pink.
300g Scarlet Queen. Orange-scarlet.
300h Orange King. Orange.
300j Chieftain. Delicate mauve.
300k La France. See Novelty pages.
300l Illumination. See Novelty pages.
Each color, 6d. per pkt.; 6 for 2/6; or 10 packets for 4/-, Post Free.

CLIANTHUS

Sow from July to end of November in a sunny situation.

- 301 Dampierii (Sturt's Desert Pea). The flowers are brilliant crimson, about 3in. long, and in the centre there is a large clear black marking, rendering it one of the most beautiful and attractive plants in cultivation. 1/- pkt.
302 Puniceus (Glory Pea). A very handsome perennial. Per packet, 6d.
303 Puniceus Alba. A white variety. Per packet, 6d.

CLINTONIA

6d. per packet.

Sow in Autumn or Spring.

Charming little plant for edgings, pots or rockeries. Sow the seed in boxes and transplant. Hardy annual.

- 307 Pulchella. Rich blue color, yellow eyes.

COBCEA

6d. per packet.

Sow Autumn and Spring.

Useful ornamental climber; magnificent large, bell-shaped flowers; rapid grower, fine foliage; hardy perennial.

- 308 Scandens. Purplish blue.
309 Scandens Alba. White.

COLEUS

1/6 per packet.

Sow Spring and Summer.

As a pot-grown foliage plant the Coleus cannot be surpassed; it is admirably adapted to our climate; requires careful sowing, as the seed is very fine. Must be grown freely in good, rich soil, with plenty of moisture, light and air, when the colours will be magnificent.

- 312 Choice Hybrids, Finest Mixed.

COLLOMIA

6d. per packet.

Sow in Spring.

Hardy annual; flowers Bouvardia-like; compact habit. Height, 12 inches.

- 314 Coccinea. Scarlet and yellow.

COLUMBINE

(See AQUILEGIA, page 19).

CONVOLVULUS

Morning Glory.

Sow in Spring.

- 316 Minor. Dwarf; mixed varieties. Per packet, 3d.
317 Major. Tall; mixed, beautiful climber. Per packet, 3d.
318 Mauritanicus. Hardy perennial; for hanging baskets and rock work; beautiful blue. Per packet, 6d.

COREOPSIS

(See CALLIOPSIS, page 20).

CORNFLOWER

(See CENTAUREA, page 21)

COSMIDIUM

6d. per packet.

Sow Autumn and Spring.

Showy and hardy annual. Well adapted for massing and for cutting or table decoration. 18 inches.

- 321 Burridgeanum. Crimson and yellow.

COSMOS

Sow in Spring and Summer.

A most popular class of hardy annuals producing flowers of great beauty; most useful for table decoration. Height, 6 feet.

SINGLE VARIETIES.

- 322 Pearl. A pure white. Per pkt., 3d.
323 Dawn. White, tinted rose. Pkt., 3d.
324 Sulphurea. Yellow. Per packet, 3d.
325 Mammoth, Choicest Mixed. Pkt., 3d.
326 Klondyke. Floriferous; orange; distinct foliage. Per packet, 6d.
327 Lady Lennox. Giant pink. Pkt., 3d.
328 Pink. Large flowering. Per pkt., 3d.
329 Purple. Large flowering. Pkt., 3d.
330 Crimson Ray. Crimson, overlaid velvet sheen. Per packet, 6d.
330a White Ray. Companion flower to above. Per packet, 6d.

DOUBLE VARIETIES.

- 331 Crested, Pink. Per packet, 6d.
332 Crested, White. Per packet, 6d.
333 Crested, Crimson. Per packet, 6d.
334 Crested, Mixed. Per packet, 6d.

COWSLIP

6d. per packet.

Sow in Autumn or Spring.

- 336 Primula Veris. This old English flower succeeds admirably in our cooler districts. Hardy perennial. Height, 9 inches.

CYCLAMEN PERSICUM

2/6 per packet.

Sow during Autumn and Spring in pots.

A most beautiful tribe of tuberous green-house plants, easily produced from seed if sown in light soil, in pots, and placed in a warm, sheltered corner of the bush-house.

- 337 Papilo Butterfly. Mixed. Petals crested and twisted; very striking.
339 Giganteum, Mixed. Immense flowers.

CYNOGLOSSUM

Chinese Forget-me-not.

6d. per packet.

Sow Autumn and Spring.

Bearing masses of flowers, this very attractive and hardy annual plant is splendid for bedding. Height, 2 feet.

341 Amabile, Blue.

342a Amabile, Pink.

DAHLIA

Sow in Spring and early Summer.

Seedlings will flower first season if sown early. The single varieties are elegant and graceful, and most suitable for cutting. Hardy perennials. Height, 4 to 5 feet.

343 Large Flowered, Double Mixed. Fine, select. 6d. per packet.

344 Pompone, Finest Mixed. Very small flowers; double. 6d. and 1/- pkt.

350 Double Cactus, Mixed. Australian-saved seed, from the best varieties. 6d. and 1/- packet.

351 Double Giant, or Peony Flowered, Mixed. A very distinct strain. 6d. and 1/- packet.

352 Collarette, Choice Mixed. 6d. packet.

353 Decorative, Mixed. Excellent strain. 6d. and 1/- packet.

354 Coltness Hybrids. Compact habit, 18 inches high. Colors, dark scarlet, crimson, red, yellow, white and purple. 6d. packet.

354a Mignon, Single Mixed. Dwarf, suitable for bedding. 6d. per packet.

DATURA

Trumpet Flowers.

6d. per packet.

Sow in Spring.

356 Double Golden. Compact bush, about 2 feet high, and bearing large golden funnel-shaped flowers.

DAISY

Bellis Perennis.

6d. per packet.

Sow Autumn and Spring.

Sow in a shadow box filled with light soil, and keep well watered; a cool position will suit best. The seedlings must be planted out when large enough to handle. Hardy perennials. Height, 6 inches.

360 Longfellow. Large, beautifully double dark rose.

361 Giant Snowball. Grand flower; pure white.

362 Double Mixed. All the best sorts.

363 Fistulosus. Pretty form of Double Daisy; globular; various colors.

364 Montrosa Ranunculiflora, Mixed. Ranunculus-shaped, giant-flowered Daisy; quite distinct.

DELPHINIUM

(399 to 409a: See page 17).

DESERT PEA

(See CLIANTHUS, page 21).

DIASCIA

6d. per packet.

Sow in Spring.

A pretty border plant, 6 to 8 inches high. Dainty flowers, produced in abundance during Summer.

395 Barberæ. Rosy pink.

395a Barberæ, Salmon Queen. Salmon.

DIDISCUS

Lace Plant.

6d. per packet.

Sow in Autumn and Spring.

Charming Annual.

396 Coeruleus. Also known under the name of Trachymene Coerulea. Flowers beautiful light blue.

DIGITALIS

Foxglove.

3d. per packet.

Sow Autumn and Spring.

Well-known favourite; of easy cultivation; striking and showy flower; requires plenty of space; hardy perennial. Height, 3 feet when in flower.

410 Gloxinoides. Superb variety; all colors.

411 Ivory's Finest Spotted. Superior strain.

411a Montrosa. Bears extra long spikes of large flowers. Colors include white, pink, rose, yellow and purple.

DIMORPHOTHECA.

DIMORPHOTHECA

6d. per packet.

Sow in Autumn and Spring.

ANNUAL VARIETIES.

These showy annuals are largely used in the garden for massing in beds and for edgings. The daisy-like flowers are arrayed in dainty formation above the foliage. Height, 12 inches.

436 *Rosy Queen*. Rose pink.

437 *Ballet Girl*. Carmine and creamy white.

438 *Vesuvius*. Wallflower red.

438a *Mauve Beauty*. Pure mauve.

438b *Tango*. Terra cotta on bronzy red.

438c *Enchantress*. Rosy carmine.

438d *Geisha*. Brilliant golden and orange crimson.

438e *Orange Flame*. Vivid orange scarlet.

438f *Double Rose*. Throws a large percentage of double flowers; bright rose.

438g *Ramona*. Frilled type. Color, pale, glittering coppery gold, pink shadings.

Each variety, 6d. per pkt., 6 pkts. 2/6, or 12 for 4/6, Post Free.

FELICIA

6d. per packet.

Sow Autumn and Spring.

From South Africa comes this delightful treasure. The growth of the plant is low; and, on 6-inch stems, the dainty flowers are carried clear of the foliage. Annual.

442 *Bergeriana* (Kingfisher Daisy). The colour is of that indescribable shade—the blue in the wings of the Kingfisher.

FORGET-ME-NOT

(See MYOSOTIS, page 25)

FOXGLOVE

(See DIGITALIS, page 22)

FREESIA

1/- per packet.

Sow in Autumn.

443 Hybrid. Improved strain; various colors.

FUCHSIA

2/6 per packet.

The seed we offer has been saved from the choicest varieties; hardy perennials. Sow during Spring in pans in a frame or bush-house, and transplant the seedlings into small pots; only a percentage of double flowers can be expected. Seed will not germinate in the open ground. Height, 36 inches.

445 Hybridum. Single and double.

GAILLARDIA

Sow Autumn or Spring.

Hardy annuals and perennials, producing beautiful single and double flowers; very attractive and showy. 18 inches to 2 feet high.

PERENNIAL VARIETIES.

447 *Grandiflora Portola Hybrids*. Superb strain; color bronzy red. 1/- pkt.

448 *Grandiflora, The Dazzler*. Color, rich red, bright orange tips. 1/- packet.

449 *Grandiflora, Tangarine*. Orange, overlaid red. 1/- per packet.

450 *Grandiflora, Mixed*. Large single yellow flowers, with crimson centre; long, stout stems. 3d. and 6d. per packet.

GAILLARDIA (continued)—

ANNUAL VARIETIES, 3d. per packet.

455 *Picta*. Single, red and yellow.

455a *Picta, Indian Chief*. Bronzy red; an ideal bedder.

456 *Lorenziana*. Double; yellow and deep crimson.

457 *Lorenziana, The Bride*. Very long stems, double creamy white.

GENTIANA

Blue Gentian.

6d. per packet.

Sow Autumn or Spring.

Hardy perennials; one of the most charming of our Alpine Plants; suitable for the cool districts only. 4 inches high.

461 *Acaulis*. Pretty little light blue trumpet-shaped flowers.

GERBERA

Seed, 1/- and 2/6 per packet.

This beautiful Daisy can be raised from seed, and we are now able to offer locally-saved seed of strong germination. Cultural directions with each packet.

469 *Mixed Hybrids*.

GERANIUM

(See PELARGONIUM, page 26).

GEUM

Sow Autumn or Spring.

A hardy dwarf perennial plant; bright and showy.

468 *Mrs. Bradshaw, Double Scarlet*. 6d. per packet.

468a *Lady Stratheden*. Rich golden yellow. 1/- per packet.

469a *Orange Queen*. Color bright orange scarlet. 1/- per packet.

GLADIOLUS

6d. per packet.

Sow in Spring.

This magnificent genus is easily raised, and from hybridised seeds the variety of colors and tints obtainable is endless; use sandy loam for raising seedlings. 36 inches high.

465 *Gandavensis*. Mixed.

466 *Lemoinei*. Mixed.

GLOXINIA

2/6 per packet.

Sow during Autumn.

One of the handsomest tender tuberous plants in cultivation; requires pot cultivation and the shelter of a frame, bush-house or conservatory; the flowers are charming in the extreme. Tender perennials.

470 *Grandiflora Crassifolia Erecta*. Distinct and beautiful flowers; erect, spotted and blotched; immense size; lovely foliage.

473 *Giant Flowered*. Strong growing and erect variety; flowers 4 inches in diameter.

GODETIA

3d. per packet.

Sow Autumn and Spring.

Beautiful hardy annuals; will grow in the poorest soil, and produce a grand display of gorgeous flowers, even in a dry season, and cut flowers keep well in water. Height, 12 inches to 2 feet.

475 *Sybil Sherwood*: See Novelty pages.

476 *Pelargonium*: See Novelty pages.

477 *Thunderbolt*: See Novelty pages.

478 *Fairy Queen*. Dwarf variety, large white flowers with carmine spots.

480 *Splendens*. Pretty purple blotch on each petal.

481 *Duchess of Albany*. Satiny white.

482 *Princess of Wales*. Crimson rose; large.

483 *Lady Albermarle*. Bright crimson; large.

484 *Duke of York*. A handsome dwarf variety; flowers bright scarlet carmine.

485 *Grandiflora Maculata*. Large white flowers with crimson spots.

486 *Mixed*.

GOMPHRENA

Globe Amaranth.

3d. per packet.

Sow Spring and early Summer.

One of the best of our hardy annual everlasting, and most useful for Winter bouquets; it is of fine erect habit, a constant bloomer, and very attractive.

490 *Globosa*. Mixed.

492 *Globosa, Purple*. Good bedder.

492a *Globosa, Orange or Golden*. Fine for cutting.

492b *Globosa, Flesh*. A delicate shade.

GRASS (Ornamental)

6d. per packet.

Sow Autumn and Spring.

492g *Mixed*. Decorative types.

Six named varieties for 2/-; 8 for 3/3; 12 for 4/6.

GYPSOPHILA

A very free-flowering hardy family of plants, particularly suitable to decorative work.

PERENNIAL VARIETIES.

Sow Autumn.

493 *Paniculata Compacta*. Semi-dwarf; hardy white. 6d. per packet.

493a *Paniculata Alba fl. pl.* A charming variety of this well-known decorative plant, throwing 50 per cent. double flowers. 1/- per packet.

ANNUAL VARIETIES, 6d. per packet.

Height, 2 feet.

Sow Spring and early Summer.

494 *Elegans Grandiflora Alba*. Very elegant.

494a *Elegans Grandiflora, Paris Market*. This improved kind is of great value for cut flower purposes.

494b *Elegans Grandiflora Carminea*. Dainty carmine flowers.

494c *Elegans Grandiflora Rosea*.

494d *Elegans, Crimson*.

494e *Elegans, Deep Pink*.

HELENIUM

Sneeze-wort.

6d. per packet.

Sow in Spring.

Hardy herbaceous perennial; produces daisy-like flowers; blooms profusely; exceedingly useful for cutting. Height, about 3 feet.

500 *Bigelowii*. Golden yellow, black centre.

501 *Riverton Gem*. Orange yellow, dark centre.

HELIANTHUS

Sunflower.

3d. per packet.

Sow Spring and Summer.

504 *Annus Single*. Primrose colored.

505 *Argophyllus*. Pretty, ornamental, silvery foliage.

506 *Californicus*. Large, double yellow.

507 *Cucumerifolius (Miniature)*. Branching, nice foliage; golden yellow flowers.

508 *Stella*. Flowers 3 inches across. Pure golden yellow, black disc.

509 *Diadem*. Single flowers; light citron color.

510 *Hybridum, Double and Semi-double*. 5 feet high.

511 *Globosus Fistulosus*. Double golden; fine. 6 feet high.

513 *Nanus, Double*. 3 feet high; fine golden yellow.

514 *Orion*. Small flowers, crisped and twisted petals; orange and lemon.

515 *Red or Gaillardia Flowered*. Flowers vary in color. 6d. per packet.

516 *Purpureus*. Small centres of unique tints of mahogany-red and reddish-orange. 6d. per packet.

HELICHRYSUM

6d. per packet.

Sow Autumn and Spring.

Everlasting flowers of great beauty, hardy and free blooming, and very useful for cutting; plants about 4 feet high; produce their brilliant flowers at a season most wanted; they are hardy annuals, but will often bloom for a whole season.

495 *Monstrosum, Double Mixed.* Fine colorings.

496 *Compositum Purpureum.* Double crimson.

497 *Monstrosum, Rose Queen.* A rich deep rose color.

497a *Monstrosum, Silvery Pink.* Double, silvery pink.

498 *Roseum.* Double; beautiful delicate rose.

499 *Alba.* Double; pure white.

HELIOTROPIUM

Heliotrope.

6d. per packet.

Sow Autumn and Spring.

Sow in a frame or bush-house in a box or pot, with a sheet of glass over it until the young plants appear; then give plenty of air, and pot off as soon as plants are fit to handle. Delicious perfume, tender perennial, border plant. 2 to 3 feet high.

522 *Choicest Mixed.* Best dark and light colors.

HEUCHERA

6d. per packet.

Sow in Autumn or Spring.

Beautiful hardy perennial of dwarf, compact, branching habit.

526 *Sanguinea.* Coral red. Graceful spikes.

HOLLYHOCK

6d. per packet.

Sow Autumn and Spring.

This noble plant produces flower spikes 6 feet high; studded with splendid Camellia-like blooms some 3 feet of their length; hardy perennial.

530 *Extra Choice Mixed (Chater's).* Superb strain; double.

HONESTY

6d. per packet.

Sow during Autumn and Spring.

Free-flowering hardy biennial; its silvery seed pods are very pretty, cut and dried for Winter decoration. Height, 18 inches.

535 *Lunaria Biennis (Satin Flower).*

HUMULUS JAPONICUS

Japanese Hop.

6d. per packet.

Annual climber, beautiful foliage; rapid grower; hardy; requires a rich soil.

539 *Variegated.* Very handsome foliage.

HUNNEMANNIA

MEXICAN POPPY.

3d. per packet.

Sow in Autumn.

A charming little perennial; erect growth, about 18 inches; easily raised from seed, and quite hardy in the open border. The flowers keep well when cut; most beautiful for dinner-table decoration.

542 *Fumariaefolia.* Very feathery foliage and buttercup-yellow single flowers, cup-shaped, with red stamens.

IBERIS

Perennial Candytuft.

6d. per packet.

Very hardy and compact grower.

545 *Gibraltarica.* Large flowers, lilac, shading to white.

545a *Sempervirens.* White.

ICE PLANT

(See Mesembryanthemum, page 25)

IMPATIENS

1/- per packet.

The East African Balsam—an excellent pot plant, succeeding best under the shade of bush or glass-house. Large flowers of bright colour.

546 *Holstii.* Mixed.

IPOMEA

Convolvulus.

6d. per packet.

Sow Autumn and Spring.

A splendid family of climbers, rapid growers, fine foliage; handsome Convolvulus-like flowers, all very beautiful; hardy annuals.

548 *Hederacea Superba.* Ivy-leaved, various.

550 *Mikado.* Most brilliant colors.

551 *Grandiflora Alba (White Moon-flower).* Magnificent white flowers.

552 *Bona Nox.* Most beautiful; large blue flowers.

553 *Heavenly-Blue.* Sky-blue, shading light towards centre.

554 *Rose Marie, Double.* See Novelty pages.

555 *Quamoclit (Cypress Vine).* Quite distinct, elegant feathery foliage, small scarlet flowers.

556 *Quamoclit Cardinalis (Cardinal Creeper).* Graceful; leaves not unlike those of a fine Japanese Maple. During Autumn covered with scarlet-red flowers—one inch across.

IPOMOPSIS

6d. per packet.

Sow during Autumn and Spring.

Long spikes of flowers delicately spotted, graceful foliage. If planted in a sheltered position is very attractive; tender biennial. Height, 3 feet.

560 *Elegans.* Brilliant orange and scarlet flowers. Succeeds best in light, rich soil.

IRIS

1/6 per packet.

Sow in early Spring.

561 *Chrysofor.* The flowers range from white to pale sulphur yellow and rich bronze, soft blue to deep purple, ornamented with pretty yellow, blue and purple markings.

JAPANESE KUDZU VINE

6d. per packet.

Sow Autumn and Spring.

568 *Pueraria Thunbergiana.* A vine of very rapid growth; foliage large and lobed, purple pea-shaped flowers in clusters; a valuable perennial. Frost cuts down the vine, but it comes along again in Spring.

KOCHIA

Annual Cypress.

6d. per packet.

Sow in Spring.

569 *Tricophylla.* An annual plant growing quickly from seed; slender and light green leaves; flowers scarlet but insignificant.

LARKSPUR

(570 to 582j: See page 18).

LEPTOSYNE

6d. per packet.

Sow in Autumn.

A most graceful annual from California; plants are bushy and compact, and the flowers are produced in great profusion.

583 *Maritima.* Deep lemon yellow; very early; charming for cutting.

LINARIA

3d. and 6d. per packet.

Sow during Autumn or Spring.

One of the most beautiful species of hardy annuals grown for Spring-flowering, with spikes of Lobelia-like flowers.

587 *Bipartita Splendida.* Beautiful dark violet.

588 *Reticulata Aurea Purpurea.* Yellow and purple.

589 *Maroccana, Mixed.* 6d. per packet.

590 *Maroccana, Pearl.* Snowy white.

590a *Maroccana Hybrid, Excelsior Mixed.* 6d. per packet.

591 *Cymbalaria.* Perennial; known as Kenilworth Ivy; useful for hanging baskets. 6d. per packet.

LINUM

3d. per packet.

Sow in Spring.

593 *Grandiflora Coccineum.* Fine scarlet flowers; foliage good. Height, 12 in. Annual.

595 *Perenne.* Perennial; blue.

LOBELIA

6d. per packet. Except where otherwise marked.

Sow during Autumn and Spring.

Exceedingly beautiful, free-blooming, hardy annuals; good for edging, ribbon or carpet bedding, producing a dense carpet of bloom.

597 *Miranda.* Covered with bright rosy purple flowers with white eyes; drooping; suitable for baskets.

599 *Speciosa Erecta.* Dark blue, for bedding.

600 *Royal Purple.* Beautiful deep blue; clear white eye.

602 *Crystal Palace.* Fine dark blue; large.

604 *Barnard's Perpetual.* Ultramarine blue, with pure white markings.

605 *White Lady.* Large flowered; white.

606 *Cardinalis, Queen Victoria.* Tall spikes, cardinal flowers, bronze leaves; distinct. Perennial; prefers cold climate. 1/- per packet.

607 *Sapphire.* Deep blue, with a clearly defined pure white eye; drooping; excellent for basket, window-box or rockery work.

LOPHOSPERMUM

6d. per packet.

Sow during Autumn and Spring.

Handsome deciduous climber. Raise in a box or sheltered position out of doors. Height, 10 ft.

611 *Scandens.* Large purple flowers.

LOVE-LIES-BLEEDING

(See Amaranthus).

LUPINS

(See Page 18).

LYCHNIS

Chinese Firefly.

6d. per packet.

Sow in Autumn and Spring.

Attractive hardy perennial. 2 feet.

706 *Chalcedonica.* Scarlet flower, in trusses.

MANDEVILLEA

6d. per packet.

Sow Autumn and Spring.

709 *Suaveolens.* Pure white, fragrant single flowers. Useful for bouquets. Hardy perennial climber. 20 feet.

MATHIOLA

Evening Scented Stock.

6d. per packet.

Sow in Spring.

720 *Bicornis.* Beautiful pink and lilac flowers; fragrant; which open in the evening. Hardy annual. Height, 18 inches.

MARGUERITE

(See Chrysanthemum, Annual Section).

MATRICARIA

6d. per packet.

Sow during Autumn and Spring.

722 *Eximia, Double.* Pure white.

723 *Golden Ball.* Beautiful hardy annual, pretty for bouquets. Height, 10 ins.

MAURANDYA

6d. per packet.

Sow Autumn and Spring.

A most superb climber, remarkably quick-growing and free-blooming; its foliage is small, but dense, and of a lively green colour; they are perennials, liking a rich friable soil.

724 *Barclayana.* Beautiful blue flowers.

725 *Alba.* Pure white flowers.

726 *Rosea.* Rose colored flowers.

727 *Mixed.*

MARIGOLD

Targetes.

Sow during the Spring and Summer. French varieties have beautiful shaped orange flowers, striped and flaked with brown. African varieties have large self-colored flowers; all are annuals.

FRENCH (Tall Double Varieties).

Height, 2 feet.

3d. per packet.

710 Tall Double, Dark Brown.

711 Tall Double, Lemon.

711a Tall Double, Orange.

711b Tall Double, Gold striped. Beautiful flowers.

711c Tall Double, Finest Mixed.

FRENCH (Dwarf Double Varieties).

Height, 12 inches.

3d. per packet.

712 Dwarf Double, Finest Mixed.

713 Dwarf Double, Yellow. Sulphur yellow.

AFRICAN (Tall Varieties).

Height, 2 to 3 feet.

713a Guinea Gold. Semi-double flowers, 2 to 2½ inches across; brilliant orange, flushed with gold. 6d. and 1/- pkt.

713b All-double, Orange. Produces well over the ninety mark in percentage of large double flowers. 1/- packet.

713c All-double, Lemon. A sister flower to the above. 1/- per packet.

714 Lemon. 3d. per packet.

715 Orange. 3d. per packet.

715a Mixed. 3d. per packet.

TREE VARIETY.

Height, 4 to 5 feet.

6d. per packet.

716 Giant Tree, Mixed. The double flowers—yellow, orange and bronze—resemble those of the French type. The plants bloom until late Autumn.

MARIGOLD, ENGLISH

(See Calendula, page 17).

MEDEOLA

6d. per packet.

Sow in Spring in pots.

Very handsome perennial bush-house plant. The graceful beauty of its foliage renders it valuable for vases. Can be used either to climb or droop.

728 Asparagoides. Small white flowers, orange scented.

MESEMBRYANTHEMUM

6d. per packet.

Sow in Spring and Summer.

PERENNIAL VARIETIES.

The first is a good rockery plant; the second is prized for its foliage, which looks as if the plant was covered with ice. Cordifolium is very suitable for bedding.

732 Tricolor. Crimson, white and purple; suits sandy soil well; only grows to height of 3 inches.

733 Crystallinum (Ice Plant). Peculiar glistening foliage; small white flowers; pretty; 6 inches.

734 Cordifolium Variegatum. A pretty variegated-leaved variety. Bright rosy flowers. 6 inches.

ANNUAL VARIETY.

Cuniflorum, Mixed. See Novelty pages.

MEXICAN SUNFLOWER

(See Tithonia, page 28).

MIGNONETTE

3d. per packet; except otherwise priced.

Sow Autumn or Spring.

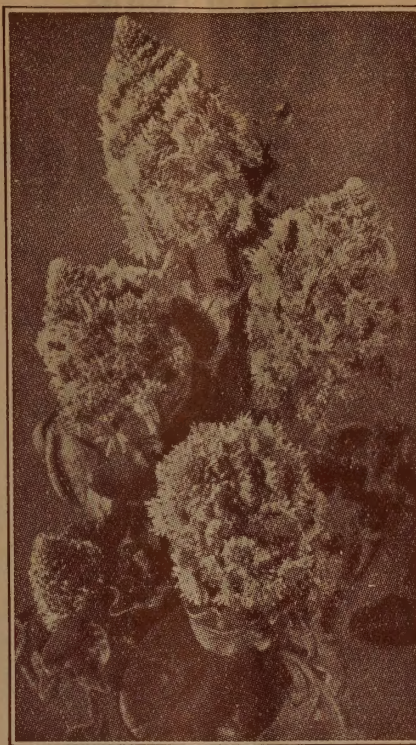

This grand annual is known to all, and its delicious perfume cannot be surpassed; it is easily grown; some of the varieties make excellent pot plants, and produce spikes of immense size.

736 Large Flowered. Very fragrant; fine spikes.

737 White Machet. Sweet-scented. 6d. per packet.

738 Crimson Giant. Large flowers; fine color.

740 Gabrielle. Robust, large spikes, red, 6d. per packet.

MIGNONETTE.

MIGNONETTE—Continued—

741 Goliath. Enormous spikes; double red. 6d. per packet.

742 Ruby. "Machet" variety; coppery scarlet. 6d. per packet.

743 Victoria. Very dark red; fine spike.

745 Machet. Dwarf; massive spikes; scented; red. 6d. per packet.

746 Machet Golden. Large spikes; yellow flowers. 6d. per packet.

747 Machet, King of Dwarfs. Charming variety; robust growth; large spikes. 6d. per packet.

749 Golden Queen. Bright yellow; pyramidal.

750 Giant Pyramidal. Fine spikes; fragrant.

MIMULUS

Monkey Flower.

6d. per packet.

Sow from early Summer to Autumn.

Charming plant for pot culture; likes rich, light soil, and a liberal supply of water. Can be grown in the open ground, where soil and situation are favourable. Moschatus, the well-known Musk, has a delightful fragrance, is well adapted for pots or baskets. Tender perennials.

760 Tigrinus, Single, Mixed. Showy, spotted.

761 Tigrinus Grandiflora, Double, Mixed. Flowers fine.

762 Tigrinus, Bonfire. Rich orange-scarlet.

763 Moschatus (Musk). Scented, yellow.

MINA LOBATA

6d. per packet.

Sow in Spring.

Pretty half-hardy annual climber. Grows to a height of 20 feet; flowers abundantly.

767 Mina Lobata. Its beautiful cream white flowers are bright orange when half blown, and when in bud of a vivid red.

MUSK

(See Mimulus Moschatus).

MYOSOTIS

Forget-Me-Not.

6d. per packet, except otherwise priced.

Sow in Autumn.

Charming dwarf hardy plant; will bloom profusely during Spring, covering itself with flowers of the most lovely blue; very useful for bouquets.

770 Palustris. Bright blue; the true Forget-Me-Not. 3d. per packet.

772 Alpestris Stricta Rosea. Upright growing; unique; flowers pink.

MYOSOTIS—Continued—

773 Alpestris Grandiflora, Royal Blue. Large flowers; very deep blue.

776 Victoria. Dwarf; globular habit; sky blue flowers with double centre.

778 Robusta Grandiflora. Very large flowering; blooms quickly from seed; blue.

779 Oblongata, Blue Bird. Very deep blue.

779a Oblongata, Perfecta. Clear blue. Early; good for winter-blooming.

NASTURTIUM

3d. per packet.

Except where otherwise stated.

Sow Autumn and Spring for warm climates.

Sow Spring only for cold climates.

The value of this family for decorative purposes cannot be over-estimated; it is particularly hardy, will thrive in any soil, and its many forms are so various that it possesses a pleasing variety of colors. Dwarf varieties do not grow more than 12 inches, form compact bushes and flower abundantly; can be transplanted, and should stand 12 inches apart; hardy annuals. The climbing varieties will spread or climb 15 feet.

DWARF VARIETIES.

780 Aurora. Terra-cotta.

781 Beauty. Pretty yellow and scarlet.

782 Crimson. Striking color.

782a Crystal Palace Gem. Sunflower-yellow, spotted purple-maroon.

783 Empress of India. Bright; beautiful scarlet.

784 Golden King. Very handsome variety.

785 King of Tom Thumbs. Scarlet.

786 King Theodore. Darkest of all; nearly black.

787 Pearl. A clear, soft white.

787a Prince Henry. Pale yellow, spotted carmine.

788 Rose. Delicate, soft rose color.

790a Vesuvius. Salmon-rose.

791 Tom Thumb, Finest Mixed.

792 Ivy-leaved. 6d. per packet.

793 Dwarf Ornamental-leaved.

SEMI-DWARF VARIETY.

793a Golden Glean. Sweet-scented. See Novelty pages.

CLIMBING VARIETIES.

794 Queen Hybrids. A mixture of seven or eight colors, all with variegated foliage. 6d. per packet.

794a Butterfly. Sunflower-yellow; spotted salmon-pink.

794b Fordhook Fashion. Terra-cotta on yellow ground.

795 Moonlight. Pale straw color; crinkled.

796 Sunlight. Clear rich golden yellow.

797 Spitfire. Bright scarlet flower.

797a Shilling. Yellow, spotted maroon.

798 Regalianum. Bright purple violet.

799 Tall, Mixed. All the best varieties.

801 Lobb's Climbing Varieties. Very suitable for vases or hanging baskets.

802 Lobbianum Lilliput, Mixed. Charming, very small flowers and foliage.

803 Ivy-leaved. Unique foliage and flowers. 6d. per packet.

NEMESIA

Sow in Autumn.

Pretty compact growing annual of great merit.

804 Strumosa Grandiflora Suttoni. The best of this class. Flowers various. 6d. and 1/- per packet.

805 Compacta, Triumph. Large flowers, with very vivid colors. 6d. packet.

805a Compacta, Blue Gem. Distinct blue flowers. 6d. per packet.

NEMOPHILA

6d. per packet.

Sow Autumn and Spring.

Californian annuals, profuse bloomers, and charming colors; dwarf. Height, 6 inches.

806 Insignis. Flowers of pretty blue.

807 Atomaria. White, with black spots.

808 Discoidalis. Black-brown margin.

809 Marginata. Blue, with white edge.

810 Mixed.

NIGELLA

6d. per packet.

Sow in Autumn or Spring.

A pretty hardy annual, with graceful foliage. The flowers are nearly hidden in light, feathery leaves; an attractive flower.

824 *Damascena* (Devil in the Bush). Clear pure white.

825 *Damascena* (Miss Jekyll). (Love in a Mist). Double. Cornflower Blue.

825a *Damascena*, Double Dark Blue.

826 *Damascena*, Mixed.

PAEONY

6d. per packet.

Sow in Spring.

A magnificent family of plants, but difficult to raise from seed. Must be sown in pots or boxes, and germinated under glass; require a cool climate; hardy perennial. Height, 18 inches.

836 *Choicest Mixed*. Finest colors.

PANSY

(838 to 864: See page 14).

PAPAEV

Poppy.

Sow Autumn and Spring.

883 *Snowdrift*. Flowers are a glistening white mass; 3 feet. 3d. per packet.

884 *Umbrosium*. Deep crimson, black spot at base of petal; 18 inches. 3d. per packet.

885 *The Bride*. Pure white, large size. 3d. per packet.

886 *Miss Sherwood*. Single flowers of shiny, satiny white. 6d. per packet.

887 *Alpinum*, Mixed. 6d. per packet.

889 *Cardinal Nanum*. 18 inches; large double scarlet flowers. 6d. per packet.

880 *Glaucum* (Tulip Poppy). Dwarf, vivid scarlet. Very charming; free blooming. 3d. per packet.

881 *Danebrog* (Danish Flag). Bright scarlet, blotched silvery white. 3d. per packet.

882 *The Shirley*. Single and semi-double, charming shades of pink, rose-margined and veined. 3d. per packet.

882a *Queen Shirley*. Charming colors of flesh, salmon, orange and various shades of rose and carmine; double. 6d. per packet.

895 *Oriental*. Dark scarlet, peculiarly blotched with black, perennial. 6d. per packet.

896 *Mikado*. Double, pure white and scarlet. 3d. per packet.

897 *Ranunculus* Flowered, Mixed. Beautiful double, various. 3d. per packet.

899 *Double French*, Mixed. Exceedingly showy. 3d. per packet.

900 *The Admiral*. Large, white flowers, with band of brilliant scarlet. 6d. per packet.

904 *Hansa*. Pure white ground, finely fringed crimson edge. 6d. per packet.

906 *Pilosum*. Perennial. Fine large buff yellow flower. 3d. per packet.

ICELAND POPPY

(Papaver nudicaule).

894 and 907 to 913: See page 18.

PASSIFLORA

Sow in Spring.

914 *Edulis* (Passion Fruit). This splendid creeper has a fine foliage and delicious fruit. A first-class verandah or trellis plant; flowers not very attractive; hardy perennial and evergreen; grows 10 to 15 feet. Soak the seed before sowing. 3d. per pkt.

915 *Coerulea Grandiflora*. Very large blue flowers; handsome. 6d. per pkt.

916 *Granadilla*. Large fruit; suitable only for warm, sheltered situations. 1/- per packet.

PELARGONIUM

Geranium.

1/6 per packet.

Sow in Autumn.

The first three listed are the large flowering perennial class known as "Pelargoniums," as distinct from "Geranium," and are best suited for pot culture, although nearly all of them will stand in the garden if they are in a sheltered situation. Must be raised in pots in a frame.

918 *French Blotched*. Superb strain; distinct.

919 *Fancy Varieties*. Handsome, showy.

920 *Large Flowered Regal*. From named sorts.

921 *Zonale* (Geranium). Mixed.

PENTSTEMON

Sow Autumn and Spring.

Hardy perennials.

924 *Sensation*. A Gloxinia-flowered variety; brilliant colors; flowers 2 inches across. 1/- per packet.

926 *Finest Mixed*. Choice strain; best sorts. 6d. per packet.

927 *Hartwegii Albus*. Buds cream color, changing to clear white. 6d. per pkt.

PETUNIA

Sow in Spring or Autumn.

Petunias suit our climate admirably, and bloom in profusion during Summer and Autumn. Seed from the double varieties will produce 70 per cent. of single flowers. Perennials; suited to our warm climate.

931 *Anderson's Bedding*. Mixed. 6d. per packet.

932 *Hybrida Single*. Finest Mixed. 3d. per packet.

937 *Grandiflora*, Single, Superb Mixed. Large-flowered. 1/- per packet.

939 *Fimbriata*, Single, Mixed. Fringed. 1/- per packet.

940 *Double Inimitable*. Striped and blotched. 1/6 per packet.

944 *Double, Mixed*. Fringed and plain edge; finest variety. 2/6 per packet.

945 *Fringed, Double*. Large flowering 2/6 per packet.

947 *Grandiflora Superbissima*, Mixed Single. A magnificent strain of Australian selection, containing a marvellously fine assortment of colors. 2/6 per packet.

949 *Giants of California*. Magnificent large-flowered variety. 1/- and 2/6 per packet.

950 *Star of California*. Balcony type, the flowers are velvety violet, with touch of crimson, starred with five pure white blotches. 1/- per packet.

BEDDING, SEPARATE COLORS.

6d. per packet; 6 packets for 2/9.

Post Free.

Dwarf, compact-growing; single. Most effective used, either singly or in conjunction, in beds or borders.

948 *Rosy Morn*. Pink, white throat.

948a *Viola*. Deep violet.

948b *Purple Prince*. Purple.

948c *Blue-bedder*.

948d *Norma*. Blue, white star.

948e *Silver Blue*. Light blue.

948f *Senator*. Gloxinia-purple, white throat.

PHACELIA

6d. per packet.

Sow during Spring.

A highly interesting Californian annual. The plant is much branched and of spreading habit. Hardy annual. Height, 12 inches.

955 *Campanularia*. Flowers beautiful rich blue.

PHASEOLUS

1/- per packet.

Sow Autumn and Spring.

956 *Caracalla* (Snail Flower). A charming perennial climbing plant, with bunches of sweet-scented purple and white, curiously-twisted flowers.

PERENNIAL PHLOX

Phlox Decussata.

1/- per packet.

Sow in Spring.

957 *Mixed*. This is quite distinct from the Annual or Phlox Drummondii section; produces spikes of flowers, some 2 feet in height; it does not usually flower the first season from seed.

PICOTEE

1/6 per packet.

Sow Autumn and Spring.

Seed must be sown in seed pans or boxes, or in canvas frame, and transplanted. Hardy perennial. Height, 12 inches.

959 *Choicest Mixed*. From the finest flowers.

960 *Perpetual Flowering*. Delicate marking; exquisite perfume; valuable for bouquets.

POLYANTHUS

Sow in Autumn.

A very beautiful class of hardy perennials and distinct rich markings; prefer a cool situation. Height, 6 inches.

963 *Floors Castle, Mixed*. Superb gold-laced flowers. 1/- per packet.

964 *Grandiflora, Mixed*. An excellent quality. 6d. per packet.

POPPY

ICELAND: See page 18.

SHIRLEY and other VARIETIES: See PAPAVER.

PORTULACA

Sow Spring and Summer.

Portulacas are particularly well adapted to our climate, and flower magnificently in the warmest situation; colours are most beautiful, suitable for vases or rock work; very dwarf, of a trailing habit; hardy annuals. Do well in any ordinary soil.

994 *Grandiflora, Double, Mixed*. Beautiful free flowering; large size. 6d. per packet.

998 *Grandiflora, Single, Mixed*. 3d. pkt.

POTENTILLA

6d. per packet.

Sow in Autumn and Spring.

Handsome herbaceous perennials. They keep in flower a long time; both double and single varieties. Height, 12 inches.

1012 *Finest Mixed*. Colors are shades of red, yellow and brown; some striped.

PRIMULA SINENSIS

Chinese Primrose.

2/6 per packet.

Sow in Autumn.

Beautiful tender perennial, suitable only for pot culture. Seedlings raised in pots in the Autumn should, as soon as the plants are fit, be transplanted; put them off into small pots, and place them in a frame or bush-house, and as soon as they are again well rooted, they should be shifted into blooming pots.

1015 *Fimbriata, Finest Mixed*. Lovely shades.

PRIMULA MALACOIDES

Sow in late Summer and Autumn. Suitable for bedding.

1023 *Pale Lavender*. 6d. per packet.

1023a *Superba*. Improved variety; deep lavender. 1/6 per packet.

1023b *Pink Beauty*. Pink. 1/6 per pkt.

1023c *Double White*. 1/6 per packet.

1023d *Snow Queen*. Improved white. 1/6 per packet.

1023f *Eclipse*. Large flowered, deep lavender-pink. 1/ per packet.

1023g *Gigantea*. An individual flower just covers a shilling, of robust growth; Colour, rosy heliotrope. 1/6 per pkt.

PRIMULA (continued, page 27)

PHLOX DRUMMONDII

3d. per packet, except where otherwise priced.

Sow Spring to early Autumn in warm districts.

Sow Spring and early Summer for cold districts.

Among our Summer blooming annuals the *Phlox Drummondii* takes a first place. If planted in beds, produce a most dazzling effect, as the plants are covered with flowers, which often entirely hide the foliage. The *Phlox* possesses a great variety of color; it is dwarf in habit, growing not more than 12 inches high; hardy, and blooms for many months. Some varieties are of delicate colors, while others are brilliant and dazzling.

967 Grandiflora. Finest Mixed. Lovely large-flowered variety, with beautiful markings; finest mixed strain in cultivation. 3d., 6d. and 1/- per packet.

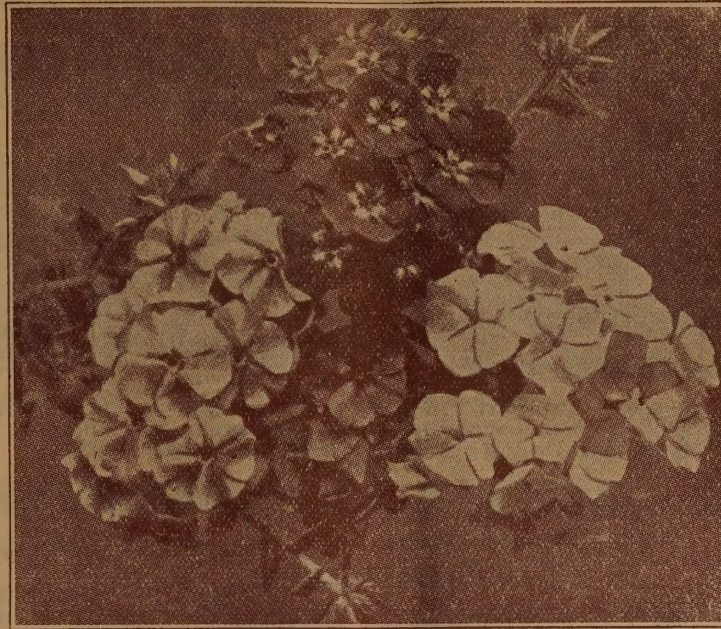

968 Grandiflora. Alba. Single white, very pretty and free blooming.

969 Grandiflora Dark Purple. Beautiful rich color.

970 Grandiflora, Scarlet. Most brilliant color.

971 Grandiflora, Red. White, Striped. Very effective.

(Continued, Third Column).

PHLOX DRUMMONDII.

(For PERENNIAL PHLOX, see No. 957, page 26)

PRIMULA OBCONICA

1024 Finest Mixed. A very beautiful flowering variety, excellent pot plant; requires similar treatment to *Primula Sinensis*. 1/- packet.

PRIMULA

Sow in early Autumn.

1025 Vulgaris (English Primrose). Yellow flowers. 6d. per packet.

1025a Acaulis Grandiflora (Large-flowered Primrose), Blue. Rich clear blue. 1/- per packet.

1026 Kewensis. Decorative; flowers golden yellow. 1/6 per packet.

PUERARIA THUNBERGIANA

(See Japanese Kudzu Vine, page 24)

PYRETHRUM

Sow Autumn and Spring.

1027 Aureum. Effective as a carpet bedder. Height, 9 inches. 3d. pkt.

1028 Aureum Cristatum. Only grown for its foliage. 6d. per packet.

1029 Selaginoides. Distinct and handsome for carpet bedding. 6d. pkt.

1030 Roseum Hybridum Grandiflorum. Single and double flowers, produced on long stems; 18 inches high. 1/- per packet.

RANUNCULUS

Should be sown early Autumn to flower same season. Roots or tubers can be obtained in February and March. (See Bulb List.)

1034 Asiaticus Superbissimus, Mixed. Producing flowers of great variety of color. 6d. per packet.

1035 Camellia-flowered, Re-selected. Mixed. The large flowers, with evenly arranged petals, are of many shades—self-coloured, dark-edged, striped and blotched—presenting a dazzling effect when massed. 1/- per packet.

RHODANTHE

Everlasting.

6d. per packet.

Sow in Spring.

Half-hardy annuals. Height, 12 inches.

1036 Maculata. Beautiful rosy pink.

1037 Maculata Alba. Pure white.

1038 Manglesi Major. Large, bright pink.

1039 Mixed.

RICINUS

Castor Oil Plant.

6d. per packet.

Sow in Spring and Summer.

1041 Gibsoni. Large, handsome, purple foliaged plant. Hardy annual. 4 to 5 feet in height.

1042 Zanzibariensis. A highly ornamental variety; immense leaves, measuring 2 to 2½ feet across. Biennial.

ROCKET or DAME'S VIOLET

6d. per packet.

Sow in Autumn or Spring.

1044 Sweet. Fragrant flowers, purple and white, profuse bloomer; hardy perennial.

ROMNEYA

Californian Tree Poppy.

1/- per packet.

Sow in Autumn and Spring.

1045 Coulteri. Pure white flowers, 4 to 5 inches in diameter, with delicate perfume.

RUDBECKIA

6d. per packet.

Sow in Spring.

1050 Bicolor Superba. Large flowered, yellow, with large dark spots; very fine variety; height, 2 feet.

1051 Neumanni. Vivid yellow; dwarf; very floriferous and constant bloomer.

SAINTPAULIA

2/6 per packet.

Sow in Spring.

1054 Ionantha. Fleshy leaves of a beautiful dark green; flowers clear blue, violet tint, shading to yellow.

SALVIA

6d. per packet, except otherwise priced. Sow in Spring and early Summer.

BIENNIAL VARIETIES.

1056 Splendens Grandiflora. Scarlet; very showy.

1057 Ingenieur Clavenad. An improved *Splendens*; flower spikes large, fiery scarlet.

SALVIA—Continued next column.

972 Grandiflora Stellata Splendens. Crimson with white centre.

973 Alba Oculata Superba. Pure white flowers, with carmine red eye.

974 Grandiflora, Reddish Lilac. Unique shade.

974a Grandiflora, Rosy Chamois. Distinct.

974b Grandiflora, Isabellina. Buff-yellow.

974c Grandiflora, Vermillion Red. Brilliant.

975 Cuspidata. Distinct class, with long winged and fringed petals, commonly known as "Star Phlox"; attractive. 6d. per packet.

977 Nana Compacta. A beautiful dwarf variety with a profusion of exquisite flowers; bush-like habit., 6d. per pkt.

979 Cecily. Large-flowered and dwarf. 6d. per packet.

980 Salmon Pink. A fascinating shade. 6d. per packet.

981 Anderson's Exhibition. A magnificent strain of this favorite annual, containing all the best colors, each having a clear white or cream eye. 1/- per packet.

SALVIA—(continued)—

1058 Argentea. Silvery; flowers pinkish white.

1059 Patens. Intense bright blue. 1/- per packet.

1060 Farinacea. Hardy perennial; suitable for bedding; sky blue.

1061 Bonfire. Dwarf and bushy, covered with erect spikes of scarlet flowers.

1062 Splendens, Harbinger. The plants are dwarf and compact in habit. Rich scarlet. 1/- per packet.

1063 Rosy Gem. Uncommon shade of deep rose-pink.

ANNUAL VARIETY.

1064a Horminum (Clary), Mixed. Has bracts of coloured leaves at extremities of flower-stalks—some dazzling bluish purple and some dull rose. Exquisite for table decoration. Easy of culture; height, 2 to 2½ feet. 1/- per packet.

SAPONARIA

6d. per packet.

Sow in Spring.

Annual, about 18 inches high; *Gysophila*-like flowers; fine for cutting.

1064a Vaccaria, Rosea. Rose.

1064b Vaccaria, Alba. White.

SCABIOSA

Mourning Bride.

Sow Autumn or Spring.

1065 Dwarf Double, Finest Mixed. Red, white, lilac and purple. Height, 18 inches. 3d. per packet.

1065a Dwarf, Fiery Scarlet. 6d. packet.

1067 Caucasica. Perennial. Soft lilac blue. 6d. per packet.

1068 Maxima, Mixed. Large, double flowers. Height, 2 feet. 3d. packet.

1069 Azure Fairy. Lavender blue, quite distinct. 6d. per packet.

1069a Peach Blossom. Is a delightful shade of pink. 6d. per packet.

1069b Shasta. Large pure white flowers. 6d. per packet.

1069c Loveliness. A glorious salmon-rose. 6d. per packet.

1069d Plum-Violet. Of good color. 6d. per packet.

SCHIZANTHUS

6d. per packet.

Sow during Autumn and Spring.

Hardy annuals, requiring a sheltered situation; well suited for pot culture; handsome foliage, and bearing thousands of butterfly-like blossoms. 24 inches.

1070 *Grahami*. Beautiful red and shades.

1072 *Pinnatus*. Beautiful bright blue.

1075 *Wisetonensis Hybrids*. Superb strain. Excellent as a pot plant.

1076 *Grandiflora Maxim Hybrids*. Extra choice strain. 1/- per packet.

SENSITIVE PLANT

6d. per packet.

Sow in Spring.

A tender annual for bush-house culture; when touched its leaves close and droop. Height, 18 inches.

1079 *Mimosa Pudica*. Very pretty foliage.

SESBANIA

Brazilian Glory Pea.

1/- per packet.

Sow in Spring.

1079a *Tripetil*. A perennial flowering shrub; very showy and produced in bunches, free flowering; grows 6 to 8 feet. Flowers orange scarlet in color.

SIDALCEA

1/- per packet.

Sow in Autumn.

1079b *Rose Queen*. Perennial plant, producing spikes 5 to 6 feet high; rose-colored flowers.

SHASTA DAISY

(See *Chrysanthemum Leucanthemum*).

SALPIGLOSSIS

3d. and 6d. per packet.

Sow Autumn and Spring.

Showy annuals, richly coloured veined and mottled blossoms. Likes rich, light soil. Height, 2 feet.

1088 *Grandiflora Superbissima*. Mixed.

SEPARATE COLORS.

6d. per pkt.; set of eight, 3/6.

1089 *Velvety red*.

1090 *Yellow, white border*.

1091 *Rosy chamois, carmine centre*.

1092 *Magenta, yellow throat*.

1093 *Deep carmine violet*.

1094 *Purple-red, striped yellow*.

1095 *Dark garnet red*.

1095a *Carmine red*.

STATICE

6d. per packet.

Sow in Spring, Summer and Autumn.

ANNUAL VARIETIES.

1096 *Sinuata, Pink*.

1097 *Sinuata, Blue*.

1096a *Sinuata, Yellow*.

1097a *Sinuata, Lavender*.

1097b *Sinuata, White*.

1097c *Sinuata, Mixed*.

PERENNIAL VARIETIES.

1098 *Mixed*. A useful plant.

1099 *Caspia (Latifolia type)*; small flowers.

1099a *Macrophylla Atrocoerulea*. Rich deep blue.

1099b *Perezii Multiflora*. Blue.

1099c *Purple Cloud*. Mass of small flowers.

STOCK

(See page 15).

STOKESIA

Stokes Aster.

Sow in Autumn and Spring.

Hardy perennial of great value; herbaceous in character.

1125 *Purple*. 6d. per packet.

STREPTOCARPUS

2/6 per packet.

1125a *Single Hybrids*. Sow under glass Autumn and early Spring. Suitable only for green or bush-houses.

SUNFLOWER

(See *Helianthus*, page 23).

SWEET PEA

Special List issued in January, Post Free, on application.

SWEET WILLIAM

(See *Dianthus Barbatus*, page 22).

SWEET WIVELSFIELD

6d. per packet.

Sow Autumn and Spring.

Resembles Sweet William but the flowers are larger. Desirable for rock-work.

1125b *Mixed*. A wide range of colors.

TACSONIA

1/- per packet.

Sow seed in Spring.

1126 *Mollissima*. This beautiful evergreen climber produces long, tubular-shaped pink flowers, followed by edible fruit known as "Banana" Passion Fruit.

TELOPEA

WARATAH.

This magnificent flowering plant may be easily grown as an ordinary shrub. Sow in Spring. Height, 10 feet.

1127 *Speciosissima*. Red. 1/- per pkt.

THALICTRUM

6d. per packet.

Sow Autumn and Spring.

1129 *Adiantifolium*. Herbaceous Perennial; resembles maiden-hair fern.

1129a *Dipterocarpum (The Lavender Shower-Bush)*. Herbaceous; small, lavender-colored flowers.

THUNBERGIA

6d. per packet.

Sow in Spring.

Half-hardy climbing annual; grows rapidly. Height, 36 inches.

1130 *Choicest Mixed*. Flowers brilliant and various colors.

TITHONIA

Mexican Sunflower.

Sow in Spring and Summer.

6d. per packet.

1131 *Speciosa*. Bright orange. Height, 5 feet.

TORENIA

1/- per packet.

Sow in Spring.

An ornamental pot plant perennial; suitable for bedding in sheltered positions. Height, 12 inches.

1133 *Baillonii*. Flowers yellow, brownish red throat.

1134 *Fournieri Grandiflora*. Large purple and white flowers.

TROPÆOLUM

6d. per packet.

Sow Spring and Summer.

1135 *Canariensis (Canary Creeper)*. Foliage delicate; flowers golden.

URSINIA

Jewel of the Veldt.

6d. per packet.

Sow in Spring.

Annual. Both foliage and flowers are elegant and attractive. The blooms, carried singly on 1 foot stems, are produced in abundance.

1135a *Anethoides*. Orange-yellow, with zone of royal purple round central disc.

VENIDIUM

Sow Spring and early Summer.

1136 *Fastuosum*: See Novelty pages.

VERBASCUM

6d. per packet.

Sow Autumn and Spring.

1137 *Dwarf Hybrids*. Charming low-growing plant, sending up many spikes of pretty flowers of various colors; excellent for cutting; perennial.

VERBENA

6d. per packet.

Sow in Autumn and Spring.

One of the most useful bedding plants; very hardy.

1140 *Mammoth Hybrid*. Mixed. Extra large flowers.

1141 *Auricula Flowered*. Mixed. 6 ins.

1142 *Coccinea*. Beautiful glowing scarlet; very fine. 6 inches.

1143 *Italian Striped*. Handsomely striped.

1144 *Coerulea*. Shades of blue; contrasts well; effective.

1145 *Candidissima*. Beautiful pure white; large trusses of flowers.

1146 *Lucifer*. Brilliant scarlet.

1147 *Lutea*. Pale yellow.

1148 *Mayflower*. Pink, self.

1149 *Royal Bouquet*. Mixed. (Upright). Auricula eyed type.

1149a *Blue shades*.

1149b *Etna*. Intense geranium-red, yellow eye.

1149c *Lavender Glory*. Lavender, medium-sized, creamy white eye. 1/- pkt.

VIOLA

(See Page 14).

VIOLET

VIOLA ODORATA.

6d. per packet.

Sow in the Autumn and Spring.

1150 *Sweet, Blue*. Hardy; perennial. 6 inches.

1151 *The Czar*. Very large; fragrant; purple. 6 inches.

1152 *Alba*. Pretty, white; distinct. 6 ins.

VIRGINIAN STOCK

3d. per packet.

Sow in Autumn and Spring.

Very dwarf, free-blooming, hardy annual; very effective for edgings.

1157 *Red*. Good rich color. 6 inches.

1158 *White*. Fine pure white. 6 inches.

1158a *Mixed*.

VISCARIA

6d. per packet.

Sow Spring and Autumn.

Of a free-blooming nature, this dwarf, compact-growing annual—height, 12 inches—is suitable for edging or for massing.

1159 *Dwarf White*.

1159a *Firefly Red*.

1159b *Azure Blue*.

1159c *Mixed*.

WALLFLOWER

3d. per packet.

(Except where otherwise marked).

Sow Spring and Autumn.

BIENNIAL VARIETIES.

(Late Flowering).

1160 *Blood Red, Single*. The old favourite; distinct.

1161 *Choicest Mixed*. Single; colors from blood red to pale yellow.

1162 *Cloth of Gold*. Distinct rich golden yellow.

1164 *Ruby Gem*. Single; a most brilliant flower, beautiful ruby violet; flowers extra large.

1166 *Choice Double, Mixed*. Grand strain; choicest double, all colors; most beautiful. 6d. per packet.

ANNUAL VARIETIES.

(Early Flowering).

6d. per packet.

Sow during late Summer and early Autumn. Will flower during Winter and Spring. Suitable for warm climates.

1165 *Early Single, Mixed (Paris Market)*. Beautifully sweet-scented.

1169 *Early Single Brown*.

1170 *Early Single Golden Gem*. Golden yellow, with green bud.

1170a *Early Single, Blood Red*.

1170b *Early Single, Belvoir Castle*. Flowers yellow; buds dark brown.

1170c *Early Double, Mixed*.

ZINNIA

(See page 16).

All Seeds offered by us are thoroughly tested to show that they conform to the standard of germination required by the N.S.W. Seed Act. Samples and quotations will be willingly sent free, together with a copy of our Monthly Price List of Farm Seeds, on receipt of application.

MANGEL WURZEL

Mangold

No dairy farmer should be without a few acres of this most valuable root crop. It greatly adds to the quality of milk, and roots can be stored for many months if required. It is useful also for feeding cows and pigs. The Long Red and Yellow Globe are the varieties most esteemed.

MAMMOTH LONG RED—Best variety for deep, well-worked, rich land. 1/6 per lb., Postage extra.

CHAMPION YELLOW GLOBE—Most suitable shallow soils; keeps well. 1/6 per lb., Postage extra.

HALF LONG SUGAR—White. 2/- per lb., Postage extra.

HALF LONG SUGAR—Pink. 2/- per lb., Postage extra.

CULTURAL NOTES.

Good, strong, and deeply-worked soil will produce the heaviest crops; the land should be ploughed deeply twice, scarified, rolled and harrowed lightly. Sow in drills 4 feet apart, and thin to 12 to 18 inches between each plant; 3 to 4 lb. of seed is sufficient for an acre, and soaking the seed in warm water for 24 hours will hasten germination. January to March, also in the Spring, are the best months to sow.

BEANS

Soja or Soy Bean

Price on application.

CULTURAL NOTES.

This plant makes fine green fodder for stock, cut when in flower; it also makes excellent hay, of which stock are very fond. The main use for Soy Beans is as green manure or soil crop, for which purpose it is very highly esteemed in the cooler areas. Also recommended as a rotation crop, especially in the tableland districts. Special attention is drawn to this valuable fodder and soil improving crop by the N.S.W. Department of Agriculture, and leaflets are available on application. Although Soy Beans have been under cultivation in a small way for many years in N.S.W., its advantages as a hay, fodder or rotation crop have not been fully appreciated. Farmers are strongly advised to become interested in its valuable properties. In the United States very large areas are devoted to growing Soy Beans for use on the lines recommended above. Sow in drills at the rate of 12 lb. per acre. If broadcasted say 20 to 30 lb. per acre. Sow from October to January.

Florida Velvet Bean

Price on application.

It is claimed for this Bean that it is one of the best land fertilisers which can be grown. It is a nitrogenous plant; enriching the ground in a wonderful manner; stock are also fond of it, either as green fodder or when matured.

CULTURAL NOTES.

Sow in Spring in hills 4 feet apart, and the same distance between the rows, two or three Beans in each hill; 15 to 20 lb. will sow an acre.

Horse Bean

Price on application.

CULTURAL NOTES.

The land for this crop should be deeply ploughed and well worked; a good strong soil, or even clay, is preferable to light or sandy soil. April is the best month to sow, but later sowing can also be made during May, June or July. One bushel will sow an acre in drills 2 to 3 feet apart.

SWEDE and FIELD TURNIPS

ANDERSON'S IMPERIAL PURPLE TOP SWEDE—Splendid heavy Swede; fine shape; excellent quality, and keeps well. Per lb., 2/6, Post Free.

SKIRVING'S PURPLE TOP SWEDE—Heavy cropper, and a well-known variety. Per lb., 2/6, Post Free.

SUTTON'S CHAMPION PURPLE TOP SWEDE—Fine shape and heavy cropper. Per lb., 2/6, Post Free.

The following are suitable for the colder districts:—

PURPLE TOP YELLOW ABERDEEN—Large, good quality. Per lb., 2/6, Post Free.

GREEN TOP YELLOW ABERDEEN—Hardy, good keeper. Per lb., 2/6, Post Free.

WHITE POMERANIAN GLOBE—Large, and very useful. Per lb., 2/6, Post Free.

CULTURAL NOTES.

Any rich, strong land, if well ploughed, harrowed and rolled, will produce fine Turnips. The best time to sow Swedes is January or February, although some prefer an earlier or later sowing. Sow in drills 2½ to 3 feet apart, and thin the plants to 18 inches apart; 2 to 3 lb. of seed will sow an acre. If broadcasted 4 lb. seed per acre.

The Aberdeen and White Pomeranian can be sown a few weeks later.

RAILWAY REGULATION.

The attention of our customers is drawn to the fact that parcels under 14 lbs. in weight cannot be despatched by goods train.

Sugar Beet

Price, 2/- per lb., Postage extra.

VILMORIN'S IMPROVED, WHITE.

This root crop makes an excellent food for dairy cattle and pigs, and yields heavily.

CULTURAL NOTES.

The cultivation is much the same as that of Mangel Wurzel, but the plants should stand closer in the rows.

Sheep Burnet

1/6 per lb. Special price for large lots.

CULTURAL NOTES.

This valuable forage plant is a perennial, and is specially adapted for poor, arid soils which would not grow lucerne. It produces most nutritious feed for sheep and cattle. It has a long tap root, which penetrates so deeply into the soil that it is enabled to resist the most severe droughts. Burnet can be grown alone, or with grass seed for hay or pasture. Sow in March and April; broadcast at the rate of 12 to 15 lb. per acre; 5 to 6 lb. when mixed with grass seed.

Cattle Cabbage

Price, 4/6 per lb., Post Free.

ROBINSON'S CHAMPION, OX.

CULTURAL NOTES.

Sow in June in seed beds of poor soil to furnish plants for transplanting into the field in August and September. Another sowing may also be made in January or February, but June is the best month to sow for large field Cabbage required during Winter and early Spring for cattle or pig food. Four ounces of seed will give plants for 1 acre. Land must be strong, rich, and well worked; and horse, cow, or pig manure can be used in large quantities.

Buckwheat

Price, 16/- per bushel.

CULTURAL NOTES.

A splendid quick-growing fodder plant, which can be sown in succession from the end of September to March. It is also grown for green manure, to be ploughed in, which greatly increases the fertility of the soil. Sow 4 to 5 pecks broadcast, and 1 to 2 pecks in drills, per acre.

Field Carrot

Price, 5/- per lb., Post Free.

LONG RED SURREY.

LARGE RED ALTRINGHAM.
WHITE BELGIAN.

CULTURAL NOTES.

Valuable root crop; prefers land of a light loamy or sandy description, deeply tilled. Choose land in good heart, and never use stable manure when putting in this crop. Four lbs. will sow an acre in drills. Sow during September. Another sowing may be made in February or March.

Cattle Melon

Price, 5/- per lb., Post Free.

CULTURAL NOTES.

Deeply dig or trench the ground; add farm-yard or artificial manure abundantly; plant in hills 3 or 4 yards apart, and sow a few seeds in each hill. September or October are the best months to sow, but late plantings may be made in favorable seasons. One lb. of seed will sow an acre.

Chicory

Price, 3/6 per lb., Postage extra.

Cultivated as a root crop, Chicory should be grown in a similar manner to Carrots. A loamy or sandy soil is most suitable. Sow during August and September.

Chou Moellier

(FODDER PLANT).

Price, 4/6 per lb., Postage extra.

This plant yields an enormous amount of feed; sometimes grows 6 feet in height. In a young state it can be fed down like Rape, or allowed to mature, and chopped or cut up, and fed to dairy stock.

Sow seed in Autumn or Spring in drills 2 feet apart; young plants can be thinned or transplanted, to stand 12 or 14 inches apart in the rows.

Kale

Thousand-headed

Price, 2/6 per lb., Postage extra.

A valuable fodder plant, which can be fed down two, and sometimes three times during the season.

CULTURAL NOTES.

Sow in June in seed beds of poor soil, to furnish plants for transplanting into the field in August and September. Another broadcast sowing, 5 or 6 lb. per acre, may be made in January or February, but June is the best month for sowing for Winter and early Spring for cattle and pig food. One lb. of seed will give plants for 1 acre if raised in the seed beds and planted out—or sow in drills 2 to 3 lb. per acre, thinning when required. Land must be strong, rich, and well worked, and horse, cow, or pig manure can be used in large quantities. Bone dust at the rate of 3 to 4 cwt. per acre will not be a too liberal dressing where farm-yard manures are not available.

White Mustard

Price, 1/- per lb., special quotation for cwt. lots.

We recommend the use of White Mustard with Dwarf Essex Rape, at the rate of 1 oz. of Mustard Seed to 1 lb. of Rape—the two combined forming a most excellent fodder.

ONION

AS A FIELD CROP.

CULTURAL NOTES.

The best time of the year to sow for the main crop of Onions in the colder parts of the State is August. In the coastal districts, and the warmer parts of the State, it will be advisable to sow the seed in May, June and July, according to situation, so that the crop will have a chance to mature before the hot weather sets in.

Sow in Drills, with machine, 4 lb. seed to acre, ordinary crop; with hand, 8 lb.

Sow in Drills, with machine, 8 lb. seed for pickling Onions.

Sow in Drills (open), with hand, 15 lb. seed for pickling Onions.

Sow Broadcast, 20 lb. seed for pickling Onions.

Per lb.

Brown Spanish 10/-

Brown Globe 10/-

Hunter River Brown (Early) { Price on Application

Extra Early Flat Red 12/6

Mammoth Silver King 10/-

Silverskin Pickling 10/-

Other varieties available. Prices on application.

Cow Pea

WHITE, BLACK AND CLAY COLORED.

Prices on application.

The Cow Pea possesses a great value as a green manure, and, like all leguminous plants, it takes nitrogen from the atmosphere and deposits it in the soil during growth.

CULTURAL NOTES.

Spring is the best time to sow, and if the crop is intended for green feed, we advise sowing in drills 2½ to 3 feet wide, and thinning the plants to 1 foot apart in the drills; about 10 lb. of seed will sow an acre in this way, but for green manuring, 30 to 50 lb. should be sown broadcast, and the crop should be ploughed down just when the seeds have formed. For this purpose it can be sown during early Summer.

Field Pea

Partridge or Grey } Prices on Application.
Small and Large Blue }
Dun }

CULTURAL NOTES.

Any fair loamy strong soil, if well drained and deeply ploughed, or a sandy loam, will suit this crop; and it is not necessary that land should be very rich, as a strong haulm is not desirable. The seed can either be sown in drills or broadcast. Sow in April, May or June, 1½ to 2 bushels per acre.

Peanuts

ARACHIS HYPOGEA.

1/3 per lb.; Postage extra.

Special Price for large quantities.

These Nuts do well in most of the warm districts of our State and in Queensland. The soil should be of a very open nature, thoroughly broken up, but not to a greater depth than 4 or 5 inches. It being desirable to keep the Nuts as near the surface as possible. Sow the Nuts in September, in drills 3 feet apart, and 9 to 12 inches between the Nuts, and about 3 inches deep; they may be planted whole at the rate of 40 lb. to the acre. It is necessary to keep the soil free from weeds until the vines have covered the ground, when the crop will need but little attention. Harvest when the vines turn yellow, and while most of the Nuts still cling to the roots.

Cattle Pumpkin

Anderson's Mammoth, 4/- lb.; Post Free.
Gamma, 8/6 per lb.; Post Free.

CULTURAL NOTES.

The best month to sow is October, though it is common to do so in August and September. One lb. of seed sufficient for an acre.

Sowing Rape

Genuine Dwarf Essex Broad-Leaved

Prices on Application.

THE CULTURE OF RAPE.

Land should be prepared for Rape by ploughing well during the Winter and exposing it to the action of the atmosphere; the land should then be cross-ploughed, harrowed, and worked to a fine surface by January. When sown broadcast from 5 to 7 lbs. is used per acre. Rape can also be grown for green manure, and ploughed under as soon as the plants have made a strong growth and become well rooted. For Barley and Wheat this makes an excellent manure, and it will also rest and clean the land. For sheep the seed should be drilled the same as for Turnips; sow 3 to 4 lb. per acre, and when the seed comes too thickly thin the young plants like Turnips, and cultivate the crop in similar manner. Sheep must not be turned in until the crop is full grown.

Rye

COMMON.

Price on application.

CULTURAL NOTES.

This excellent forage plant will grow on poor or rich land. Sow from March to July, broadcast 1 bushel per acre.

Sainfoin

ESPARCETTE.

Price on application.

CULTURAL NOTES.

An excellent forage plant particularly suited to our climate. Sow the seed broadcast at the rate of 40 lbs. per acre. Sow March and April.

Sunflower

LARGE RUSSIAN.

1/- per lb.; Postage extra.

Tares or Vetches

LARGE BLACK AND GOLDEN.

Prices on application.

CULTURAL NOTES.

Valuable either for hay or green fodder. Prefers rather a strong, well-worked soil, and will even grow in clayey ground during moist seasons if it has been well manured. On average land one ploughing will be sufficient. Sow in March, April and May, with Barley or Rye.

Teosinte

EUCHLAENA LUXURIANS.

6d. per packet.

CULTURAL NOTES.

This being a tropical plant, only the warmer districts of this State and Queensland are suitable to its cultivation. When it has reached a height of 3 or 4 feet, it will, if cut for fodder, give three or four cuttings. Sow October and November.

Tagasaste

CYTISUS PROLIFERUS.

4/- per lb.; Postage extra.

This plant is sometimes called "Tree Lucerne." A forage plant of which stock are fond. Valuable in hot, dry districts, as it roots deeply, and is very hardy.

Sow in Autumn or Spring, and thin out to 10 feet apart.

Tobacco

List of varieties available, and prices will be furnished on application.

SORGHUMS AND MILLETS

For Nutritious Green Fodder

SORGHUMS

CULTURAL NOTES

The precise time to sow the seed will depend upon the season and the district, as local and other influences must be taken into consideration—generally speaking, from September to end of January. In any case seed should not be sown until the ground is thoroughly warm, as cold, damp weather will often prevent germination and a vigorous growth after the seed has sprouted. If the crop is required for hay, it is best to sow the seed broadcast at the rate of about 35 to 50 lbs. to the acre. Should the crop be required for feeding to stock in a matured state, or for grain, the seed is best drilled in at the rate of from 10 to 15 lbs. per acre. The drills should be about 3 feet apart.

Early Orange Sorghum

Early Orange is one of the best drought-resisting Sorghums. Its nutritive value is high, and it is claimed to be much superior to Saccaline. In growth a height of from 12 to 13 feet is obtained, and a marked freedom from disease is one of its merits. The growth is rapid, the taste sweeter, and the stem covering much softer, than other Sorghums. The stalk is excellent feed and keeps its juice well. Though not quite so tall as some other varieties it stands up well and does not fall or break up. Early Orange Sorghum is ideal for green feed (after wilting), ensilage or hay. Similar to other Sorghums, it stools freely, and during the season will stand several cuttings. When sowing, the same quantity as other Sorghums may be used.

Saccaline or Sweet Sorghum

The Sorghum of high nutritive value, and specially fine as a fodder for the coastal districts. Saccaline grows to a height of 12 feet, and springs again when cut. Sow 35 to 50 lbs. to the acre broadcast, or 10 lbs. in drills.

Early Amber Cane

We strongly recommend this variety of the Sorghum family. It makes splendid feed, is very largely grown, and crops early. Sow 10 to 12 lbs. per acre in rows, or up to 45 to 50 lbs. broadcast.

Planter's Friend

TRUE SOUTHERN SEED.

One of the most popular of the Sorghum family, it produces enormously, and can be cut two or three times. Sow 10 to 12 lbs. per acre in drills; up to 45 to 50 lbs. broadcast.

Sudan Grass

SORGHUM VULGARE.

Sudan Grass, so called, is really a Sorghum, and is primarily used as a hay crop. It is probably the most drought-resisting hay plant known. It may be grazed, but it will not then supply the same amount of feed. Sudan Grass will thrive on land that will not grow Lucerne, and will make itself at home on almost every class of soil. These facts should be of vital interest, as it ensures a greater yield per acre than from any crop yet cultivated. If sown early, it is possible to obtain three cuts per season. Sow eight to ten pounds of seed to the acre in drills, and 20 to 25 lbs. broadcast. Sow Sudan Seed in the Spring.

JOHNSON GRASS

SORGHUM HALEPENSE.

One of the best fodder plants we have for poor land, and while it is known as Johnson Grass, it is in reality a Millet. Sown largely on the poorer pasture lands, it has proved invaluable during periods of drought. It spreads rapidly, its runners sending up a shoot at every joint. For this reason it should not be sown on cultivated land or in the garden, as if once introduced it is almost impossible to eradicate it. Its remarkable adaptability to all sorts of soil, and its resistance to drought render it most valuable. It can be cut three times a year, and it will give five tons of hay per acre. The best time to cut for that purpose is when the plant comes into bloom. Sow and cover lightly 10 to 15 lbs. per acre. Sow during Spring; it will not stand frost.

PRICES OF ALL ITEMS ON THIS PAGE WILL BE
SUPPLIED ON APPLICATION.

MILLETS

CULTURAL NOTES

In the coastal districts the seed may be put in any time during September, October, November, December, and January, but in the cooler parts October, November, and December will be found the best months to sow. The seed may be drilled or sown broadcast. Generally there is but little, if any, choice between the two methods when the crop is to be grown for green feed or cut for hay, except that the drilled-in seed usually results in a more even growth, and a little less seed is required. Where the crop is grown for grain or ensilage it is advisable to drill the seed in. By this method it takes 10 lbs. of seed to sow an acre, but if sown broadcast, 15 to 20 lbs. will be required for the same area.

Japanese Millet

Is of rapid growth, is drought-resisting, and yields large quantities of green fodder. Sow 28 lbs. per acre broadcast, or 12 lbs. in drills.

Hungarian Millet

Is recommended as a green food, and for hay. Sow 20 lbs. per acre broadcast, 8 lbs. in drills.

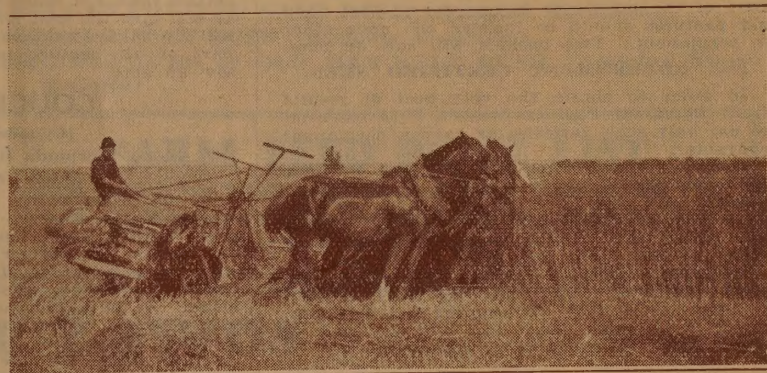

Pearl Millet

This is relished by stock, but is not so valuable as some of the other varieties. 10 or 12 lbs. will sow an acre broadcast. Sow October and November.

Broom Millet

WHITE ITALIAN.

Valuable only for broom-making.

Seed Grains

All Seed Grain offered by us is thoroughly dressed and re-cleaned. We shall be pleased to submit samples and prices on application. We sell Seed Grain for Nett Cash Only. F.O.B. or F.O.R. Sydney.

Thew Canberra	WHEAT.	
	Hard Federation Yandilla King	Marshall's No. 3 Florence, Firkank
White Tartarian Potato	OATS.	
	Algerian Sunrise	Guyra Mulga
Cape	BARLEY.	
	Skinless All Finest Samples.	English or Malting

Seed Maizes

The Maizes sold by us are standard kinds, true to name and are obtained from the best sources. When possible the Maizes will be selected cobs, "topped and tailed." Thus, first-class seed is secured. Samples and quotations upon application. All seed sold as per sample. We usually handle the following kinds:—

Funk's Yellow Dent	Fitzroy	Hickory King
Wellingrove	Iowa Silver Mine	Yellow Ninety Day
Golden Glow	Iowa Gold Mine	Leaming
Golden Superb	Large Red Hogan	Golden Beauty

ANDERSON'S SPRING LIST

We publish each Spring a Special List of Maizes, Millets, Sorghums, Rape, Grasses, fully priced. Make sure and send for a copy. Post Free on application.

ONE IMPORTANT FACTOR TO SUCCESSFUL FARMING IS THE RIGHT SEEDS

PERMANENT PASTURE GRASSES.

Re-cleaned and Machine Dressed

NOTE:—Prices of Grass Seeds and Clovers are liable to vary during the season, but we shall be pleased to forward quotations upon receipt of enquiry from our friends and customers. Our samples are all prime, re-cleaned and of a high standard of germination.

PERENNIAL RYE GRASS

(*Lolium Perenne*)

An excellent pasture grass; produces an abundance of fibrous roots; starts very early in Spring. Possesses most nutritious qualities, and is relished by all kinds of stock. It bears depasturing well, and will succeed in any average soil. In the cooler districts of the State it thrives admirably, and yields surprising results. Samples of Rye Grass Seed differ so very much in quality that great care on the part of the purchaser is necessary. Seed from old pastures should be insisted on; none other is permanent. Two bushels will sow an acre.

N.Z. GOVERNMENT CERTIFIED SEED.

In order to obtain the very best of results from Perennial Pasture Grasses it is essential to use only such varieties as have a permanent character.

In some of the Grass Mixtures that we offer Perennial Rye Grass is included, and the seed used is only such as is obtained from old pastures and can be classed as perennial without any doubt, but of late, enquiries have come from agriculturists for what is known as "Certified" Seed, and in order that clients can be satisfied on that point we have secured supplies of the N.Z. Government Certified Perennial Rye Grass Seed, and will be glad to quote either in mixtures or otherwise.

WIMMERA RYE GRASS

(*Lolium Subulatum*)

A drought-resistant form of Italian Rye Grass. An annual, and has proved a very desirable addition to the pasture grasses, especially in conjunction with Subterranean Clover and others on second-class land. During the past few years it has been utilised successfully in many parts of N.S.W. and Victoria, both for pasture and hay purposes.

ITALIAN RYE GRASS

(*Lolium Italicum*)

This is an excellent grass to grow for green fodder for dairying purposes. On rich, moist soil it will yield three or four heavy cuttings in a year. It is only a biennial. Seed bearded. Two bushels will sow an acre.

COCKSFOOT GRASS

(*Dactylis Glomerata*)

This is perhaps the most generally useful of all the introduced grasses. It produces heavy crops of feed which is greedily eaten by all kinds of stock; can be either depastured or cut for hay; grows rapidly after being cut or grazed, and will flourish on a variety of soils and situations. It is largely grown by dairy farmers and graziers, and is one of the most prized of the imported grasses in New South Wales owing to its hardy constitution, and excellent fattening qualities, and it should be in every mixture. It reaches its greatest perfection in the cooler districts of the State. Two bushels to the acre.

PRAIRIE GRASS

(*Bromus Unioides*)

A very fine, rapid-growing grass, which yields a large amount of herbage during the Autumn and Winter months. It seeds very freely, and soon spreads by self-sowing. A nutritious fodder and pasture grass, one of the most valuable we possess. In rich land it will produce very heavy crops of the richest forage, and will afford five or six cuttings in the year. As a pasture grass it is first-class, being even richer in nutritious properties than the much-valued Perennial Rye Grass. It will give the best results in rich, moist land, but will do fairly well on any soil, and should form part of all pasture mixtures. Two bushels will sow an acre.

COUCH GRASS

(*Cynodon Dactylon*)

Bermuda Grass of America
Doob Grass of India

In dry seasons this grass is invaluable. It is esteemed as a pasture grass for its nutritious and flesh-forming properties. It will grow during the hot months of Summer, and start into fresh green growths after rain. Its long sucking roots soon cover the surface of the land, rooting at every point. It is a Summer and Autumn grass, and has no rival in dry, hot seasons. For a lawn or bowling green this is without doubt the most suitable grass for the coastal and warmer districts, and if kept well watered and cut, it will produce a beautiful green carpet during the hottest weather. Sow 10 to 15 lbs. per acre.

MOLASSES GRASS

(*Melinis Minutiflora*)

This grass has proved a valuable addition to pastures and is good for fodder purposes. It has proved resistant to drought, is robust in habit and growth, and is palatable to stock. Molasses Grass has grown exceptionally well on poor soil, it is well known in the Northern part of Queensland, and very suitable for the warm districts of N. S. Wales.

KENTUCKY BLUE GRASS

Or Smooth-Stalk Meadow Grass (*Poa Pratensis*)

A good pasture grass; suits the coast and cool districts, and will thrive in poor land. It forms a thick turf, and prefers sandy loam. Should form a portion of all pasture grass mixture; is one of the very best herbage grasses in cultivation.

CRESTED DOGSTAIL

(*Cynosurus Cristatus*)

A valuable grass for sheep pastures, forms a compact turf, deep rooting, capable of resisting drought. Good lawn grass, but not strong growing enough for cutting as fodder. Its chief value is for permanent pastures.

TALL OAT GRASS

(*Avena Elatior*)

A grass that will grow on almost any soil—it is recommended to be sown with other grasses in mixture for hay or pasture.

PHALARIS TUBEROSA

(*Bulbosa*)

The Great Winter Grass

This wonderful Fodder plant is adapted to almost any part of the State except in the far Western districts, although on the Irrigation Areas (Murrumbidgee) it has done remarkably well.

Phalaris is essentially a Winter grass, and it is in the colder regions of the State, such as Glen Innes, Guyra, Ben Lomond, that it has proved such a wonderful success.

In some of the districts the areas under Phalaris have been considerably increased of recent years. In some instances the seed is sown alone at from 2 to 6 lb. per acre, in other instances it has been sown along with other grasses, such as Cocksfoot, Rye, Fescue, Clovers, using from 1 to 2 lb. of Phalaris per acre, according to fancy.

The seed should be sown as early in the Autumn as possible to enable the grass to become thoroughly established before the Winter. It is also possible to increase the area under Phalaris by division of roots and transplanting.

Phalaris is a rapid grower, and attaining a height of 7 to 8 feet makes excellent hay, yielding 8 tons per acre.

During the growing season the herbage is very rich and good.

Special leaflet with Prices on application.

CHEWINGS FESCUE

An exceedingly useful and hardy variety; a great drought resister.

MEADOW FESCUE

(*Festuca Pratensis*)

A valuable grass for permanent pastures on all good but not too dry soils. Its leaves are succulent and tender, and it never forms rank turfs.

HARD FESCUE

(*Festuca Duriuscula*)

A variety of Sheep's Fescue, somewhat taller, and a good pasture grass for soil of sandy or light nature. It will not grow well on heavy land; a productive and nutritious grass.

SHEEP'S FESCUE

(*Festuca Ovina*)

A very hardy pasture grass, most suitable for sowing on the tablelands of the State; thrives on any average soil, and will even grow luxuriantly on poor land. It stands dry seasons fairly well; relished by stock; suitable lawn grass for cooler districts.

TALL FESCUE

(*Festuca Elatior*)

Productive and vigorous growing variety; much relished either as a pasture or hay. Strong and moist soils are suitable for its growth.

Sweet-Scented Vernal Grass

(*Anthoxanthum Odoratum*)

This perennial grass is liked on account of the perfume it imparts to meadow hay. As it starts early, it is a useful grass in pastures where the land is of a moist character. A pound or two should be added to all permanent pasture mixtures.

GRASSES—continued

Rough-Stalked Meadow Grass

(Poa Trivialis)

Suitable for pastures, and much relished by stock. All these meadow grasses prefer light soil, and may be sown at any time during the Autumn or Spring, when the soil is in suitable condition and the weather favourable.

Evergreen Meadow Grass

(Poa Sempervirens)

One of the most valuable of the Poas. Very suitable for cooler districts.

Wood Meadow Grass

(Poa Nemoralis)

A fine grass for sowing on natural pastures in country shaded by timber; it will also grow well in open country. Very nutritious, though not remarkable for abundance of yield. Desirable grass for pasture mixtures.

Wallaby Grass

(Danthona Semiannularis)

A valuable forage grass that adapts itself to almost any condition of soil or climate, and is recommended for systematic cultivation.

Rhodes Grass

(Chloris Gayana)

This famous Grass has now fully established itself, and is recognised as a most valuable fodder grass. Sow seed in the Spring, and during Summer; 1lb. to 2lb. of seed will sow an acre.

Paspalum Dilatatum

(The Great Dairying Grass)

FINEST STRONG-GROWING SEED. This Grass luxuriates under sub-tropical influences. It stands dry, hot weather admirably, yields a large quantity of herbage, and is particularly suitable for dairy cattle. The seed should be sown at the rate of 2lb. per acre, mixed with other grasses, or 6lb. per acre sown alone. The best time for sowing is in Spring and early Summer.

Paspalum Compressum

(Carpet Grass)

Considered to be an excellent pasture grass for sandy soils, on moderately fertile light soils it quickly covers the ground, forming a thick carpet and excluding weeds and other grasses. It is also used as a lawn grass, being dwarf and compact in habit, and easily cut with lawn mower.

Timothy or Catstail Grass

(Phleum Pratense)

A very productive and nutritious grass, suitable for hay, green fodder, or as one of the grasses in permanent pasture mixtures. In rich soil it yields enormous crops of fodder, while in poor soil it is also productive, sown with other grasses for grazing, when its luxuriant character will be assured, as it readily accommodates itself to circumstances. Sow in Autumn and Spring.

Native Grasses

MITCHELL GRASS (Astrebla Triticoides)

This perennial grass is found on rich soil all over the interior, but nowhere in large quantities. Under good cultivation it yields a very large amount of rich succulent herbage, stock being very fond of it.

N.S.W. BLUE GRASS (Andropogon Sericeus)

A splendid and valuable pasture grass, and makes considerable growth during Winter, and is thus doubly valuable to the grazier. During the Summer it yields a rich, leafy, bottom herbage, of which sheep are particularly fond, and fatten well on it. Stands close feeding, and makes capital hay.

Australian Salt Bush Seeds

Prices on Application.

The Salt Bush is a wonderful plant, and enjoys a great reputation amongst stockmen in the arid districts of the Central Plains. The kinds enumerated below will withstand long periods of dry weather, and still retain their nutritious qualities. Stock feed upon them with avidity. The best time to sow is Autumn, after a rainfall for preference, but may also be sown in early Spring.

We can usually supply seeds of the following varieties:—

CREeping SALTbush (Atriplex Semibaccata).

SLender-Fruited SALTbush (Atriplex Leptocarpa).

HALIMUS-LIKE SALTbush (Atriplex Halimoides).

ALL-Fruited SALT BUSH (Atriplex Holocarpa).

ANGULAR FRUITED SALT BUSH (Atriplex Angulata).

BLADDER SALT BUSH (Atriplex Vesicaria).

ROUND LEAVED or OLD MAN SALT BUSH (Atriplex Nummularia).

FARM SEED PRICE LIST

Each month we issue a Farm Seed Price List, giving the latest market quotations. A copy will be willingly sent to you Free on request.

Grasses for Lawns

How to Successfully Sow a Lawn

A NEATLY-KEPT LAWN, closely cut and free from noxious weeds, adds a finishing touch to the Home Garden. A beautiful rich, green lawn of ANDERSON'S EVERGREEN LAWN GRASS SEED, possessing that smooth, even, carpet-like appearance, is a delight to the eye, and a pleasure to walk upon.

First trench the soil, or at least dig deeply; this will assure a vigorous root growth. A dressing of Bone Dust at the rate of 4 ozs. to the square yard will greatly improve the lawn. To be a success, a lawn should be well drained.

Heavy soil can be made friable by working in a supply of slack lime or sand. Either will greatly improve the soil.

A weed-free lawn can be secured by going to a little trouble in the initial stages. After the ground has been well-dug and levelled, allow it to remain idle for five or six weeks. Then thoroughly hoe out the weeds that have germinated.

Before sowing, well rake the surface and remove all stones. Give a good watering, using a fine-nozzled hose. An important point to remember is that the finer the soil and the more even the surface, so will your lawn attain a better growth.

Sow ANDERSON'S EVERGREEN LAWN GRASS SEED broadcast on a fine day. A good plan, when sowing the seed, is to lay a plank or planks across the surface and sow an area two yards wide. Then gently rake over the soil, and so work until the whole of the lawn is completed. After sowing, it is advisable to lightly roll, thus firming the soil. When the seedling grass is about one inch in height, it should be rolled again, and the operation occasionally repeated. This will make for a good sward in the days to come.

It is important to keep the lawn well watered with the aid of a fine-nozzled hose; this will encourage a strong root development and prevent the young tender shoots from dying off.

Birds and cats can cause a lot of damage to a new lawn. The application of the following simple remedy will save you much annoyance and possibly loss of temper. Place wooden pegs around the edges of the lawn, leaving about 8 inches out of the ground, and stretch strands of black cotton across the lawn; this will effectually keep birds and cats away.

SOWING QUANTITIES:—

1 lb. Anderson's Evergreen Lawn Grass Seed will sow 625 square feet—25ft. x 25ft.

Anderson's

Evergreen Lawn Grass Seed

A specially prepared Mixture of Grasses, most suitable for Lawns. Price on Application.

Couch

Sow Spring and early Summer.

Particularly suitable for warm situations.

Price on Application.

Creeping Bent (Brown Top)

(AGROSTIS TENUIS)

This Grass has come very much to the front of late, as it has been found particularly adapted for Lawn Tennis Courts and Golf Greens. In the United States the putting greens on a great majority of the Golf Courses are made entirely from Creeping Bent. We can supply choice re-cleaned seed, and will gladly furnish price on application. Autumn sowing is recommended.

Buffalo

(ROOTS ONLY). 2/- per 100; 17/6 per 1,000.
Postage or Carriage Extra.

CLOVERS

AND OTHER

PASTURE

SEEDS

SAMPLES AND PRICES ON APPLICATION

Lucerne

(MEDICAGO SATIVA)

N.S.W. GROWN TRUE BROAD-
LEAVED TYPE

Our re-cleaned genuine Australian-grown samples are always to be relied on, and no dairy farm should be without a large paddock of Lucerne, as it largely increases the yield of butter, gives enormous crops of green fodder in succession, and is a great standby in dry seasons if a good supply of hay has been secured. Every station or home farm should have its Lucerne paddock for the same reason, and if the small selector is wise he will make this one of his first cares—to sow a small paddock of this valuable crop on the best land he has, being careful that the soil is thoroughly well worked.

Lucerne can be used either as a green crop or as hay, and all stock will thrive well upon it. The land intended for it must be well and deeply tilled, and deep alluvial soil is most suitable, although any well-worked average land will produce fine crops. Sow in drills about 10 lb., and broadcast about 15 lb. of seed to the acre. The best time for sowing, under ordinary circumstances, is Autumn; but Spring sowing is also successfully practised by many growers.

Perennial, Red Clover or Cow Grass

(Trifolium Pratense Perenne)

This is the grand old Red Clover of the English meadows, which is relished by all stock, has splendid fattening qualities, and should be in every pasture mixture sown on the tablelands of the State and cooler districts. A good fodder plant, and makes fine hay. Sow in Autumn, 2 lb. only per acre, when included in pasture mixture.

Scarlet Clover

(Trifolium Incarnatum)

Excellent for a green crop of fine quality, large yield, quick growth, and relished by all kinds of stock. If sown on grazing land, care must be taken that it is kept fed down, as if it is eaten by stock when in flower it has an injurious effect. Sow 20 lb. per acre.

Berseem or Egyptian Clover

(Trifolium Alexandrinum)

This Clover has proved of value in many parts of the State, and is specially recommended for Coastal districts. It can be used for pasture, cut for green feed, or ploughed under as green manure to improve the soil, and in this respect is especially valuable for preparing the land for Lucerne. It is particularly useful for cleaning the land, as the frequent cutting destroys the weeds. It does fairly well in poor soils, much better than other clovers, and resists droughts. It suits land under irrigation splendidly, and is much relished by stock. It requires to be sown each season, being an annual, and should be sown in Autumn. 15 to 20 lbs. to the acre, broadcast.

(Send for Leaflet about Berseem).

Strawberry Clover

(Trifolium Fragiferum)

The suitability of Strawberry Clover for swampy and moist lands has become established beyond any doubt either as a fodder for dairying cattle or for fattening purposes. Perennial in character and by its habit of growth establishing itself very quickly. Strawberry Clover is also suitable for black loamy land, also moist river flats. Sow 2 lb. shelled seed per acre. Leaflet and price on application.

Subterranean Clover

(Trifolium Subterraneum)

This annual fodder plant has become an important factor in the carrying capacity of many areas devoted to stock of various kinds, including sheep.

Subterranean Clover is highly esteemed by pastoralists because it supplies such a large quantity of feed very early in the season, and because it is so nutritious, and although it dies down in the Summer, its value must not be depreciated by that fact.

Once Subterranean Clover becomes established it is not necessary to sow again, as the plant by its peculiar habit of growth, resows itself, as it were, and the new growth appears shortly after the first Autumn rains and continues until well into Summer. The stems are of a creeping habit, and under favourable conditions measure from 4 to 5 feet from tip to tip.

The plant is hardy, and cold will not affect it. It thrives in any soils, except swamps, and is particularly valuable on poor, gravelly land.

The best time to sow is from March to August. With the early sowing followed by rains, good results will be obtained. The quantity of seed per acre ranges from 2 to 8 lbs.—that is to say that 2 lbs. is sufficient for an acre, but in order to secure the better results per acre of feed—it is considered desirable to sow the larger quantity. Leaflet and prices on application.

Trefoil or Yellow Clover

(Medicago Lupulina)

This is a hardy Clover for sheep pasture, and very useful in the colder districts, but it is not of the same value as either the Red or White Clover; it is very free-growing, spreads easily, and is difficult to eradicate.

Alsike Clover

(Trifolium Hybridum)

A heavy yielding and excellent Clover, but requires a moist situation. Sow in September if the land is moist, otherwise March or April; 5 to 6 lb. of seed for mixing with pasture grasses will be sufficient per acre.

Birds-Foot Trefoil

(Lotus Major)

This plant is well-deserving of cultivation on light inferior soil on which it will yield a greater bulk of herbage than any of the other cultivated Clovers. It is highly nutritious, and is eaten with avidity by cattle and sheep. From the great depth to which its roots penetrate it is not liable to be injured by drought. Sow 10 to 12 lb. per acre.

Sweet Clover

(Melilotus Alba)

While not extensively grown, this plant has obtained some attention in the cooler parts of New South Wales. It is largely grown in the United States, both as a pasture and green manure crop, and should be given a thorough trial throughout the various parts of the State. Sow in drills, 10 lb. per acre, in early Spring.

Rib Grass

(Plantago Lanceolata)

In Spring and other seasons, when moisture is abundant, the Rib Grass yields an enormous amount of rich herbage, and should be included in all pasture mixtures. Sow with grasses 2 or 3 lb., or 20 lb., if alone, to the acre.

White Clover

(Trifolium Repens)

White Clover has long since become naturalised in many districts, and is generally found on alluvial flats. It is valuable in pastures either for dairying or fattening, and will thrive on comparatively poor land. In dry and hot weather the herbage withers and disappears, but again makes a vigorous growth in the Autumn. Sow February to May; 2lb. to 4lb. will be sufficient for an acre if mixed with grasses.

Permanent Pasture Grasses

It has become an important factor in the welfare of Stock, both for grazing and dairy operations, that the quality of the fodders requisite for the object in view should be given first consideration. Not only is it necessary to provide pastures that, with judicious feeding, will enable the herds to maintain their standard of wool or beef production, but also the very important supply of milk and butter-fat.

The following Grass Seed Mixtures are to be looked upon as indicating only the probable Grasses to be utilised in the several districts. Conditions, however, are so varied that it is absolutely requisite, almost in every instance, that Special Mixtures should be recommended.

Our desire, therefore, is to get into touch with those who contemplate sowing Pasture Grasses, and we will be glad to give quotations at per acre for any locality if clients will furnish full details as to area of land to be laid down, description of same, situation, and as to whether partially grassed.

Hints on Sowing and Cultivation of Grass Paddocks

Suitable Land

The best results must always be expected from rich lands, but much can be done with even average soil if it is well prepared; the former will require no manure, but the latter will be greatly assisted by a good dressing of artificial fertilisers—say 3 cwt. to the acre, the first cost of which will soon be repaid by the increased crop.

Preparation of the Land

Generally the better the land is worked the more satisfactory will be the results, and if the reader requires confirmation of this statement let him look at any paddock of Oats, Barley or other green crop which has been sown on land recently cleared and stumped, and he will find that wherever a tree has stood, the crop will be much higher than in any other portion of the paddock, the reason being that in removing the stumps by fire or otherwise, the land has been broken up to a depth of probably 2 or 3 feet. It will, therefore, be seen that you cannot plough the land too deeply before sowing grass seeds. Cross-ploughing will also do much to improve it, and it will often be found that a rough harrow passed over the land before sowing will be desirable.

Manures for Grass Land

The use of artificial manures cannot be too strongly recommended, because they contain all the fertilising qualities of stable and cow manure, and also much that these do not possess, and also because they do not contain weed seeds, which all stable, and particularly cow manure, does in very large quantities. Artificial manures last longer in the soil, and are more easily applied, and really, on consideration, they are best.

Seasons to Sow

Autumn sowing is best, and March and April are the best months, but later sowings can be made with advantage in many districts, and a favourable season will often render this practicable. August and September are the best spring months, but all sowings should be complete by that time, as young plants must be established to enable them to stand a dry Summer.

The Seeds to Sow

The selection of grass seeds of a permanent character is an all-important matter; such seeds can only be obtained from old pastures. Farmers should be careful to sow only clean seeds, otherwise they will introduce into their farms all manner of weeds.

The Seed Sowing

About 20 lb. mixed seed (equal to 1 bushel) will be sufficient for an acre, and this should be sown broadcast, which will vary with the conditions of the land, etc., and a day should be selected when there is not much wind, otherwise it will be difficult to sow evenly. The heavy seeds—Clover, Rib Grass, etc.—are better sown separately, and as it may be difficult to distribute evenly a few pounds of seed over an acre, we recommend that these heavy seeds be mixed with three or four times their bulk of sand or soil and then sown after the grass seed. The sowing completed, a roller or light harrow should be run over the ground, and this will be all that is necessary to cover the seed. And if the land was in good condition when seeded, or if rain should fall soon after, the young plants will make their appearance in a week or ten days.

Sowing after a Green Crop

It is a capital plan to sow a green crop first on newly cleared land, as there is sure to be a great deal of weed

seeds in the soil which will come up with the crop and be killed by the second ploughing, leaving the land clean for the reception of the grass seeds to follow. It is advantageous to run a roller over the land when the grass is only a few inches high. The first crop of grass should be cut and not eaten down, as the young plants are liable to be pulled up if stock is turned upon them. The second crop can, of course, be pastured. Do not allow young pastures to ripen seed for the first two years, at least, as by doing so you weaken them, and the grasses will die out.

Improving Poor Pastures

To improve bare or poor pastures we recommend the following course, which will in good seasons give splendid results:—Break up the bare patches with a heavy hoe, or, if a large area, with a heavy tine harrow, and during showery weather sow 10 to 20 lb. mixed grass seed to the acre over the barest portions of the paddock as may be recommended. Then pass a flock of sheep over it, driving them closely, so that they may tread the seed in where most wanted. This will take the place of harrowing or rolling. In dry seasons a large percentage of the seed sown in this way will be sacrificed, but that risk may be faced, as our plan is the best and the only one to thicken up old and poor pastures without breaking them up.

"GOLDEN OPINION"

Extract from letter received from a customer on the South Coast:—

"The paddock is hill land, not steep, just a gentle rise. The one joining it we planted two years ago with your mixture, and the Clovers in it have been wonderful—tons and tons of beautiful feed. About every six weeks the cows are grazed on it from two to three weeks for two hours each day—50 cows."—
"W.T.," Central Tilba, 6/2/33.

Suggested Grass Seed Mixtures for Permanent Pastures

FOR THE WARMER DISTRICTS

Mixture No. 1—

- 5 lbs. Perennial Rye Grass.
- 5 " Wimmera Rye Grass.
- 4 " Prairie Grass.
- 2 " Cocksfoot Grass.
- 2 " Rhodes Grass.
- 2 " Mixed Clovers.

20 lbs. for 1 acre, mixed.

Mixture No. 2—

- 5 lbs. Cocksfoot Grass.
- 3 " Prairie Grass.
- 5 " Perennial Rye Grass.
- 4 " Italian Rye Grass.
- 1 " Paspalum Grass.
- 1 " Rhodes Grass.
- 1 " Mixed Clovers.

20 lbs. for 1 acre, mixed.

FOR THE COOLER AND COLD DISTRICTS

Mixture No. 3—

- 10 lbs. Perennial Rye Grass.
- 4 " Wimmera Rye Grass.
- 4 " Cocksfoot Grass.
- 5 " Prairie Grass.
- 2 " Kentucky Blue Grass.
- 1 " Dogstail.
- 1 " Tall Oat Grass.
- 1 " Phalaris Bulbosa.
- 2 " Mixed Clovers.

30 lbs. for 1 acre, mixed.

Mixture No. 4—

- 15 lbs. Perennial Rye Grass.
- 7 " Prairie Grass.
- 4 " Cocksfoot Grass.
- 2 " Kentucky Blue Grass.
- 1 " Phalaris Bulbosa.
- 1½ " Mixed Clovers.

30 lbs. for 1 acre, mixed.

FOR THE WARM COASTAL DISTRICTS

Mixture No. 5—

- 2 lbs. Rhodes Grass.
- 2 " Paspalum Dilatatum.
- 3 " Cocksfoot.
- 1 " Wallaby Grass.
- 2 " White Clover.

10 lbs. for 1 acre, mixed.

Mixture No. 6—

- 3 lbs. Rhodes Grass.
- 2 " Paspalum Dilatatum.
- 2 " Cocksfoot.
- 2 " Wallaby Grass.
- 1 " White Clover.

10 lbs. for 1 acre, mixed.

In addition to the mixtures of Grasses set out, we will be very pleased to quote for any of the various specifications recommended by the Government Agrostologist for the different sections of the State. Space does not permit us to enumerate all the details, but any enquiries we may receive will have our close attention.

The Orchard: Its Planting and its Care

The Land

It is not necessary that the soil chosen for an orchard should be rich, although such land will always produce splendid crops after the trees are a year or two old and are carefully pruned. Any ordinary average soil will grow fruit trees, provided it is well worked. It is not necessary to trench the ground unless the subsoil is very stiff; then we recommend that it should be trenched and a thorough system of drainage should be adopted if necessary. This can be done by putting in rubble, pipe or timber drains at a depth of three feet, and twenty to thirty feet apart, so as to carry off all surplus water from the subsoil as quickly as possible. In trenching the ground the greatest care should be taken not to bring the stiff clay subsoil to the top; it should only be broken up in the bottom of the trench. On land of a fairly good depth and open subsoil digging and ploughing will be all that is required to prepare it for the fruit trees. But the question of drainage must not be overlooked unless a naturally drained slope has been selected; on strong, stiff soils drainage is absolutely necessary.

Planting

To prepare for fruit trees, the land should be measured off into rows 20 to 30 feet apart, and the trees should stand at the same distance from each other in rows, so that they will be 20 to 30 feet apart each way. This will give the cultivator every facility to work between them. The holes to receive the trees should be dug to a depth of 18 inches, and made wide enough to allow the roots of the young trees to spread out. The soil in the bottom of the hole should be broken up as fine as possible, then a good stout stake should be driven into the centre of it.

Examine the roots of the tree, and remove all bruised or broken rootlets with a sharp knife; then place it in the hole close to the stake and spread out the roots carefully and as horizontally as possible; drop the fine soil on to the roots until the hole is about one-third full; then gently shake the tree from side to side and lift it slightly from time to time with an up-and-down motion; the object of so doing is to allow the soil to shake down among the small roots; then fill up the hole to the level, and tread the soil tightly around the tree; secure it to the stake in two places, near the ground, and near the top, and the planting is completed. Trees should be planted not more than a couple of inches deeper than they stood in the nursery.

Manure

It is not desirable to give young trees manure in the earlier stages of their growth, as it is liable to promote an overgrowth of young wood, and if the land is virgin soil, or if it has been out of cultivation for some years, the breaking it up for the fruit trees will be quite sufficient to cause them to grow freely for a year or two at least, but if the ground is naturally poor a good dressing of bone-dust or other manure can be given to the trees at a later date if they show any signs of stunted growth.

Aspect

In selecting a site for an orchard, an easterly to a north-westerly aspect should be chosen if possible. The matter of shelter, if not naturally provided, should be of the first importance, as also natural drainage and convenience of position.

Time to Plant

Deciduous fruit trees, or summer fruits, as they are sometimes incorrectly called, such as Peaches, Plums, Cherries, should be planted during May, June, July, and August, and if the weather is favourable, the earlier the better. Evergreen trees, such as Oranges, Lemons, can be planted at almost any season of the year, but from April to September are the best months. Only plant to July and August in localities fairly free from frosts.

Position for Various Fruit Trees

If the orchard is on a slope the highest parts should be allotted for Apricots, following on in succession in the order named down the slope with Peaches and Nectarines, Plums, Apples, Pears and Quinces. If the situation is sheltered and the climate suitable, the Citrus family (Oranges and Lemons) should be planted near the centre of the plantation.

First Pruning of Young Trees

When the deciduous fruits are planted, they should be cut back to the height fixed upon for the trunk. If there are no natural branches three buds only should be allowed to push out from the head of the tree. This will generally be the case with Apples and Pears, but Peaches and such like will often have several lateral branches. In that case cut the leader to the height required, and cut off all the laterals except three near the top; these should be left to form the head, but should be shortened. Each tree after planting may be painted with Harbas in solution, to destroy any insect pests which may possibly be hidden in the bark.

When young fruit trees are properly summer pruned during the first few years after planting it conduces to the early development of fruit-bearing spurs on such trees as Apples, Apricots, Pears, Plums. If the operation is skilfully performed, the vigour of the whole, or any particular part, can be reduced or limited. By systematically pruning in summer, much good will not only result to the branches retained, but there will be less need for cutting severely in winter, and consequently the strength of the trees will be conserved. Summer pruning must not be done before the shoots have reached a certain stage, otherwise the buds at the base of the spurs left will develop dormant, and forming into fruit-bearing buds for the following crop. Generally the most suitable time is when the growth becomes firm for about half its length, which should be shortened there or a little higher up, according to the vigour of the tree. The summer pruning of such fruit trees as Nectarines and Peaches, which do not usually bear fruit on spurs, will require different treatment. The fruit of these trees is mostly borne on what is called young wood—that is, growth made during the previous year. Therefore, only the useless and superfluous growths should be removed.

Disbudding may be considered a part of summer pruning, for the judicious removal of the developing shoots at such an early stage of growth will not only conserve the strength of the trees, but will save a lot of labour which would have to be expended in cutting them out after they become wood.—Abridged from "Anderson's Manual of the Orchard."

Varieties to Plant

If, as a commercial speculation, a large area is being planted, we cannot too strongly emphasise the necessity of confining the plantation to a few well-tested varieties that do well in the vicinity, and have proved profitable.

Frequently we hear orchardists regretting the error they made when first planting, in having too many varieties, and consequently they have never sufficient of any one sort to enable them to place on the market in a satisfactory manner.

Ascertain what is doing well in your locality, and confine yourself to this sort, leaving an odd row or so for experimenting with new importations.

Grape Vines

European Grape Vines should be placed five feet apart each way, in straight lines, that the plough may be used either across or along the vineyard. If the land be rich and deep, the distance between the vines should be increased to 6, 7, or 8 feet. The American Grape Vines do better on a trellis as the training and pruning that suits them best is quite different from that employed for others. These may be planted 10 to 12 feet apart, along each side of a trellis which covers a broad walk. Rooted Vines may be planted at any time from June till September, pruned back to two or three eyes.

Spraying

The Winter Spraying of Deciduous Trees for the control of Scale, Red Spider and American Blight is one of the most important operations of the orchardist. It should never under any circumstances be neglected, and is essential to the success of the coming season's fruit crop.

The Ideal Winter Spray is "Harbas." It possesses those characteristics that are so essential in a winter spray, namely, penetrating power, adhesiveness and ease of mixture and application. It is effective against Scale, Red Spider, and American Blight, and leaves the tree healthy and ready to carry large crops of sound fruit.

"Harbas" can be applied to fruit trees at any time between the fall of the leaves to the swelling of the buds; but early spraying is specially recommended. If the weather is bad spraying will have to be delayed, but the earlier in winter that "Harbas" is applied the better will be the results.

For CITRUS TREES "Harbas" has been found most serviceable in the eradication of Red Scale, Black Scale, Smut and White Louse. For full particulars as to use, see special pamphlet and leaflet.

For Price of "Harbas" see page 59.

ORCHARD PESTS AND SOME REMEDIES

APPLE BLIGHT—WOOLLY APHIS

This can be got rid of by brushing or spraying the affected parts with "Harbas."

FUNGOID DISEASES

Such as Powdery Mildew, Apple Scab, Shot-hole Fungus, Peach and Plum Rust can be largely kept in check by systematic spraying with Bordeaux Mixture or "Harola" Lime Sulphur.

PEACH APHIS

Spray the trees with "Harbas" in the Winter, then spray every week in early Spring with Tobacco extract no matter if strong; but keep at it. A weaker solution is desirable for the first few days when fruit is forming, i.e., just as blossom is falling.

For Prices of various Spraying Fluids, Insecticides and Spray Pumps, see pages 59, 60

THRIP

Use Tobacco Extract.

SCALE

The systematic and regular use of "Harbas" Spray Fluid will effectively rid the trees of this pest.

For SAN JOSE and OTHER SCALE PESTS on DECIDUOUS TREES

Use "Harbas" in Winter.

PUMPKIN BEETLE

The best remedy for this troublesome insect is Arsenate of Lead.

CODLIN MOTH

Spray regularly with "Albora" in conjunction with Arsenate of Lead.

CHOICE FRUIT TREES

EVERYONE possessing a garden should make a point of including a few fruit trees. Economically they are a sound proposition. Most fruits being utilizable either as dessert, for cooking or for preserving. Once established, the trees—given ordinary care and attention—continue to bear their fruit in season, year in and out. Health authorities speak in high terms of the value of fruit from a dietetic point of view. Freshly gathered fruit being particularly rich in essential vitamins. The following varieties catalogued are those selected by a Committee working under the auspices of the N.S.W. Department of Agriculture. This Committee has divided the State into four divisions, viz.: Coastal, Tablelands, Inland and the Murray and Murrumbidgee and other Irrigation Areas. Varieties suitable for these districts will be found indicated by a capital letter placed before the name of the variety. "C" will indicate Coastal Districts;

"T" Tablelands, such as Penrose, Goulburn, Orange, Bathurst, Armidale, Uralla, Young, Yass, Molong; "I" Inland, such as Dubbo, Albury, Forbes, Narrabri; "M" Irrigation Areas. Where an asterisk appears before the letters, the indication is that that particular variety is recommended by the Department. Though it does not follow of necessity that where this is done that the Department recommends the particular variety for all the divisions specified.

For the benefit of our customers we have placed the following abbreviations AFTER the descriptions of the varieties. SIZE 1 denotes Large; 2 denotes Medium; 3 denotes Small. SEASON or time of ripening: E denotes Early; M denotes Medium; L denotes Late. USE: K denotes Kitchen; D denotes Dessert.

APPLES

Prices: 1/6 per single tree; 12 trees (2, 4, or 6 sorts), 16/-; 6 trees (3 sorts), 8/-; 12 trees (12 sorts), 18/-.

Packing charges, 1/- doz. Postage or Carriage Extra.

Apple Trees prefer compact, sandy loam, with shelter from west and south. Stiff, clinging land is not suitable, but any good average light soil will give good results. Young trees generally grow too fast, therefore strong growth should be checked by pinching back shoots in Summer, and by Winter pruning of roots.

ALL OUR TREES ARE WORKED ON NORTHERN SPY STOCKS

C	I	Allsopp's Early. The earliest Apple on Sydney market. 2 K.
C	I	Carrington's. Fine Apple. 2 D E.
T	I	Cleopatra. Large crisp. 1 D L.
T	I	Cox's Orange Pippin. One of the best. 2 D M.
* C	T	Delicious. One of the best late-keeping Apples. 2 D L.
* C	T	Democrat. Fruit brilliant red; good for shipping. 1 D L.
* C	T	Five Crown Pippin (London Pippin). Valuable for all purposes. 2 K D L.
* C	T	Granny Mack. A cross between McIntosh's Red and Granny Smith. Strong Trees. 1 K E.
* C	T	Granny Smith. Heavy bearer; keeps. 2 K L.
* C	T	Gravenstein. Synonymous with Carpenter's. 1 K D M.
* C	T	Jonathan. Beautiful dessert fruit; rich. 2 D L.
* C	T	King David. A rich dark red apple, with yellowish flesh; flavour good. 1 D M.

C	T	I	Lalla. Similar to Delicious. 2 D L.
C	T	I	Lord Nelson. Showy; first rate. 1 K D M.
* C	T	I	McIntosh's Red. Good for both hot and cold climates; rich, red stripes; flesh white. 2 D L.
C	T	I	Mobbs' Royal. Extra large; good. 1 K M.
* C	T	I	Northern Spy. Tender; delicious. 1 D L.
* C	T	I	Pomme de Nieve (Fanny). A famous dessert apple. 2 D M.
* C	T	I	Rome Beauty. Fine shape, hardy. 1 K D L.
C	T	I	Twenty Ounce. Green, yellow striped. 1 K M.
C	T	I	Willie Sharp. A beautiful medium-sized dessert Apple; skin yellow. D M.
* C	T	I	Yates. Small fruit, but bears heavily; flesh white, yellow, splashed red. 3 D L.

APRICOTS

Prices: 1/6 per single tree; 6 trees (3 sorts), 8/-; 12 trees (2, 4, or 6 sorts), 16/-; 12 trees (12 sorts), 18/-. Packing charges, 1/- doz. Postage or Carriage Extra.

ON APRICOT AND PLUM STOCKS. Except where otherwise marked

C	I	Allen's Early. Grand variety for marketing. 1 E.
C	I	Camden Superb. Fine for canning; prolific. 2 E.
C	I	Cattell's Early. Very early and a good cropper. 1 D E.
* C	I	Early Moorpark. Juicy, rich and excellent. 2 E.
* C	I	Hemskirk. Rich, like Moorpark. 1 D M.
* C	I	Mansfield Seedling. Rich in flavour. 1 L.
* C	I	Newcastle. Ripens middle to end of November. Fine yellow colour, and heavy bearer. 2 E.

* C	T	Oullin's Early Peach. Delicious. 1 E.
* C	T	Shipley's Blenheim. Very productive. 1 L.
* C	T	Trevatt. Good cropper and dryer. 1 D L.
* C	T	Wenatchee. A prolific bearer, and ripens evenly. Very distinct, large. 1 D L.

CHERRIES

1/9 per single tree; 6 trees (3 sorts), 9/-; 12 trees (2, 4, or 6 sorts), 18/-; 12 trees (12 sorts), 21/-.

Packing charge, 1/- dozen; Postage or Carriage extra. Cherries thrive exceedingly well in our cooler districts.

T	I	Bigarreau Twyford. Bright red, flesh firm. E.
T	I	Bing. Fruit large; black; tree vigorous and hardy. M.
T	I	Burgdorff Seedling. Suitable for Riverina districts. E.
T	I	Black Republican. Solid flesh; juicy. L.
* T	I	Eagle Seedling. Good black. E.
* T	I	Early Lyons. Deep red flesh, juicy. E.

* T	I	Florence. Large, richly flavoured, late; red.
* T	I	May Duke. Very good, fine cropper; surest bearer in Sydney climate; red. E.
* T	I	Noble. Very large, dark red; flesh firm, good flavour. L.
* T	I	St. Margaret's. Large, firm, sweet, sub-acid. L.
* T	I	Werder's Early. Black, large. E.

PEACHES

1/6 per single tree; 6 trees (3 sorts), 8/-; 12 trees (2, 4, or 6 sorts), 16/-; 12 trees (12 sorts), 18/-.

Packing charge, 1/- dozen; Postage or Carriage extra.

Sandy loam is the best, but any soil will produce good Peaches (if it is well drained), in nearly every district in N.S.W. As the young trees make very strong growth during the Summer, it is desirable to rough prune them back, the object being to induce the production of spurs or small wood which will yield the fruit. The Trees should be carefully gone over in the Winter, and the pruning finished.

CLINGSTONE—Varieties marked (C).

FREESTONE—Varieties marked (F).

C	I	Admiral Dewey. Early; yellow flesh; freestone.
* C	T	Aunt Becky. Large; white flesh; freestone; good market variety. E.
* C	T	Bell's November. Ripe November; partial slipstone.
* C	T	Bell's November Improved. Fruit much larger; better colour, superior flavour to the original.
* C	T	Blackburn. An early Elberta, ripens 2 weeks before Elberta.
* C	T	Braddock's Superb (F). Very early, good market variety; heavy cropper. 2 E.
C	T	Brigg's Red May (F). Very best early Peach. E.
* C	T	Carmen (F). Flesh, melting sweet; second early peach. M.
C	T	Early Crawford (F). Large yellow. E.
C	T	Early Elberta (F). Fruit as large as Elberta, colour and good quality; good cropper. M.
C	T	Edward VII. Ripens early in November.
* C	T	Elberta (F). Yellow-fleshed; sweet; for dessert or canning. M.
C	T	Flat China (F). Early Peach for market. E. (North Coast and Queensland).
* C	T	Golden Queen (C). Heavy cropper; medium-size yellow at stone; good canning. M.
C	T	Greenborough. Late flowering early variety. Suitable for short season districts.
* C	T	Hale's Early (F). High flavour; juicy; ripe Christmas.

C	T	I	High's Early Canada (F). Very fine. E.
* C	T	I	J. H. Hale (F). Half as big again as Elberta and a week earlier; a firmer and better colour.
C	T	I	La France (F). Very large, skin dark crimson; flesh white melting, juicy. L.
* C	T	I	Le Vainqueur (F). Large and juicy; very early.
* C	T	I	Mayflower (F). All red; good shipper. E.
C	T	I	Mountain Rose (F). Large, good. E.
* C	T	I	Phillip Cling. Yellow flesh; regular cropper. L.
* C	T	I	Pullar Cling. Clingstone; good grower; heavy bearer. L.
C	T	I	Red Bird Cling. A new early cling; highly coloured, creamy white and bright red.
C	T	I	Royal George (F). One of the best extant. M.
C	T	I	Royal George Cling (C). White, firm flesh. M.
* C	T	I	Ruby Red Clingstone. Ripens early in Jan.; heavy cropper.
C	T	I	Salway (F). Fine flavour; ripens March.
C	T	I	Shanghai Freestone. A valuable variety; exquisite flavour. M.
* C	T	I	Tuscan Cling. Very large yellow; best early canning peach. M.
* C	T	I	Watt's Champion. A local production of great merit. It is a red freestone, ripening in favourable seasons before the end of October. It is the first peach of the season on the Sydney Market, and commands top prices. Is a strong grower, very prolific. A splendid market variety.
* C	T	I	Wiggins (F). Fine peach; ripens Christmas. 1 E.

PEARS

1/6 per single tree; 6 trees (3 sorts), 8/-; 12 trees (2, 4, or 6 sorts), 16/-; 12 trees (12 sorts), 18/-.

Packing charge, 1/- dozen; Postage or Carriage extra.

The climate, situation, soil, and cultural notes given for Apples will apply to Pears. Pears will not be in full bearing until the sixth year after planting, excepting such varieties as Bartlett, Keiffer's, and a few others, which frequently commences at second year after planting. To induce fruitfulness, we advise a judicious system of Summer pinching where practicable, followed, if necessary, by root pruning in Winter.

ON SEEDLING PEAR STOCKS.

* I	I	Bergamot. Fine Winter Pear. 2 D M.	* T	Josephine de Malines. Pale green; flesh pink to white. 2 D L.
* I	I	Bergamot Gansells. Melting rich. 1 D M.	C	Keiffer's Hybrid. Cross between Williams' Bon Chretien and China. 1 K D M.
* I	I	Beurre Bosc. Rich and aromatic. 1 D M.	* T	Packham's Late. Large, heavy cropper. 1 D M.
* I	I	Beurre de Capiamont. Melting and sweet. 2 D M.	* T	Packham's Triumph. Excellent quality. 1 D E.
* C	I	Bon Chretien (Williams). The Bartlett Pear; fine. 1 D E.	* T	Winter Bartlett. A duplicate of the old favourite; ripening 3 months later. 1 D L.
* C	I	Clapp's Favourite. Resembles Bartlett. 1 D E.	* T	Winter Cole. A very richly flavoured late Pear.
* C	I	Howell. Fruit large; heavy bearer. 1 D M.	* T	Winter Nelis. Buttery; rich. 2 D L.

PLUMS

1/6 per single tree; 6 trees (3 sorts), 8/-; 12 trees (2, 4, or 6 sorts), 16/-; 12 trees (12 sorts), 18/-.

Packing charge, 1/- dozen; Postage or Carriage extra.

Plums thrive in our cool highlands. Any good soil will suit them so long as the subsoil is porous and well drained. We highly recommend the beautiful Japanese varieties for quality and appearance. Plums require to have their long shoots stopped during the growing season so as to produce spur wood.

ON MYROBOLAN AND MARIANA STOCK

* C	I	Angelina Burdett. Large, purple, most excellent for dessert and preserving; medium. 1 K D M.	* I	Late Black Orleans. Medium size; skin black, blue bloom flesh deep yellow; juicy clingstone.
* C	I	Coe's Golden Drop. Very large, excellent. K D M.	* C	Loutherborough. Black; very prolific. 2 D M.
* C	I	Diamond. Large, best preserving. K M.	* T	Pond's Seedling. Red; valuable. 1 K D L.
* C	I	Early Orleans. Medium, juicy, sweet. K D E.	* T	President. Fruit is large, oblong shaped, over 2in. long, beautiful purple colour; flesh firm and sweet. 1 D L.
* C	I	Evan's Early. Juicy, rich, excellent. 2 D E.	C	Tibbit's Seedling. Medium size, dark skin, enormous crop. 3 K M.
* C	I	Gage, Green. Medium size, rich. D M.		
* C	I	Grand Duke. Purple skin, yellow flesh. 1 D L.		

Japanese Plums

(Same price as other Plums)

* C	I	Blood. Large mottled, flesh red, delicate. M.	* C	I	Rubio. Best Blood Plum; abundant bearer. E.
* C	I	Burbank. Large, cherry red; flesh deep orange, juicy and sweet; early. E.	* C	I	Santa Rosa. Flesh deep purplish crimson, with purple skin. Commences to ripen early December. M.
* C	I	Climax. Early; fruit large; delicate flavour.	* C	I	Satsuma. Blood Plum; flesh dark red; heavy bearer. L.
* C	I	Duffy's Early Gem. A very early variety; round fruit, medium size, amber flesh. Ripens early in November.	* C	I	Shipper. Good cropper; hangs long time. M.
* C	I	Duffy's Early Jewel. Large, good cropper. Ripens late in Nov.	* C	I	Shiro. Firm, yet juicy; light yellow; clingstone. E.
* C	I	Kelsey. Valuable; one of the best. Large yellow. L.	* C	I	Sultan. Firm, dark crimson; sub-acid.
* C	I	Narrabeen. Large, round; rather flattened, skin yellowish, covered dark red and yellow dots, flesh yellowish, juicy, very sugary, small stone, drooping habit but good grower, heavy cropper, good carrier; ripens last week in January.	* C	I	Wickson. Excellent; keeps and ripens well.
* C	I	October Purple. Fruit round; distinct flavour. M.	* C	I	Willson's. Ripens middle of November; almost black when ripe; flesh yellow; heavy bearer. E.
			* C	I	Wright's Early. Fine early Plum.

NECTARINES

1/6 per single tree; 6 trees (3 sorts), 8/-; 12 trees (2, 4, or 6 sorts), 16/-; 12 trees (12 sorts), 18/-.

Packing charge, 1/- dozen; Postage or Carriage extra.

Any well and deeply-drained soil will suit Nectarines, but they cannot obtain perfection without abundance of moisture in Spring and Summer.

* C	I	Albert Victor (F). Very large, melting, delicious. E	* C	I	Lady Carrington. A clingstone with a thick, juicy flesh; ripe first and second weeks in January. E.
* C	I	Early Rivers (F). Flesh tender, juicy. 1 E.	* C	I	Lee's Seedling (F). Fruit large, richly flavoured. E.

* C	I	Irrewarra (F). Earliest; dark, great bearer. E.			

PERSIMMONS

DATE PLUMS.

2/- each; 22/- dozen.

Packing charge, 1/- dozen; Postage or Carriage extra.

A Tomato-shaped fruit with a thin skin; flesh, when ripe, delightfully sweet and luscious. Will grow in nearly any part of our State; prefers a warm climate, but will not be injured by slight frosts.

**Dai Dai Maru. Large, orange skin, yellowish flesh, nearly seedless.

Hyakume. Early, oblong, large.

Kurokuma. Early; highly flavoured.

Nitaro. Beautiful color, flat, square-shaped fruit, similar to "Dai Dai Maru."

**Tanenashi. Yellow, oblong, seedless.

Yemon. Flattened; yellow.

FIGS

1/6 per single tree; 6 trees (3 sorts), 8/-; 12 trees (2, 4, or 6 sorts), 16/-; 12 trees (12 sorts), 18/-.

Packing charge, 1/- dozen; Postage or Carriage extra.

These require no special treatment, and provided the soil is good and fairly moist, will produce fine fruit. If the fig is grown near the house

FIGS (continued)—

where it can be abundantly watered from the laundry, it will produce enormous crops of fruit, give a fine shade, and form a shelter. It requires but little pruning.

Adam. Large size fruit; pale brown; very early, and a good market sort.

Black Genoa. Large, juicy and rich.

Blue Provence. Small, rich, abundant.

Brown Turkey. Luscious; good for drying.

Brunswick. Very large, rich and excellent.

White Adriatic. Large size; red flesh; rich.

QUINCES

1/6 per single tree; 6 trees (3 sorts), 8/-; 12 trees (2, 4, or 6 sorts), 16/-; 12 trees (12 sorts), 18/-.

Packing charge, 1/- dozen; Postage or Carriage extra.

Most useful for preserves and culinary purposes generally; may be grown in poor soils, where ordinary fruits will fail; very hardy; makes a fine tree when fully grown.

Champion. Large and good; late.

Giant of Lescovas. Fruit often attains up to 3 lb.; flesh white; very prolific.

Large Portugal. Very large; good.

Master's Early. Earliest of all; large.

Missouri Mammoth. Pleasant flavour.

Sea's Mammoth. Large fruit, round, early.

Van Dieleman. Superior quality.

PRUNES

Price same as Plums.

This list is specially recommended as giving the best varieties for drying.

D'Agen. Small, but unrivalled for drying.

Giant. The largest variety known.

Golden. Flesh yellow, rich and sugary; freestone, and heavy cropper.

Robe de Sargent. Like Prune D'Agen, but large and better cropper.

Sugar. Fruit even in size; large; rich in sugar, hence its name.

Splendour. Large and sugary.

LOQUATS

2/- Single Tree, 22/- dozen.

Postage or Carriage extra.

Californian Advance. Fruit large, deep yellow, being nearly all pulp. Flavour distinct and delicious.

Herd's Large. Enormous. The best market variety.

Mammoth. Very large.

ORANGES

2/- Single Tree; 22/- per doz. Except where otherwise marked.
Packing charge, 1/- doz.; Postage or Carriage extra.
Varieties marked ** are specially recommended by the
Department of Agriculture.

- Blood (Maltese).** Medium size flesh blood color.
Buckeye Navel. A true Navel Orange, ripening early; distinct; delicious.
Golden Nugget Navel. Fruit smooth, solid, thin skinned; color strong gold. Even cropper.
****Groverley Navel.** A Queensland variety of splendid quality; good cropper.
Jaffa. Excellent, and a constant bearer.
****Joppa.** Large; thin skin; juicy pulp; seedless.
Mediterranean Sweet. An excellent Orange.
****Paper Rind St. Michael.** Medium size; thin skin.
Paterson River. A fine Orange of Parramatta type; tree strong grower; heavy fruit; good bearer.
****Parramatta or Queen.** Large, hardy, prolific.
Poor Man's Orange. Very large, hardy Orange, slightly bitter; makes best marmalade.
Seville. Bitter; for preserving.
****Siletta.** Small, handsome and good.
****St. Michael.** Large, thin skin; best for export.
Navelencia. A cross between the popular Valencia and Washington Navel. Retains the good qualities of Washington, together with hardiness and lateness of Valencia.
*****Oonshi (Japanese).** A very hardy tree, said to stand frost well; pendulous habit, no seeds, flesh firm, thin skin.
****Valencia.** Late Orange, but most excellent.
****Washington Navel.** Prolific; better than old Navel in size and flavour; hardy.
****White Siletta.** Earliest, skin fine, thin, juicy.

MANDARINS

2/- each; 22/- per dozen.

- Packing charge, 1/- dozen; Postage or Carriage extra.
***Beauty of Glen Retreat.** Excellent; enormous cropper.
Cumquat. Small; for preserving.
****Ellendale Beauty.** Improved Beauty of Glen Retreat; is not liable to split in wet weather.
****Emperor.** Large beautiful fruit; one of the best.
***Fewtrell's Early Shipping.** A cross between an Orange and Mandarin, being practically the largest Mandarin in cultivation. Fruit ripens very early and is a good carrier.
Imperial. Earliest variety in cultivation.
****Jacob's Improved Thorney.** Large and early; similar to Thorney.
King Emperor. Very large; rough skinned; hangs well late.
Navel Mandarin. Fruit solid and sweet, of good size; few seeds.
Parker's Special. Early; solid, smooth skin.
Pride of Ellendale. Full, solid fruit; skin thin and tough; juicy; good carrier.
****Scarlet (Syn. Canton).** Large fruit, skin almost scarlet, flesh juicy.
****Thorney.** Small, firm, fine high flavour.

GRAPEFRUIT

POMELOES

2/- each, 22/- dozen.

- Packing charge, 1/- dozen; Postage or Carriage extra.
Common. Very large, up to 2 lb. weight, very heavy bearer, fruit being produced in clusters of from three to seven in a bunch.
****Marsh Seedless.** Medium size, thin rind, half the usual bitterness; practically seedless; pulp juicy; very little rag; superior flavour; keeps and packs well.
****Triumph.** Medium size; peel smooth, clear, thin and fine grained; little rag and few seeds; very heavy, being juicy and well flavoured.

CITRONS

2/- each; 22/- dozen.

- Packing charge, 1/- dozen. Postage or Carriage extra.
****Bengal.** Giant. ****Knights.**
All varieties of Citrons are very similar. They are largely used for preserving.

SHADDOCKS

2/- Single Tree; 22/- dozen.

- Packing charge, 1/- dozen. Postage or Carriage extra.
Blood. Excellent for preserving.
Manilla. Small, sweet juice.

ASSORTED FRUIT TREES FOR HOME GARDENS

AT REDUCED COST

We have pleasure in drawing attention to the following **SPECIAL COLLECTIONS**—Every care is given to the selection of varieties for the various districts, and any wishes expressed by those ordering will have our careful attention.

SPECIAL COLLECTIONS OFFERED

HOME GARDEN COLLECTION OF SUMMER FRUITS.

Six Trees, comprising one each Apple, Peach, Plum, Apricot, Nectarine, Pear, or Fig. Selection to be left to us; we will choose only the hardy varieties most suitable for your district. Price, 8/-, packing free; postage or carriage extra.

ANDERSON'S CHOICE COLLECTION SUMMER FRUITS.

Twelve Trees for 16/-; packing free; postage or carriage extra. Selection of varieties left to us, but customer's preference, if stated on order, will be followed as near as possible. We will select the hardiest and best sorts to suit climate and district.

ANDERSON'S SPECIAL CITRUS COLLECTIONS—

SIX TREES, comprising 3 Oranges (including one Navel), 2 Mandarins, 1 Lemon. Only the best varieties selected by our experienced Staff. Price, 11/-, packing free; postage or carriage extra.

TWELVE TREES, comprising 6 Oranges (including 3 Navel), 3 Mandarins, 2 Lemons, 1 Grapefruit. (Our selection). Price, 20/-, packing free; postage or carriage extra.

LEMONS

2/- each, 22/- dozen.

- Packing charge, 1/- dozen; Postage or Carriage extra.
Common. Well known; rough skinned.
****Lisbon.** One of the best.
Lisbon Thornless. Very hard, without thorns. Thrives where other varieties fail.
Lisbon Variegated. Vigorous grower and bearer.
****Sweet Rind.** The best of all Lemons, being above medium size and very even. Sells very freely in the markets.
****Villa Franca.** Oblong, thin skin, superior flavoured.

LIMES

2/- Single Tree, 22/- dozen.

- Packing charge, 1/- dozen; Postage or Carriage extra.
****East Indian.** Large, very juicy.
Persian or Sweet. Sweet and pleasant flavour.
****Tahiti.** Fruit very large.
West Indian. Best for lime juice.

PASSION FRUIT

Postage or Carriage extra.

- Passiflora Edulis.** The well-known Passion Fruit. 6d. each; 5/- per doz., in 3in. pots; from open ground, 10/- per 100. Special quotations for larger quantities.
Tasconia Mollissima (White Passion Fruit), 1/6 each; 15/- doz.

STRAWBERRIES

1/- doz., 6/- 100. Postage extra.

- Strawberries do best in strong soils, and should be planted in beds. Plantings may be commenced in April, and continued till end of July. Rows, 4 feet wide, plants 18in. apart.
Creswell. A fine Strawberry; good for warm districts. Large, long fruit, bright, glossy red; second early.
Fendelcino, American Hybrid. With very handsome dark red berries. Well flavored.
Illawarra. Vigorous grower; heavy cropper. Berries June Red color, flesh solid, rich flavour.
King Edward VII. Berries extra large; deep vermilion; produced in bunches. Flesh pure white; delicious pineapple flavour.
Mason's Immense. The berries of this splendid variety are bright red and a splendid flavour, and are very large, as the name will imply; excellent keeper; strong vigorous habit, and thrives in all soils; plants, well rooted and strong. 2/- dozen; 100 plants for 15/-, post extra.
Melba. Large brilliant red fruit of finest quality; ripens fairly early; heavy cropper.
Phenomenal. Early variety; fruit large; splendid flavour; extremely vigorous, standing extremes of heat and drought better than any other we know.
Rhodes Special. Beautiful dark red berries. Heavy bearer.
Royal Sovereign. Superb variety; large, luscious; deep scarlet fruit; abundant bearer.
SPECIAL NOTE.—Fendelcino and Rhodes Special need to be grown together for fertilising purposes.

Grape Vines

ON THEIR OWN ROOTS

We cannot supply any Grape Vines on Phylloxera-proof Stocks.

NOTE—We have now made such arrangements as will enable us to send Grape Vines to any part of the State. A number of well-known varieties are available in addition to those mentioned below.

- 1/- each, 9/- per dozen; postage extra.
Black Hambro. The best for coastal districts.
Black Isabella. Berries large; strong grower.
Black Lady's Finger. Deep shining black.
Black Monukka. Excellent seedless variety; bunches large; good flavour.
Black Prince. Berries largest size; late.
Black St. Peters or Black Alicante. Jet black berries, with blue bloom; both bunches and berries large.
Buckland's Sweetwater. An improvement on the old Sweetwater. Constant bearer, heavy cropper, medium size bunches, pale amber.
Doradillo (White Mornillion). Bunch and berry large; fawn color.
Early Sherry. A profitable early white grape; largely grown for market.
English Sultana. A seedless yellow grape; bunches and berries medium sized; used mainly for Raisin making.
Golden Chasselas. Medium size; round; early.
Gordo Blanco. Very extensively grown for Raisins, being for that purpose superior to well-known "Muscat of Alexandria."
Gros Colman. A splendid late black grape, very large berries.
Hayes' Keeper. Fine large white late grape; hangs very late.
Mrs. Prince's Black Muscat. Berries large; late.
Mudgee Black Sherry. Firm, tough berry; late.
Muscat of Alexandria. One of the very best White Muscats, medium strong grower and an old favourite.
Pink Lady's Finger. Large, long berries; good.
Red Muscat. Medium sized fruit; early; rich muscat flavour.
Shiraz. A very fine red grape; berries olive shaped; fairly large; early bearer.
Snow's Black Muscat. Splendid, delicious.
White Isabella. Berries large; good flavour.
White Muscat. Berries large; mid-season; strong Muscat flavour.
White Wax. A very handsome mid-season Grape; large bunches; sweet; and constant cropper.

NOTICE.

Will Customers please note that Grape Vines cannot be sent from N.S. Wales to Queensland.

GUAVAS

1/9 each, 18/- dozen; postage extra.

Of easy culture in districts where the climate is not colder than that of Sydney; preferring good and deep soil, but will grow and do well in any ordinary orchard ground.

- Purple.** A handsome shrub; fruit deep purple.
Parker's Hybrid. Fruit creamy white; large; superior.
Yellow. Large fruit; splendid for dessert.

CHERIMOYER

CUSTARD APPLE.

Postage or Carriage extra.

A delicious tropical fruit; succeeds well in warm and sheltered situations.

Rough Fruited. Easily grown; delicious.
 Price, 2/6 each.

GOOSEBERRIES

1/- each; 10/- per dozen.

Postage or Carriage extra.

We can supply a large quantity of this useful cold climate fruit in red, yellow and green varieties. In the leading commercial varieties, such as Crown Bob and Roaring Lion, we can supply by the thousand.

BLACKBERRIES

Postage or Carriage extra.

The bushes form an admirable thick, prickly hedge, and its fruit is most useful as dessert or for preserves. Quick growing; not particular to soil or climate.
Himalayan. Beautiful, fine foliage. 2/- ea.
Laughton. Large, excellent flavour. 9d. each; 7/6 dozen.

White Crystal. Clear golden yellow form of Blackberry. 1/- each.

Dewberry (Lucretia). One of the very best of this attractive class of fruit berries; large and handsome, and shining jet black; of delicious quality. Price, 9d. each; 7/6 dozen.

RASPBERRIES

6d. each; 5/- per doz.; 35/- per 100.

Postage or Carriage extra.

A really useful fruit, and of easy culture in the colder districts of the State.

Antwerp Red. Large, fine flavour.

Cuthbert. Sturdy grower; red.

Northumberland Fillbasket (Thornless).

Deep red; good size and flavour.

Victoria. Large, red; excellent, late.

MULBERRIES

Postage or Carriage extra.

Black or English. Luscious fruit for any part of the State; very ornamental trees. 2/6 and 3/6.

Cape. Fast growing; useful for shelter; fruit small; culinary purposes only. 2/-

Downing's Everbearing. Fruit long, juicy, rich; valuable for cooking only. 2/-.

Hicks' Everbearing. Rapid-growing shade tree; sweet sub-acid flavor. 2/-.

Prolific. Wonderful bearer; table and kitchen. 2/-.

LOGANBERRY

1/- each; 10/- dozen; postage extra.

Fruit as large as Blackberry, produced in clusters; dark red color. A highly desirable fruit for jams or preserves.

CURRANTS

1/- each; 10/- per dozen.

Postage or Carriage extra.

These fruits are suited only to our cool districts. Black Naples, La Fertile and La Versailles are best adapted for culture where Winters are too mild for general collection.

Black Naples. A large fruit, but late.

Carter's Black Champion. Rich flavour.

La Fertile. Red.

La Versailles. Red.

Ogden's Black. Resembles Black Naples; earlier.

Red Imperial. A heavy-bearing variety; beautiful red fruit; large size.

Red Dutch.

White Dutch.

White Imperial. Large.

MEDLARS

1/6 each.

Postage or Carriage extra.

Thrives well in New South Wales; requires very trifling attention, and is not particular as to soil.

Monstrous. The largest.

BANANAS

Postage or Carriage extra.

Cavendishii. Dwarf, delicious flavour; 2/6 each.

Lady's Finger. Fruit long and slender; fine flavour. 2/6 each.

Sapientum. Common Banana; hardy. 2/- each.

Miscellaneous Fruits

Postage extra. s. d.

Chinese Raisin (Hovenia Dulcis)	2	0
Mango	3	6
Papaw	2	6
Pineapple	2	0
Pomegranate (Punica Granatum)	1	6

Almonds

1/6 per single tree; 6 trees (3 sorts), 8/-; 12 trees (2, 4, or 6 sorts), 16/-; 12 trees (12 sorts), 18/-.

Packing charges, 1/- doz.; Postage or Carriage extra.

It is not advisable to plant Almonds in districts where severe frosts occur in the late Spring, as the frosts would be likely to injure the flowers and prove fatal to the crop. It thrives and produces the best crops on a variety of soils, provided they have been well drained. A light sandy loam will suit it best. Almonds are a profitable crop to grow, and are well worth the orchardist's consideration.

Brande's Jordan. Large; good bearer.

Burbank's Seedling. Hardy and heavy cropper.

Eureka. Heavy cropper; paper shell.

Golden State. Heavy and regular bearer; with smooth kernel.

I.X.L. Nuts large; soft shell.

Hatch's Nonpareil. A very fine almond; large kernel, and very thin shell.

Paper Shell. The commonest sort.

White Nonpareil. Strong grower; heavy cropper; nuts very large.

NUTS

Walnuts

2/6 each; 27/- dozen.

Packing charges, 1/- dozen; Postage or Carriage extra.

These delicious Nuts can be produced in any climate suitable for the Spanish Chestnut, and in colder districts. Young trees are invariably without any roots, but customers need not hesitate to plant our stock, as they rarely fail.

Chaberte. Large French variety; very productive.

Juglans Regia. The English variety.

Juglans Seiboldii. A Japanese variety.

Juglans Cordiformis. A flat variety.

Nuts and Filberts

1/9 single tree; 18/- dozen.

Packing charges, 1/- dozen; Postage or Carriage extra.

The undermentioned Nuts thrive well on the mountains between the coast and the Riverina. They will grow well, but produce little fruit in the immediate neighbourhood of our coast. At Braidwood, and even at Picton and Berrima, Hartley, Mudgee and Bathurst, they bear well.

Northampton Prolific Filbert. Red Filbert.

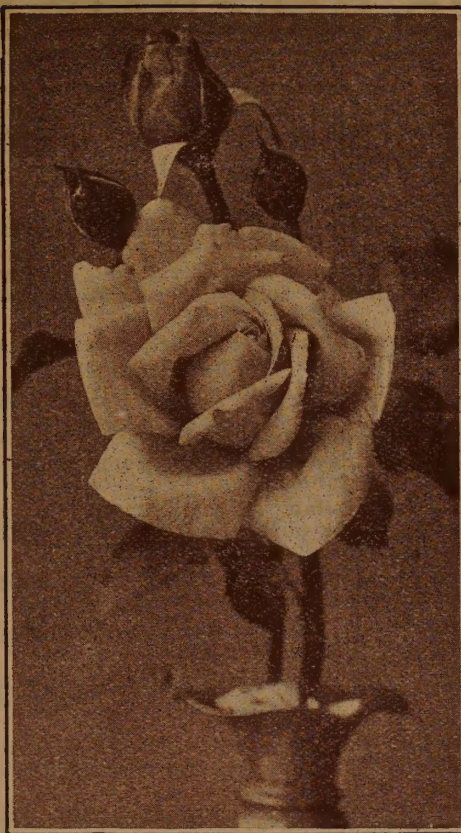

Hazel Nut. White Filbert.

Japanese Chestnut, 2/6 each. Produces good Nuts when only four years old.

Spanish Chestnut (Castania Vesca). 3/- each; 33/- dozen. A fine stately tree; magnificent foliage; fruits freely, and will succeed admirably in our cooler districts.

Pecan Nut. A most delicious Nut; quick-growing; full bearing in eight years. From 2/3.

Queensland Nut (Macadamia Ternifolia). 1/6.

Alexander Hill Grey (T.). Lemon yellow; vigorous and good.

America (H.T.). Buds long and pointed; fragrant rose-pink flowers.

Amy Johnson (H.T.). It is a very vigorous grower with good foliage and sweetly-scented pink flowers.

Angele Pernet (Per.). Vivid orange yellow shaded fiery red, deep reddish apricot, outside of petals golden yellow.

Antoine Revoire (H.T.). Pale rosy flesh-shaded and edged bright carmine, base of petals yellow.

Aspirant Marcel Rouyer (H.T.). Deep apricot, tinted salmon flesh on outer petals.

Autumn (H.T.). Bud medium size, ovoid, burnt orange; flower medium size; disease-resistant. Growth moderate. Free bloomers.

Busybody (H.T.). Bud rich orange yellow shading, lighter when flower opens.

Betty Uprichard (H.T.). Salmon to carmine, while the reverse is glowing carmine, with coppery sheen.

Caledonia (H.T.). A splendidly formed pure white, backed up by good growth and foliage. Richly perfumed. Recommended.

Canary (H.T.). The buds are clear golden yellow, opening to canary yellow and paling to white in the last stages. Free blooming.

Captain F. S. Harvey-Cant (H.T.). Rich salmon pink.

Carine (H.T.). Orange carmine, blush buff, creamy fawn and coppery salmon.

Clarice Goodacre (H.T.). Biscuit chrome on ivory white.

Charles P. Kilham (H.T.). Brilliant orange orient red, suffused with glowing scarlet. Well shaped buds.

Clovelly (H.T.). Rich carmine rose, salmon shaded.

Columbia (H.T.). Rich rose pink flowers on long stems. The growth is vigorous and disease resistant. Highly recommended.

Comtesse de la Morandiere (H.T.). Growth vigorous; good foliage, immune from disease. Bud long, carmine cochineal, on rigid stem. Double, rose color shaded coral orange, reverse of petals red coral.

Countess of Gosford (H.T.). Salmon pink; base of petals yellow; perfect.

Cuba (Per.). A very uncommon shade of orange scarlet, inside of the petal rich velvety crimson with carmine towards the tips.

Daily Mail Scented (H.T.). Color rich deep velvety red, with a scarlet sheen, excellent shape. An ideal bedding rose.

Dainty Bess (H.T.). Quite single, and in cool weather is salmon pink, with a prominent centre of crimson and gold stamens. In cool climates this variety will fully live up to its name.

Dame Edith Helen (H.T.). The color is pure glowing pink. Possesses the true old rose scent.

Director Rubio (H.T.). Flower very large and beautiful of a new velvety magenta red shade and richly fragrant. Growth good; foliage dark green. Immense blooms.

Dorothy Lee (H.T.). The color resembles that of W. F. Dreer; foliage mildew-proof and glossy.

Dr. Hawkesworth (H.T.). Color rich crimson shading to deep maroon. Very fragrant.

Duchess of Wellington (H.T.). Saffron yellow, stained crimson.

Duchess of Westminster (H.T.). Sweetly perfumed; a dainty clear rose-madder; vigorous.

Earl Beatty (H.T.). Flower deep crimson; sweetly-scented; an ideal bedding rose.

Edith Nellie Perkins (H.T.). Light orient red, heavily shaded cerise, orange at base, the inner face is salmon pink; sweetly scented.

Edith Part (H.T.). Deep salmon and coppery yellow. Sweetly perfumed.

E. G. Hill (H.T.). Dazzling scarlet shading to deeper pure red as it develops. The bud is unsurpassed in beauty, except by the open flower, which is a wonder.

Elegant (H.T.). Long, sulphur yellow bud.

Elizabeth of York (H.T.). Color a rich shade of cerise pink lit up through the petals with a wonderful iridescence. A most distinct rose. The flower resembles a richly colored Sunny South.

Empire Queen (H.T.). Clear cerise with an orange flush occasionally. Long buds.

Ethel Somerset (H.T.). Shrimp pink.

Etoile de Hollande (H.T.). Bright dark red, sweetly perfumed.

Fascination (H.T.). Rosy cerise, shaded yellow.

Federico Casas (H.T.). Bud very large, long-pointed red; flower large, semi-double, intensely fragrant, red and yellow.

Feu Joseph Looymans. Flower yellow, with vivid apricot, giving a brilliant effect in the centre; large buds well formed, long and pointed. Growth strong, straight and bushy.

Felberg's Rosa Druschki (H.P.). Best seedling from the world-famed rose "Frau Karl Druschki," and has inherited all the good qualities. The beautiful large blooms are in form and constitution like Druschki. The color bright pink.

Flamingo (H.T.). Bud bright geranium red opening to rosy cerise. Highly fragrant.

Francis Scott Key (H.T.). Deep red; excellent.

Frank W. Dunlop (H.T.). Rich deep pink bloom; highly recommended.

Frances Gaunt (H.T.). Delightful fawny deep apricot; delightfully fragrant.

Frau Karl Druschki (H.T.). Pure white; one of the best.

Freiburg II. (H.T.). Flower peach blossom with deeper shading on reverse of petals, large; buds long. Growth vigorous.

Gaiety (H.T.). Bud large, long-pointed. Color orange, Indian red and silver.

General MacArthur (H.T.). Richest crimson, shaded scarlet.

George Dickson (H.T.). Scarlet crimson.

Georges Schwartz (T.). Deep canary yellow.

Gloria Mundi (Dwf. Poly.). Flower large for the class, fully double, orange scarlet, borne in clusters.

Golden Dawn. The buds are rich sunflower yellow, heavily flushed with deep old rose. The blooms are richly tea-scented.

Golden Ophelia (H.T.). A seedling from "Ophelia." Color, golden yellow in centre.

Grenadier (H.T.). Brilliant currant red shaded scarlet. Bud long pointed. Foliage bronze green; disease-resistant.

Gustave Grunerwald (H.T.). China pink, apricot centre.

Hadley (H.T.). Dark crimson scarlet; one of the best.

Hawlmarm Crimson (H.T.). A glorious rose whose pointed buds are intense crimson maroon.

Hon. Violet Douglas Pennant (H.T.). The color on outside of petals is peach and salmon; inside cream shaded pink. Strong growth and good foliage. 40 petals. Tea scent.

Hoosier Beauty (H.T.). Crimson, with darker shadings. A real beauty.

Hugo Roller (T.). Rich lemon yellow, petals edged crimson.

Irish Elegance (H.T.). Bronzy orange, profuse bloomer; single.

Irish Fireflame (H.T.). Single. A deep madder orange, splashed with crimson. Strong tea perfumed.

Isobel (H.T.). Single; carmine red, flushed orange scarlet.

EVER-BLOOMING ~ ROSES ~ of Highest Quality

Price, 1/6 each; 15/- dozen; £5/10/- per 100.

Postage extra—N.S.W. 1/9 to 2/3 dozen.

Interstate { Victoria, Queensland and Tasmania, 3/6 dozen.
S. & W. Australia, and Northern Territory, 4/3 dozen.

ROSES (continued)—

James Walley (H.T.). Deep apricot suffused pink with a buttercup yellow base. The blooms are of medium size. Stiff stems. Recommended with every confidence.

Johanniszauber (H.T.). Flower medium size, full and long lasting. The color is dark red. The plant vigorous and branching.

John Davison (H.T.). Deep rich crimson.

John C. M. Mensing (H.T.). Sport from "Ophelia," being a deep bright rose.

Jonkheer J. L. Mock (H.T.). Large, perfect formation; highly perfumed; color carmine.

Joyous Cavalier (H.T.). Flowers brilliant scarlet. Disease resistant.

Julien Potin (Per.). The most gorgeous and brilliant yellow rose yet introduced. The buds are long and shapely; sweet scented. Growth upright.

June Boyd (H.T.). Salmon carmine with a yellow base, the outside of petals being heavily flushed amber yellow.

K. of K. (H.T.). Intense scarlet; semi-single.

Killarney Queen (H.T.). Cerise pink, shading lighter at base of petals.

Kaiserin Augusta Viktoria (H.T.). Pure white; one of the best.

Konigin Luise (H.T.). Color white, with an occasional greenish tinge. An improved "Kaiserin Augusta Viktoria."

Lady Alice Stanley (H.T.). Deep coral rose, inside pale flesh; fragrant.

Lady Fairbairn (H.T.). The color is a beautiful lively pink. Flower well formed on stiff upright stems. Ideal for bedding.

Lady Helen Maglona (H.T.). The bud and young flowers bright crimson red with blackish markings.

Lady Margaret Stewart (Per.). Deep sunflower yellow, heavily veined and splashed with orange scarlet.

Lady Pirrie (H.T.). Reddish salmon, inside of petals apricot yellow, flushed fawn and copper.

Lady Roberts (T.). Reddish apricot; the base of the petals coppery red.

Lady Worthington Evans (H.T.). The color is glowing blackish crimson. Disease resistant foliage. Ideal for bedding.

Laurent Carle (H.T.). Brilliant velvety carmine; perfumed; good.

Li Bures (Per.). The plant is of medium growth with shiny foliage. The blooms are produced on long strong stems. Combination of yellow and deep red and rose. Delightfully fragrant.

Lord Charlemont (H.T.). Clear crimson, deepening to carmine crimson; sweetly scented.

Lord Rossmore (H.T.). Creamy white shaded and margined rose towards edge of petals. The flowers are of great size. Growth is strong, free and upright; foliage mildew resistant.

Los Angeles (Per.). Luminous flame pink, toned coral and gold at base of petals; long pointed bud.

Lucien Chaure (H.T.). Flesh, illuminated clear buds.

Madame Abel Chatenay (H.T.). Pale flesh shaded rose; free flowering.

Madame Butterfly (H.T.). Sport from Ophelia; a harmony of bright pink, apricot and gold; excellent.

Madame Edouard Herriot (H.T.). A deep terra-cotta or reddish copper.

Madame Henri Lustre (H.T.). Vigorous growth and erect branching habit, beautiful long bud. Color, dark scarlet to red.

Madame Henri Pate (P.). Very vigorous growth, resembling Ville de Paris; glossy foliage, immune from disease; long buds. Pure golden sulphur yellow.

Madame Jules Bouche (H.T.). Salmon white, centre shaded virginal pink. Recommended.

Madame Leon Pain (H.T.). Silvery salmon, centre orange yellow.

Madame Oreve (H.T.). Color is rose salmon, the centre deep salmon.

Madame Pierre S. Du Pont (H.T.). Growth vigorous and erect, free branching; foliage clear green; long bud, erect stem; flower large, sweetly scented. Color intense yellow shaded ochre.

Madame Segond Weber (H.T.). Petals large and firm; color rosy salmon.

Mabel Morse (H.T.). Golden yellow without shading; sweetly scented.

Mabel Turner (H.T.). Flowers large and well formed. Deep salmon.

McGredy's Scarlet (H.T.). Color brilliant rich scarlet with orange base to petals. Vigorous and upright growth.

Maman Cochet (T.). Blush rose, shaded carmine and salmon.

Margaret Dickson Hamill (H.T.). Delicate maize straw color; petals flushed with carmine at back; perfumed.

Margaret McGredy (H.T.). Color orange-scarlet. Flowers are large, full, of perfect form.

Marion Cran (H.T.). Color deep buttercup yellow, margined and flushed cerise and rosy scarlet.

Marjorie Bulkeley (H.T.). Buff ochre, flushed rosy pink.

May Wettern (H.T.). The outer side of the petals pass from deep rose to rosy pink, and finally to bright rose.

Mevrow C. van Marwyk Kooy (H.T.). White, centre Indian yellow; sometimes coppery orange.

Miss Willmott (H.T.). Soft sulphur-cream, with faintest flush towards edges.

Molly Sharmon-Crawford (T.). Delicate eau-de-nil, white; perfumed.

My Maryland (H.T.). Bright salmon pink, with paler edges; fragrant.

Mrs. Bryce Allen (H.T.). Carmine rose, highly perfumed.

Mrs. A. R. Waddell (H.T.). Very long buds of reddish-salmon tints.

Mrs. C. J. Bell (H.T.). A sport from Radiance; color, delicate shell pink.

Mrs. Erskine Pembroke Thom (H.T.). Long buds, developing into perfectly formed flowers.

Mrs. George Shawyer (H.T.). Similar in color to Madame Jules Grolez.

Mrs. E. T. Stotesbury (H.T.). Bright pink.

Mrs. E. Willis (H.T.). Seedling from Mad. S. Weber; long buds; delicate pink.

Mrs. H. Winnett (H.T.). Beautiful red, not as dark as Hadley.

Mrs. Sam McGredy (H.T.). A beautiful scarlet coppery orange. The stems are long and strong.

Mrs. Tom Smith (H.T.). Growth vigorous and erect. Dark bronzy mildew-proof foliage. Color glowing cerise; fragrant.

Mrs. W. C. Egan (H.T.). Color a two-tone pink.

Mrs. Lovell Swisher (H.T.). Large, beautiful pointed buds of deep coppery salmon. A very vigorous grower with bronzy foliage, resistant to disease.

Mrs. Beckwith (Per.). Buttercup yellow, lighter on edges of petals.

Mrs. Charles Lamplough (H.T.). Soft lemon, sweetly scented.

Mrs. Dunlop-Best (H.T.). Reddish apricot, base of petals coppery yellow; perfumed.

Mrs. MacKellar (H.T.). Deep citron, or delicate pure canary, changing to primrose cream.

Mrs. R. H. Darlington (H.T.). Creamy yellow, sweetly scented.

Mrs. Foley-Hobbs (T.). Ivory white, faintly tinged clear pink.

Mrs. Harold Brocklebank (H.T.). Creamy white, centre buff, base of petals golden yellow.

Mrs. H. Stevens (T.). White centre, shaded with fawn and peach, buds long and pointed.

Norman Lambert (H.T.). Outside petals deep buttercup yellow, and the inside deep salmon orange suffused bronze and yellow, fading to yellow at base. Delightfully fragrant.

Oliver Mee (H.T.). Color deep salmon, with heavy flush of clear fawn. Sweetly scented.

Ophelia (H.T.). Salmon flesh, shaded with rose.

Papa Gontier (H.T.). Rosy crimson; very large petals.

Peggy Bell (H.T.). A beautiful rose of fine substance and distinct coloring, perhaps suggesting Betty Uprichard, but it is more free and robust in habit.

Penelope (T.). Lower half reddish crimson; centre creamy white.

Perle des Jardins (T.). Bright canary yellow; fragrant.

Portadown Bedder (H.T.). Orange yellow on outside, with a rich cerise flush that deepens toward the edges; free bushy habit; fragrant.

President Deville (H.T.). A splendid rose with a brilliant and intense color, cochineal red passing to cochineal carmine. Fragrant.

President Herbert Hoover (H.T.). Bud large, long pointed; semi-double; moderately fragrant; medium orange; strong stem; disease-resistant.

President Jac. Smits (H.T.). Brilliant dark red, with long pointed buds. Flowers large; long stems.

Radiance (H.T.). Flowers large size, clear rose color, with a brilliant reverse of dark carmine; stems are long and stiff; flowers erect. A constant bloomer. Perfumed.

Rapture (H.T.). Sport of Madame Butterfly. Flower medium size, deep pink.

Red Letter Day. Scarlet crimson buds, and cactus-like flowers.

Red Radiance (H.T.). A red flowered sport from the popular favorite Radiance. Very free flowering.

Rev. F. Page Roberts (H.T.). Marechal Neil color, buff markings reverse of petals.

Rhea Reid (H.T.). Flowers red, large, fragrant.

Richard E. West (H.T.). Cadmium yellow, paler on reflex; fragrant.

ROSES (continued)—

- Rose Berkeley (H.T.).** The color is deep rosy salmon-pink suffused orange, and running to an orange base.
- Roselandia (H.T.).** A new yellow sport from Golden Ophelia; larger and deeper in color.
- Rose Marie (H.T.).** Rose pink, fragrant; highly recommended.
- Sensation (H.T.).** Scarlet crimson with maroon markings; growth vigorous.
- Shot Silk (H.T.).** Colorings may be described as bright cherry-cerise over-shot with salmon orange, flushed rose, and a deep-veined clear buttercup yellow base.
- Souv. de Claudius Pernet (Per.).** Sunflower yellow that does not fade.
- Souv. de H. A. Verschuren (H.T.).** Cadmium yellow, passing to orange yellow.
- Souv. de Madame Boulet (H.T.).** Dark cadmium yellow; large, long bud.
- Souv. de Maria de Zayas (H.T.).** Vivid carmine; large and good.
- Souv. de R. B. Ferguson (Per.).** Splashed cerise and rose pink on apricot.
- Souv. of Stella Grey (T.).** Deep orange, with splashes or veinations of yellow, apricot, salmon and crimson.
- Souv. Therese Levet (T.).** Dark velvety crimson.
- Sunburst (H.T.).** Cadmium yellow, orange-yellow centre, large cupped form.
- Sunny South (H.T.).** A lovely pink, flushed carmine on a yellow base.
- Sunstar (H.T.).** Deep orange and yellow, edged crimson.
- Star of Queensland (H.T.).** Rich deep velvety crimson, shaded maroon.
- Talisman (H.T.).** A very fine and attractive Gold Medal rose that is quite distinct. Scarlet, pink, copper and gold are all to be found in the glorious shadings; vigorous grower.
- Una Wallace (H.T.).** Cherry rose, without shading.
- Victor Waddilove (H.T.).** Bright carmine pink with yellow base; magnificent form; tea perfume.
- Ville de Paris (Per.).** Flower large, full, globulous; color, sun yellow, slightly tinted orange.
- W. E. Chaplin (H.T.).** Deep crimson shading to carmine crimson. The flowers are large, pointed and sweetly-scented.
- W. F. Dreer (Per.).** Deep golden yellow, strongly perfumed.
- W. R. Smith (T.).** Creamy white, flushed and suffused with bright rosy pink.
- William E. Nickerson (H.T.).** A fine rose, color glowing orange cerise. Very attractive.
- White Ensign (H.T.).** The color is pure white, flushed delicate cream at very base of petals.
- White Maman Cochet (T.).** Equal to the celebrated Pink Maman Cochet.
- Willowmere (Per.).** Rich crimson pink, shaded yellow in the centre.
- Warrior (H.T.).** Flowers vivid scarlet crimson, large, double.
- Yves Druhen (H.T.).** Dark velvety red; highly perfumed.

CLIMBERS

- Can be grown in the border if trained on poles. The prefix "Climbing" is only used when there are dwarf roses of the same name, and should never be omitted when ordering if confusion and disappointment are to be avoided.
- Black Boy (H.T.).** The darkest climbing rose yet offered. The bud is well shaped and the flower most attractive. The color is a deep crimson, shaded with blackish maroon.
- Climbing Belle Siebrecht (H.T.).** Deep rose, long pointed buds.
- Climbing Caroline Testout (T.).** Flowers bright rose.
- Climbing Chateau de Clos Vouget (H.T.).** Easily darkest H.T. grown.
- Climbing Chatenay (H.T.).** Carmine rose, shaded salmon; very free and good.
- Climbing Columbia (H.T.).** Strong-growing sport of this well-known variety.
- Climbing Devoniensis (T.).** Creamy white.
- Climbing General MacArthur (H.T.).** Possessing all the good points of the parent.
- Climbing Georges Schwartz (T.).** The blooms are of the brightest yellow; flowers freely.
- Climbing Golden Emblem (Clb. Per.).** A vigorous climbing sport from the dwarf form, which will be a most decided acquisition. The growth is vigorous, the climbing habit is constant.
- Climbing Golden Ophelia (H.T.).** A fine climbing sport of the pretty dwarf variety. The flowers are perfect in shape.
- Climbing Hadley (H.T.).** The flowers are identical to the parent in rich crimson color and sweet fragrance.
- Climbing Hoosier Beauty (H.T.).** Vigorous sport from the popular dwarf variety.
- Climbing Kaiserin Augusta Viktoria (H.T.).** Pure white, one of the best.
- Climbing Lady Hillingdon (H.T.).** Long buds; deep orange yellow; good.
- Climbing Los Angeles (Per.).** Probably no other rose has made such a stir in all except tropical countries. For description see Los Angeles Rose in General List.
- Climbing Madam Edouard Herriot (Per.).** A vigorous climbing sport of the highly esteemed variety.
- Climbing Madam Segond Weber (H.T.).** Climbing sport; color same as dwarf variety.
- Climbing Maman Cochet (T.).** A strong climbing sport; color, same as dwarf variety.
- Climbing Mrs. G. Shawyer (H.T.).** Brilliant pink, vigorous climber.
- Climbing Ophelia (H.T.).** Identical with the normal type; perfect blooms, which are salmon flesh, shaded rose.
- Climbing Perle des Jardins (T.).** Bright yellow; profuse; one of the best.
- Climbing Shot Silk (H.T.).** A rich salmon orange cerise veined buttercup yellow, at times over-shot with orient shades. Vigorous growth; immune from mildew.
- Climbing Stevens (H.T.).** Vigorous grower, full snow-white flower; sport from Mrs. H. Stevens.

- Climbing Sunburst (H.T.).** A climbing sport from the well-known dwarf variety. Color, cadmium yellow, with orange centre.
- Climbing Sunstar (H.T.).** A climbing sport of the well-known and popular bedding variety.
- Climbing White Maman Cochet (H.T.).** This is a true climber of very vigorous habit, of the magnificent Maman Cochet.
- Climbing Radiance (H.T.).** A real climbing sport of "Radiance." Very vigorous grower.
- Climbing Red Radiance (H.T.).** A vigorous climbing sport, will be very welcome in New South Wales, where all the Radiance family are so popular.
- Climbing Rose Marie (H.T.).** A climbing sport of Rose Marie is one of the most valuable acquisitions for many years. Mildew-proof foliage. Highly recommended.
- Climbing Souv. de Georges Pernet (Per.).** A climbing sport of free flowering character, producing large blooms of rich color similar to the parent variety.
- Cloth of Gold (Noisette).** Sulphur yellow.
- Countess of Stradbroke (H.T.).** A vigorous growing, free blooming rose of exceptional merit. The flowers are large and full. The color is a rich dark velvety crimson.
- Flying Colours (H.T.).** Large single flowers of deep bright cerise.
- Golden Vision (H.T.).** Golden yellow; borne in great quantity.
- Jessie Clark.** Large single flowers (4in. across), borne in clusters. Color, a lovely shade of pink.
- Kitty Kininmouth (H.T.).** Bright carmine rose.
- Marechal Neil (Noisette).** Rich golden yellow.
- Mermaid (H.T.).** Sulphury yellow, single.
- Miss Marion Manifold (H.T.).** Rich velvety scarlet; shaded crimson. Vigorous grower. Free flowering.
- Noella Nabonnand (T.).** Extra large, semi-double, velvety crimson, handsome buds.
- Nora Cunningham (H.T.).** Flowers large, decorative, semi-double; color, pure pink in Spring.
- Sachsengruss (H.T.).** Delicate flesh, with China rose reflexes; very large.
- Souv. de Claudius Pernet (Per.).** This valuable sport will be extremely welcome, as it provides quite a new break in climbing varieties. The growth is vigorous. Color, rich sunflower yellow.
- Souvenir de Leonie Viennot (H.T.).** Silvery rose, shading to carmine, base of petals canary yellow.
- Striped Reine Marie Henriette (H.T.).** Has the same excellent qualities as R. M. Henriette, with the exception of the flowers, which are striped magenta, on paler ground.
- Walter C. Clark (H.T.).** Deep maroon crimson, shaded black; perfumed.
- William Allan Richardson (Noisette).** Beautiful orange yellow.
- Zephryne Drouhin (H.T.).** Clear shade of pink, fine foliage; almost thornless.

Dwarf Polyantha Roses

ORLEANS TYPE

This section is most suited for bedding and massing, low edges, or as an edging to taller growing varieties. They produce large clusters of bloom and are almost continuously in flower. They are all compact growers, and should not be mixed with other types.

Chatillon. Beautiful pink, enormous trusses of semi-double flowers.

Coral Cluster. A coral pink sport from Orleans.

Ellen Poulson. Brilliant pink; large, full, sweet scented.

E. N. Ward. Warm pink, sometimes tipped with carmine.

Goldlachs (Golden Salmon). An intense fiery golden salmon of wonderful beauty. Flowers medium to large in size, produced in large full trusses. Strong bushy growth. Fine healthy foliage. Highly recommended.

Ideal. Flower beautiful dark crimson, at times scarlet. A sport from "Miss Edith Cavell," and in growth somewhat similar. Highly recommended.

Jeannie Soupert. White, with pale pink flushing.

Maman Turbat. Beautiful China rose, shaded clear peach. Large trusses.

Miss Edith Cavell. Scarlet crimson sport from Orleans.

Orleans. Brilliant geranium red, suffused rose, with white centre. Bushy habit; very free flowering.

CECIL BRUNNER TYPE

The varieties of this list comprise the best of the Baby Roses. They produce exquisitely shaped blooms in small clusters, suitable for buttonhole or similar decoration; but generally are not suitable for bedding.

George Elgar. Coppery golden yellow, changing to clear yellow.

Mdlle. Cecil Brunner. Delicate salmon pink; deep salmon centre.

Perle D'or. Nankeen yellow; deep orange in bud.

Tip Top. Golden yellow, heavily tipped cerise.

MISCELLANEOUS TYPES

These varieties include all the best sorts which do not find a place in the previous sections; but as they are of various habits of growth and flower, should never be mixed with other kinds.

Borderer. Flowers difficult to describe; shades of pink, copper and amber go together and make a charming and distinct rose.

Distinction. Rose neyron pink passing to deep rose pink with brighter centre.

Kirsten Poulsen. Large single scarlet flowers; seedling from Orleans.

Leonie Lamesch. Copper red, shaded yellow.

Locarno. A deep orange scarlet sport of "Orleans." Good.

Mdlle. Francisque Favre. Like Papa Hemeray, but darker red. Single.

Salmonea. A fine shrimp pink variety; color good.

Salmon Spray. Rich salmon pink; reverse of petals carmine.

Climbing Polyantha and Ramblers

Climbing Cecil Brunner. A vigorous climbing sport from the favorite dwarf.

Climbing Orleans. A climbing sport from the well-known dwarf variety.

Mrs. F. W. Flight. Lovely pink; white centre, semi-double; produced in enormous clusters.

Moonlight. White, flushed with lemon; sweetly scented.

Tausendschon. Large pink, in large clusters.

Vietchenblau. Reddish lilac, changing to amethyst and steel blue; semi-double flowers.

Moss Roses

This charming old-world type of Rose succeeds best in the colder districts. Around Sydney blooms in the Spring only.

White Bath. White. **Zenobia.** Pink.

Captain Basroger. Red; large, full.

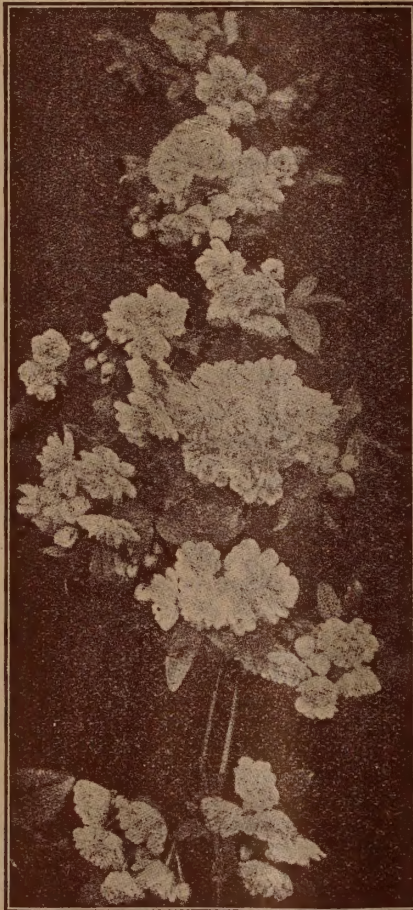

Banksian Roses

Desirable Roses for climbing purposes:

Alba. White.

Lutea. Yellow.

Fortunii, large, White.

BANKSIAN ROSE.

Wichuraiana Roses

These delightful Roses make ideal subjects for covering banks, pergolas, tree stumps, rockeries, arches or pillars. Most varieties have small shiny foliage, and bear a profusion of large clusters of flowers in the Spring. Suitable in all climates.

American Pillar. Large, single, rich pink, with white eye and yellow stamens.

Cherub. Produces a mass of beautiful salmon pink flowers in Spring.

Dorothy Perkins. A beautiful shell pink; double flowers in clusters.

Dr. W. van Fleet. Flowers 4 inches in diameter, with high centre; delicate shade of pink, deepening in the centre.

Emily Grey. Golden yellow climbing rose. Without doubt the finest yellow Wichuraiana rose yet introduced.

Excelsa. Brilliant scarlet crimson, large trusses of double flowers; mildew-proof foliage; much superior to Crimson Rambler.

Hiawatha. Single; bright rich crimson; white eye.

Paul's Scarlet Climber. Vivid scarlet shaded with crimson; suitable for pillars and pergolas.

Romeo. Deep red; double; perfect form; resembling a miniature "Liberty."

Sanders' White. Best white.

Shower of Gold. Vigorous; almost the color of Wm. Allan Richardson, but not so much orange.

Silver Moon. Very strong grower; large, silvery white flowers; 6 inches across.

Standard Roses

Three-quarter Standards, about 30in. } 4/- each
Full Standards, about 36in. . . . } 45/- doz.

For description see General List.

The following is a list of the varieties we can supply, and are fine, strong plants. We recommend the Three-quarter Standard as the best for this climate:—

LIST OF VARIETIES AVAILABLE ON APPLICATION.

ANDERSON'S TREES, PLANTS and SHRUBS

EXECUTION OF PLANT ORDERS.—Plant orders are executed at the time most suitable for planting, taking into consideration the weather and other existing circumstances. We are always willing to attend to specific instructions regarding the execution of plant orders, should customers desire delivery at a certain time and they will accept the risk. Most of our Pot Plants are sent in water-tight paper pots, saving freight and carriage in packing. The cost of packing must be added to prices named. The minimum charge of 2/- for orders packed in cases will cover cost of packing a dozen pot plants.

In order to assist customers in selecting Trees, Shrubs, Climbers, etc., we have placed certain numerals which will indicate localities where the plants are suitable:—1, Mountain; 2, Inland; 3, Coastal; 4, Tropical.

N.B.—D. denotes Deciduous; E. denotes Evergreen.

ACACIA DEALBATA.

ABUTILON—2, 3, 4 CHINESE LANTERN.

Handsome evergreen flowering shrubs of free growth; some of the varieties have variegated leaves and are very handsome, but the whole family are attractive and profuse bloomers; flowers bell-shaped. We recommend cutting back every second or third year.

Boule de Nieve. E. White. 6ft.	1 9
Cloth of Gold. E. Golden. 6ft.	1 9
Emperor. E. Large flowers, dark crimson. 6 feet	1 9
Rosaeflorum. E. Pink. 6 feet	1 9
Souvenir de Bonn. E. Leaves have a wonderful silver margin; flowers orange, veined scarlet. 10 feet	1 9
Vexillarium. E. Yellow and red. 6 feet	1 9

ACACIA—1, 2, 3, 4

Baileyana (Cootamundra Wattle). E. Silvery leaf of great beauty; free flowering. 20 feet	1 0
Decurrens (Black Wattle). E. 20 feet	1 0
Dealbata (Silver Wattle). E. 20ft.	1 0
Elata. E. 30 feet. The best for avenue planting	1 6
Mollissima Floribunda. E. 25 ft.	1 0
Podalyraefolia (Queensland Silver Wattle). E. A very choice variety. 20 feet	1 0
Pycnantha (Golden Wattle). E. 20 feet	2 0
Spectabilis. E. 15 feet. Beautiful variety	1 0

ACER—1 MAPLE.

Ginnala. D. This Maple grows to a small tree, and its vivid red leaves in Autumn are an outstanding feature of the landscape. Suitable for cool climates. 15 feet	2 6
Negundo (Box Elder). D. 40 ft.	2 9
Negundo Argentea Variegata. D. A silver variegated form of Acer negundo. Grows in Sydney if kept well watered, but is at its best in the cooler districts. 20 ft.	2 6
Platanoides (Norway Maple). D. 50 feet	2 0
Polymorphum. D. Seedling Japanese Maple. 20 feet	2 0
Pseudo Platanus (Sycamore or False Plane). D. 50 feet	2 0

These varieties are quite hardy out of doors.

JAPANESE MAPLE—1

None of the ornamental trees excel these beautiful Japanese Maples. They are striking in foliage, and thrive well in the cool parts of New South Wales when grown in sheltered positions. They can also be grown as pot plants in the bush-house.

Atropurpureum. D. Deep maroon, large regular palmate leaves.	
Dissectum Atropurpureum. D. Deep maroon, richly fringed thread-like leaflets; drooping.	
Dissectum. D. Green.	
Osaka-Zuki. D. Large-leaved regular palmate, light maroon, changing to blood-red in Autumn. We can supply Seedlings only of the above four varieties, 2/6 and 3/6 each.	

ÆSCULUS—1

The Horse Chestnut is very suitable for the colder parts of our State. It is a magnificent shade tree, and requires ample space.

Hippocastanum (Horse Chestnut). D. 40 feet	2 0
--	-----

ALOYSIA—1, 2, 3

Citriodora (Lemon-scented Verbena). D. 8 feet	1 6
---	-----

The scent of the leaves is delightful.

AMYGDALUS PERSICA—1, 2, 3, 4

Double flowering Peach; very ornamental. 10 feet.

Clara Meyer. D. Palest double pink	1 9
Carnation Striped. D. Flaked white and pink	1 9
Crimson. D.	1 9
White. D.	1 9

New Winter Flowering Sorts. Earlier than the Ordinary Sorts. Not suitable for cold climate on account of frost killing blooms. Available in pink and red shades only	1 9
--	-----

ARBUTUS—1, 2, 3

STRAWBERRY TREE.

Bearing small edible fruit. Handsome evergreen, hardy shrub, with laurel-like foliage; prefers a light sandy or peaty soil.	
Unedo. E. 20 feet	2/- & 2 6

ARDISIA—2, 3, 4

Crenulata. Crimson berries. 2 ft.	2 0
-----------------------------------	-----

Evergreen; a charming pot plant.

ARDUINA—2, 3, 4

CAPE PLUM.

Beautiful flowering shrub, with white flowers strongly scented like the Jasmine.	
Grandiflora. E. White. 8 feet	2 0

AUCUBA—1, 2, 3, 4

THE GOLD DUST TREE.

Handsome, hardy shrubs; leaves pale green, spotted with yellow; will thrive even under trees, and will stand severe frosts.	
Japonica Aurea. E. 4 feet	2 0

BAUHINIA—3, 4

MOUNTAIN EBONY.

Very showy evergreen flowering shrubs.	
Alba. E. 10 feet	2 0
Purpurea. E. 25 feet	2 0

BENTHAMIA—1, 2, 3

Flowers large, white, densely aggregate, forming a round head. This is a beautiful evergreen tree, and produces reddish fruit, somewhat resembling the Arbutus; very effective.

Fragifera (Himalayan Strawberry). E. 10 feet	2 0
--	-----

BERBERIS—1, 2, 3

Wilsonii. E. A new low growing shrub from China. Golden yellow flowers followed by red berries. Very attractive in autumn. 3 feet	1 9
---	-----

Stenophylla. D. A hardy graceful shrub, bearing large quantities of small yellow flowers in Spring. Suitable for all the colder climates. 4 feet	1 9
--	-----

Thunbergii Atropurpurea. D. A compact bushy shrub, deep red foliage the greater part of the year. Purplish crimson berries. Hardy in all cool climates. 4 ft.	1 9
---	-----

BORONIA—1, 2, 3

This charming and well-known, sweetly-perfumed plant is most suitable for the South Coastal, Mountain and cooler districts of New South Wales. Possesses light, graceful foliage and brown flowers, with golden yellow lining. Should be cut hard back after flowering.

Megastigma. E. 4 feet	2/- & 2 6
-----------------------	-----------

BROWALLIA—3, 4

Deep orange-colored flowers, produced in great abundance during Spring and Summer.

Jamiesoni. E. 4 feet	1 9
----------------------	-----

BRUGMANSIA—2, 3, 4

TRUMPET FLOWER.

Soft-wooded, evergreen flowering shrub, hardy only where frosts are not severe; flowers drooping tubes, often 6 inches long. Perfume is delightful.

Knightii. E. White. 10 feet	2 0
-----------------------------	-----

BRUNFELSIA—3, 4

FRANCISCEA.

An elegant, free-flowering evergreen shrub, producing flowers of a variety of color. It prefers a warm sheltered situation.

Latifolia. E. Lavender with white eye. 6 feet	2 0
---	-----

BUDDLEIA—1, 2, 3, 4

A very hardy, quick-growing family of plants, bearing honey-scented blossoms in profusion.

Globosa. E. Orange. 12 feet	2 0
-----------------------------	-----

Nanhoensis. E. Virtually a dwarf B. Veitchii, being much more compact, and therefore more suitable for small gardens, and producing the same heliotrope violet blooms. Hardy everywhere. 5 feet	1 6
---	-----

Variabilis Magnifica. E. Rose purple. 10 feet	1 6
---	-----

Veitchiana. E. Splendid for hedges or as a shrub on a lawn. The clusters of flowers are 12 to 18 inches in length, and of bright lilac color. The delicious fragrance resembles that of the English Lilac. 10 feet	1 6
--	-----

BUXUS—1, 2, 3

BOX.

Arborea (Tree Box). E. 10ft. From	2 0
Aurea Variegata. E. 3 feet	2 0
Sempervirens. E. Common English Box for edging. 3 ft. doz.	4 6

CALLISTEMON—2, 3, 4

THE BOTTLE BRUSH.

	E.	L.	s.	d.
<i>Acuminata</i> .	8 feet	Large blooms.	1	9
<i>Crimson</i> .	8 feet	Large blooms.	1	9
<i>Coccinea</i> .	15 feet	Weeping variety.	1	9
<i>Scarlet</i> .	15 feet	Large blooms.	1	9
<i>Lanceolatus</i> .	8 feet	Large blooms.	1	9

CALODENDRON—2, 3, 4

THE CAPE CHESTNUT.

<i>Capense</i> .	E.	Beautiful lilac-colored flowering tree; evergreen.	40 feet	2	0
------------------	----	--	---------	---	---

CAMELLIA

(See page 55).

CAMPHORA—2, 3, 4

<i>Officinalis</i> (Camphor Laurel).	E.	Beautiful evergreen tree, of quick growth; suitable for our climate; admirable as an avenue tree.	50 feet	1	6
--------------------------------------	----	---	---------	---	---

CASSIA—2, 3, 4

A very pretty evergreen shrub, covered with a profusion of yellow blossoms during Autumn.				
Candolleana.	E.	10 feet	1	9
Didymobotrya. E. A particularly fine foliaged and robust growing Cassia. The heads of blossoms are larger than other Cassias.				
Spring to Autumn.		6 feet	2	0

CASTANEA—1, 2, 3, 4

<i>Vesca</i> (Sweet or Spanish Chestnut).	D.		3	0	
---	----	--	---	---	--

CASTANOSPERMUM—3, 4

A native of Queensland, suitable for most parts of N.S.W.; bears saffron-colored flowers, and makes a handsome evergreen tree.

<i>Australis</i> (Moreton Bay Chestnut).	E.	50 feet	1	9	
--	----	---------	---	---	--

CATALPA—1, 2, 3

A showy, rapid-growing tree, with pyramidal clusters of fragrant flowers. Splendid specimens for lawns and shrubberies.

<i>Speciosa</i> .	D.	White, fragrant.	20 feet	1	6
-------------------	----	------------------	---------	---	---

CERASUS—1, 2, 3

The Laurels are old favorites; they thrive well here if planted in good strong soil, and make splendid hedges. (See Hedge Plants.)

<i>Lauro-cerasus</i> (English Laurel).	E.	20 feet	1	6	
<i>Lusitanica</i> (Portugal Laurel).	E.	20 feet	1	9	

CERASUS JAPONICA—1, 2, 3

DOUBLE FLOWERING CHERRY.

Japanese double-flowering Cherries are the most beautiful flowering shrubs one could wish to have. They are showy, ornamental, and the flowers sweetly pretty. Highly recommended.

<i>J. H. Veitch</i> .	D.	Rosy pink, 2in. diameter, bronze foliage.	10ft.	2	0
<i>Mt. Fuji</i> .	D.	Semi-double white.	10 feet	2	0
<i>Sieboldti Rosea Superba</i> .	D.	A very double deep pink flowered variety		2	0

CERATOPETALUM—3, 4

CHRISTMAS BUSH.

The Christmas Bush is a gem.

<i>Gummiferum</i> .	E.	40 ft.	From	1	9
---------------------	----	--------	------	---	---

CERATONIA—2

Hardy evergreen tree, small red flowers, followed by pods 4 to 5 inches long; useful for stock feeding; has a thick stem; a spreading habit. Requires a hot, dry climate.

<i>Siliqua</i> (Carob Tree, St. John's Bread, Locust Tree).	E.	16ft.	1	9	
---	----	-------	---	---	--

CERATOSTIGMA—1, 2, 3, 4

<i>Willmottiae</i> .	D.	A rare and beautiful shrub, allied to Plumbago and producing deep sky blue flowers over a long season. The plants are shrubby and grow from 3 to 5 feet in height. Highly recommended. Hardy everywhere		1	6
----------------------	----	---	--	---	---

CERCIS—1, 2, 3

The Judas Tree is a beautiful deciduous flowering tree, producing vivid purple flowers covering the leafless branches, after which the curiously-shaped leaves appear; requires shelter; suitable for cold districts.

<i>Siliquastrum</i> (Judas Tree).	D.	20ft.	2	0	
<i>Canadensis</i> .	D.	Red. 20 feet	2	0	

CESTRUM—3, 4

<i>Nocturnum</i> .	D.	Greenish white. Sweetly scented at night.	6 feet	1	6
--------------------	----	---	--------	---	---

CHAMAELAUCIUM—1, 2, 3

<i>Uncinatum</i> (Geraldton Wax Plant).		A native of Western Australia, and produces bunches of very pretty pink blooms, somewhat after the shape of our native Tea Tree flowers. The plant will stand very dry conditions, but is sensitive to too much water.	5 feet	2	6
---	--	--	--------	---	---

CHOISYA—1, 2, 3

<i>Dwarf</i> evergreen shrub, with flowers like orange blossoms; sweetly scented.					
<i>Ternata</i> .	E.	6 feet	From	2	0

CHORIZEMA—1, 2, 3, 4

<i>Illicifolia</i> .	E.	One of the prettiest of our native shrubs, growing to a height of two or three feet, and covered in Spring with delightful orange and red pea-shaped flowers		1	6
----------------------	----	--	--	---	---

CISTUS—1, 2, 3

<i>Sunset</i> .	E.	The list of really good dwarf flowering shrubs is small, and we can recommend this variety with confidence. The cerise pink flowers are produced freely in Spring.	3 feet	1	9
-----------------	----	--	--------	---	---

CERASUS JAPONICA.

CLERODENDRON

<i>Ugandense</i> .		Recent introduction, producing beautiful blue blooms which have given it the name of the "Butterfly Flower." The outer section is pale blue with a darker centre. Is only suitable for climates with mild winters.	10 feet	2	0
--------------------	--	--	---------	---	---

CLETHRA—1, 2

LILY OF THE VALLEY TREE.

These are very ornamental. Flowers very like the Lily of the Valley.					
<i>Arborea</i> .	E.	White.	10 feet	2	0

CLIANTHUS—1, 2, 3

NEW ZEALAND GLORY PEA.

A hardy evergreen soft-wooded shrub; fine foliage, trailing habit.					
<i>Puniceus</i> .	E.	Beautiful red flowers.	8 feet	1	9

COPROSMA—1, 2, 3, 4

Handsome evergreen shrubs, with bright shining leaves, some variegated and margined; very hardy, thriving well in either hot or cold districts; suitable for hedges near coast.					
<i>Lucida</i> .	E.	Strong grower.	6 ft.	1	6

COTONEASTER—1, 2, 3

Very hardy shrubs, bearing a profusion of berries.

<i>Francheti</i> .	E.	A hardy evergreen shrub allied to the Hawthorn, and grown for its handsome arching canes, which are heavily laden with orange-red berries in Autumn and Winter		1	9
--------------------	----	--	--	---	---

CRATAEGUS—1, 2, 3

HAWTHORN.

These are general favorites, flowering profusely in the Spring; the double varieties exceedingly beautiful and particularly showy.

<i>Carrieri</i> .	D.	Large scarlet fruit.	8 feet	2	0
-------------------	----	----------------------	--------	---	---

<i>Crenulata</i> (Fire Thorn).	E.	Bears red berries like Ardisias; very pretty for decorations during Winter.	Evergreen.	8 feet	1	6
--------------------------------	----	---	------------	--------	---	---

<i>Crus-Galli</i> (Cockspur Thorn).	D.	White flowers, producing edible red fruit.	15 feet	2	0
-------------------------------------	----	--	---------	---	---

<i>Gibbsi</i> .	E.	The evergreen Crataegus have become very popular by reason of their ability to withstand heat and cold, and this new species with white flowers and bunches of scarlet berries should prove a welcome addition		2	0
-----------------	----	--	--	---	---

<i>Oxyantha Double White</i> .	D.	12 feet	2	0	
--------------------------------	----	---------	---	---	--

<i>Oxyantha Double Pink</i> .	D.	12 feet	2	0	
-------------------------------	----	---------	---	---	--

<i>Oxyantha Double Red</i> .	D.	12ft.	2	0	
<i>Pyraecantha Angustifolia</i> .	E.	A strong growing evergreen hawthorn, producing bunches of white flowers in Spring, followed in Autumn by dense masses of orange berries.	8ft.	1	6

CROTOLARIA—3, 4

<i>Laburnifolia</i> .	E.	Native of Queensland. It thrives in our cooler climate. It is called the "Bird Flower" on account of the fancied resemblance of its large yellow flowers—from 2½ to 3 inches long.	3 feet	2	0
-----------------------	----	--	--------	---	---

CUPHEA—3, 4

Dwarf-flowering plants; old favorites; flowers delicate tubes.					
Platycentra.	Red.	E.	The		
cigar-flower.	2 feet	..	..	1	6
Jorulensis.	E.	Yellow and	red.		
3 feet	..	..	..	1	6

CYDONIA—1, 2, 3

THE FLOWERING QUINCE.

Handsome, deciduous shrubs; should be largely planted.

	s.	d.
Nivalis. D. Pure white. 4 feet ..	1	6
Sanguinea Nivalis. D. White and red. 4 feet ..	1	6
Rosea. D. Pink. 4 feet ..	1	6
Rubra Grandiflora. D. Rich bright red. 4 feet ..	2	0
Vermillion. D. Vermillion scarlet. 4 feet ..	2	0

CYPHOMANDRA—3, 4

TREE TOMATO.

Very ornamental shrub. Fruit makes good preserve.

Betacea. E. 10 feet ..	1	6
------------------------	---	---

CYTISUS—1, 2, 3

LABURNUM.

Charming English flowering tree, which during Spring is covered with beautiful pendant racemes of flowers; prefers cold climate.

Laburnum (English Golden Chain). D. 12 feet ..	1	6
Lilac Time. E. Improved variety and one which promises to be the forerunner of a new range of colours. The plant vigorous and branching, covered with masses of lilac pink blooms, which pass to clear pink with age. 5 feet .. each	1	6

DAPHNE—1, 2, 3

Prefer a light, moist soil and warm situation; highly perfumed; free bloom; universal favorite.

Indica Rubra. E. Red. 3 feet. Each ..	5/-	& 7 6
Odora. E. White. 3 feet .. from	3	6

DEUTZIA—1, 2, 3

WEDDING BELLS.

Dwarf-flowering shrubs, highly recommended.

Candidissima fl. pl. D. Semi-double flowers. 6 feet ..	1	6
Gracilis. D. White. 4 feet ..	1	6
Pride of Rochester. D. Beautiful double flowers. 5 feet ..	1	6

DIERVILLA—1, 2, 3

WEIGELIA.

Beautiful deciduous plants; profuse bloomers; require but little attention. Produce fine clusters of tube-shaped flowers of a variety of colors. Can be highly recommended.

Abel Carriere. D. Rich rosy crimson. 4 feet ..	1	9
Amabilis. D. Pink. 6 feet ..	1	9
Candidissima. D. White. 6 feet ..	1	9
Couquette. D. The largest flowered variety—deep rose, measuring 1½ to 2 inches across. 6 feet ..	1	9
Eva Rathke. D. Moderate grower, flowering abundantly; large crimson red color. 6 feet ..	1	9
Gloire de Bosquets. D. Deep red flowers. 6 feet ..	1	9

DIOSMA—2, 3

Charming little evergreen plant, with light feathery foliage, which is, during September and October, studded with small starry white flowers.

Ericoides. E. 3 feet ..	2	0
-------------------------	---	---

DIPLACUS—2, 3, 4

A dwarf yellow-flowering shrub; very attractive; evergreen.

Hybrida. E. 3 feet ..	1	6
-----------------------	---	---

DOMBEYA—3, 4

Evergreen flowering shrubs, good foliage; flowers perfumed.

Dregiana. E. White. 15 feet ..	2	0
Mastersi. E. White. 12 feet ..	2	0

DORYANTHES—3, 4

Palmeri. E. A Queensland variety of the Native Spear Lily or Gynea. Color brilliant, flowers are large .. 2 | 0 |

DOUBLE-FLOWERING CHERRY

(See Cerasus, page 46).

DOUBLE-FLOWERING PEACH

(See Amygdalus, page 45).

DOUBLE-FLOWERING QUINCE

(See Cydonia, on this page).

DRACAENA—3, 4

CORDYLINE.

Handsome, tropical-looking plants; very hardy.

Indivisa. E. 8 feet ..	1	9
Terminalis. E. 20 feet ..	1	9

DURANTA—3, 4

A pretty family of dwarf-growing, evergreen shrubs; very free-flowering and quite hardy; make pretty dwarf hedges. (See Hedge Plants.)

Alba. E. White. 6 feet ..	1	6
Plumieri. E. Blue. 6 feet ..	1	6
Variegated. E. 8 feet .. each	1	6

ELCEAGNUS—1, 2, 3

Fine hardy shrub; grows freely in any ordinary soil; very ornamental.

Japonica Macrophylla Aurea Variegata. E. 6 feet ..	2	0
--	---	---

EDWARDSIA—1, 2, 3

Microphylla. E. Evergreen flowering shrub. Yellow flowers; very hardy. 12 feet .. 2 | 0 |

ERYTHRINA—2, 3, 4

CORAL TREE.

Erythrina, or Coral Trees, are splendid subjects in large or small pleasure grounds. They will thrive in the poorest soil, or even in barren sand; are handsome trees when out in flower.

Crista Galli Grandiflora. D. Bright deep scarlet. 8 feet ..	1	9
Indica. D. Scarlet. 25 feet ..	1	9
Speciosa. D. 15 feet. This variety is dwarf in habit and brilliant when in bloom ..	2	0

ESCALLONIA—1, 2, 3

Beautiful, free-flowering, evergreen plants.

Macrantha Ingrami Rosea. E. Pale pink. 6 feet .. each	1	9
Macrantha. E. Red. 6 feet ..	1	6
Montevidiensis. E. White. 10 ft. 1 9		

EUCALYPTUS—2, 3, 4

We list only a few of the ornamental varieties of this large genus. Globulus is the well-known Tasmanian Blue Gum. Ficulifolia is one of the most beautiful flowering trees. A blaze of color in Summer.

As all plants of Ficulifolia are grown from seed, we cannot guarantee the colors. They are various shades of scarlet, sometimes crimson and orange, and occasionally a plant will flower white.

Botryoides (False Mahogany). E. 60 feet ..	1	0
Calophylla Rosea. E. Bright pink flowers. 30 feet ..	1	6
Citriodora. E. Lemon-scented leaves. 75 feet ..	1	0
Corynocalyx (Sugar Gum). E. 100ft. 1 0		
Ficulifolia. E. Bright crimson flowers. 15 to 20 feet ..	1	6
Globulus (Tasmanian Blue Gum). E. 1, 2, 3. 100 feet ..	1	0
Sideroxylon Rosea. E. 30 feet. Very hardy ..	1	6

EUGENIA—2, 3, 4

LILLIPILLI.

Beautiful myrtle-leaved evergreens, ornamental; some varieties have blue and purple berries.

Leuhmanni. E. 10 feet. Graceful foliage; red fruit ..	2	0
Pendula. E. Purple fruit. 20 ft. 2 0		
Smithii. E. White fruit. 20 ft. 2 0		

EUONYMUS—1, 2, 3

A handsome family of evergreen shrubs with fine shining foliage.

Argenta Variegatus. E. 6 feet ..	1	9
Aurea Variegatus. E. 6 feet ..	1	9
Japonica. E. 12 feet ..	1	9
Latifolius Alba Marginatus. E. 12ft. 1 9		
Latifolius Aurea Marginatus. E. 6ft. 1 9		

EUPATORIUM—3, 4

Flowers produced in very large corymbs, suitable for Winter flowering.

Ianthinum. E. Purple. 4 feet ..	2	0
---------------------------------	---	---

EUPHORBIA—2, 3, 4

CROWN OF THORNS.

Curious and beautiful plant of dwarf habit. The shoots are hard and woody, with strong prickles; bright crimson flowers, produced in trusses, being nearly always in flower.

Splendens. E. 4 feet ..	1	9
-------------------------	---	---

EXOCHORDA—1, 2, 3

PEARL BUSH.

This cannot be too highly recommended. One of the loveliest flowering shrubs in cultivation; flowers pure white, borne in great profusion.

	s.	d.
Grandiflora. D. 8 feet ..	1	6
Macrantha. D. 6ft. Large flowered form. The plants are deciduous, and in early Spring are clothed with beautiful large pure white blooms; hardy in cold districts	1	6

FAGUS—1

BEECH.

Beautiful deciduous tree; leaves cover the tree with dense foliage in the Spring and Summer; only suitable for cold climates.

Sylvatica. D. 50 feet ..	2	0
--------------------------	---	---

FEIJOA—1, 2, 3, 4

Sellowiana. An evergreen bush up to about 10 feet in height, with conspicuous red and white flowers followed by edible greenish colored fruit, which partakes somewhat of the flavor of a guava; hardy, survives heat, frost and drought .. 2 | 0 |

FICUS—2, 3, 4

Remarkable for their magnificent foliage. Useful shade trees.

Australis (Port Jackson Fig). E. 60 feet ..	1	9
Macrophylla (Moreton Bay Fig). E. 100 feet ..	1	9
Hilli. E. Beautiful variety. Suitable for street planting. 40 feet	1	9

FORSYTHIA—1, 2, 3

Very showy yellow flowering shrub.

Viridissima. D. Golden Bell. 4ft. 1 6		
---------------------------------------	--	--

FRANGIPANNI

Refer to Plumieria.

FRAXINUS—1

COMMON ASH.

Hardy and deciduous; prefers cool climate.

Excelsior. D. 50 feet ..	1/6	& 2 6
Excelsior Aurea (Golden Ash). D. 30 feet .. from	2	6

GARDENIA—2, 3, 4

Evergreen dwarf-flowering shrubs; foliage of a beautiful dark glossy green; lovely pure white flowers, delightfully fragrant; Globosa is a tall-growing shrub of great beauty. Not particular as to soil, but requires a warm situation.

Globosa. E. White and globular. 6 to 8 feet ..	2	0
Intermedia. E. 3 ft. Pure white, fragrant ..	2	0
Magnifica. E. White. 4 feet ..	2	0

GENISTA—1, 2, 3

Pretty, hardy flowering shrub; good foliage.

Andreana. Crimson and yellow. 3ft. 1 6		
--	--	--

GOLDFUSSIA—2, 3, 4

Dwarf and very pretty evergreen; flowers of rich lavender.

Anisophylla. E. 3 feet ..	1	9
---------------------------	---	---

GORDONIA—2, 3, 4

Anomala. E. A very rare flowering shrub classed by some botanists as Camellia axillaris. It produces large creamy white flowers in Spring. 10 feet .. 2/- | & 2 6 |

GRAPTOPHYLLUM—3, 4

Pretty red Queensland flowering shrub.

Earlii. E. 6 feet ..	2	0
----------------------	---	---

GREVILLEA—2, 3, 4

Banksii Fosterii. E. Crimson. 3ft. 2 0

Dallachiana. E. 3ft. An attractive dwarf shrub, with a bushy habit of growth and small leaves. Flowers, small but numerous, of a rich red color with a cream centre, being seen in Spring .. 1 | 9 |

Robusta (Silky Oak). E. 40 ft. 1 6

A great favorite; grows quickly. It is very handsome and fragrant when in blossom.

Rosmarinifolia. E. 5 ft. Foliage silvery green, resembling "Rosemary." Red flowers with pale cream centres. Spring .. 1 | 9 |

HABROTHAMUS—2, 3, 4

A showy, soft-wooded shrub, allied to Cestrum; free-flowering, very hardy; flowers in bunches.

Elegans. E. Scarlet. 6 feet 1 6

HAKEA—2, 3, 4

Eucalyptoides. E. A magnificent evergreen flowering shrub, with crimson flowers. 8 feet 1 6

HARPEPHYLLUM—2, 3, 4

Caffrum. E. A tall evergreen tree of noble appearance. Known as Kaffir Plum; an excellent specimen may be seen in the Sydney Botanic Gardens. 40 feet 2 0

HELIOTROPIUM—3, 4

HELIOTROPE—CHERRY PIE.

Dwarf-growing flowering plants; some have variegated leaves. Are delightfully perfumed.

Aureum, Pale Blue Flowers. E. Golden leaved variety. 2 feet 1 6

President Garfield. E. Light colored variety. 2 feet 1 6

Priapo. E. Blue, with white eye. 3 feet 1 6

Roi de Nois. E. Very dark. 3 ft. 1 6

Royal Highness. E. Large light flowers. 3 feet 1 6

HIBISCUS—3, 4

EVERGREEN TYPE.

Agnes Galt. E. A new variety from Honolulu, and said to be their largest flowering Hibiscus. Color cerise, shading to old rose; growth compact and flowers freely. 8 feet 2 0

Andersoni. Dark crimson with dark eye. 8 feet 2 0

Aureole. Golden apricot, carmine eye. 8 feet 2 0

Camdeni. Single crimson. 8 feet 2 0

Conqueror. Rich apricot, dark eye. One of the best. 6 feet 2 0

General Courtes. Scarlet. One of the largest flowering. 8 feet 2 0

Gloria. Chinese orange, suffused and veined with madder lake. 6 feet 2 0

Harwoodi. Large single pink, dark centre. 6 feet 2 0

Island Empress. Rich pink, double. 6 feet 2 0

Island Queen. Deep pink self; distinct from other pink shades. 6 feet 2 0

Julius Camfield. Rich crimson, dark maroon eye. 6 feet 2 6

Lamberti. Large double red, resembling a ball of ribbon. 6 ft. 2 0

Madeline Champion. Rich apricot, strawberry red eye. 6 feet 2 0

Peachblow. Semi-double flowers of salmon pink color, with dark eye. 8 feet 2 0

Rosy Morn. Salmon, old rose reverse. 6 feet 2 0

Rose Scott. E. Single rose pink, with dark eye. 6 feet 2 0

Tango Queen. Beautiful tangerine or coppery shade. 6 feet 2 0

Wilders White. E. This is the nearest approach to a pure white evergreen Hibiscus, the only color being a flush of pink on the outside of the petals. Distinct foliage and compact growth. 8 ft. 2 0

Special quote for the above varieties—18/- doz. all one kind; 21/- doz. assorted.

Moscheutos. Hardy herbaceous plants, in colors white, pink and red 2 0

HIBISCUS (continued)—

DECIDUOUS TYPE—1, 2, 3

The Syriacus varieties are very hardy and will thrive in the coldest districts.

Mutabilis fl. pl. (Chinese Rose)). s. d. Double pink. 8 feet 2 0

Mutabilis Alba fl. pl. Double white. 8 feet 2 0

Syriacus. Various types 2 0

HOLMSKIOLDIA

Sanguinea. E. An unusual shrub from India, bearing peculiar red flowers in Autumn. 8 feet 2 0

HYPERICUM—2, 3, 4

Charming dwarf-flowering plants, producing their flowers in heads, and in great abundance; very hardy.

Moserianum. E. Bright yellow, 3 feet 1 9

M. Tricolor Variegata. E. 3 ft. 1 9

HYMENOSPORUM—2, 3, 4

Flavum. E. A splendid tree; hardy, with beautiful evergreen foliage; fragrant yellow flowers. 20 feet 1 9

HYDRANGEA—1, 2, 3, 4

Where colors are not mentioned, they will be pink or blue, according to the soil in which they are grown.

As it is impossible to list Hydrangeas according to color, which depends on the soil, we are listing them by name only. The following are all the newest varieties, which will give a very varied range of color, but this depends on the type of soil in which they are planted:—

Amaranthe	Matador
Blue Prince	Mrs. H. J. Jones
Domotoi	My Ideal
Elmar	Nedersachsen
Etincelant	Parsifal
F. Mathes	Pasteur
General Valhubert	Peer Gynt
Germaine Moulliere.	Professor Dubois
White	Rubis
Gertrude Glahn	Rhinegold
Goliath	Satinette
Helge	Sensation
Kremhild	Sir Trevor de Baudry
La Marne	Splendour
Lancelot	Triumph
Madame A. Riverair	Yvonne Cayeux

2/- and 2/6 each.

ILEX—1, 2, 3

HOLLY.

A beautiful tribe of evergreen shrubs, with bright green foliage, generally prickly.

Aquifolium (English Holly). E. 15ft. 1 9

Alba Marginata (Silver Holly). E. 10 feet 2 6

Aurea (Golden Holly). E. 10 ft. 2 6

Cornuta (Chinese Holly). E. 15ft. 2 0

INGA—3, 4

Beautiful evergreen shrub, with mimosa-like foliage.

Portoricensis. E. White tassel flower. 4 feet 2 0

Pulcherrima. E. Scarlet tassel flower. 4 feet 2 0

IOCHROMA—3, 4

Tubulosa. E. Blue. 8 feet 1 9

JACARANDA—3, 4

Magnificent tree; producing beautiful lavender flowers; foliage graceful, deciduous.

Mimosifolia. D. 30 feet 1 9

JASMINUM—1, 2, 3

Fruticans. E. Yellow Jasmine. 8ft. 2 0

Primulinum. E. Yellow. 8 feet 2 0

KERRIA—1, 2, 3

Hardy, handsome shrub.

Japonica. D. Single yellow flowers, in Spring. 4 feet 1 9

Japonica fl. pl. D. Double yellow. 5 feet 1 9

LAGUNARIA—2, 3, 4

Most suitable tree for shelter from sea breezes. A native of Norfolk Island.

Patersoni. E. Pink. 20 feet 2 0

LAGERSTROEMIA—2, 3, 4

CREPE MYRTLE.

Splendid flowering, hardy, deciduous shrubs. s. d.

Eavesi. D. Heliotrope. 8 feet 2 6

Flos Regina. D. Pink. 12 feet 2 0

Heliotrope Beauty. Dark Heliotrope 2 0

Indica Alba. D. White. 8 feet 2 0

Indica Rubra. D. Red. 20 feet 2 0

LANTANA—3, 4

Splendid flowering shrub and thrives anywhere.

Chelsea Gem. E. Orange and red. 4 feet 1 0

Drap d'Or. E. Yellow. 3 feet 1 0

Sellowiana. E. Mauve. 2 feet 1 0

Snowflake. E. Pure white. 2ft. 1 0

LASIANDRA—2, 3, 4

Free-flowering, evergreen shrubs; free growers, producing lovely single flowers; requires sheltered situation.

Edwardii Robusta. E. Dwarf habit, and free blooming. Color of flowers dark violet. 6 feet 2 0

Macrantha. E. Purple. 6 feet 2 0

Macrantha Grandiflora. E. Rich purple flowers. 6ins. across. 6 feet 2 0

Rosea. E. Pink; very profuse bloomer. 4 feet 2 0

LAURUS—1, 2, 3

Beautiful evergreen. The leaves have strong seasoning properties.

Nobilis (Sweet Bay). E. 10 feet 2 0

LAVANDULA—1, 2, 3

Spica. E. Common lavender. 2ft. 1 0

Stoechas. E. French lavender. 3ft. 1 0

LEONOTUS—2, 3, 4

Leonurus (Lion's Tail). E. A hardy shrub bearing a large crop of orange-colored flowers. 4 ft. 1 6

LEPTOSPERMUM

Nicholisi (Crimson Manuka). E. A rare New Zealand shrub, with rich ruby crimson flowers. 6 ft. 2 0

Alba Plena. E. Large double white flowers. Hardy. 6 feet 2 0

Sandersii. E. Large single pink. 6 feet 2 0

LIGUSTRUM—1, 2, 3, 4

Lucidum. E. 12ft. 2/- doz.; per 100 12 6

Ovalifolium Aureum Eleganti-
mum (New Golden Privet). E. Leaves have a broad, golden margin; very effective for hedge purposes or single specimens. 6ft. 1/- each; per dozen 10 0

Pubescens. E. 6ft. 2/- doz.; per 100 12 6

LINUM—1, 2, 3

Trigynum. E. Producing a profusion of large, clear yellow bell-shaped flowers in Winter. 3 feet 1 9

LILAC

(See Syringa, page 50).

LIQUIDAMBAR—1, 2, 3

Styraciflua (The Sweet Gum Tree). D. 40 feet 2 6

LIRIODENDRON—1, 2, 3

Hardy deciduous tree, large flowers.

Tulipifera (Tulip Tree). D. 30ft. From 2 6

LOPHOSTEMON

(See Tristania).

LUCULIA GRATISSIMA—3, 4

E. 8 feet.

One of the most beautiful shrubs imaginable. Will not stand frost. Blooms like Bouvardia and are a delicate shade of pink, richly fragrant with Daphne perfume. Plant in easterly position, sheltered from heat and winds.

Plants each 2/- & 2 6

MACADAMIA—3, 4

QUEENSLAND NUT.

Ternifolia. E. 20 feet 2 0

MACKAYA—3, 4

Vigorous ornamental shrub.

Bella. E. Lilac purple. 6 feet 1 9

HIBISCUS IN FROSTY DISTRICTS

Only the Deciduous type of this beautiful shrub is suitable for planting in districts where frosts are prevalent.

MAGNOLIA—2, 3, 4
Fuscata (The Port Wine Magnolia). s. d.
 E. 8 feet 2 0
Grandiflora. E. White. 25 feet.
 (1, 2, 3, 4) 2 0
Purpurea. D. Purple and white.
 15 feet 2 6

MALUS—1, 2, 3
THE CRAB APPLE.
 Single and Double Flowering, in
 variety 2 0
Aldenhamsensis. D. Purple leaved
 shrubs make a distinct color note
 in the garden, and when they
 have the added attractions of
 flower and fruit are doubly wel-
 come. The large semi-double
 carmine flowers are followed by
 purplish crimson fruits. 12 feet 2 0

MELALEUCA—1, 2, 3
Hypericifolia (Tea Tree). E. Scar-
 let. 8 feet 1 9

MELIA—1, 2, 3, 4
CHINESE WHITE CEDAR.
 Suitable for street and ornamental planting.
Azederach. D. 20 feet 1 6

METROSIDEROS—3, 4
Tomentosa (New Zealand Christ-
 mas Tree). E. 2 0

MURRAYA—3, 4
 A beautiful dwarf evergreen shrub, with per-
 fumed white flowers, like orange blossoms.
Exotica. E. 6 feet 1 9

MUSSAENDA—3, 4
Frondosa. E. A beautiful shrub,
 suitable for situations free from
 frosts; flowers orange, backed
 by a white leaf. Very conspicu-
 ous. 6 feet 2 0

MYRTUS—1, 2, 3
MYRTLE.
 A charming plant with dark green, shining
 leaves, which are highly perfumed; flowers
 white; not hardy in the colder parts.
Communis. E. 6 feet 2 0

NANDINA—1, 2, 3, 4
 A pretty, hardy dwarf shrub, with clusters of
 flowers and graceful foliage.
Domestica. E. 5 feet 2 0

NERIUM—1, 2, 3, 4
OLEANDER.
Dr. Golfin. E. Single rosy red. 8ft. 1 9
Luteum Plenum. E. Semi-double,
 cream. 8 feet 1 9
Mrs. F. Roeding. E. Semi-double,
 salmon. 6 feet 1 9
Madonna Grandiflora. E. Semi-
 double, white. 10 feet 1 9
Mdlle. Dubois. E. Flowers single,
 pure white. 6 feet 1 9
Mons. Belagieur. E. Light pink.
 6 feet 1 9
Splendens. E. Double pink. 12ft. 1 9
Splendens Variegata. E. Gold
 variegation; flowers double pink.
 6 feet 3 0
Souv. de Cazalis Allut. E. Bril-
 liant single red; the best red; 5ft. 1 9

OCHNA—2, 3, 4
 The flowers, which are produced in great pro-
 fusion, are very fragrant, and are succeeded by
 ornamental berries of scarlet and black color.
Multiflora. E. Yellow. 6 feet 2 0

OLEA—1, 2, 3
Europaea (The Common Olive). E.
 In pots only. 1/6 each. Suitable
 for hedges; fine, dense, dark green
 foliage. Named varieties 20 feet 2 6

PEPPER TREE
 (See Schinus, page 50).

PHILADELPHUS—1, 2, 3
MOCK ORANGE.
Grandiflorus. D. 4 feet 1 6
Speciosa. D. Single, sweet-scented.
 6 feet 1 6
Virginal. D. Semi-double. White.
 6 feet 1 9

PHORMIUM—1, 2, 3
NEW ZEALAND FLAX.
 A fibre plant of great value; the variegated
 varieties are very ornamental. s. d.
Tenax. E. 5 feet 1 6

PHOTINIA—1, 2, 3
CHINESE HAWTHORN.
 A fine foliage, hardy, evergreen, of compact
 habit; its flowers are small and white; leaves
 deep green.
Glabra Rubens. A small shrub
 growing 8 to 10 feet, and per-
 fectly hardy in all climates. The
 young foliage is a rich, deep red
 color. As foliage ages it turns
 green 2 0
Serrulata. E. 20 feet 1 9

PISTACIA—1, 2, 3
Chinensis. D. Colored foliage in
 Autumn. Pistacia grows into a
 bushy shrub or tree, and is emi-
 nently suited to small gardens in
 all climates. Plants available May
 to August only. 30 feet 2 6

PITTOSPORUM—1, 2, 3
 All the Pittosporums are highly ornamental,
 and make fine single specimens in the shrubbery.
 Undulatum, Eugenoides, and Eugenoides Varie-
 gatum are suitable for ornamental ever-green
 hedges.
Eugenoides. E. 20 feet 1 9
Eugenoides Variegatum. E. 12 ft. 2 0
Rhombifolium. E. Bushy growth
 and large clusters of orange
 berries 1 9
Undulatum. E. So-called Victorian
 Laurel, producing creamy-white
 flowers, highly scented. 25 feet 1 9

PLATANUS—1, 2, 3
PLANE.
 Most handsome deciduous tree, suitable for
 avenue or pleasure grounds; quick growing shade
 trees.
Orientalis. D. (Ornamental Plane
 Tree). 50 feet from 2 0

PLUMBAGO—2, 3, 4
Capensis. E. Lavender. 5 feet.
 15/- dozen 1 6
Capensis Alba. E. Splendid shrub,
 bearing white flowers. 4 ft. 15/-
 dozen 1 6

PLUMIERIA—3, 4
Acutifolia (Frangipanni). D. Creamy
 yellow flowers; beautiful perfume.
 12 feet each 1/6 & 2 6
Rosea. D. Pink. 8 feet each 2 6

POINSETTIA—3, 4
 Late Winter flowering shrub; produces beauti-
 ful bracts, 6in. across, on the points of the shoots
 of current season's growth; the leaves follow the
 flowers.
Pulcherrima. D. Bright crimson.
 12 feet 1 9

POPULUS—1, 2, 3
POPLAR.
Balsamifera (Balsam Poplar). D.
 40 feet 1 6
Bolleana (Silver-leaved Poplar). D.
 70 feet 1 6
Dilitata (Upright or Lombardy
 Poplar). D. 60 feet 2 0
Deltoides (American Cottonwood).
 D. 40 feet 2 0

POINCIANA—2, 3, 4
Gillesii (The Bird of Paradise).
 E. Orange, yellow and red; a
 magnificent flower, and will do
 well anywhere. 10 feet 2 0

PROSTANTHERA—2, 3
Ovalifolia. E. A native shrub of
 the highest excellence. Rich
 purple blooms of distinctive
 character. 8 feet 1 9

PROTEA
Mellifera. E. Cape Honeysuckle,
 pink and yellow. Spring. 8 feet 2 6

PRUNUS—1, 2, 3 s. d.
Alba fl. pl. D. 6 feet 1 9
Blirelana Flora Plena. D. A flower-
 ing plum with double flowers of
 a bright rose color and purple
 foliage. Hardy everywhere. 10ft. 1 9
Moserl, fl. pl. D. Double rose
 flowers, reddish, purple foliage.
 20 feet 1 9
Pissardii. D. Ornamental species
 from Persia; Coppery crimson
 foliage, strikingly pretty; highly-
 colored; edible fruit. 20 feet 1 9
Pissardi Nigra. D. A dark foliaged
 form of the purple plum, and an
 acquisition where contrast in foli-
 age is required; hardy in all
 climates. 20 feet 1 9
Rosea, fl. pl. D. 6 feet 1 9
Triloba. D. Double rose. 6 feet 1 9
Vesuvius. D. Large purple leaves.
 10 feet 1 9

PSIDIUM (Guava)—3, 4
 Splendid plants to grow, as they produce an
 abundance of fruit, which makes an excellent
 preserve.
 Refer to Fruit Tree List for Varieties.

PUNICA—1, 2, 3
POMEGRANATE.
Granatum (Common Pomegran-
 ate). D. 10 feet 1 6
Granatum fl. pl. D. 3 feet 1 6
Granatum Alba fl. pl. D. 10 feet 1 6
Andre Leroy. D. Quite distinct;
 reddish salmon; white margin.
 10 feet 1 6

PYRUS—1, 2
Aucuparia (Mountain Ash or
 Rowan Tree). D. 30ft. . . from 1 9

QUERCUS (Oak)—1, 2, 3
 Hardy family of beautiful trees, mostly requir-
 ing cooler districts of the State; deciduous and
 slow grower.
Ilex. E. Evergreen. 30ft. . . from 2 6
Pedunculata (English Oak). D.
 60 feet. 18/- dozen 2 0
Palustris (American Crimson Oak).
 D. 30 feet from 2 6
Virens (Evergreen Oak). E. 40ft. 2 0

RAPHIOLEPIS—1, 2, 3
INDIAN HAWTHORN.
 Evergreen, free-flowering, hardy shrubs.
Indica. E. 8 ft. 15/- dozen . . 1 6
Intermedia. E. 6 feet 1 6
Ovata. E. 4 feet 1 6

RHODODENDRON—1, 3
 Charming tribe of plants for the cooler dist-
 ricts of the State; hard-wooded evergreen
 shrubs; magnificent heads of flowers of a variety
 of colors.
Hybridum. E. Varieties. 8ft. From 6 0
Pink Pearl 7 6

RHUS—1, 2, 3
Succedanea. D. Hardy shrub, with
 beautiful foliage. The leaves of
 this variety turn to a bright
 crimson in the Autumn. 10 feet 2 0

ROBINIA—1, 2, 3
 Pseudo Acacia is highly ornamental with its
 Wistaria-like white flowers; can be strongly
 recommended for the drier parts of the State,
 but suckers badly.
Pseudo Acacia (False Acacia). D.
 40 feet 1 6

RONDELETIA—3, 4
Amoena. E. Salmon. 8 feet . . 2 0

ROSMARINUS—1, 2, 3
ROSEMARY.
Officinalis. E. 4 feet. . 10/- doz. 1 0

RUSSELLIA—2, 3
 A small family of plants with rush-like leaves,
 rather ornamental, and suitable for outdoor cul-
 ture; scarlet flowers.
Juncea. E. 3 ft. 1 9

SALIX—1, 2, 3

WILLOW.

Salix Babylonica (Weeping Willow), thrives well in light, moist soil; it will grow best near ponds or watercourses, and even in water, if not too deep.

Babylonica (Weeping Willow). D.	s. d.
60 feet	15/- dozen 1 6
Caprea (Pussy Willow). D. 30 ft.	
The long canes produce large silky buds in early spring. Cut at this stage they are excellent for decorative work and last a long time	15/- dozen 1 6
Coerulea (The Cricket Bat Willow). An upright growing tree attaining a height of 80 feet or more in England, with a corresponding girth. It is an extremely rapid grower	1 6
Vitellina Aurea (Golden Basket Willow). D. 20 feet	1 6

SAMBUCUS—1

ELDERBERRY.

A useful and ornamental tree for shrubberies; prefers cool regions.

Nigra . D. 12 feet	1 6
-------------------------------------	-----

SCINUS—2, 3, 4

CALIFORNIAN PEPPER TREE.

A beautiful, fast-growing, graceful tree; light green foliage and bright scarlet berries; leaves have a strong aromatic scent. Suitable for avenues or break-winds.

Molle . E. 25 feet	1 6
-------------------------------------	-----

SILKY OAK

(See Grevillea, page 47).

SPARTIUM—1, 2, 3

BROOM.

Hardy, free-flowering, suitable for any climate.

Juncum (Yellow Spanish Broom). E. 8 feet	15/- dozen 1 6
---	----------------

Multiflora Alba . White. E. 8 ft.	1 6
--	-----

SPIRÆA—1, 2, 3

Deciduous, free-blooming and useful shrubs. A charming family of plants. Should be in every garden.

Anthony Waterer . D. Crimson, free-flowering. 4 feet	1 6
---	-----

Caryopteris Mastacanthus (Blue Spiræa). D. Not a true Spiræa. Lovely rich lavender. 6 ft.	1 6
--	-----

Reevesiana . D. Single, May; white. 6 feet	1 0
---	-----

Reevesiana fl. pl. D. Beautiful hawthorn-like double-flowering May; white; 6 feet	1 0
--	-----

STENOCARPUS—3, 4

Beautiful tree, large handsome foliage, fine flowers; evergreen and hardy in warm districts.

Sinuatus (The Scarlet Umbrella Flower Tree of Queensland). E. 40 feet	2 0
--	-----

STRANVAESIA

Davidiana. E. Recent introduction from China, it produces attractively colored autumn foliage. After the white flowers have been produced there is a crop of attractive red berries. The flowers are not unlike Photinia; hardy in all climates

STERCULEA—2, 3, 4

Acerifolia (Flame Tree). D. 30 ft.	1 9
---	-----

Diversifolia (Kurrajong). E. 50 ft.	1 6
--	-----

Hybrida , Grafted. Pink and red	2 6
--	-----

STRELITZIA—1, 3, 4

Augusta . E. White. 15 ft.	2 0
---	-----

Regina . E. Pale blue and gold. 4 feet	3 6
---	-----

STYRAX

Wilsonii. Another introduction from China, producing large quantities of white flowers during the Spring months. Suitable for cold and medium climates . . ea.,

SYNCARPIA—3, 4

Laurifolia (Turpentine). E. 50 ft.	1 9
---	-----

SYRINGA—1, 2, 3

ENGLISH LILAC. D. 8 ft.

2/- each; 18/- dozen.

Lilacs are too well-known to require any remarks on their wealth of beauty as Spring flowering shrubs, but it is only in a few gardens that the choice kinds are to be found. The foregoing are the pick of the numerous varieties in cultivation.

Abel Carriere. Double, dark blue.

Belle de Nancy. Double, satiny pink.

Chinensis. This is similar to Persica, but has larger flowers and deeper color.

Condorcet. Blue. Double.

Jan Van Tol. Extra large single white flowers in large trusses.

Le Notre. D. Deep red buds opening to large heliotrope flowers.

Laplace. Single, deep red buds, opening to reddish violet.

La Tour d'Auvergne. Double, purple violet.

Lemoinei fl. pl. Double, carmine violet.

Madame Abel Chatenay. Double, white.

Maurice de Vilmorin. Double, azure blue, shading lighter towards edges.

Michel Buchner. Double, lilac.

Monge. Beautiful single variety, the color being nearest to red we have seen.

Negro. Single, dark purple, opening to heliotrope red.

Persica. Pale blue, erect spikes.

Persica Alba. A white flowered form of the above variety.

President Fallieres. D. Bud reddish lilac, opening to light blue.

President Garnot. Double, light lilac.

President Grevy. Double blue, large truss.

President Loubet. Double, deep red, opening to reddish mauve.

Scipion Cochet. Single, purple violet.

Souv. de Louis Spath. Single, blackish red.

Vauban. D. Dark buds opening to soft mauve.

TAMARIX—1, 2, 3

FLOWERING CYPRESS.

Very hardy trees, suitable for planting near the sea coast or very exposed situation.

Gallica . D. Pink. 12 feet	1 6
---	-----

Japonica Plumosa . D. Improved variety. 12 feet	1 6
--	-----

TECOMA—2, 3, 4

Valuable evergreen shrubs, flowering more or less all the year round.

Capensis (Scarlet Big-nonia). E. Very suitable for a flowering hedge. 12ft. 15/- doz.	1 9
--	-----

Velutina . E. Yellow. 15ft.	1 9
--	-----

Smithii . E. Orange yellow, with brown markings. 15 feet	1 9
---	-----

TELOPEA

Speciosissima (most beautiful). E. It is not generally known that this flowering plant may be easily grown as an ordinary shrub once it is past the seedling stage; suitable all climates. Spring. 10 ft.

TILIA—1

Europea (Linden Tree). D. 40 feet	2 6
--	-----

TRISTANIA—2, 3, 4

Conferta. E. (Syn. Lophostemon). Handsome shelter tree, suitable for planting with pines, Camphor Laurels, etc. 50 feet

ULMUS—1

ELM.

The Chinese evergreen variety is most beautiful; it has a drooping habit, with small dense foliage; for a shade tree on a large lawn it cannot be surpassed.

Campestris (English Elm). D. 80 feet	2 0
---	-----

ULMUS (Continued)—

Chinensis (Chinese Elm). D. 30ft.

Medio Argentea Variegata. Beautiful, variegated form of the English Elm. Leaves heavily marked silvery white

Suberosa (Cork Bark Elm). D. 60 feet

VERONICA—1, 2, 3

A useful tribe of free-blooming, soft-wooded plants. The several varieties bear racemes of various colors; hardy.

Andersonii . Blue. 4 feet	1 9
--	-----

Coelestial . Blue. 3 feet	1 9
--	-----

Gracilis . White. Splendid for hedge. 6 feet	1 9
---	-----

Imperialis. A brilliant amaranth red, changing to magenta. One of the best. 3 feet

VIBURNUM—1, 2, 3

As ornamental foliage plants Viburnums are well worthy of a place, and their beautiful flowers render them invaluable. **V. Tinus** (Laurustinus) is one of the finest shrubs in cultivation. All thrive equally well in the coldest as well as the hottest parts of New South Wales.

Tinus Lucidum . White. Large, shining leaves. 8 feet	1 9
---	-----

Opulus (Guelder Rose or Snowball Tree). D. 10 feet	1 9
---	-----

Plicatum Tomentosum . D. 10 ft.	2 0
--	-----

Sinensis . White. 15 feet	2 0
--	-----

Suspensum . E. Yellow, sweet-scented. 4 feet	1 9
---	-----

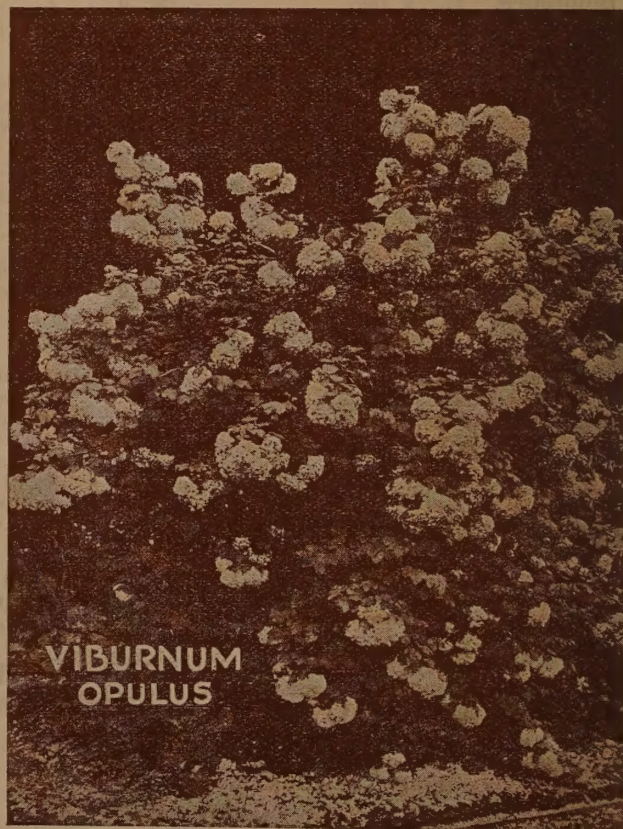

Tinus (Laurustinus). E. 6 feet	1 9
---	-----

VIRGILIA—2, 3, 4

Capensis. E. Purple and white, pea-shaped flowers. Very quick grower. 25 feet

NOMENCLATURE OF PLANTS.

While every possible care is exercised to send out all plants true to name and description, we give no warranty, and will not be responsible for the result of any errors in this respect; but at the same time we desire to be informed of mistakes, so that we may have the matter inquired into.

HEDGE PLANTS

BOUGAINVILLEA Mag Trailli. Makes a fine, almost ever-blooming hedge. Plant 4 ft. apart. 18/- dozen.

CUPRESSUS Macrocarpa (Seedling only). Not recommended, liable to die out. 16/- dozen.

COPROSMA Lucida. Plant 3 ft. apart. 15/- dozen.
This is a good hedge plant, and is particularly hardy, especially on the sea coast.

CERASUS (English Laurel). Suitable for cold districts only; 3 ft. apart. 12/- dozen.

CUPRESSUS Torulosa. Plant 3 ft. apart. Plants of the true variety propagated from cuttings, and established in pots. 33/- dozen.
This makes a splendid shelter hedge or breakwind, requiring little or no trimming for a long time.

DURANTA. Blue. 3 ft. apart. One of the best flowering hedge plants. Rooted cuttings in 4in. pots. 12/- dozen.

ESCALLONIA Macrantha. A splendid dwarf hedge, suitable for either hot or cold climate. Plant 3 ft. apart. 16/- doz.

HIBISCUS Camdeni. A gorgeous flowering hedge for warm climates. Plant 3 ft. apart. 18/- dozen.

LANTANA, Sellowiana and Chelsea Gem. 10/- dozen.

LONICERA nitida. An extremely bushy and dwarf variety of Honeysuckle, bearing small foliage and creamy white fragrant flowers in Summer. The habit of growth makes it an ideal subject for a low hedge, and at 2 ft. apart it will soon make a dense compact wall of green. It should be trimmed early on top and sides to encourage dense growth. Hardy everywhere. 12/- dozen.

MURRAYA exotica. For a dwarf hedge this is one of the really choice varieties. Slow growing and reaching maturity about 4 ft., it is beautiful alike in its dark green foliage and sweet-scented orange blossom flower. Plant 2 ft. apart. B.R.S. 16/- dozen.

OLIVE, Common (Olea Europea). Plant 18in. apart. 12/- dozen. In pots only.

PHOTINIA glabra rubens. A hardy evergreen hedge plant, producing vividly coloured young foliage of a deep glistening red at each new growth. It will stand the coldest climates and when in new growth is a brilliant sight. 18/- dozen.

PLUMBAGO. White and blue. 2 ft. apart. 15/- dozen.

PRIVET, Large Leaved (Ligustrum Lucidum). Plant 2 to 3 ft. apart. 2/- dozen; 12/6 100; not less than 50 at 100 rate.

PRIVET, Small Leaved. Plant 12in. apart. 2/- dozen; 12/6 100; not less than 50 at 100 rate.

PRIVET, New Golden. The best golden foliage variety. 10/- dozen. Open Ground, 6/- dozen.
Of all tried hedging shrubs, none compare with Privet.

TECOMA Capensis. Red flowering. 16/- dozen.

VIBURNUM Tinus (Laurustinus). Plant 2 ft. apart. Useful evergreen hedge. 16/- dozen.

VERONICA of Sorts. 3 ft. apart. 16/- dozen.

Page 51

Plants for Climbing and Twining

This List contains a choice selection, and, with the exception of the Ivies, and one or two others, all those named are handsome flowering plants. On page 57 will be found a list of climbers suitable for planting in various localities. These have been carefully selected and are highly recommended by us. D. indicates Deciduous; E. indicates Evergreen.

AKEBIA—1, 2, 3

A beautiful climber from Japan; flowers of a dark heliotrope color, borne in small clusters. s. d.
Quinata. D. 2 0

AMPELOPSIS—1, 2, 3, 4

VIRGINIAN CREEPER.

Grown for their beautiful Autumn tinted foliage. Well-known favourite creepers; hardy and rapid growers, with fine foliage; of easy culture. Veitchii will cling to the wall without support.

Lowii. Small growing variety. Suitable for hanging baskets or bush-house posts. Attractive apple green foliage 1 9

Veitchii. D. True Virginian creeper. Leaves turn to vivid red color in Autumn 1 9

ANTIGONON—3, 4

A charming, slender creeper, producing an abundance of flowers.

Leptopus. D. Pink 1 6

BAUHINIA—3, 4

Scandens. Pink and white. One of the loveliest of flowering climbers 2 6

BEAUMONTIA—3, 4

A magnificent flowering climber, producing large white trumpet-shaped flowers; highly perfumed.

Grandiflora. E. White 2 0

BIGNONIA—2, 3, 4

Bignonias are of easy culture, fast growers, and beautiful, as well as free bloomers. "Venusta," when grown on a wall, is unsurpassed in the profusion of magnificence of its large racemes of bright orange-colored flowers. Most varieties attach themselves to the walls and fences, and gain their own support.

Australis. E. (Wonga Wonga Vine). Cream and brown 1 9

Cherere. E. Large scarlet 2 0

Guilfoylei. D. Red and orange 2 0

Jasminoides. E. White, dark eye 1 9

Jasminoides Alba. E. A pure white variety 1 9

Lindleyana. E. Lavender 2 0

Rosea. D. Rosy lilac 1 9

Tweddiana. E. Golden 2 0

Venusta. E. Orange 2 0

BOUGAINVILLEA—2, 3, 4

Bougainvilleas like a warm northerly aspect and shelter; their flowers are magnificent, and continue for a long time. All are splendid climbers.

Glabra Sanderiana. E. Rosy purple, free flowerer; not as good as Magnifica Trailli 1 9

Laterita. E. Brick red; absolutely the finest of the type 2 6

Magnifica Trailli. E. Bright purple, very floriferous 2 0

Mrs. Butt. E. Red 5 0

Rosea. E. Rich pink 2 6

CLEMATIS—1, 2, 3

Aristata. E. Native Clematis 2 0

Montana. D. White 2 0

Montana Rubens. D. A pink flowering variety of C. Montana. The young leaves are reddish brown, and with the flowers form a most attractive climber 2 6

COBÆA—1, 2, 3

Very suitable for covering a trellis; grows freely, has fine foliage, and produces an abundance of bloom; hardy.

Scandens. E. Purple 1 9

DOLICHOS—2, 3, 4

Fine climber for covering old fences, etc.

Lignosus. Pink 1 9

Lignosus Alba. White 1 9

FICUS—2, 3, 4

CREEPING FIG.

Very fine creeper for covering a wall or fence; leaves small and clinging, and the shoots, having small roots, will make fast to anything against which they are trained. Any large-leaved shoots should be cut away.

Minima. Very small-leaved, dwarf variety 1 9

Repens Variegata 2 0

Stipulata. E. Ordinary variety 1 6

GELSEMIUM—1, 2, 3, 4

A beautiful climber; corolla of the flower deep yellow, with protruding anthers.

Sempervirens. E. 2 0

HARDENBERGIA—1, 2, 3

Exceedingly pretty climbing plant.

Monophylla. E. Purple 1 9

HEDERA—1, 2, 3

IVY.

The variegated varieties are particularly fine, and cold climates suit them admirably.

Helix. E. (Common Ivy). Green-leaved 1 9

Variegata. E. 2 0

HUMULUS—1, 2, 3, 4

THE ENGLISH HOP.

A charming quick-growing climber, with fine fresh green foliage. The heads of the fruit are used in brewing, and the young branched foliage is a good pot herb.

Lupulus. D. 2 0

JASMINUM—1, 2, 3, 4

Jasmines produce sweetly-scented flowers.

Grandiflorum. E. White, 10 ft. 2 0

Poicoicum. E. White, star-like flowers, 8 ft. 2 6

LATHYRUS—1, 2, 3

EVERLASTING PEA.

Exceedingly ornamental, and very desirable plants of easy culture; thrive in any ordinary garden soil. s. d.

Latifolius Alba. E. White 1 6

Latifolius. E. Red 1 6

Pubescens. E. Blue 1 0

Pink. E. 1 6

LONICERA—1, 2, 3

HONEYSUCKLE.

Scented flowering climbers; fine foliage; quick growth.

Aurea Reticulata. E. White and yellow foliage 1 9

Caprifolium. E. (English). Pink and white 1 9

Fragrantissima. Yellow bush variety; very sweetly scented 1 9

Gigantea. Flower buttercup yellow; quick grower 1 9

Halleana. E. The best white 1 9

Sinensis. E. White and red 1 9

Tartarica Splendens. E. Scarlet trumpet 1 9

MANDEVILLEA—2, 3, 4

A beautiful deciduous creeper, bearing lovely white flowers; fine foliage. Delicate perfume.

Suaveolens. D. 1 9

MANETTIA—3, 4

Bicolor. E. Yellow and red; very pretty climber 1 9

MEDEOLA—2, 3, 4

SMILAX.

The graceful beauty of this handsome plant renders it most valuable for vases or hanging baskets, and it is suitable for bush-house or verandah. It lends itself admirably to table decoration for mixing the foliage with cut flowers and fern leaves; a quick grower.

Asparagoides. E. 2 0

RHYNCHOSPERMUM, E—2, 3, 4

A beautiful, perfumed white-flowered creeper of quick growth and fine foliage; hardy, except in the colder districts.

Jasminoides. E. 2 0

Jasminoides Variegata. E. 2 0

SOLANDRA

Nitida. A rare climbing plant. The deep yellow flowers are fully one foot in length and open to a wide mouth six to eight inches across. Popular name Golden Cup. Very susceptible to frost injury and requires a warm sheltered position 2 6

SOLANUM—3, 4

Jasminoides. E. White 1 9

Seafortianum. E. Beautiful clusters of blue flowers 1 9

Wendlandii. E. Superb Summer flowering vine; blooms continuously. The color is an attractive shade of lavender blue, strikingly beautiful 1 9

THUNBERGIA GIBSONI.

Plants for Climbing and Twining—Continued

STIGMAPHYLLON—3, 4

Producing orchid-like flowers. Very pretty.

Ciliatum (Golden Vine). E. 2 0

TASCONIA—2, 3, 4

This family is distinguished from the Passiflora by the long cylindrical tubes of the calyx of the flowers; they are quick-growing, beautiful climbers.

Manicata. E. Intense scarlet . . . 2 0

Mollissima. E. White Fruiting

Passion Fruit, pink flowers. 18/-

dozen 1 6

THUNBERGIA—3, 4

A fine, free-flowering plant of great beauty.

Laurifolia. E. Large blue flowers. . 2 0

Gibsoni. E. Rich orange. 18/- doz. 1 9

WISTARIA—1, 2, 3, 4

Multijuga Alba. D. White 2 0

Multijuga Rosea. D. Very distinct; plant vigorous and floriferous; long clusters of lilac rose flowers, lower petals yellow in centre . . . 2 0

Sinensis. D. A handsome climber. The lavender flowers hang in pendant clusters, flowering in early Spring before it puts forth a leaf 2 0

Sinensis Alba. D. 2 0

Sinensis fl. pl. D. Double blue . . . 2 0

FAILURES IN PLANTS

We do not undertake to replace plants or seedlings lost through inexperience in planting, or from any cause beyond our control.

CONIFERS and TAXADS

ABIES

Beautiful trees of symmetrical but rather slow growth. When making young growth, they are clad with beautiful pale green foliage; quite hardy.

Alba (White Spruce), 80 feet 2 6

Excelsa (Norway Spruce). 100 ft. 2 6

ARAUCARIA

Bidwilli (Bunya Bunya). 100 ft. 2 0

Excelsa (Norfolk Island Pine). 100 feet 2 0

CEDRUS

Deodara, or Indian Cedar. 50 feet 2 0

A beautiful tree, adapted for specimen tree on extensive lawns, and can be introduced into large avenues; drought-resisting.

Atlantica (Atlas Cedar). Hand-some silvery foliage. 80 feet . . . 2 0

CUPRESSUS

CYPRESS.

Most largely grown of all the Conifers, embracing a variety of beautiful quick-growing trees; they do well near Sydney, and in nearly all other parts of the State. Lambertiana, the finest of this splendid variety of tree shrubs, grows 15 to 20 feet in three years, of dense habit, pyramidal, branching to the ground, hardy, will stand cutting freely. Can be grown as a hedge or breakwind.

Arizonica (Arizona Cypress). E. Hardy variety, with spreading habit and grey green foliage. Suitable hot dry climate. 20 ft. 1 9

Erecta Aurea (Golden). E. 12 ft. 4 6

Funerbris (Funeral Cypress). 50ft. 1 9

Knightii. Hardy in all parts. 80ft. 1 9

Lambertiana Aurea. Very beautiful (Grafted). Golden foliage. 40 feet 4 6

Lambertiana Horizontalis. One of the best. 60 feet from 3 6

Lawsoniana. 30 feet 1 9

Sempervirens. 50 feet 1 9

Torulosus. (From seed). 60 feet 1 9

Torulosus. Propagated from cuttings; very useful for hedge . . . 3 0

CRYPTOMERIA

Fine ornamental trees from Japan; hardy, but prefer good soil and sheltered position. Upright habit, well branched, and covered with fine foliage, which changes to bronzy crimson during the Winter.

Elegans. 60 feet 2 0

Japonica (The Typical Tree of Japan). 100 feet 2 0

JUNIPERUS

JUNIPER.

Hardy, upright-growing Conifers; contrasts well with Cupresses or Pines. Very useful, and will thrive in any climate; distinct in form and foliage; or compact habit.

Africanus. Dwarf and compact. 8 feet 2 0

Bermudiana (Pencil Cedar). An exquisite tree. 30 feet 2 0

Chinensis Argentea. 20 feet 2 0

Hibernica (Irish). 20 feet 2 0

Virginiana (Virginian Cedar). 30ft. 2 0

LARIX

LARCH.

Europaea. D. 50 feet 2 6

PINUS

This family includes some of the finest trees in cultivation. They are hardy, quick-growing, and beautiful specimens for lawn embellishments, or for avenues, and make excellent breakwind plantations.

Canariensis. 40 feet 1 9

Halapensis. Hardy. 60 feet 1 9

Insignis. 60 feet 1 6

Maritima (Pinaster). Cluster Pine. 40 feet 2 0

Fine for planting near the sea or in exposed situations.

Pinea (Stone Pine). Tree thrives best near the sea. 30 feet 1 9

PODOCARPUS

We can offer a fine stock of this beautiful shade tree.

Elatus. The largest variety. 40 ft. 2 0

RETINOSPORA

Retinospora, a beautiful tribe of tree shrubs from 8 to 20 feet high, closely allied to the Cupressus family; branching, pyramidal.

Obtusa Cripsii. Richly colored golden form. Excellent for specimens in lawns. Invaluable for cool and mountain climates. 12 feet 3 6

Plumosa. 10 feet 2 0

Plumosa Aurea. 8 feet 2 0

SALISBURIA

THE MAIDEN HAIR TREE.

Ginkgo Biloba. D. A fine tree, with foliage somewhat resembling an Adiantum; it is not an evergreen. 50 feet 2 0

TAXODIUM

Distichum (The Deciduous Pine). 30 feet 2 0

THUJA

All the family are hardy anywhere, except in hottest districts.

Lobbi. Handsome tree from California. 40 feet 2 0

Occidentalis. 30 feet 2 0

Orientalis (The Bookleaf Pine). 40 feet 2 0

THUJOPSIS

Hardy evergreen, coniferous tree, resembling Thuja.

Dolabrata Variegata. 30 feet 2 0

AZALEAS

2/- each; 22/- per dozen.

(S) denotes Single; (D) Double; (SD) Semi-double.

The Azalea is a lovely Spring-flowering shrub, and has no equal for richness and purity of coloring. Planted in masses, it affords a strikingly beautiful display. In very dry seasons Azaleas should be helped with heavy waterings about once a fortnight. They can be grown as pot plants, and are suitable either for bush-house or verandah culture. Lime should never be used on Azaleas, Ericas, or Rhododendrons.

IMPROVED VARIETIES.

Alba Magna (S). Large white, occasionally striped. Tall.
Arlequin (S). White with red stripes. Dwarf to medium.
Balsaminaeflora (D). Salmon pink. Dwarf.
Baron de Vriere (S). Large white. Green centre. Medium.
Bernhardt Andreas (D). Deep rose. Compact. Medium.
Bernhardt Andreas Alba (S.D.). Pure white. Medium.
Charles de Buck (D). Cerise lake. Medium.
Charmer (S). Bright amaranth. Medium.
Cocarde Orange (D). Red. Dwarf to medium.
Comte Charles de Kerchove (S). Deep pink shading to white; dark centre. Crimped petals. Medium.
Comte de Chambord (S). White with broad red stripes. Medium.
Comte de la Torre (S). Pink bordered white. Medium.
Concinna (S). Richer shade than magnifica. Tall.
Countess of Flanders (S). Large clear pink; crimped. Medium.
Dame Melanie (S). Soft pink margined with white. Dark blotch. Medium.
Daphne (D). White, faintly striped with pink. Medium.
Deutsche Perle (D). Pure white. Dwarf to medium.
Duc De Nassau (S). Deep rose. Medium.
Empress of India (S.D.). Rosy salmon, carmine blotch on upper petal. Medium.

Eugene Mazel (S). Brick red. A shade darker than Roi de Hollande. Tall.
Flag of Truce (S). White. Medium.
Helen Thelemann (D). Pink. Medium.
Konigin Cleopatra (Red Sport) (S). Light salmon red; crimped petals. Medium.
Lady Poltimore (S). White. Tall.
Louis Margottin (S). White. Medium.
Madame A. d'Haene (S.D.). Pink bordered with white. Medium.
Madame Herman Siedel (S.D.). Pure white, occasionally striped. Medium.
Madame Iris Lefebvre (D). Reddish salmon. Medium.
Madame Paul de Schryver (D). Rose. Medium.

Magnifica (S). Rosy violet; large and free. Tall.
Marquis of Lorne (S). Salmon red, Dark blotch. Medium.
Mortii (S). White. Tall.
Murasaki Riukiu Rosea (S). Very early, extra fine; bright clear pink. Tall.
Orange Brilliant (S). Light scarlet. Tall.

Phoebe (S.D.). Salmon red; one of the best. Dwarf to medium.
President Oswald de Kerchove (D). Salmon pink, bordered white. Medium.
Refulgens (S). Salmon red; free flowering. Tall.
Roi de Hollande (S). Brick red. Tall.
Schryderii (S). Large white flowers with lilac spotted centre. Tall.
Sigismund Rucker (D). Rosy pink. Medium.
Sir Charles Napier (S). Salmon rose. Medium.

Souv. de Monsieur Low (D). Crimson suffused violet; free flowering. Dwarf.
Splendens (S). Rosy salmon. Tall.
Splendide (D). Rich dark rosy crimson. Medium.

Stella (S). Light salmon red, purple blotch. Medium.

Theodorus (S). Brick red. Medium.
Vervaeana (D.) Soft pink, bordered white; dark blotch. Dwarf.
Vervaeana Rosea (D). Pink. Dwarf.

Kurume Varieties

2/- each; 21/- dozen.

These are a new type of Azaleas, named after a district in Japan. List of varieties on application.

Mollis Varieties

A distinct class of Azalea, deciduous in the Winter, and producing various shades of yellow flowers in the Spring. 6/- each.

BEGONIAS

FLOWERING.

These charming pot plants are easily managed, and can be grown very successfully in a bush-house; all shades of color. Abundant bloomers.

TUBEROUS-ROOTED.

Dry Tubers available JULY and AUGUST. In Separate Colors.
 Double Varieties, 1/6 each; 16/- dozen
 Single Varieties, 1/3 each; 13/- dozen

BASKETS BEGONIAS.

Mixed 1/3 each; 13/- dozen
 TREE BEGONIAS.
 1/- each; 10/- dozen.

Growing to a height of 6 to 8 feet.
Beatrice Roseby. Glorious pink type.
Corallina. Rich pale pink flowers.
Corallina Carnea. Palest flesh color.
Mabel Roseby. A splendid white variety.
Smithii. Rich carmine rose, bronze, and green foliage.

BEGONIA, REX

ORNAMENTAL-LEAVED.

1/- and 1/6 each; 11/- and 16/- dozen
 We can offer a fine collection of the most beautiful colors. Highly decorative pot plants for green-house, verandah, or bush-house culture. The leaves are beautifully marked with bronze, silver and crimson. Most charming house-plants.

BOUVARDIAS

1/- each; 11/- dozen.

One of the most elegant perennials we have, flowering all through the Summer almost to the middle of Winter. For cut flowers they stand unrivalled, and in addition are more hardy than generally pronounced. The young plants should be protected from the frost, and when once established they are rarely affected. Water and well-mulch during the hot Summer months, and cut back in early Spring. The best time to plant is from November to February.

Alfred Neuner. Double; petals waxy white.
Beauty of Brisbane. Pure white, robust habit.
Bocchii. Bright pink, white throat; fine.
Coral Queen. Finest coral pink.
Duchess of York. Very cheerful blush pink, shading to a tinge of heliotrope.
Enid Oliver. Pale pink. Strong grower.
Mrs. Kerslake. Flowers large, pure white.
Federal Queen. A cross between President Cleveland and King of Scarlets.
Hogarthii fl. pl. Dark scarlet; double.
Humboldtii Corymbiflora (Imp.). Snow-white, large; highly perfumed.
King of Scarlets. Immense blooms of deep scarlet; freely produced.
Mabel Porter. Dark crimson, large, full.
Miss Ida Cheeseman. Large flowers of a delicate pale pink color, the tube and reverse of petals being a deeper shade.
Mrs. Gazzard. Showy, bright pink; very good.

AZALEA.

BOUVARDIAS (continued)—

Pres. Cleveland. Large; brilliant scarlet.
President Garfield. Double rose.
Priory Beauty. Pale rose; fine large truss.
Salmon Queen. Color, salmon, with a darker tube; distinct.

CANNAS

9d. each; 6/- dozen.

A decorative plant of great beauty, nearly always in flower; magnificent foliage; not particular as to soil or situation. A very ornamental plant, apart altogether from its surprisingly lovely flowers.

Special Offer—

CHOICE BEDDING VARIETIES.

Hungaria, Pink. **King Humbert**, Red.
Dr. Gelbin, Yellow.
 In lots of not less than 18 bulbs, 5/- doz.

ERICA THE HEATH

2/- each; 21/- dozen.

Autumnalis. Very beautiful variety, small, rosy-pink, bell-shaped flowers.
Bowienana. Pure white, long tubular waxy flowers; very free flowering; one of the best.
Charsleyana. Delicate blush pink tubular flowers.
Cruenta. Orange-scarlet, tube-shaped.
Grandinosa. White, bell-shaped flowers; very fine.
Hentyana. Delicate pink shaded white; beautiful long spikes of tubular flowers.
Intermedia. A magnificent variety; large spikes of pure white tube-shaped flowers; beautiful.
Linnaoides. Bright rose pink, very effective.
Mammosa. Purplish-crimson, tubular.
Melanthera. Lavender purple with deep eye. Small bells. Flowers profusely in Winter.
Rogerminans. Small white. Sweetly scented.
Vulgaris Alba. The white Scotch Heather. Dwarf spreading habit.
Webbleyana. A beautiful variety producing delicate waxy and tubular flowers; exceedingly choice for florists' purposes.

Camellias

From 2/6 each.

These grand and favorite plants succeed admirably in this climate. The best soil for them is strong, well-drained loam of good depth, with liberal manuring once a year. In favorable soil the trees will grow to a height of from 12 to 20 feet. Bloom May to September.

Angele Cocchi. White, striped rose.

Bonomiana. White, occasionally marked pink.

Candidissima. Large pure white.

C. H. Hovey. Dark crimson.

Countess Callina. Pure white.

Great Eastern. Bright red; semi-double.

Harriet Beecher Sheather. Salmon pink.

Isabella. White; late flowering.

Lady Parker. Deep rose.

Lady St. Clair. Pale pink.

Metallica. Very dark red.

Mrs. A. M. Hovey. Pink with white blotch.

Prince Frederick William. Light pink.

Red Waratah. Bright red.

Sasanqua. Single pink. A small foliaged, rather smaller flowered variety than the ordinary single Camellia. The plant is of a bushy, compact habit, and when in bloom is an attractive shrub. One of its greatest charms is that the flower is not so stiff and formal as the usual type, but a really graceful bloom. We can supply this variety as Single White, Single Red, and Snowflake Double White.

White Waratah. White, with yellow stamens.

Wrightii. Deep rose.

Fuchsias

1/- each; 10/- dozen.

FUCHSIAS form fine features in the flower garden; they merely demand shelter from the wind, plenty of water during the dry weather, with a mulching during the Summer months, and the ordinary treatment of general outdoor plants; they make splendid decorative plants; any good garden soil will suit them.

DOUBLE VARIETIES.

Avalanche. Tube and sepals crimson. Corolla purple.

De Cherville. Large rose corolla. Sepals dark red and well reflexed.

Diamant. Tube and sepals bright rose. Corolla white, veined red; large and perfectly shaped.

Dollar Princess. Corolla purple, sepals red.

Duchess of York. Corolla lilac mauve, sepals white.

Jubilee. Sepals crimson; corolla rosy mauve.

Jumna. Bright crimson sepals, rich purple corolla; the base marked with rosy crimson.

Molesworth. Pure white, red sepals, largest in cultivation.

Mrs. E. G. Hill. Corolla double white; sepals crimson.

Phenomenal. Short tube and reflexed crimson sepals. Corolla azure violet, flaked red.

Storm King. Corolla white, veined red, sepals red.

Victor Hugo. Large blood-red sepals; corolla violet purple, marbled red.

White Giant. White corolla, red sepals.

SINGLE VARIETIES.

Beacon. Tube and sepals crimson; purple corolla.

Beauty of Exeter. Bright rosy pink; large flower.

Elegance. Deep purple corolla, broadly striped red; sepals crimson.

Julius. Sepals bright red, corolla rosy lavender.

Rose of Castile. Sepals white; corolla violet.

HYBRID VARIETIES.

Boliviana. Crimson.

Carter's Meteor. Bronzy green and gold.

Coralie. Coral red.

Gartenmeister Bonsted. Salmon red, bronze foliage; very fine.

Otto Furst von Wernegrode. Pink.

Sunray. Leaves rich crimson.

Gerbera

No other flower in recent years has attained such wonderful popularity as the Gerbera, due largely to the fact that the plants flower practically the whole year. In addition, the long stems on which the flowers are borne and the great range of colors make them valuable for floral work.

Selected Colors 1/- ea.; 9/- doz.

Seedlings 2/6 doz.

Zonale Geraniums

1/- each; 10/- dozen.

SINGLE VARIETIES.

Col. Lambton. White; pink edge.

Countess of Dudley. Light red; white eye.

Eucharis. Splendid white.

Hall Caine. Cherry red.

Henry Compton. Deep pink.

Iona. Pale salmon.

J. Redman. Large scarlet.

Maxim Kovalisky. Orange scarlet.

Paul Crampel. Brilliant scarlet.

Phoebe. Purplish crimson, shading to orange.

Rose Queen. Rose pink.

Universal. Dark purplish crimson.

Vesta. Cerise pink; splendid.

Winston Churchill. Purple crimson.

Wonderful. Reddish crimson, good.

DOUBLE VARIETIES.

Apothoise. Rosy red.

Diana. Salmon pink and white.

Etermanthe. Scarlet.

Gintaire. Rich salmon.

Gustave Emich. Clear scarlet.

Madam Yvier. Apple blossom pink.

Miss G. Ashworth. White.

Mons. Byrle. Bright pink.

Mrs. Lawson. Salmon pink.

Pink Perfection. Rose pink, shaded white.

Rose Enchantress. Deep rose pink.

Souv. de Ete. Light scarlet.

Ivy-leaved Geraniums

1/- each; 10/- dozen.

Beauty of Jersey. Scarlet, shaded purple.

Calypso. Clear scarlet.

Charles Minsolet. Bright scarlet.

Etincelant. Scarlet.

H.M. the Queen. Salmon pink.

Jean d'Arc. White, suffused lavender.

Mrs. Hawley. Lovely pink shade.

Mrs. Jos. Warren. Purplish crimson.

Souv. de Chas. Turner. Deep pink, feathered maroon in upper petal.

The King. Dark cerise.

Pelargoniums, Regal

2/- each; 22/- dozen.

We will be pleased to supply customers with a list of varieties in stock, together with descriptions. Available from May to October.

Pentstemons

1/- each; 10/- dozen.

Pentstemons are very hardy and attractive. They produce fine spikes of blooms during the greater part of the year.

Adra. Tube and lip dark magenta; throat white, heavily pencilled, blotched maroon.

Blue Beauty. Blue shade, white throat.

Brilliant. Bright red, white throat.

Cambral. Tube and lip soft heliotrope; throat white, pencilled purple.

General Allenby. Tube scarlet, lip blood red, blotched crimson, throat white, pencilled maroon.

Mrs. J. H. Horton. Purple, lip maroon, white throat, streaked maroon.

Louis Lepastrier. Crimson lake, white throat.

Majesta. Tube light crimson, lip vivid orange scarlet, throat white, lightly pencilled purple.

Merida. Tube and lip purplish crimson, throat white, pencilled, blotched chocolate.

Miss E. Farrell. Carmine rose, blotched maroon.

Miss Vera Baker. Tube pinkish, heliotrope, lip carmine rose, throat white, lip faintly spotted maroon.

PENTSTEMONS (continued)—

Mrs. Yates. Delicate heliotrope, with pure white throat.

Noel. Crimson scarlet tube, throat white, lip scarlet.

Princeps. Purplish crimson, throat white blotch; vermillion.

Purity. Creamy white, with deep pink lip.

Purpurea. Throat white, tube and segments white and purple, immense flowers.

Other varieties available. Full list on application.

Perennial Phlox

1/- each; 10/- dozen.

Plant September, October, and November.

Coquelicot. Bright orange scarlet.

Devonia. Soft reddish salmon, eye red; immense trusses.

Dr. Konigshofer. Bright orange, scarlet blood, red eye.

Europa. Pure white, carmine red eye.

Fiancee. Pure white, lemon eye; very large truss.

Firebrand. Bright orange scarlet, with dark eye; tall grower.

F. P. Morris. Salmon red, crimson eye; very large truss of extra large flowers.

G. Andrean. Deep rosy carmine.

G. A. Strohlein. Scarlet orange, carmine eye, extra large truss.

Home Land. Brilliant dark orange red, large truss.

Marie S. Jacob. Pale lilac, white eye.

Mrs. A. Ellis. Deep rosy red; semi-dwarf.

Mrs. Ethel Pritchard. Clear rosy mauve, very large flower and tall growing.

Mrs. F. Robinson. Deep salmon pink, dark eye.

Mrs. H. J. Jones. Deep mauve, shading to white.

New Bird. Rich crimson, large truss; early free flowering.

Pearl. Pure white; large truss of well-formed flowers.

Pink Perfection. Warm flesh pink, red eye.

R. A. Goldie. Rich salmon; extra large truss; compact variety of great beauty.

Rinjinstroom. Rose pink; very fine.

Superb. Rich cerise; crimson eye.

Wm. Veitch. White, with eye of deep carmine.

Water Lily

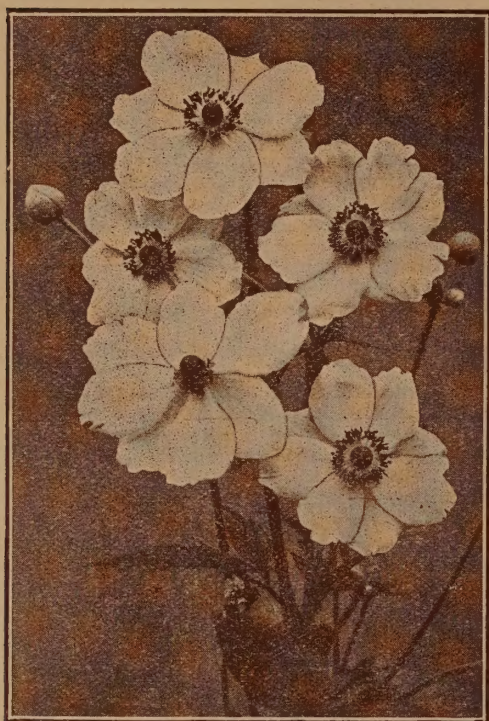

(Nymphaeas)

These beautiful aquatics are quite the fashion and we are preparing large stocks for September delivery, which is the best planting time. Where ponds are not already provided much may be done by sinking half a 40-gallon petrol drum to soil level. In the bottom of the drum there should be 6 to 8 inches of rich, sweet potting soil, or well decayed cow manure. After planting the lilies in this, 3 inches of clean sand should be added as a top layer and the drum then filled with water. Fish may be introduced to keep down mosquitoes, while the soil should be renewed every two years at least.

White and Yellow Flowered Water Lilies, 2/6 each; Pink and Red, 3/6 each.

HERBACEOUS, PERENNIAL AND ROCKERY PLANTS

ACANTHUS		s. d.
Mollis. Bold foliage plant for border	1 6	
ACHILLEA		
Ptarmica, fl. pl. The Pearl. Double white. Dwarf growing herbs producing double white flowers very suitable for cutting	1 0

TREES LEND AN AIR OF MAJESTY TO THE GARDEN.

Fertilizers for Increased Production

Scientific research, as applied to Agriculture, Horticulture and Floriculture, has advanced by leaps and bounds during the past decade. Modern cultural methods—soil cultivation, irrigation, spraying and correct fertilizing, are now practised as a matter of course by successful producers. Every producer naturally aims at increased and better production. The use of correct fertilizers will greatly help toward this end, providing the seeds sown are healthy and sound, and the correct fertilizers be brought into use; then success can be reasonably looked forward to. Anderson's, of George Street, Sydney, sell only high-grade fertilizers that are quickly assimilated in the soil, and

because of their high manurial qualities will give the best results.

We shall be pleased to give quotations for $\frac{1}{2}$ ton, 1 ton, and larger lots upon application. All Fertilizers are quoted F.O.R. or F.O.B., Sydney, except where otherwise stated. Bags free.

For the Home Gardener we would specially draw attention to our "Excellenta," a good all-round result-producing Fertilizer. This concentrated plant food is specially packed by ourselves, and contains the three main fundamentals of a correctly prepared fertilizer, viz.: Nitrogen, Potash and Phosphates. Our increasing sales year by year are striking testimony of the popularity of this valuable line amongst our customers.

ANDERSON'S "EXCELLENTA"

A RESULT-PRODUCING FERTILIZER

"Excellenta" is a highly concentrated plant food. Being rich in the three main fundamentals of a correctly prepared fertilizer, namely, nitrogen, potash and phosphates. It is equally balanced, prepared from first-class ingredients, and contains no waste matter. It is economical to use, a little going a long way. "Excellenta" will immediately increase the size of vegetables and give greater crop yields. Flowers thrive on it, and produce blooms in greater abundance, of richer coloring, and for a longer period. Users have been astounded at the results obtained. "Excellenta" is splendid for mixing in potting soil. Young plants or cuttings potted in such soil will grow into fine sturdy specimens. It is essential that the fertilizer is thoroughly mixed at the rate of one part to 80 parts soil. Pot plants thrive on it, and give an increased growth of foliage and richer displays of flowers. Apply a small teaspoonful to a 5in. or 6in. pot; for larger pots, more in proportion. The fertilizer should be incorporated into the soil and watered. When used as a top dressing for lawns at the rate of $\frac{1}{2}$ ozs. to the square yard, or one tablespoonful to the gallon if used in liquid form, growth will be promoted.

Prices: 4 lb. bags, 1/-; postage extra N.S.W., 1/6. Also sold in 7 lb. bags, 1/6; 14 lb., 2/6; 28 lb., 4/-; 56 lb., 7/-; 1 cwt., 13/6. Carriage extra.

For Interstate Postage Rates, see Inside Back Cover.

SUPERPHOSPHATES

The following particulars in tabulated form will serve as a guide in indicating the kind of Super to use for different purposes:—

	Cwt.	$\frac{1}{2}$ -cwt.	$\frac{1}{4}$ -cwt.
Super No. 22—For Wheat, Oats and Pastures	7/6	4/-	2/6
Basic Super—For wet, sour soils	8/6	4/6	2/6
No. 2—Pastures, Turnips and Rape	10/-	5/3	3/-
No. 3—Cabbage, Cauliflower, Maize (Cob)	12/-	6/6	3/6
No. 5—Beans and Peas, Tomatoes, Citrus Fruits, Apples, Pears, Grapes, Passions	13/-	7/-	3/9
No. 6—Melons, Pumpkins and Onions	11/6	6/3	3/6
No. 8—Grass and Pastures, Green Fodder and Potatoes (recommended by Department of Agriculture)	10/6	5/6	3/-
No. 11—Lucerne, Peas, Beans, for top dressing	10/6	5/9	3/6

"NATIONAL" ROSE FOOD Means Better Roses

Every grower of the Queen of Flowers desires the best results. One of the essentials towards this end is correct feeding. "National" Rose Food is a special mixture containing balanced proportions of Nitrogen, Potash and Phosphates. The application is simplicity itself: 4 ozs. per plant hoed and watered in, 12 inches from the stem in a circle. "National" Food is prepared by a leading Amateur Rosarian—a man who has won many prizes throughout Victoria for Roses; who is a Lecturer on Rose Manures, and a prominent member of the National Rose Society.

FEED "NATIONAL" ROSE FOOD

For Richer Blooms
For Stronger Growth
For Better Foliage

For Sturdier Plants
For Best Results

Sold in 3 lb. Cartons, 1/6 each. Postage, N.S.W., 1/6 extra.

For Interstate Postage Rates, see Inside Back Cover.
In bag lots, F.O.R. Sydney; 7 lb., 3/-; 14 lb., 5/6; 28 lb., 10/-; $\frac{1}{2}$ cwt., 18/6; 1 cwt., 35/-.

ANDERSON'S SPECIAL BLOOD AND BONE

Anderson's Special Blood and Bone is manufactured by a special scientific process, the result being a high-class fertilizer that will give excellent results.

Manufactured specially for us. A sure slow-acting fertilizer.

1 cwt.	10/-	$\frac{1}{2}$ cwt.	5/3
$\frac{1}{4}$ cwt.	2/9	14 lbs.	1/9

"FLORAPHOS"

Crops in plenty and crops in quality are the results of wise plant feeding. "Floraphos," the new synthetic fertilizer, stimulates plant life, and will give you results far beyond your most sanguine expectations. It contains nitrogen 20.6, equivalent to ammonia 25.00, phosphoric acid 52.5. Prices: Trial packet, 6d., postage extra N.S.W., 3d.; 2 lb. cartons, 1/9, postage extra N.S.W., 1/3; 7 lb., 5/3; 14 lb., 10/-, carriage extra.

For Interstate Postage Rates, see Inside Back Cover.

Anderson's Sweet Pea Food

Every enthusiastic grower of the Sweet Pea desires the best results. The best results are obtained only by feeding with a complete fertilizer in which basic ingredients are properly balanced. Anderson's Sweet Pea Food is a complete fertilizer for Sweet Peas, Lupins and all members of the Pea family, and is instrumental in increasing size of bloom, producing length of stem and extending flowering period. Prices: 4 lb. bag, 1/-; postage extra—N.S.W., 1/6; Qld. and Vic., 2/6; S. Aust., N. Aust., W. Aust. and Papua, 3/6. Also in Bags: 7 lb., 1/6; 14 lb., 2/9; 28 lb., 5/-.

Carriage extra.

"PLANTOIDS"

These wonderful little tablets of concentrated food contain, amongst other ingredients, the three basic essentials necessary for successful plant growing, viz., phosphates, potash and nitrogen. Pot plants need feeding with mineral salts. "Plantoids" supply this need. Full directions with each box. Send for a box to-day and be convinced. Packed in air-tight boxes, each: 6d., post free 8d.; 1/-, post free 1/3.

SPRAYING COMPOUNDS AND DUSTS

NOTE:—Postage and Carriage Extra on all Items quoted on this Page.

"Harbas" Specially Prepared Oil

Is an excellent preparation for controlling scale pests, such as San Jose Scale, American Blight, Red Spider. "Harbas" is easy to mix, easy to apply, adheres to the tree, and has strong penetrating power.

Used for Deciduous Trees: 1 part "Harbas" to 20 parts cold water.

Used for Citrus and other Evergreen Trees: 1 part "Harbas" to 40 to 60 parts cold water.

Sold in tins containing, each: 1 pint, 1/6; 1 quart, 2/3; 1/2 gallon, 3/6; 1 gallon, 6/-; 2 gallons, 11/-; 4 gallons, 17/4. Also in drums containing 46 gallons, at per gallon, 4/-.

Free on rail or steamer, Sydney.

"Albarol" (White) Spraying Oil

"Albarol" is a new scientific white spraying oil which has proved efficacious, particularly in the control of the dreaded codlin moth, when used in conjunction with arsenate of lead.

Price: 1 pint, 2/3; 1 quart, 3/6; 1/2 gallon, 4/3; 1 gallon, 7/6; 2 gallons, 14/-; 4 gallons, 24/-.

Full descriptive booklet free on application.

"Harola" Lime Sulphur Solution

The best fungicide for all fungus diseases. "Harola" may be used in conjunction with arsenate of lead.

Summer: 1 part "Harola" to 50 to 60 parts cold water.

Winter: 1 part "Harola" to 10 to 15 parts cold water.

Used for Citrus Trees—

1 part "Harola" to 28 to 45 parts cold water.

Sold in tins containing, each: 1 pint, 1/3; 1 quart, 1/9; 1/2 gallon, 2/3; 1 gallon, 3/6; 2 gallons, 6/6; 4 gallons, 8/-.

Also in drums containing about 46 gallons, per gallon, 1/9.

Free on rail or steamer, Sydney.

Important:—"Harola" should be used the same day as mixed.

"Glue Pearls"

A spraying preparation of value in checking and destroying various insect and scale pests affecting Fruit Trees, Shrubs, etc. Full directions with each package.

1 lb. package, 1/9; makes 3 gallons spray.

2 lb. package, 2/9; makes 6 gallons spray.

Nicoteen

BLACKLEAF 40 (Concentrated Tobacco Extract).

This specific will effectually exterminate all Thrip, Aphis, Red Spider, Mealy Bug, and all Insect Pests.

	s.	d.
3oz. bottle, to make 4 galls.	1	0
1oz. bottle, to make 8 galls.	1	3
2oz. bottle, to make 16 galls.	2	3
4oz. bottle, to make 32 galls.	3	9
8oz. tin, to make 60 to 70 gallons	7	0
16oz. tin makes 120 to 140 gallons	12	6
2lb. tin makes 240 to 280 gallons	24	0

Gishurst Compound Insecticide

An excellent preparation for destroying Red Spider, Scale, Mealy Bug, Thrip, etc. Full directions on each packet.

Price: Full 1 lb. packet, 2/3.

"Volck"

For control of various pests affecting Fruit Trees, Shrubs, and other Garden Plants. Full directions on each package.

Prices: 1/2 pint, 1/6; 1 pint, 2/6; 1 quart, 4/6; 1 gall., 12/-.

Postage or Carriage Extra.

Tobacco Powder (PESTEND)

This powder can be applied by a dust gun, and is excellent for the destruction of such insects as Spider and Mealy Bug. Some time after treatment the plants should be syringed with clean water.

Prices: 3d. per lb.; 7 lb., packed in calico bag, 1/3; 14 lb., 2/3; 1 cwt., 4/-; 1/2 cwt., 7/-; 1 cwt., 12/-.

Dust Guns

Prices: 4/9 each. (Postage, N.S.W. 1/-, Q'ld. 1/6).

6/6 each. (Postage, N.S.W. 1/3, Q'ld. 2/-).

Arsenate of Lead Powder

Very reliable brand, and being in such a handy form is particularly convenient for amateurs and others who require only small quantities.

Prices: 1/2 lb., 9d.; 1 lb., 1/3; 1 lb., 2/3; 2 lbs., 4/3. Special Prices for large quantities. 1 lb. is sufficient for 50 to 100 gallons water.

Bordeaux Powder

Scientifically prepared, safe and reliable remedy for preventing Mildew, Black-rot, and other fungoid diseases on potatoes, tomatoes, vines, fruit trees, roses and other plants. Directions for use with each package. Ready for mixing in water.

Prices: 1/2 lb., 9d.; per lb., 1/9; 5 to 10 lb., at 1/6 lb.; 20 lbs. and over, at 1/4 lb.

Solomia

A non-poisonous Insecticide and Fungicide in liquid form. In this way it differs from all other one purpose washes and spraying solutions. It is the only effective solution that can be sprayed on any crop, fruit, flower or vegetable, at any stage of growth, without causing the slightest harm. It is absolutely harmless to human beings and domestic animals. Will not injure the most delicate foliage.

Solomia is so deadly that one application applied as directed exterminates insect pests and at the same time checks fungus development.

Prices: 1/2 pint, 1/6; 1 pint, 2/6; 1 quart, 4/3; 1/2 gallon, 8/3; 1 gallon, 14/-.

Cooper's Arsinette

For the control of all chewing insects such as Codlin Moth, Grubs, Slugs, Caterpillars, Leaf Eating Beetles, etc.

Arsinette is easy to mix, economical to use, and does not require the addition of a spreader.

Owing to the fineness of the particles Arsinette gives an even cover over the whole of the foliage or fruit, and thus ensures that no untreated spaces are left through which chewing insects might eat their way.

Prices: 4 oz. tins (to make 10 gallons), 1/3; 1/2 lb. packets (to make 20 gallons), 1/9; 1 lb. packets (to make 40 gallons), 2/9; 4 lb. packets (to make 160 gallons), 7/-.

Kattakilla Powder

A perfect Insecticide of English manufacture.

Prices: Cartons containing 4 packets, 2/6; postage, 6d. Each packet separate, 9d.; postage, 2d. Each packet sufficient for 2 1/2 gallons water.

Large package, sufficient for 50 gallons water, 6/-.

Postage, N.S.W. 1/3, Q'ld. 2/-.

Full directions with each packet.

Flowers of Sulphur

Used for dusting roses, vines, and plants affected with mildew.

Prices: per lb., 3d.; per cwt., 24/-.

ATOMOL DUSTS

The use of "Atomol Dusts" is the latest scientific method of satisfactorily dealing with Aphis, Red Spider, Thrip, Curculio Beetle, Caterpillars and Tomato Blight, and is a better, easier and cheaper method than wet spraying.

ATOMOL "ALL IN ONE"

The Best all-round Dust, comprising arsenic oxide, nicotine (Blackleaf No. 40), sulphur and copper oxide, and will exterminate all chewing and sucking insects, fungus diseases and mildews. Prices: Cartons, 1 lb., 1/8; 2 lb., 3/-; 4 lb., 5/6; 7 lb., 8/10.

ATOMOL "SULPHUR No. 1"

An excellent fine sulphur for mildew on vines, etc. Price: 1 lb. carton, 10d.; 2 lb., 1/1.

ATOMOL "APPLE AND PEAR No. 2"

Effectively destroys codlin moth, caterpillars, etc. Price: 1 lb. carton, 1/4; 2 lb., 2/4; 7 lb., 5/2.

ATOMOL "TOBACCO DUST"

Eradicates aphis, thrip and sucking insects. Price, per 1 lb. carton, 1/3; 2 lb., 1/11.

ATOMOL "TOMATO DUST No. 2"

Recommended for Wilt, Black Spot, Red Spider, and Cut Worms. Price, per 1 lb. carton, 1/10; 2 lb., 3/2; 4 lb., 6/-; 7 lb., 9/4. Postage on Atomol Dusts:—1 lb. tins: N.S.W., 1/-; Q'ld., Vict., Tas., 1/6. 2 lb. tins: N.S.W., 1/3; Q'ld., Vict., Tas., 2/-.

HOW TO APPLY ATOMOL DUSTS

The Dust Gun is the most efficient form of applying Atomol Dusts, it easily eclipses the old-fashioned bellows, is strongly made and easy to handle. It is so constructed that the dust can be distributed underneath the foliage of vines and plants with ease. Two patterns available.

Rega "Model O": Small size, 4/9 each. Postage 1/- in N.S.W., Q'ld., 1/6.

Rega "Bonza": Large size, 6/6 each. Postage 1/3 in N.S.W., Q'ld. 2/-.

APPLIANCES FOR SPRAYING

Packing and Carriage Extra.

KNAPSACK PUMPS

"REGA KNAPSACK" (Australian manufacture)—Capacity, 3½ gallons. Constructed of brass alloy. Pump outside container. Excellent design, and can be used for all classes of spraying mixtures. Price £4/-/-
Also lead coated £5/-/-

MYSTO No. 5 (English)—Copper coated with tin, thus enabling it to be used for lime sulphur solutions. Capacity, 3½ gallons. Pump outside the container. Price £5/-/-
(Similar design to "Rega Knapsack," as illustrated).

MYSTO No. 1 (British)—Polished copper. Capacity, 3½ gallons; fitted with double swivel nozzle and brass rod or lance. Price £4/12/6
Packing on Knapsack Pumps, 2/- extra.

Accessories for Spray Pump

2ft. Extension Rod (Brass) 6/-
Curved Extension Rod 6/-
Bordeaux Nozzles 4/-
"Rega" Adjustable Nozzles 7/6

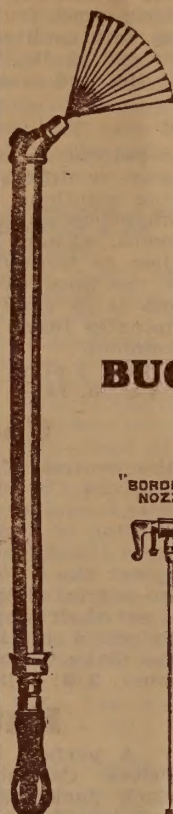

Extra Hose Lengths

Extra Lengths of Hose for Bucket, Pneumatic, and Knapsack Pumps.
9d. foot for Bucket and Knapsack.
1/- foot for Pneumatic.
Postage extra.

Brass Syringes

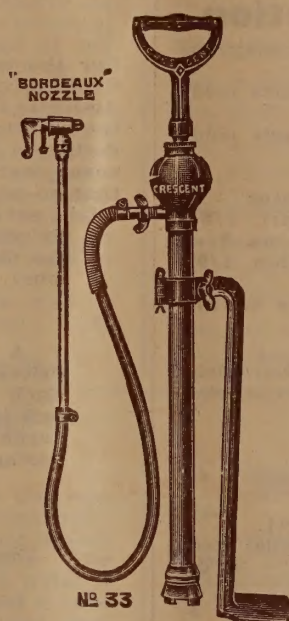

Prices, each:
4/6, 6/6, 7/3, 8/6, 14/-, 19/6, 21/-, 27/-

"Rega Mist" Syringe

This Syringe is becoming more and more popular each day. It represents the acme of syringe construction, made of solid brass. It is dependable in its action, and will give satisfactory service. Can be used for all spraying mixtures. Prices, 6/6 and 10/6. Postage: N.S.W., 1/- and 1/3. For other States, see Inside Back Cover.

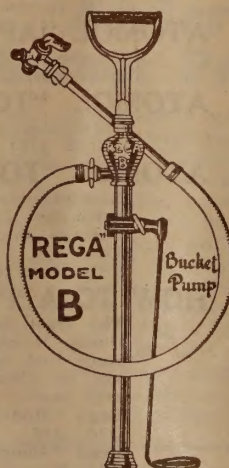

BUCKET PUMPS

THE "CRESCENT" No. 33.

One of the most useful appliances that one can have where there is a garden, or where poultry are kept. For white-washing or spraying the houses with disinfectants they are invaluable, and for spraying plants and fruit trees the pump is very effectual.

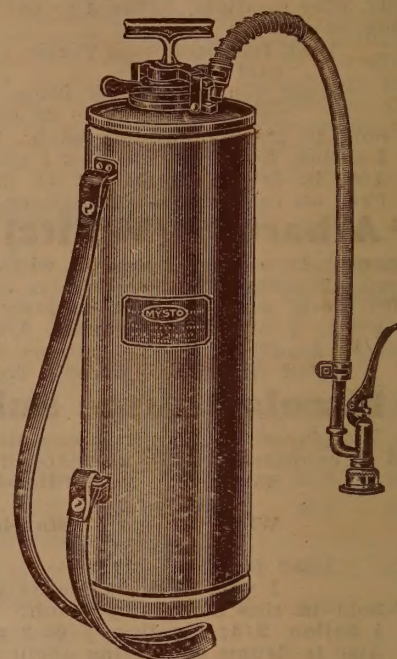

THE "CRESCENT" No. 33 (British). Price, 30/-. Postage and packing extra: N.S.W., 3/3. For other States, see Inside Back Cover.

The "Rega" Bucket Pump

This Australian product is a strongly constructed pump, and one that we can thoroughly recommend. Prices:
Model "A" . . . 27/6
Model "B" . . . 25/-
Postage and packing extra: N.S.W., 3/3.
For other States, see Inside Back Cover.

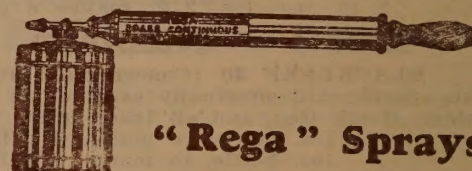

PNEUMATIC PUMPS

No. 15

MYSTO PNEUMATIC No. 15 (British)—Brass; suitable for all spraying solutions; capacity, 3 galls. Price, £3/5/-.

AUTO SPRAY PUMP No. 1 (American). Same pattern as Mysto Pneumatic; Galvanized Metal. Price, £1/15/-.

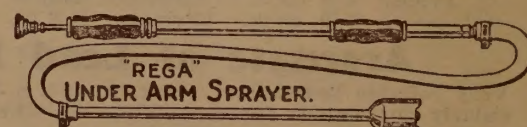

"Rega" Sprays

AUTO SPRAY, "REGA" (Australian). Brass, has a continuous action, and is of sound and lasting construction. Capacity: 1½ pints. Price . . . 7/9

AUTO SPRAY, "REGA"—TIN. Capacity: 1 quart. Price . . . each, 3/3

AUTO SPRAY No. 26 (American). An improved hand pump; brass container. Capacity: 1 quart. Price, 7/6
Packing and postage extra on either of the above three Sprays: in N.S.W., 2/3. For other States, see Inside Back Cover.

LADYWOOD (British made)—The Ladywood is one of the handiest sprayers ever placed on the market. It can be used not only for spraying trees and plants, but is useful for disinfecting fowlhouses, washing down motors, etc. Fitted with two nozzles. Price 22/6
Postage extra: N.S.W., 1/9. For other States, see Inside Back Cover.

Australian-made Ladywood pattern. Fitted with two nozzles. Price, 20/-; Postage extra, 1/9, N.S.W.

GARDEN SUNDRIES

Customers Please Note that All Garden Sundries are Postage or Carriage Extra.

Warne's Shell Lime

Soil that is kept sweet and clean will make for greater and better production. Warne's Shell Lime is an essential Fertilizer and Pest Exterminator combined. Harmless to the tenderest plants—easy to use. Lime your garden with Warne's Shell Lime. Descriptive leaflet free on request.

"Apex" Hydrated Lime

Possessing the essential qualities for improving soil conditions, controlling insect pests in the soil, and contributing to successful gardening operations.

Prices:

50 lb. bag, 3/3 each; sacks, 6/6 each.
F.O.R. or Steamer, Sydney.

Levin's Manurial Insecticide

Many Insect Pests lurk in the soil, awaiting the opportunity to eat the seeds, destroy bulbs and root growth. Levin's Manurial Insecticide will rid the soil of white ants, grubs and other soil pests.

Prices: 20 oz. Tin, 1/3; 7 lb. Tin, 3/9.

Stakes for the Garden

These stakes are made specially for us from selected hardwood. They are cut square, well pointed and will give lasting and durable service. Strong, substantial stakes that can be used for almost any class of work.

Cooper's Weedicide

An arsenical preparation that will kill all weeds on paths, drives, gravel spaces, chip tennis courts, etc., a better, easier method than hand weeding. One gallon will make sufficient solution to thoroughly cleanse 400 square yards.

Prices:

1 pint, 2/6; 1 quart, 4/6; Postage Extra.
1 gall. drum, 12/6; 5 gall. drum, 52/6

F.O.R. or F.O.B., Sydney.

Nosco

An excellent preparation for killing weeds. To every gallon of water, add 1 oz. (about a tablespoonful) of "Nosco." For best results apply with a Watering Can or a Spray Syringe when the ground is damp.

Prices:

1 lb. tin, 2/6; 2 lbs., 4/3; 4 lbs., 7/6

Grant's "265"

FOR SLUGS AND SNAILS

A most satisfactory preparation.

Prices:

Tins: 1½ lb. 1/6
2½ lb. 2/6
5 lb. 4/6

Also in Bulk.

Garden Labels

The keen gardener believes in labelling his plants and bulbs. This saves frequent confusion over correct naming, as in the case of Roses; and serves as an indication of the presence of bulbs when they have died down. Judicious labelling also adds to the neat appearance of a garden.

2-gal. 24/-

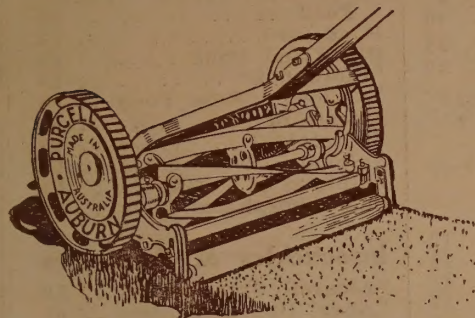

Long Spout, with Brass Rose; fine spray.

Lawn Mowers of Australian Manufacture

We have pleasure in including in our list of garden requisites two very estimable brands of serviceable Australian-made Lawn Mowers.

Firstly: Because they are the outcome of local enterprise; secondly: because it gives you an opportunity of helping to encourage local effort, and thirdly: because the make-up and efficiency of the machines will prove to you that the investment you have made will be a profitable one.

The "Purcell" Mower

From

66/6

A light, easy-running machine of exceptional quality, designed to give long service.

The driving wheels have the geared teeth well off the ground so that dirt and grass will not collect in them. The lower stationary blade is of tool steel, oil tempered so that the revolving knives have a tendency to sharpen themselves when the mower is properly adjusted. The cutter bar is adjustable.

The clutch and pinion are cast in one piece and give both a gravity and force feed. The clutch pins or pawls are made of hardened steel and will last for years.

Each mower is made to carry a grass catcher either in front or behind the blades.

The "Purcell" Mower can be supplied in three sizes: 10, 12 and 14 inch. The driving wheels are 9-inch, the cutter has 5 blades and the gear is ball-bearing. The material used is of the very best and we can furnish further details regarding the machine on application. Prices: 10in., 66/6; 12in., 68/6; 14in., 71/-; free on rail or steamer, Sydney.

The "Presto" Mower

From

68/6

The "Presto" Mower has been perfected after long and careful study and experiment. The "Presto" Mower is a product based on Modern Engineering Science and Workshop Practice, and the latest developments in the use of High-Grade Steels.

THE "PRESTO" MOWER embodies the following features which have justifiably earned for it the name "The Magic Mower."

Light Weight—Unbreakable Construction—Machine Cut Gears—Improved Design Ratchet—Improved Bottom Blade Adjustment—Balanced Chassis—Self Adjusting Ball Bearings—Concave Cylinder Blades—Case-hardened Wearing Parts—Steel Roller—Close Cutting—Requires Lubricating Only Once per Season. Sizes: 12in., 68/6; 14in., 71/-.

Full details on application.

Grass Catchers

Adjustable to all makes of Lawn Mowers. Price: 6/6.
